This is what scares many on this newsgroup. The thought of having to interact with real, live people. Much easier to hide behind a microphone and/or a keyboard.

Had some time on the road today and Rush became boring...so, I turned on the 'ol 10-meter mobile.

Dialed up 28.085 and heard quite the circus going on. Several truckers on AM, carrying on what sounded to be local conversations with each other. Mixing with their signals were presumed ham operators...attempting to jam the above-mentioned truckers with CW, tone generators, and various sound effects. Also a loud, gruff, southern-drawl voice that kept repeating "Get the %$#@! off this frequency, you scum-suckin', interlopin' CB'ers. This here's a ham radio frequency. Get the %#$#@@! off this frequency!" This chaos went on for several hours this morning & afternoon.

Laughed so hard that I almost ran off the Interstate! Haven't enjoyed a circus like this since "Big Al" Abernethy used to play the "Pork Butt Song" repeatedly on 3894.5!

No, but you've seen the head of your daddy's dick before haven't you?

Amazing, is it not? Amazing that so much filth can spew forth from Roger's mouth and his food doesn't taste like dung.
Roger, it is rumored, had a glass navel implanted during his early twenties. Story is that his head is so firmly lodged in his rectum that he needed the glass navel to see where he is going. This position also has an advantage for JBO in that his ears don't get cold, tho he is now somewhat hearing impaired. Nobody has yet been able to explain just why he is mentally impaired.

Well Donnie,
You got me there, you're correct. I have to agree that India does spend millions, if not, billions on a nuclear weapons program (oh yeah! they need one don't you know), and more $ on developing ballistic missiles. But don't you know that a huge country like India needs to defend itself against little piss ant hash producers like Pakistan? Why they even got themselves a border dispute going over aa area that is tall mountains and desolate desert. Ever seen pictures of Kashmir? It's a freaking wasteland and they both are willing to go nuke over it?!!?!?!?!?!?!
You are correct in saying that BOTH counrties have their priorities all screwed up.
But what more can you expect from a bunch of people that would rather starve than kill a food source? And Of course then there's Pakistan...
They should go back to what they do best... MAKING HASH... I remember that Pakistani hash years ago... OUTSTANDING!
Kill the missiles and save your people...
I agree.

Source record: 93863

Suzy, in a hissy fit posted this. Suzy....the old "see you in court" refrain is old. Suzy can't take anybody to court because Suzy would first have to show that an offense has been committed. Secondly, Suzy would have to hire a lawyer or visit a Prosecuting Attorney to file a complaint. This requires the outlay of CASH , as in $$$, a commodity that Suzy is sorely lacking. Suzy is also burdened with proving beyond a doubt that he knows who posted these comments...something that the anonymous news servers will NOT do without a Court Order. Merely annoying Suzy does not fit the criteria needed for such an order. Check the case laws for further on this.
Suzy has no Probable Cause to go before a judge and request a subpoena be issued for the records of any anonymous news server. Ergo, no Court Order will ever be forthcoming and Suzy will NEVER obtain such records. Never!
Lastly, Suzy would have to prove beyond a doubt that posts mentioning Suzy are aimed at a particular person, himself...thereby admitting that Suzy was the source of numerous threats aimed at others. This is a Catch 22 situation for Suzy.
Suzy...word to the wise...stop threatening court action. Your threats are as empty as your wallet. You are nothing more than so much hot air. Now go take on the day and earn a living.

> I think you know damn well who buzzsaw is. It is
> probably you, and I will know that just as soon as

Now, let's back up in time to when the Generals *got* privileges they had
not worked for, when they were given phone privileges on 75 and 20 which
were formerly restricted to Class A operators. No exam, no
operating/license time restriction, no nothing - just fire up and operate.

Never seem to read much about that end of the stick, do we?

1952, I believe..... I've done quite a bit of research into the changes in
Amateur licensing over the years... some big changes in 1924,1928, 1934,
1952,1967-69, 1990, 2000 (dates may not be 'right on' the money, but then
many of the changes were phased in over a period of time.)

It sounds like you're a little bit jealous, bucktooth choad. Is that
because your rotten teeth were lost because of chewing tobacco as well
as using your teeth as a wood lathe? Or you lack of daily hygeine
because you're too poor to buy toothpaste? Now, get your Poly-Grip and
put your store-boughts back in before you get on the air with your WIDE
signal. What's the matter, can't operate that radio?

Yep Yep Yep....I had my first gun at the age of 12, which I bought myself from my 3 paper route monies. I used it until I joined the military at age 18. At no time did I want to shoot my mother, or the dog, or a kid a school.

I also had my butt blistered as required. I managed to make it just fine, as have my 4 kids. And guess what? Not a damn Demoncrat in the bunch.

Welcome back. You are correct that the shorthand Q-codes originated for CW but have also been used extensively on phone for at least the 30 years I've been licensed.

You may use "who is calling" if you wish...I prefer the shorter QRZ?

You may say "I have received/have you received my transmission"...but QSL is certainly shorter and easier...especially in a contest.

If the Q-codes offend your ears, don't use them...simple as that.

QSL??

In spite of so much freedoms, talents and resources, India can not attend to its priorities precisely because it has open undefended borders - any anybody who has any hostility towards progerss and welfare of India is able to pitch a political tent inside India, making a mess out of Indian political process and its priorities. Nuclearization came to India only couple of years back, but India's problems has been long-standing - you can't blame them on recent revisions in security posture of India. India ahs a long standing history of being ravaged and plunders by barbarian thugs passing through Pakistan. What good is progerss if it is eventally going to be razed down by Islamic jihadi gangs? So India has got its priority right for the first time in ages - defend India so that India can take care of what is within India.

The same place that other slang comes from, Ed. Years ago, we had very different meanings for "cool," "gay," "bad," and a long list of other slang words used in our everyday language. Since everyday language continuously evolves, it is a little unrealistic to expect radio language to remain static. In fact, I'm fairly sure you were using some words four years ago that hams didn't use twenty years ago.

> [snip] After all, the rules for telephony
> state that we are to use plain language,
> not codes or ciphers. [snip]

But for anyone who uses a ham radio, QSL is about as plain language as it gets. And, the last time I checked, "contact" was in the english dictionary.

Damn this guy is patholigical! Worse than Clinton! Rich claimed that the e-mail was forged, a fraud. Riley states that all he has to do is send a sworn statement stating as such. Then Rich says that, yes, he typed it up for mental therapy because he's bi-polar. But it was MISTAKENLY sent by him. The next lie: it was mistakenly sent by his wife. NOW...he's telling everyone that Riley is ignoring him after sending in sworn statements that his wife mistakenly sent the e-mail. THAT'S NOT WHAT RILEY TOLD YOU!!!, Rich Clinton, Willaim Jefferson Whiten! Quit your phucking spin machine!!! You said it was FORGED!!! Riley told you to PROVE IT WAS FORGED!! You then admitted to typing it, but wifey sent it out by mistake. (Yeh, sure...) IT DOESN'T MATTER ANYMORE!!! YOU'VE ALREADY PHUCKING LIED TO THE FCC!!! If you had done your time in the corner, you'd have been back on the air a long time ago!! But YOUR LYING AND COVER-UPS ARE WHAT IS KEEPING YOUR ASS OFF NOW!! And you ain't gonna be !
allowed to skirt the law much longer by using someone elses callsign. I guarantee you that! This shi*t's going higher than Riley!!

Suzy's nefarious deeds over the years have been far better documented
than Suzy may hope to realize. Detailed records and witness statements
have been assembled from many sources and attest to Suzy's very lengthy
history of harassment of various people which Suzy perceives to have
crossed her in some manner.

"QSL" as a synonym for "yes," or "message received" is very old,
perhaps almost as old as amateur radio itself.

But "contact," meaning "I want to contact you" is quite new, less
than a decade of commonplace use I think. I think it migrated to
amateur radio from the Citizen's Band, though I don't know if it
originated there, and I welcome corrections if I'm wrong. All I know
for certain is that it was almost never heard on the HF amateur
bands from 1968 (when I started listening) until the 1990s.

Personally, I feel that "contact" when used with that meaning is
outside the amateur tradition and also outside good English usage,
so I don't utilize it. The traditional amateur term is "break."

With all good wishes,

Kevin, WB4AIO.

I was surfing the web the other day when I ran across the lyrics of a song by Paul McCartney and Raoul Xemblinosky which was entitled "Roger Wiseman's Greyhound Men's Room Band." You can find the lyrics (which I think should not be published in a delicate family forum such as this one) at http://extra.newsguy.com/~shpxurnq/songs.html#song5.

Is this indeed *our* Roger. And how was it that he came to achieve such fame? That same web site claims that Roger was spanked off of Usenet entirely back in '97, but maybe it was someone else, because we all know that Roger is very much here, even though he's not all there.

Anyone care to enlighten us?

>
> --
Sir,,

You are wrong on the above. Besides breaking the law and interfering with legitimate communications of other domestic radio services, the "skills" of "freebanders" hardly qualifies them for the promotion of the welfare of the community--among other things. If that were true, how come when there's a disaster (flood, tornado, hurricane, etc) they don't call on the "freebanders" to help out instead of ARES, RACES, the host of hams who are not in the above organizations, and Civil Air Patrol? How come they don't ask for "freebanders" to pass traffic on 27.555 instead of hams on 3872 KHZ, or 14.300? In time of disaster, when other comms are down, more traffic is passed by HAMS than any other group.

All this bullcrap about ham radio being "dead" is wishful thinking, bud. And for every "bad" ham that "may" be heard, I can find TEN CBers just as bad or worse. BUT! Does that make CB itself "bad"? NO! For every ten of the "bad" CBers, I can find 20 good ones. For every "one" of the so-called "bad" hams, I can find 100 good operators. The FCC's return to enforcement is welcomed by the rest of the Amateurs and, we hope, that their activity will weed out the bad ops. The rest of us that get smeared by the activities of a few welcome the departure of the jerks. Same with CB: you can't judge the entire service by the antics of a few morons.

Jerry

2733. Bucktoothed Choad Stagger Lee's unsolved mysteries

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-09 03:17:15 UTC
From: KC8JBO <roger_kc8jbo@my-deja.com>
Message-ID: <95vnflvqf1@nnrp1.deja.com>
Source record: 93812
Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc

In his backwatered town in the middle of nowhere, Stagger Lee walked
into a police station with a 9-inch wire protruding from his forehead
and calmly asked officers to give him an X-ray to help him find
his brain, which he claimed had been stolen. Police were shocked
to learn that the man had drilled a 6-inch deep hole in his
skull with a Black & Decker power drill and had stuck the wire
in to try and find the missing brain. Lee, who comes from a broken
home, tried to call his stepfather, who refused to have anything to do
with him since Lee left the State Mental Institution last year. Mr.
Lee's stepfather said his stepson suffered from incontinence and his
history of Down's syndrome prevent him from having a normal life.
Police informed Lee's parole officer and social worker of his status.

Tracy, you keep blurting about the ARRL is "trampling" the ARS. Yet
they still print the Amateur's Code in every Handbook, which most of you
OF's appear to have completely abandoned. You're sending mixed
messages.

Now explain yourself rather than just making accusations. Thanks.

Heck, for all we know it could be coming from the contact managers everyone has on their computers today. Or it could be coming from the business world. I've noticed a lot of business people saying that today - the word "contact" both as a question and statement (meaning "will you contact..." as a question or "yes, I'll contact..." when answered back). In other words, who knows where this stuff comes from.

Source record: 93815

You know, Dan,

Those sentiments are mine exactly. We have, indeed, reaped that whick we have collectively sown. Used to be that if I got a paddling at school I got a belting from Dad when I got home. I got my first pocket knife in the fourth grade. For boys of my generation, it was a rite of passage. The only things they were used for was whittling and making whistles. We carried them to school (GASP!! HORRORS!) never once thinking of them as "weapons". We even got into school yard fights at times, never once thinking of pulling a knife on an adversary. We were taught that a knife was a TOOL, not a weapon. Teachers never had to think about kids using knives for anything other than whittling things that they would take away from us if they found them. Dad taught me everything about his old H & R shotgun by the age of 10--how to carry it, how to clean it, all safety rules INCLUDING checking the barrel for a shell EVERY time you touched it. Believe me, I never moved that gun without the first thing being breaking it down and checking for a shell. I never actually shot it until I was 12. What was his thinking--showing a 10 year old about his gun? Simple. He wanted to remove any curiosity I might have about it and instill in me the dangers of guns. If I was to handle that gun, he wanted me to know how and to respect the potential dangers. I DID play a trick once that garnered me one of his worst whippings. I discovered that you could put a toy cap in the gun and fire it, and it would sound just like a shotgun going off. I slipped outside with the shotgun one day, and yelled at Dad, "Look!" Before he could move, I shot the gun into the air scaring the dickens out of him and a neighbor. Before I could explain my "discovery", he rushed me and snatched me into the house where I received the business end of his belt and a long lecture. I never pulled that caper again!

When it has reached the point where a little girl gets suspended for bringing a BUTTER knife to school in her lunch kit to spread peanut butter, we have, indeed, reached a new low. It's OUR fault! As a people we have abdicated our responsibilities for our children by failing to take the time to teach them OUR own values, and allowed liberal ideas to take hold.

I truly miss the days when America was more rural, more work oriented, and we had less leisure. Kids had chores because we HAD to raise food. We had livestock to tend and rows to plow on the old '40s John Deere tractor. We can't turn back the clock on "progress", but we CAn turn back the clock on the liberals by saying ENOUGH is ENOUGH!

Yep. That has been my objection with Code Quick. To me, it would be fine
for learning code - up to about 8-10 wpm. I doubt if the extra level of
translation would work well at higher speeds.

> What the hell does that have to do with what I said?

You were ranting about India's Nuclear and Missile programs. So I tried to set the record straight
about how Indian defence preparedness is essential for progress on domestic fronts.

> People are starving and sleeping in the streets and
> India is going to launch a rocket into space.

India always had many pressing domestic priorities. Domestic priorities and national security
priorities have never been multually exclusive in India. They will both be pursued side by side. India's
rocket program did not cause earthquake. The program has been there for long time. Earthquake
has only added one more domestic priority and it will be attended by government and people of India
on a war footing. Food and medicine have been able to reach to all affected areas

while tents are
currently in short supply. The consignment of over 150,000 tents is due within next 2 weeks and it will
adquately meet the needs of all affected areas. The sheer size of relief operations make logistic,
coordination and management very tough task, especially when badly affected burocracy has to
administer them. It will be slow but job will get done.

> If I was in charge of foreign policy or funding for relief
> they wouldnt get a thin dime until they made progress to help there
> own

Of course, you are not in charge of anything and your opinions carry no weight beyond your own
wallet. India had grudgingly sought the help in rescue operations because of scope of devastation and
time constraints against number of tragedies. But it has not begged or sought any charity or
assistance for any other operations from any foreign governments - India has accepted whoever has
offered to help but it has not specifically asked for any help from foreign governments. Indian
government has been badly crticised by many for not asking for outside help. Many NGO, Non
Resident Indians and international charity organizations have sprung up for offering help - but Indian
government has no control over that. India has not refused their help as it is on a voluntary basis
without any strings attached. If you have conditions or strings with your support, stop right there. You
better keep your money for better use. India does not need even a penny that has strings
attached.

>so carry that defend there border bullshit elsewhere.

Living in America with thousands of nuclear weapons and trillions in defence spending to secure your
freedom and your prosperity, I don't expect you to give a hoot to national security concerns of other
nations. By the same token, India does not give a hoot to what people like you think about India's
domestic and defence priorities. India will do what it think is in its best interests. So you may take your
unwelcome views elsewhere.

It came from CB sidebanders back in the mid-70s or so. They wanted to
talk like hams, but they didn't want to say "break" because it sounded
too much like AM CBers, so they started that idiotic "contact" crap when
they wanted to break in.

When I want to break in, I just give my call letters. It gets the job
done, and saves time letting people know who's breaking in.

2745. FT: Like New Yaesu FT-920

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-09 05:25:18 UTC
From: foxblaine@aol.com
Message-ID: <20010209002518.05805.00000258@ng-md1.aol.com>
Source record: 93824

Greetings...

Up for trade is a beautiful Yaesu FT-920 with TXCO board and FM board installed. I am the original owner of this rig, and bought it in late November, 2000 from AES Milwaukee. Includes original box and manuals in perfect shape!

Looking to trade for another 'Big Rig'...in particular a Kenwood TS-870S, Kenwood TS-950SD, or perhaps an Icom IC-756. For the right deal I'll throw in the matching Yaesu MD-100A8C desk microphone, also bought new in November.

Reason for trade? I just like playing with new equipment! Would prefer an 'in-person' trade. I am within driving distance of Chicago, Milwaukee, Madison, WI, or perhaps even Twin Cities area if you want to meet half way. Will listen to offers from anywhere, however. E-mail w/ offers.

73 es gud dx de N9LXX~~~

: around....HAHAHAHAHAHA!!!

What an amazing coincidence it is then! The several songs about "Roger
Wiseman" on http://extra.newsguy.com/~shpxurnq/songs.html mention
Marshall County, West Virginia (see "Hit the Road, Bucktoothed Choad").

Imagine that: Two Roger Wisemans in Marshall County, both of whom use
the same colorful language. Apparently, one of them was booted off
both alt.fan.karl-malden.nose and alt.flame some years ago.

Fancied himself to be a flamer, but got laughed at.

It seems that Raoul Xemblinosky wrote his songs in the same language Roger used
to commemorate that auspicious occasion.

But, hey: You deny that songs like "Imagine #2" were written about you,
and who are we to question that?

2748. OTK situation: Why don't you get it??

Newsgroup: rec.radio.amateur.misc

I guess I'll have to give you an anal-ogy: Let's say you're driving goofy, and the cop stops you and gives you a ticket. You get pissed, and say you ain't gonna pay it. And to show everybody what a man you are, you QUIT DRIVING and turn in your driver's license. Now you know you won't get busted for the ticket because you ain't driving anymore. Then you get the notion to go get ice cream one Sunday afternoon. Your buddy who does have a driver's license comes over. But instead of you letting HIM drive...you decide to take your own car...thinking its OK for YOU to drive because your buddy's in the front seat. Now normally, there would be nothing wrong with this. But what was once legal, is now illegal because you still haven't PAID FOR YOUR PHUCKING TICKET!!!!!

<flame off>

Piss-poor logic. Read Part 97........

97.115 Third Party Communications

b) The third party may participate in stating the message where:

(1) The control operator is present at the control point and is
continuously monitoring and supervising the third party's participation
and

(2) The third party is not a prior amateur service licensee whose
license was revoked; suspended for less than the balance of the license
term and the suspension is still in effect; suspended for the balance
of the license term and relicensing has not taken place; or surrendered
for cancellation following notice of revocation, suspension or monetary
forfeiture proceedings. The third party may not be the subject of a
cease and desist order which relates to amateur service operation and
which is still in effect.

That section 2 may be applied to Herpie Schoenbaum, but it doesn't
apply to Rich.

I wouldn't give what 2-Belo says any credence, from the "Alt.flame
Who's Who":

"This idiot came out of nowhere in late 1996 posting from
Japan, following up every cascade in existence, until he was deemed
irritating enough to reply to. Quickly jumped on the Meow bandwagon,
hiding in alt.fan.karl-malden.nose." --flamefaq@feedME.

"Sad little dog (er...cat) who begs to be led around by a leash. Has
had
about the same amount of free thought this decade as Ronald Reagan.
Needs
someone to lead him and tell him what to do (also not unlike Ronald
Reagan)."
--The Cypher

"The 2-Belo always has something to say; to anyone, about anything.
Very
rarely will it make sense. Almost never will it be worth reading. On
the odd
occasion, when the planets align, it may provide the odd chuckle.
Otherwise,
I wish the 2-Belo did get fired. Would finally shut-up. Would at last
leave
a cascade without molesting it. Would, well, be gone." -- Strawberry.
"A balding, vicious little bastard pissed off at the world due to his
enslavement in the land of the Rising Sun. Has made it his mission to
punish
a dot f because he has to pay $75.00 US for a single fucking grape in
Japan.
His one saving grace is his sense of humour. He _knows_ he's a short,
balding fuckhead. But the dwarf can flame." -- Scott Campbell.

"Skittish and awkward like a colt on coke, this autistic child
prostitute
hides behind the sympathy generated by the gastrointestinal disease
that
bears his name. Boyd's Disease, characterized by the projectile
expulsion
of a curdlike, smelly discharge, forces him to leave the keyboard every
ten
minutes for an enema. This explains his sporadic and halfhearted proof-
reading." -- Blub.

Yes, Herbie CAN be on the air with the aid of a control operator. (Although I hope I never hear the a**hole ever again...) NO ACTION was EVER taken against Herbie-baby. In fact, Herbie's problem is INACTION! They wouldn't renew his license! That's all! He wasn't revoked, he wasn't suspended! Rich, on the other hand, HAS BEEN SUSPENDED! Until he does his time, he's to be OFF THE AIR!! OK...time now for comments from the cereal box-top lawyers out there...

And your law degree is????????? You sound like you have too much time on your hands.

I LOVE it, you assholes are so obsessed with Rich, you'll scrape the bottom of the barrel to find something to get him in trouble for. Same goes for your attitudes about me, I suppose. Idene, Rich's wife submitted an affidavit saying that the e-mail was sent unintentionally. I don't know which e-mail prgram they are using, but e-mails can be sent automatically (IF you don't watch the cc: and bcc: to people you don't want to receive it.) and that's what happened, somehow the e-mail got put in the outbox, and Rich or whomever sent it didn't check the outbox contents. If the re was a suspension, why isn't there a letter on the Rain Report?
Why wasn't it int he Amateur Enforcement News?
Rich was initally tested in front of the FCC, so he shouldn't have to retest. There's some vagueness about his "cancellation," to begin with.

South Normanton & District Amateur Radio Club,
in association with the G-QRP Club, are holding what
promises to be the year's main amateur radio event
in this area.
"Junction 28 QRP Convention", will be held on Saturday
17th March 2001, at the Village Hall Community Centre.
Market Street, South Normanton, near Alfreton in Derbyshire.
Located just 5 minutes from Junction 28 of the M1 motorway
and the A38, this will be a traditional radio event, organised
in the true spirit of amateur radio.
All under cover, there will be a good variety of stallholders
with components, kits, vintage and radio surplus, plus the
G-QRP Club stand, club stands and special interest groups.
There is a programme of lectures by Rev.george Dobbs G3RJV,
Rob Mannion G3XFD (Editor of Practical Wireless), Tex Swann
G1TEX (Also from Practical Wireless) and Douglas Pitt of the
Narrow Bandwidth TV Association (NBTVA) who will giving a talk
and live demonstration of mechanical television.
Hot and cold food and drinks will be available, plus a licensed bar.
Talk-in will be provided by GB0LOW on S22.
Doors open 10.00am.Admission is just ?1.00. FREE PRIZE DRAW.
Further details from the organiser on 01623 465443.
We look forward to seeing you there!

> Yes, Herbie CAN be on the air with the aid of a control operator.
(Although I hope I never hear >the a**hole ever again...) NO ACTION was
EVER taken against Herbie-baby. In fact, Herbie's >problem is INACTION!
They wouldn't renew his license! That's all! He wasn't revoked, he
>wasn't suspended! Rich, on the other hand, HAS BEEN SUSPENDED!

Prove your allegations. You're long on talk, but I still haven't seen
any evidence of suspension.
Herpie will have to move to one of the Third-World African countries he
holds, or another country to legally transmit under his other
callsigns. U.S. citizens are prohibited from getting a reciprocol
operating permit. See 97.107.

> Until he does his time, he's to be OFF THE AIR!! OK...time now for
comments from the cereal >box-top lawyers out there...

Herpie *is* under a cease and desist order, fool. And Herpie *is*
unlicensed as far as U.S. licensing goes as well. You're letting your
blind hatred of Rich cloud your thinking.
And no, I'm no lawyer, but I did take a few courses in college that
touched on Constitutional/legal issues.

"No Balls" <no.user@anon.xg.nu> whined in message
news:9227ce0d0528f117d6d27460c2cc15c7@anon.xg.nu...
> He is STILL UNLICENSED. His station isn't licensed! Rich committed SO
many violations >yesterday, it was pathetic!

You'd better read the part 97.115 again. Do you have even a General?

> First, he ID'ed. He's not suppose to do that! Since Rich is
unlicensed, all he can do is SPEAK >INTO THE MIKE. His friend is the
one who is suppose to ID!

He IDed using the control operator's callsign, as required. He
mentioned his old callsign in conversation, that isn't IDing. He
could've said "Third Party," if you really want to get nitpicky
technical about it.

> Second, Rich ID'ed using his friend's callsign...slant...Rich's OLD
callsign! Improper ID! Rich also >ID'ed using his friends's
call...slant...*EX-WB2OTK*! ANOTHER improper identification! His
>friend was NOT in control of the station! Rich ADMITTED he was on the
other side of the room, >operating the computer!

And the control operator was continously monitoring as per part 97,
too. How big of a room do you think he has? Most bedrooms are 12' by
12', which is enough close proximity for anybody.
What do you think, (IF you do) that the control operator has to key the
mike each time?

> UNLICENSED RICH WAS HANDLING (OPERATING) THE EQUIPMENT!

Unlicensed people *can* buy ham equipment all the time..at a hamfest,
even AES doesn't demand proof of license when you buy equipment. They
might ask you your call, and if one said that they didn't have one, the
people at AES, for instance might remind that buyer that it is illegal
to transmit without a license! Put yourself in that salesman's shoes,
are you going to risk losing that commission on the sale of that $2000-
3000 worth of equipment? Piss the buyer off, he'll go elsewhere for
business. What about a Technician class licensee who gets a say, FT-847
as a gift? He can transmit using the 6 meter and above portions of the
transceiver, but what should he do, open the rig up and desolder the HF
portions of the motherboard? No. It is up to the station control
operator to follow part 97 and transmit on the bands his license allows
him to. Third party, that's a different story.

>You people need to think twice about defending this guy. Rich
PURPOSELY does this to thumb >his nose at Riley! And if I were Riley,
I'd take his equipment!

And you still lack the guts to give your callsign. Using your logic,
the "Internet police" should take your computer. <snicker>

Source record: 93747

You all need to visit the FCC letter section at the R.A.I.N. website. Look under the *WB2OTK5* catagory. You will note, Riley repeats Rich's contention that the original license cancellation e-mail was the result of HACKERS...and that he *catagorically denies* ever sending the e-mail. THEN...Whiten comes back and claims that it originated from his computer, but that it was done by mistake. In other words, RICH PHUCKING LIED TO THE FCC! He deserves EVERYTHING he gets and Jock Biting Orifice and other OTK supporters should bite the big one for supporting this radio a**hole!

Well, lets start with the railroading of Herb. Let also visit Rich's bad
check in Florida. Rich is a downright butthead. He may not be as fat,
but I'll always call him "Porkbutt" I think Rich should retest. He's a
bad apple in the fruit basket of Ham Radio. And You and Jeswald are just a
couple of sour grapes.

Haha, the infamous FUCKHEAD CHILD MOLESTER Molesterian has nothing better to do than beet off to jpgs of handsome dashing rock vocalist ERIC SAEGER, wishing he was a boy like the last boy he BEAT AND MOLESTED with a two-headed dildo.
Molesterian lives in a big Maytag box in the Bronx, and he sprouted from the bucktoothed choad of his HALF-MONKEY MOM and a thousand mental patients.

e-vince

--
"SarumanTheChef tells us that in the novelization, Darth Maul had another line that wasn't in the movie, and it was a great line too. While the Jedi and Maul are stuck in between the security barriers in the final duel, Maul tests his saber on the shield like in the movie, but after he looks at Qui-gon, he looks at Obi-wan and smiles, saying 'Oh, don't worry, I'm coming for you too.'"

Fuck yourself, ham radio geek.

> Haha, the infamous FUCKHEAD

You're giving yourself too much credit, toy-car collector. But what's a
washed-up NEVER WAS
"glam rock" musak-cian going to do since he's in hock for the rest of
his life.

>CHILD MOLESTER Molesterian has nothing
> better to do than beet off

"Beet off," is that akin to your cucumber anal routine, vegatable boy?
Once can hear Ewwic's moans as he inserts that cool cuke up his rectum.
His houseboy, "

> to jpgs of handsome dashing rock vocalist

<snicker> Apeish, foul-smelling, HACK vocalist whose singing sounds
like he's gargling cum with those razorblades.
Phuckhead Menstrual looks like a evolving gorilla:
http://mypage.goplay.com/rickyscreamer

He routinely stuffed sweatsocks down the front of his spandex, they
called him 'stumpy" for a reason, and it wasn't just his height.

> ERIC SAEGER, wishing he

would have another week at the Betty Ford Clinic to dry-out. Yeah, we
know.

> was a boy like the last boy I BEAT AND
> MOLESTED with a two-headed dildo.

Just like your mommy did to you, isn't that so?

> Molesterian lives in a big Maytag box in the Bronx,

Mentstrual's having a flashback to his days when he hocked his
instruments, the K-mart special microphones and lived by his wits on
the streets. Well, if you can call pimping yourself out for drugs
living....The tenth rate "record company" had to file for bankruptcy

when they couldn't recover the enormous recording costs of recording
that obstreperous "album: that was destined for the cut-out bin.

> and I sprouted from the bucktoothed choad of my HALF-MONKEY MOM and
a thousand
> mental patients.

And yet, the never-was HACK musak-cian whale, you blow goats. With
enthusiasm, admittedly.

2788. Roger's Men's Room Band (the lyrics)

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-09 23:41:02 UTC
From: Buzzsaw <"Catch Me."@edu.com>
Message-ID: <961v3q$1ht$0@pita.alt.net>
Source record: 93767

Roger Wiseman's Greyhound Men's Room Band
(R. Xemblinosky/P. McCartney)

It was twenty years ago today,
Roger Wiseman forced the boys to be gay
He's been going in and outa their rears
And he's made them into ravin' queers.
So watch out or I'll force on you
The act we've hated all these years,
Roger Wiseman's Greyhound Men's Room Band.

We're Roger Wiseman's Greyhound Men's Room Band,
Disciples of the Bucktoothed Choad,
Roger Wiseman's Greyhound Men's Room Band,
Sit back and watch us shoot a load.
Roger Wiseman's Greyhound, Roger Wiseman's Greyhound,
Roger Wiseman's Greyhound Men's Room Band.
It's wonderful to be here,
But Wiseman's full of crap,
The dirty goddamn pederast:
That fucker gave us syphilis,
That fucker gave us clap.

I don't really want to stop the show,
But I thought you had all better know,
That Wiseman's going to play a song,
On a stickpin that he stuck through his schlong.
So let me introduce to you
The one and only Bucktoothed Choad
And Roger Wiseman's Greyhound Men's Room

ICOM IC-O2AT handheld in excellent condition. Late SN..Comes with a drop in type battery but no drop in charger. Battery is rechargeable with a cigarette lighter plug in cable which also operates the radio.The radio also includes all of my original shop and factory info on the O2AT series as well as a manual. The receiver has been opened up to receive the WX channels. My experience with ICOM covered 17 years in Dallas.

Listen Hadji,
All I am saying is what is your country's priority,
Launching a rocket in space to enhance your nuclear program
while its people are starving in the street and suffering from a
earthquake that possibly has killed hundreds of thousands.
Is there any honor in that.
nuff said if I was in charge before you got any aid from the U.S.
you would have to scuttle the rocket launch.
Donnie

Can someone advise me how to program these radios?

I received some tech help from yaseau, however I do not posses the technical knowledge to input the channels.

My question is two-fold;

1. What is the difference between the transmitter freq. and receiver freq.?

2. When I input the frequencies do I need to use different freq. for trans and rec.

Any help would be greatly appreciated.

My, my. Roger sure seems to fixate on the reproductive organs of bipeds, tripeds (the neighbor's three-legged cow), and quadrapeds. He seems quite well versed in the function of all and is fastly approaching the knowledge level of an expert. Is this a result of his cross-species experimentations? This must be the result of having grown up in a backwoods area of West-By-God-Virginia where the available women all rebuffed his advances and he was left to settle for anything with a body temperature warmer than his hand.

A double break ("break, break") or triple break used to be used to
indicate priority or emergency traffic. The FCC doesn't have any
guidelines on the matter.

With freedom, comes responsibilty. Freebanders aren't acting responsible
when they interfere with other communications services. It's the "yelling fire"
cliche.

I do, however, have a problem with the FCC telling me what topics I may or may
not talk about. Example: During an interview several years ago, an FCC official
said that discussing controversial subjects over the amateur frequencies
basically violated 97.1(e), because such subjects, as he put it, "did nothing
to enhance international good will."

This is a regional thing. I don't remember any SSB CB'ers using "contact" instead of "break" in the 70's (Washington, California, or North Carolina). And I haven't heard a single ham operator around here using it today, but I did hear it one time in Washington state recently.

Because it is so regional in nature, I really don't think we can so easily blame this on "those CB'ers." Instead, I suspect this is coming from somewhere within the ham community itself, or coming from plain language outside of radio.

> When I want to break in, I just give my

Most people do that, but I don't know how much it really saves time by letting people know who's breaking in. In my case, unless I already know the person (and callsign), I rarely ever catch the callsign of those breaking in this way.

This might give you some insight:

Hello Lloyd.
Been watching the goings on in the newsgroup.
Roger seems to be getting bolder. Here are a few pictures of Rogers
house----a crackerbox if I ever saw one.
Note: If you enlarge the photo on the window to the right under the
awning in photo 5 tiff, you can see an image of Roger. I swear to GOD
and on a stack of bibles that I did not do any retouching on this
photo. All I did was adjust the curves to bring out any detail in the
shadow areas.. As you can see, Roger is shall I say without being
cruel----deformed. His head is extremely elongated and he looks to have
some sort of birth defect. Again, I will reiterate.......I did not put
this image in this window. You have to look real hard, but it is
there .
No wonder Roger did not want to come out of his house to meet me. I
feel kind of sorry for him because I know know why he is so mad at the
world.

Hey,

email me and I'll send you the photos of Roger's cracker-jack house

Roger should be allowed a small bit of pity here even though he has not earned same. Consider if you will the filth that Roger spews....one must by extension feel at least a small bit of pity for him.
Roger is obviously working on the fringes of what one would consider to be "normal" and the poor man shows obvious signs of dimentia.
His fixation on genitalia seems to occupy most of his waking hours, and because of this one must pity the poor man. It is almost as if Roger lives, breathes, and fixates upon the genitalia he is so wont to accuse others of being focused upon.
Gosh, Roger. Did this stem from your Junior High School days in the Phys. Ed. locker room when you discovered that you were endowed with a REALLY, REALLY short penis? Being laughed at by your fellow eighth graders must have been humiliating. To be laughed at by the fifth-grade cheerleaders must have really been the ultimate of insults.

"Dementia," Dropout. What sort of "job" do you hold, landfill living,
chipmunk Turder?

Clearly, Buttfuck/buzzsaw, is the product of afterbirth, what the
doctor scraped off of his alcoholic-drug-using, whore momma, and
Buttfuck was the scrapings from his momma's venereal-diseased crotch.

> His fixation on genitalia seems to occupy most of my waking hours, and

You're the one bringing it up, Buttfuck.Is that because you got laughed
at by every woman, or little boy that it is your wont to fondle?

> Gosh, Roger. Did this stem from your Junior High School days in the
Phys.
> Ed. locker room when you discovered that you were endowed with a
REALLY,
> REALLY short penis?

Heh, and that's why your momma moaned in my ear "oh, fuck me harder,
wideman" when I fucked her. Best $10 I ever spent.

> Being laughed at by your fellow eighth graders must have
> been humiliating. To be laughed at by the fifth-grade cheerleaders
must have
> really been the ultimate of insults.

I Know You Are But What Am I, Pee Wee Turder. But that's the BEST you
can ever hope to do, isn't it?

You dropped out of college after 1 1/2
semesters.BWHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!
Your major of HVAC was too hard for you, huh??

Hey, if you're real nice and sound like you're on heavy doses of sugar
or cocaine when you babble on the so-called "Liberty Net," maybe
Strompet's Hungarian whore mail-order dyke will blow you like she does
all the netters.

Your mommy finally let you out of your trailer to use the computer I see.
Poor poor Roger Whitetrash. So did you get your welfare check this month?
That is the only check youll ever be able to earn, lazy scum.

No. loser, I actually haven't heard anything from Craig. Heck, I have talked to him several times personally. Never had a problem with him in three years I have been using his service. Pretty neat fellow I think. Furthermore, its productive people like him and myself who make this country. Not garbage like you who sit on your butt and collect your welfare. P.S. Perhaps getting a job would cure you of your foul mouth and inability to deal with others. Furthermore, as much as you talk about the gay sex stuff, It would seem that you obviously know a great deal about it. Are you finally coming out of the closet and admitting your experiences. Whatever happened to the idea of don't ask don't tell. I guess that died with your hero Clinton. Fools like you are so far to the left that you make a certain miscreant from New Jersey seem pretty normal. Of course, what else is to be expected since your lifestyle resembles something from the Jerry Springer show.

Yeah, just like You.....It's no more than one big "You're gay LAME,"
balding, bulemic, can't get laid
AIDS-carrier. And YOU reamed Billlll about HIS gay lames....what a
fucking hypocrite! It's nice to know a obsessive-
compulsive "personality" is still around; your obessing on Gareth (and
me, as well as others)as evidenced by your pictures on your sophmoric
webpage. I suppose you have to masturbate to *something*, since your
last lay was your skanky hunchbacked mommy.
<snicker>LOL!!!!! oh, and "meow!" LOL!!!!!!!!!

<flame off>
Oh, and BTW, man, the guy who most likely whined to you and got you
over here is a racist,
Lllllllllllllloyd Davies.Here's some of his shit:

"YOU ARE NOTHING BUT A LYING JEW WHO LOVES TO CONTROL EVEYTHING AROUND
HIM." Drools the sub-human antisemite N0VFP, Lloyd Davies in

Discussing controversial subjects! Gee sounds like "no political dissent allowed!"
Of course Hams will willingly bend their knee and kiss ass.
Freebanders will carry on and will remain THE LAST BEST HOPE FOR FREEDOM!!!

btw most freebanders have equal knowledge in electronics and SUPERIOR knowledge of human freedom.

....act irresponsibly and break the law.
Adolf Hitler-1935

I just want to take a few minutes of my most valuable time here to address some issues.

1. I have never been arrested.
2. I do not engage in homosexual acts or bestiatilty.
3. I support the Liberty Net
4. I think Brother John is doing a great job on 14.313
5. Ex-WB2OTK should never get on the air again, or there will be some trouble.
6. Herb will return, I know he will
7. As long as I'm alive, the B.A.R.F. will live on, if even as a memory.

Actually, Lloyd, you being a pizza pusher doesn't change my opinion about you at all. What matters is that you are well meaning person which is much more preferable than some of the miscreants that we see on the various newsgroups. At least you have a job, which is something that a certain miscreant from West Virginia has never claim. That guy doesn't have the mental ability to work at the city dump. One thing I have to wonder is if that guy speaks to his mother like he does. I really wonder if he says those same things like that around mommy. Actually that same miscreant from WV talks a lot about bestiality and sexual perversions. He must have taken a lesson from Marv Albert fame. Its really pretty sad all considering that he is nothing more than a 45 year old wash up who will never do much of anything with his life other than trash up these newsgroups. One wonders how anyone can condone someone of his conscience blathering out of his filthy mouth. Not to mention his obvious sexual perversions. You would think that he was an expert regarding those topics. Perhaps he is and wants to come out of the closet. He must be a sexually repressed person perhaps because he lacks the mental stability to leave the mental institution for any sort of time. Then again, perhaps that is why he is generally unemployable at any task. Notice we have never heard what his profession is. He doesn't want to talk about it. As far as Dumb Dan goes, he has shown in the past that he is pretty much a psycho who threatens to kill or incite violence against others. Vietnam Dan is certainly a psycho man and it shows in his threats he makes to others. The tapes out there prove his mental instability.

In article <963ovuhgp1@dagobah.blueriver.net>,
GOAT FELLATOR AND PERVERT "George Jones" <lightnin9@hotmail.com> whined
and cried:
> No. loser, I actually haven't heard anything from Craig.

Liar.

> Heck, I have talked to him several times personally.

That *many* TOS complaints about you????

>Never had a problem with him in three years
> I have been using his service.

Yeah, but he tells a different story, dimwit.

>Pretty neat fellow
> I think.

Impossible...You lack the brain stem *to* think! You said you talked to
him several times, now you say you 8think* he's pretty nice. Caught
your lying, welfare-recipient ass in another LIE.

> Furthermore, its
> productive people like him and myself who make this country.
> Not garbage like you who sit on your butt and collect your welfare.

PKB, I KNOW you're a welfare recipient, no matter how much you LIE that
you're not!

P.S.

This is USENET, not a fucking letter, you FUCKING IDIOT.

> Perhaps getting

Yeah, I GET some all the time, even your whore mommy.

> a job would cure you of your foul mouth and inability to deal with
>others.

I HAVE a JOB, YOU goat-fucking moron.

> Furthermore,

Furthermore, YOU ARE A FUCKING POMPOUS ASSHOLE.

>as much as you talk about the gay sex stuff,

I know you get all HARD at the mere mention of the "gay stuff," you
closet queen you.

>It would seem that

Yeah, it would seem that you have the IQ of at least an imbecile, but
appearances are deceiving, and it's only being optimistic.

> you obviously know a great deal about it.

You told me all about it in that e-mail.

>Are you finally coming out of the closet and admitting your
>experiences.

IKYABWAI, Pee Wee.... now don't be like your idol and masturbate in
that theatre and get caught again.

> Whatever happened to the idea of don't ask don't tell.

It kept you out of the military, draft-dodging faggot.

>I guess that died with your hero Clinton.

Clinton isn't dead, STUPID. Even though you obviously are.

> Fools like you are so far to the left that you make a certain
> miscreant from New Jersey seem pretty normal.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!
I *am???* Prove it, shitling.

> Of course, what else is to be expected since your lifestyle
>resembles something from the Jerry Springer show.

It figures you'd be a viewer of the Springer show, but then, all you do
is sit on that cum-stained couch all day in your shit-skid-marked
underwear and gorge yourself on moon pies. Talk about the "dumbing down
of the youth of America, " you're the poster BOY.

Well said.

By the way, who is "Ken"? and if freebanders are so mature, why are they ignoring the FCC, breaking the law, and putting all of our frequencies in jeopardy, ham, CB, and freebander? Doesn't sound all that mature to me.

GOAT FELLATOR "George Jones" <lightnin9@hotmail.com> cumgargled in
message news:9648dfifv1@dagobah.blueriver.net...
> Actually, Lloyd, you being a pizza pusher doesn't change my opinion
about
> you at all, but I sucked off Bill Clinton, too!. What matters is that
you are well meaning person

Slurp Lllllloyd's ass in public some more, Georgie! But that's what
your alcoholic Daddy did to *you* on a nightly basis, isn't it, Indiana
Inbred?

>which is much more preferable than some of the miscreants that we see
on the various
> newsgroups, like me. At least you have a job, which is something that
a certain
> miscreant from West Virginia has never claim.

"Claimed," you, Elementary school dropout! I HAVE a job, you retarded
babboon!
I don't hear you talking about yours, but working at McDonalds is where
you work!

>That guy doesn't have the mental ability to work at the city dump.

While "George Jones," LIVES at the city dump!

> One thing I have to wonder is if
> that guy speaks to his mother like he does. I really wonder if he
says those
> same things like that around mommy.

Why don't you rent some BALLS and come over and find out, FUCKWAD?

>Actually that same miscreant from WV
> talks a lot about bestiality and sexual perversions and I get so
truned on by it.
> It reminds me of when I was Andrew Cunanan's love slave, I took a
> lesson from Marv Albert. Its really pretty sad all considering that I
> am nothing more than a washed up whore will never do much of
> anything with his life other than trash up these newsgroups. One
wonders how

mother. Perhaps I am and
> I wants to come out of the closet. I must be a sexually repressed
person perhaps because I
> am afraid of sexual topics and lack the mental stability to leave the
mental institution for any sort of
> time. Then again, perhaps that is why I is generally unemployable at
any
> task so I trick for little boy cum in public bathrooms.

Poor autistic Georgie.....<snicker> Lllllloyd says Georgie's
underwear has so many streaks, you could use it as a road map.

Georgie has yet to get his first piece of ass, don't you Georgie???
At least the ass of a real human woman instead of the farm animals
you're used to.

> Notice we have never heard what his profession is. He doesn't want to
> talk about it.

While your profession of being a gay prostitute is well known in Salen,
IN, Georgie!
The police in that town know you quite well. You've got quite an arrest
record!

DYOFDW if you want to find out where I work, cunt.

> As far as Dumb Dan goes, he has shown in the past that he is
> pretty much a psycho who threatens to kill or incite violence against
> others. Vietnam Dan is certainly a psycho man and it shows in his
threats he
> makes to others. The tapes out there prove his mental instability.

And a YELLOW streak runs down Georgie's back.....he shits
his pants still on a daily basis, don't you Georgie?

After listening to Donnie repeat at least 100 times in two hours his definition of what is and is not a ham station, I now see why a couple of the Hams lovingly refer to him as "Dumbass Donnie". Donnie, ever the connsumate fool kept saying "I caint git this outta my haid." Over and over and over again and again.
It finally took intervention by Riley Hollingsworth to silence his yammering....telling Donnie to call him on Monday for an explanation and further telling Donnie to stop tying up the frequency so the other guys could use it. Donnie was last seen pushing his Porta-Potty and HT down the road in search of some more DX.

Thats where he learned his trades at, while being in jail.Of course, the guy has proven time and time again to be a real miscreant. He is definitely the type of person that I wouldn't want around my friends or girlfriend for that matter. Of course, it just shows the depravity of his soul with the filthy utterances rolling out of his shell of a mind. But what else is to be expected of someone on Ritalin, Prozac, Zoloft, and AZT. Not to mention his beer habit of littering the dump up with beer cans and broken out windows. Really can't help but to feel sorry for him.

Source record: 93651

I have a beautiful condition 475 scope except it doesn't work and I don't have a maint. manual - yet.

If you have a manual maybe you could offer a suggestion to what is the problem to my scope.

Voltages missing:
+5
+15
-15
Incorrect Voltages
+50 V is 12.3 V
+110 V is 90 V
Ungregulated +50 V is +66 V

The internal fuse F1318 is ok
Of course, the mail line fuse is ok.

The only lights that will come on are the uncal lights on the front of the scope.

It's obviously missing some primary voltage.

Any ideas?

Thanks,
WA4QGA

Try writing them a nice letter stating, due to diminished mental ability resulting in your involuntary commitment to a state mental hospital, that you are no longer able to function as a reasoning amateur radio operator, so would they please cancel your membership and return any refund so you can pay for the electro-shock treatments. I'm sure the League will be very understanding.

73,

Listened to the Lib Net for the first time ever....such disinformation I have never heard! Their spin on local and federal laws are waaaayyy off base and groundless.
Watch out, all! According to the Lib Nuts the sky is falling and there are govt. agents under every seat cushion of your new car and these agents are waiting to confiscate your car, your kids, your dog, your house, and even your chicken coop!
What tripe these guys spew! I am sure most of them mean well, but these conspiracists do lean pretty hard to the right, hard enough to be over the edge in fact....I wonder if they awake every morning and look skyward to see if any black helicopters are hovering above their houses? Garsh...must be a chore to scan their cars and houses every week to see if any listening devices have been clandestinely hidden by those "secret agents" who, according to them, want to confiscate their properties.
Oops! Watch out for Radio Shack...they have electronics kits that allow monitoring of citizens...must be a CIA plot....
Watch out for those baby monitors that WalMart sells...that is another plot to monitor what goes on in you houses....the CIA is behind that, too.
Look up in the sky...see that Piper Cub? Stay off your cordless phone...that Piper Cub is probably being piloted by a CIA Agent who is monitoring your cordless phone and taking photos of your house.
Next thing ya know, the FBI will be battering in your front door because you said something bad about the IRS.
Watch out, Lib Net...."they" are coming to take you away.....labor camps and such.....the helicopters are hovering just over the horizon.....

How very laughable....

Well, Ken, some time ago on rec.radio.cb, someone was encouraging the "gang" to use a particular group of HF frequencies for their free-banding. I thought the list of frequencies looked familiar, then it struck me that he had listed the trans-Pacific and trans-Atlantic HF air-to-ground channels that Aeronautical Radio, Inc., uses to track long-range commercial airline passenger flights. When I pointed that out to him, explaining that he could possibly be endangering lives by encouraging HF free-banders to utilize those frequencies, I was flamed to a crisp.

Break whatever laws you desire, but in doing so, don't infringe upon other people's welfare and well-being.

Use a real ham log instead of crufty software like Access. Logger comes
to mind. It has everything preconfigured to suit your means.

> He was never outclassed.

Raoul Xemblinosky praised Wiseman's flaming skills thusly:
"When the ineptitude [of HFW] got too much for even Wiseman to take,
he fled the coop." in <33E27B62.4ECD@jsltd.bungmunch.edu>.

Doom wrote on Thu, 06 Aug 1998 16:57:24 GMT:
"It's plainly obvious that you had some kind of thing against Roger
Wiseman. I've been on alt.flame for nearly a year now and I never saw
a single post from him. Why on earth would some newbie hate someone he
has never met? I guess you'll say you read it on some web page, but
that poor excuse won't wash with me. "I" know you better than that,
"I" know you hate Roger because he kicked your sorry behind up and
down the flame pits for quite some time."

Follower of the Clawed Albino <wyndigo@dennon.co.uk> praises thusly
"Roger Wiseman, who was HFW's only flamer.." in
Message-ID: <37BEC5F5.3278@dennon.co.uk>

Mike MacLennan <mmaclenn@ix.netcom.com> wrote to Skippy:
Message-ID: <37B51721.87D7DDEC@ix.netcom.com>

"Roger Wiseman was a better flamer than you."

> Sometime in 1997, Raoul Xemblinosky III teamed up with the likes of
John
> Lennon

What a DUMBASS, Lennon's been dead since 1980. Paul McCarney wouldn't
give the drooling bulimic Raoul the time of day.

>and Paul McCartney to immortalize Roger in a sophmoric song.

"Palmjob's "boner"...." responded Raoul Xemblinosky III when asked what
he
likes to suck on the most in <343ABF3F.719F@decaxp.bungmunch.edu>

> They used the
> same language that Roger used in his posts to come up with drivel like

Running The Washing Machine Tonight
(Pat Benatar/Neil Geraldo/D.L.Byron/R. Wiseman) Deversive of "Shadows of the Night."

Stagger Lee's running the washing machine tonight,
So maybe he can get his "stained sheets" white,
His parents are out, lucky for him, tonight,
Stagger prays the sheets'll wash clean in the end

Stagger said, "Oh, girl, it's a cold world,
When I always excrete on myself,
You can't hide from the world outside
All the stains you've made on yourself."
Run to the laundry room, Stagger baby, don't look back,
'Cause you haven't got any more clean underwear

Stagger Lee's running the washing machine tonight,
So maybe he can get his "stained sheets" white,
His parents are out, lucky for him, tonight,
Stagger prays the sheets'll wash clean in the end

Y'know, sometimes, Stagger's bowels move a-way too fast,
He uses every alibi and words to deny
That clean underwear ain't meant to last
He can cry, "All Temp-a-Cheer, baby," it's all right,
He usually wears "Depends," but not tonight

Stagger Lee's running the washing machine tonight,
So maybe he can get his "stained underwear" white,
His parents are out, lucky for him, tonight,
Stagger Lee prays the shorts'll wash clean in the end

Stagger Lee's running the washing machine tonight,
So maybe he can get his "stained sheets" white,
His parents are out, lucky for him, tonight,
Stagger prays the sheets'll wash clean in the end

Another lack of bladder control from Stagger the imbecile,
Wear your "Depends," Stagger, won't you say you will?

Stagger Lee's running the washing machine tonight,
So maybe he can get his "stained underwear" white,
His parents are out, lucky for him, tonight,
Stagger prays the shorts'll wash clean in the end

Stagger Lee's running the washing machine tonight,
So maybe he can get his "stained sheets" white,

His parents are out, lucky for him, tonight,
Stagger prays the sheets'll wash clean in the end

Hey guys (K0HB or Jeff), its time to update that darn analog meter. It's not accurate enough - my digital meter showed that as a solid 9.65, not a full ten.

Jeffery--

Are you affiliated with a University? If so, from Eco 401, you may recall that when you no longer send an organization money, they eventually lose interest and terminate your memebership.

Now, what's really bothering you???

Rick K1BQT

2905. Racal Dana 1992 TOKO switch?

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-11 15:55:55 UTC
From: Henry Kolesnik <wd5jfr@oklahoma.net>
Message-ID: <t8ddgf858l4m42@corp.supernews.com>
Source record: 93684

i have a Racal Dana 1992 counter that has 32 pusbutton switches..
made by TOKO..
they solder onto the pcb and are a little over 1/4" square, 1/2" long and
have a rectangular pushbutton for momentary contact..
moulded into the back is "TOKO 3J" with an "A" above on pin and an "I" over
the other..
they are all stuck!
i've diasassembled one and it consists of 4 parts:
the pushbutton..
the plunger..
a black piston..
the case with the contacts..
i cannot figure out how thye worked when they did unless someone was into it
before me and reoved a part..
if anyone can tell me where i can find replacements, substitutions, or how
to fix i'd be happy..
so far no luck at Digi-key, Mouser, MCM, CirKit, or TOKO web..
i'll try calling TOKO if i can find a number
tnx
hank wd5jfr

I don't see why you are blowing off about your assumed monetary prowess.
Last time I seen, your West Virginia home pretty much looked like a hovel.
Not to mention the fact that there were at least 10 rusted out bombed out
cars on concrete blocks. As far as welfare goes, you must know all about it
since you spend so much time on here. When do you work or are you just a
part timer at McDonalds? So does that explain why your mommy pays the rest
including the bills for your radio hobby.

You've got it all wrong again reprobate. Now that should be expected out of Roger Wiseman, the proof that there is life after abortion. Actually Roger were you delivered via the birth canal or via the anus. I am assuming the latter with your foul white trash utterances and constant foul language. Perhaps a trip back to the psycho ward and some soap would help that. Of course, your idea of dropping the soap is to drop it and then turn facing the other man. That explains the large amount of protein on your pimply, pock marked face. Then again, what else is to be expected of some crosseyed inbreed whose family tree looks like a totem pole like yours does.

Being the best-looking leper in the whole colony is nothing to
brag about, Roger. Your penance is to go to the library and look
up the word "even" in the dictionary.

Oh, I forgot... you don't even have LIBRARIES in West Vagina.

BWHAHAHAHA!

OK, but my kids will be pissed about getting Code Quick for dinner
this Friday night. Maybe if I put cheese on it. Sounds like I need to
support the hobby to the tune of another 35 sheckles (as Dick calls em).
Maybe I'll have that QSO with N2EY before 2027AD when I retire.

I agree. While it can be done, why re-invent the wheel? There are a number of programs available from shareware on up depending on the depth required. I use Logic5 and recommend it to others. It can be rather intimidating to start, but once you get into it, very powerful. I learn new things about it all the time and its interactive capabilities, such as DX clusters, rig control.

Just heard some strip mall in the area of Ham Radio Outlet's
Newark De outlet burned to the ground last night. Was it them?
Hope not! Or did all that jap radio junk that's built inside like a
$69.95 K-Mart VCR gone up in smoke? Ham radio's dying anyway
so it's probably no loss in the long term. Try this sometime. Open the
hood of a Kenwood or Icom HF and a Daewoo or Hitachi VCR or TV
alongside of it. See the thru-hole components placed haphazard, chinzy cheap
wirebundle inter-connectors, unplated steel chassis that rust,
SMT resistors and caps placed at angles on the board and thin
polycarbonate plastic used everyplace in both. Difference is that hams
pay $1500 for HF rigs and everyone else pays $79.95 for identical components
and workmanship from the same jap factories.

2930. Roger "inbred" Wisewoman

"Of
course, your idea of dropping the soap is to drop it and then turn facing the other man. That explains the large amount of protein on your pimply, pock marked face. Then again, what else is to be expected of some crosseyed inbreed whose family tree looks like a totem pole like yours does."

I LIKE this one! The thought of Roger's family tree looking like a totem pole is humorous. Can you imagine all the cross-eyed inbred mental midgets grinning from one side of their misshapen faces? The thought that they all look like Roger is another sad but hilarious thought. I can just imagine Roger and his inbred relatives sitting around a tire fire and playing "Dueling Banjos" while his mommy is off in the bushes having fun with her brother.

Guess the stats lie, huh
1917 - about 6,000
1928 - about 17,000
1936 - about 46,000
1950 - near 90,000
1956 - over 140,000
1958 - about 160,000
1963 - over 250,000
1977 - 327,000
1989 - over 500,000
1997 June - 678,473
2001 Jan 1 - 682,240

I respectfully beg to differ. Most of Code Quick's critics are indeed
non users of the program.

Using the stepper disk that came with Code Quick, I'm now copying a
solid 18WPM with 20WPM as my goal.(for now) This is after about 15
weeks of "farting around" with it. I've got a life, so I can't give
the hour+ a day I'd like to.

I started from ground zero. No code at all. The simple truth is, it
works if you stick with the program. I tried twice before and got
nowhere using other methods and had given up before I tried Code
Quick. This is in spite of the kind and patient efforts of my Elmer
(W7JX). I achieved 5WPM in less than 2 weeks with Code Quick. Was
copying a solid 12WPM when I took my 5WPM code test, so it was like
falling off a log. Yes, there IS a wall at about 13 WPM you have to
push through, but it's do-able.

The "seeds" get planted with the "sound alikes". As the speed
increases, the word groups are replaced with a single word and finally
a single letter. It's an unconscious process that works. It, like all
the other methods, requires much practice to bring the speed up.

Learning Morse at 40 wasn't easy by any stretch of the imagination,
but Code Quick made it possiible for me.

No it doesn't look like the GNP -- but pretty respectful, I'd say

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters, AD1C, N1FOC, K2KW, WB2YQH/WB2RAJ & The 599 DX Report, W3LEO, W3UR & The Daily DX, N4AA & QRZ DX, WD4NGB, K6GNX, K6RO, N6RT, AF7O, NA7DB, K7BV, W7KNT, K8AV, K8YSE, NE8Z/HC1MD, W9VA, CE6TBN, CT1END, DL4KQ, F5NOD, F5PBL, F6AJA & Les Novelles DX, FM5GU, G3PJT, HB9BXE, HB9CRV, LZ1JZ, PS7AB, PY3DX, PY7ZZ, SM0GNU, UX0FF, VE7DP, VK4AAR, VK4FW, ZL2HU/ZL4HU and 4L1DA for the following DX information.

3B6, AGALEGA. Press Release Bulletin Nr. 12 (large) was released over the past weekend. In short, the team has added 4 new members, close to the maximum number of 20 operators. The new members are: Steve/N3SL, Stefan/SP9RTI, Leonid/4Z5FL and Antonio/CT1EPV. Other crew members are: Rene/HB9BQI, Christine/HB9BQW, Hans-Peter/HB9BXE, Hermann/HB9CRV, Cedric/HB9HFN, Karl/HB9JAI, Friedhelm/HB9JBI, Jacky/3B8CF, Luis/CT1AGF, Matthias/DL3KUD, Mart/DL6UAA, Jack/F6HMJ, Derek/G3KHZ and Ken/NK6F. Tom, 9A4DU, had to cancel his participation. He will continue his studies at Florida during the time the expedition will take place. The 3B6RF team is scheduled to arrive at Agalega on Thursday, May 3rd, and begin operations on Saturday, May 5th, for 14 days. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin. The 3B6RF Web site is at: http://www.Agalega2000.ch

3W, VIETNAM. Claude, F5PBL, will be active from Ho Chi Minh City between March 22-30th. Activity will be on 15 and 10 meters, mainly on SSB, CW is also possible. A single/single entry will be made in the CQ WPX SSB Contest, the band is not yet selected. The exact callsign is not yet known. QSL via F5PBL, direct or via bureau.

3Y, BOUVET. Chuck, 3Y0C, continues to be active. According to the latest update (dated Feb. 10th) on WD4NGB's Web site: "Things have not changed a whole lot since the update on February 3rd. Chuck has been staying busy with his mission duties, trouble shooting equipment, and installing/ repairing antennas. He put up a 600 ft long wire to use on the low bands,

with counterpoise for for 160, 80 and 40m. These were destroyed by a storm the following day. Today, he completed installing dipoles for the low bands and will see if they will stay up. The Amp is still being worked on, and more information is expected from Japan on Monday to help determine what the problem is, and a fix or work around for it. Chuck has worked many on RTTY, but is taking a short break from it now since the equipment he is using on RTTY is having troubles. No update on the pick up date yet, so it still planed for the last part of February, and up to March 2nd. Will update as soon as I have anything more concrete. Chuck has been spending more time on the WARC bands lateley. He was on 12m with a HUGE EU pile up today..... Maybe the storms will allow the low band antennas to stay up more than one day. Chuck is still working CW by request only, on the same frequency as he is operating on SSB."

4I, PHILIPPINES (IOTA Activity/Update). Frank, VE7DP, informed OPDX early last week that the activity from Polillo Island (OC-091) as VE7DP/DU1 and DU1KGJ/p, made about 1600 QSOs in 2 days. However, propagation was poor, and they had problems with power interruptions between 2200-0200z and after 1700z. Over the past weekend, the Philippines locals and Frank organized an IOTA expedition to the unnumbered Luzon Coastal Island. They used the callsign 4I1P from the island of Marinduque. This island now has an IOTA of OC-244. QSL both operations via VE7DP or DX1CW. The next IOTA DXpedition will be to Batan Islands (OC-093), and they have applied for 4I2P callsign. Operation is to take place about February 24-25th. QSL via VE7DP or DX1CW. More info/details to follow.

6Y, JAMAICA (Update/High Schooling For DXing). The DXpedition University (DXU), the first of its kind to provide a training ground for energetic radio amateurs wanting to learn the foundational methods and tactics of DXpeditioning, is getting ready to hit the DXpedition trail. The group will be active from February 26th to March 6th signing 6Y8A or homecall/6Y5. Activity will be on all bands from 160-6 meters, mostly on SSB and CW though some PSK31 is possible. In addition to normal operations, the group will enter the ARRL DX SSB Contest with a Multi-2 entry. Operators will be Klein/WT6G, Mike/WA6O, David/K0COP, Tim/W6NS, Walter/N6XG, and Kenny/K2KW. QSL 6Y8A via WA4WTG, others via homecall. The group will have 4 stations with KW amplifiers on 160-6m, and use Force 12 vertical arrays for 160-6m. The DXU ops are learning the skills to run them with the best, so give them a call to help them improve their pileup skills! Questions go to Kenny, K2KW at: k2kw@prodigy.net
Also visit the following Web page for more info at: http://www.k2kw.com
There are 2 slots available if anyone wants to join the group.

9M0, SPRATLY ISLANDS (The UnDXpedition!). A press release by Darryl, AD7O, reports that the members of the "Central Arizona DX Association" are planning ("with NO fanfare and NO hype") their first "UnDXpedition". They will be operating from the Spratly Islands as 9M0M during the first week of March. Their interesting press release states:
" The UnDXpedition will have no more press releases until we return, and maybe not then. We could not find any pilots, no one understood satellite uplinking of logs, and nobody wanted to stick to any schedules.

There will be no sponsors of our radios, coax, amplifiers, or T-shirts, because we couldn't find any. All governments involved have taken a, - Who are these people anyway? - attitude. We did try to contact the San Miguel Brewery, but they didn't even call us back."
Operators will be Sally/KM5EP, Dennis/AF7Y, Jerry/WB9Z, Luis/XE1L, Darryl/AF7O and "unindicted co-conspirators" Dan/NA7DB and Mike/N7MB. Some of the above operators may enter the ARRL DX SSB Contest. They will operate from Sabah, Malaysia, as 9M6DBT and 9M6MBT for a few days before and after their activity on Spratly. They plan to operate CW and SSB on 80 through 10 meters. QSL the 9M6 callsigns via WN7J and the Spratly Island callsign of 9M0M via K7XN. A Web site has been set up for this operation at: http://www.xcvr.com/9M0M
The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

CE0, EASTER ISLAND. Several sources report to look for Arliss/W7XU and Holly/N0QJM to become active from here March 29th-April 9th. Reportedly, they will maninly concentrate on 6 meters.

CE0X, SAN AMBROSIO ISLAND (Bad News!). Early last week the team going here announced that they received some good news. The SUBTEL authorized the DXpedition to use the callsign CE0XT (their first choice) instead of CE0ZT. HOWEVER, on Saturday, pilot station Dr. Bill, K6GNX, reported:
"The team regrets to report that due to circumstances beyond their control regarding the boat transportation from Valparaiso to San Ambrosia the DXpedition must be canceled. Everyone is safe and well but very disappointed and they are returning home as soon as possible."

DAYTON HAMVENTION NEWS. According to the Dayton HamVention Web site, the DX Forum (and the Contest Forum) is going to be held this year at Hara Arena on Saturday in Room #4 from 8:30 AM until 12:30 PM. Check the Web page at: http://www.hamvention.org/forums.html

D6, COROMOS. The D68C operation is in full swing. Activity is on all bands and modes, and very easy to work. Activity will last until February 28th. QSL via G3SWH.

DX HOLIDAY WEB SITE HAS MOVED. Kenny, K2KW, informs OPDX that the DX Holiday, "The Ultimate DXpedition Resource", has moved to a new server. DX Holiday is a site that lists QTHs around the world where people have operated on DXpeditions, and provides information on how to contact the owners. There is information on Rent-a-QTHs, Ham Friendly Hotels, and Club stations. Please change your links to: http://www.dxholiday.com
The old site will be decommissioned in the near future at: http://pages.prodigy.net/k2kw/qthlist
The response and support for DX Holiday has been great, with new locations and information coming in all the time. In addition, the "Team Vertical", information on vertical antennas for DXpeditions and past operations, has been moved to Kenny's personal site at: http://www.k2kw.com

EO6, UKRAINE (Attention Prefix Hunters). Nikolay, UX0FF, informs OPDX that he is licensed to use EO6F, a special contest callsign that expires

at end of February this year. He states that he is the only one which has this prefix in Ukraine. His last CW operation with EO6F will be in the ARRL DX CW Contest as an All Bands/High Power entry. QSL via UX0FF: Nikolay Lavreka, P.O.Box 3, IZMAIL, 68600, UKRAINE.

FM, MARTINIQUE. Dan/IV3TDM, Max/IV3FHH and Luke/IV3JVJ, from the Pordenone gang, will hit the airwaves from here, March 17-23rd. Dan will operate on SSB, Max on CW and Luke on RTTY, also SSB. They will try to concentrate on the lower bands, and their target is to "generate the hugest pile-up of their lives". They should have a good signal, so please call them! The callsigns will be FM/homecall. All QSLs go to IV3TDM CBA. The Pordenone gang will operate from Clement's, FM5GU, station, and then join the FM5GU team for the CQ WPX SSB Contest.

FO0/M, MARQUESAS ISLANDS. By the time you read this, Wulf/DL1AWI, Mat/ DL5XU, Peter/DL3APO and his wife Birgit/DG0OBN should have moved from Rangiroa (OC-066) to Nuku Hiva in the Marquesas Island group. Look for them to be active until around February 28th. Reports indicate that they will sign FO/DL1AWI, although their earlier announcements stated that they would sign FO0/homecall. Activity should be on 160-10 meters CW/SSB and some RTTY, also probably SSTV. Online logs will be available via the Web page http://www.qsl.net/dj7aa/fo0
QSL their Marquesas operation via DL1AWI. QSL their Rangiroa operation via DL3APO. Addresses can be found in OPDX.491.

HC, ECUADOR. Dr. Rick, NE8Z/HC1MD, reports that Dr. Scott Olitsky, AC3A, will soon be active from Ecuador as AC3A/HC5. Scott will be on a medical mission to perform ocular surgery on children in Azogues, Ecuador, roughly between March 2-16th. During his off hours he will be active on HF, CW and SSB. Scott will also be active on 2m EME as AC3A/HC5 from the beautiful mountain home of Guillermo/HC5GL and his XYL Maya/HC5DX in Chaullabamba, Ecuador. Many members of the Cuenca Radio Club (HC5CRC) will be assisting Scott with his EME station setup. There will be an HF station manned by HC5PJ/Gerardo, HC5SF/Fausto and HC1HC/HC5/Alfredo on 14155 kHz during the EME operations. This may be the first ever EME operation from Ecuador. QSL via AC3A. Please contact Scott before his trip if you have any questions about the EME operation at: solitsky@acsu.buffalo.edu

IOTA NEWS.....
NA-203. Joel, HP7/F5PAC, was active from IOTA NA-170 last week, but told Jean, F6AJA, that he will be active this coming week-end from an island in the Los Santos/Herrera/Colcle Province Group.

OC-160. Bill, VK4FW (not VK3FW as reported last week - sorry), reports that he has postponed his operation to Cumberland Island due to transportation problems associated with equipment not arriving from Sydney. This operation centers around work commitments installing new monitoring equipment. New scheduled dates are February 11-16th. QSL direct only to VK4FW: Bill Horner, P.O. Box 929, Gympie, 4570, Australia.

OC-201. Bob, G3PJT, will be active as ZL4CC from Waiheke Island from March 8-13th. Although he will be active in the RSGB Commonwealth Contest, primarily on the 10th and 11th, he will be active for all/any takers outside the contest. His activity will be mainly on CW. QSL via his home callsign G3PJT, direct or via RSGB bureau.

SA-026. Paul, PY3DX (ex-PY3PAZ), informs OPDX that he is going to take his vacation from February 23rd through March 5th on Santa Catarina Island. He will operate mainly on CW (with some SSB) on all bands, but with special attention on the lower bands (80/40 meters) and some WARC bands as well. He states that his sunset on that island starts around 2200z and lasts until 2100z. He will use this time to call CQ on lower bands during the grayline for EU, NA and AF. The callsign will be PY3DX/p. QSL via home call or via bureau.

MM0, SCOTLAND. Leo, W3LEO, will once again be active from Portpatrick in southwest Scotland from about February 20th through March 14th. However, Leo states that this is once again a vacation not a DXpedition, and "time on the air will depend on the antennas, on propagation, and on when the nearby pubs are open, HI..." His callsign is MM0LEO and he plans to be in the ARRL International DX SSB Contest. He will use an Icom 706 (100 watts), a R-5 vertical [10, 12, 15, 17, 20 meters], and a 40-meter dipole [in inverted-V configuration]. He will try and get on PSK-31. QSL via his CBA (with SASE) or via bureau to W3LEO. Leo provided the following reference numbers: IOTA - EU-005 [Great Britain]; CQ Zone - 14; ITU Zone-27; Grid Square - IO-74ku and Worked All Britain [WAB] Square - NW-95.

NP2, U.S. VIRGIN ISLANDS. Dennis, K7BV, will be operating before and after the 2001 CQWW CW Contest as NP2/K7BV. He will use WP2Z during the contest. QSL all contacts with either call via KU9C.

PJ2, CURACAO (Update/Change). Last week we mentioned that Larry/K6RO and Charlie/W6KK would be active from here between February 27th through March 5th. Larry informed OPDX this week that his callsign was changed for the ARRL SSB Contest as SO/SB/HP entry. He will now be active as PJ2K instead of PJ2R (which has been already taken). Remember to look for them before and after the contest as PJ2/homecall on all bands CW/SSB. Larry states band country skeds is not a problem. His E-mail address is: k6ro@earthlink.net

PORTUGAL'S MOST WANTED. Carlos, CT1END, reports that the results of the Most Wanted in Portugal survey for the year 2000 have been posted to the Web sites: http://ct1end.freeservers.com and http://gpdx.netpower.pt

PW0, ST. PETER AND ST. PAUL ROCKS. On February 7th, at 04:30 local time, the motor-sail boat "OLD SMUGGLER" left for Fernando de Noronha with their destination to the St. Peter and Paul Rocks. On their way to the Rocks, they stopped on Fernando de Noronha and picked up another operator, Andre, PY0FF. The new operator bought with him a TS-60 for 6 meters that will be on the air 24 hours a day on that band with a 5 elements yagi. He also took along a complete SSTV station and another laptop. The PW0S

team arrived by the Rocks last Friday at 1300z, but landing was not possible due to high sea. The big waves were almost covering the rocks so they had to cancel the landing. Pictures of the high seas can be seen on their Web page. As this bulletin was being prepare, no activity has been reported. The team has decided to change its operating frequncies to avoid a conflict with the D68C operation. Suggested frequncies now are:

SSB - 3790, 7050, 14170, 18125, 21270, 24960, 28470 and 50115 kHz
CW - 1832, 3504, 7025, 10108, 14025, 18090, 21025, 24915, 28025 and 50095 kHz
RTTY - 14080, 21080 and 28080 kHz
SSTV - 14233, 21363 and 28683 kHz
They will have a 24 hour beacon operating on 50.006 MHz. QSL via KU9C. There is a web site with photos and info abt PW0S on: http://www.soutomaior.eti.br/mario

QSL INFO AND NEWS.....
NEW QSL INFO. David, 4L1DA, informs OPDX that QSL for 4L1DA and 4L0G should now go via DL7BO: Tom Hubert, PirolSTR.50, 12683 Berlin, Germany.

The FK8HC/P log for the operation from Tindu Island (DIFO FK-085) is now available (as of February 2nd) on the following Web page: http://f5nod.waika9.com/fk8hc_fk085.html

Jean Michel, F6AJA, reports that he has received the FM/F2JD card from the printer, and ALL direct request are mailed.

Tony, LZ1JZ, reports that he is the QSL Manager for Europe for OA4DKC. His address is: Anton Stefanov, P.O Box 43, Harmanli-6450, Bulgaria.

Alan, VK4AAR, has requested for the readers to be informed again about the following: "Please advise your readers AGAIN that, when QSLing VK's or to Australian managers, they should NOT send SAE's with Australian stamps unless they have access to the correct style of stamp for overseas destinations. This was originally to have been implemented on 1st Feb 2001 but has been moved back to 1st Mar 2001. Reply postage is gratefully received but PLEASE, PLEASE let US attach the stamps to ensure that mail will reach its destination. Finally, do NOT send cards for VK0LD to me (I do not have that log). Only VK0MM."

OUTGOING QSL BUREAU ANNOUNCES RATE INCREASE. "In response to the recent postal rate increase and price restructuring, the ARRL Outgoing QSL Bureau has announced new rates for this service. It is still possible to send ten cards for one dollar, but the twenty and thirty card rates have been discontinued. The new rate is $4.00 per each half-pound or portion thereof. This rate structure helps to cover the basic cost of handling the minimum number of QSL cards in a package while actually offering a price reduction for sending a half pound of cards (approx-imately 75 cards) which previously cost $6.00. The new rates will go into effect on March 1, 2001. The last Outgoing QSL Service fee increase was in January 1999."

S9, SAO TOME & PRINCIPE. John, W7KNT, informs OPDX that Tom, W7LUU, is now on the air as S92TX. Tom will be operating mainly on 10/15/20 meter SSB and some 6 meters soon. He has been overseas for the last 12 years with the State Department / Voice of America. His assignment just started in Sao Tome & Principe, and he should be there for about 2 years. QSL is via his QSL Manager W7KNT. ADDED NOTE: John also mentions that he will be there for about a month this fall or February 2002 of next year to work down the pileup's.

V2, ANTIGUA. Ed, N2ED, is expected to be active as V26EW from February 13-20th. He will also be active as V26G in the upcoming ARRL DX CW Contest. QSL via N2ED.

VP2E, ANGUILLA. Look for Ron/W8ILC, Don/N6JRL, Harry/AC8G, Ed/WD8MQJ and James/N8JE will be active as VP2EK from February 28th through March 7th. The group will be a Multi-Op entry in the ARRL DX SSB Contest. QSL via W8ILC.

XU, CAMBODIA. Frank, DL4KQ, informs OPDX that there will be activity from here by a German group between July 15th and August 3rd. Operations will be on all bands 160-10 meters including the WARC bands and 6 meters using linears. Modes will be SSB/CW and possibly RTTY/PSK31. A special emphasis will be on the low bands by DL4KQ. Exact callsigns are still unknown. More updated information will follow.

XX9, MACAU. Ulf, SM0GNU, will be operating as XX9TDX between February 12th and February 20th. Activity will be on all bands CW/SSB and possibly some RTTY. There will also be a SOAB effort in the ARRL DX CW Contest. QSL via SM0GNU (E-mail address: sm0gnu@swipnet.se)

YK, SYRIA. By the time you read this, the YK9A operation will be almost, if not, QRT. Press releases by Al, K7AR, sent out last week were basically stating they were doing the best they could with what they had. Al states, "Please keep in mind we are missing 3 ops and 2 amps and it is difficult to meet everyone's needs." They also had low line voltage problem. QSL via K9LA. Don't forget that the YK9A Web site is available at:
http://www.qsl.net/k7ar/yk9a_'01.htm
Also, pictures are available at: http://www.dailydx.com/yk9a.html

ZL7, CHATHAM ISLAND (ZK3, Cancelled). A press release by Ken Holdom, ZL2HU/ZL4HU, Group Organizer/Team Leader/QSL Manager for the Kermadec DX Association, announced this past week about a change in plans for the ZK3 Tokelau Island DXpedition. Ken reports, "After lengthy considerations and taking into account the very high number of DXpeditions that are being undertaken at present and those that are planned for the future, combined with the extremely high costs invloved in undertaking ZK3, we wish to advise with considerable regret that we will not be undertaking this DXpedition in July-August 2002 as planned. Our last DXpedition to ZL9CI in January 1999 was, according to all counts and responses, one of the most successfull DXpeditions ever undertaken and in order to keep the Kermadec DX Association reputation intact, we have decided to undertake a much smaller DXpedition to ZL7 - Chatham Isalnds in October 2002 to coincide with the CQWW SSB contest." All OPDX InterNet Subscribers will receive the complete press

release as an additional bulletin.

Jerry - You made the assumption that the twit (read troll) even has one to send back.

Of course when the moron looks under the hood of his "American" car, he doesn't have enough brains to know the air conditioner compressor on his "Mopar" is Mitsubishi or the speedometer on his Harley says "Nippon Seki" on the very bottom either.

No, they have libraries in West Virginia but the books are all in the local dialect of English known as the WV dialect. It goes something like this "Wee hare in Wess Virginia lik to half relashuns wit oar cesturs, dat explanes way wer crouseeyed an inbred. That pretty much describes the language skills of JBO and his ilk. Of course, his good buddy from east of Birmingham also speaks the same way.

I'm new to electronics and I am trying to build a small FM transmitter. The circut contains a 3-18 pF adjustable cap fo tuning. I can't seem to find any info on how these work. I assume that I turn what looks like a "screw head" inside, in order to change the capacitance. Does one turn cover the whole range, or many turns? Any information would be greatly apreciated

DID ANYONE HEAR THE RAIN REPORT, THIS EVENING? A HAM IN COLLIERVILLE TENN. WAS SENT A WARNING LETTER FOR JAMMING ON 75M. SURELY TO GOODNESS IT COULDN'T BE THE PILLAR OF THE COMUNITY, W4FQF!! IF IT LOOKS LIKE A PARROT, SOUNDS LIKE A PARROT, AND SMELLS LIKE A PARROT CAGE, IT MUST BE OUR BELOVED POLLY. I MUST SAYIT COULDN'T HAPPEN TO A BIGGER, MORE OBNOXIOUS JAMMER. THE ONLY SURPRISE IS HOW LONG IT TOOK TO SEND HIM A LETTER. THE SOB HAS BEEN DOING IT FOR YEARS, PLAYING THE HARMONICA, PLAYING MUSIC, WITH W4LLI AS AN ACCOMPLICE, JAMMING THE FREQ. DELIBERATELY FOR HOURS. tHE DUMB BASTARD NEEDS TO PUT ON HIS VESTMENTS AND DIE FOR THE BETTERMENT OF HAM RADIO. THE WHEELS OF JUSTICE TURN SLOWLY, BUT THEY DO TURN, EVENTUALLY, MAYBE AN EMAIL CAMPAIGN ON K3QAM WILL PRODUCE SIMILIAR RESULTS. THEY'RE JUST REAPING WHAT THEY SOWED.

There's different types. If its the type that just continues
rotating with no stop, then the range 3-18 pf will be in 180
degrees of rotation. Lets say you're going clockwise, it will
increase from 3 to 18pf and as you pass the halfway point it will
start decreasing back to 3pf. If you cannot see the moving
plates, its hard to determine where max and min are.
A compression trimmer will have a screw that will usually
"tighten" if you go clockwise 6 or 8 turns. Thats max capacity.

Bill Meacham
Vieques, PR

It's not so surprising if you have ever actually been to West Vagina.

In West Vagina, it's *mandatory* to have an incestuous relationship
with one's mother. Even if, as in Roger Wiseman's case, the incestuous
relationship requires exhumation.

HI Lee.

I think that the capacitor is probably one of those that you just turn it one in order to go from 3 to 18 pf. But just to be on the safe side you can do this little experiment to see if my theory is correct.

Hook up a 50 MEGA ohm resistor in series with the cap and attach it a 12 VAC voltage source. The esiest thing for the AC source is a transformer. If you can get a function generator and set the frequency higher then you could use a smaller value resistor, but the transformer is fine. Now, assuming the frequency of the transformer is at 60 Hz you should get these readings.

When the Cap is at 18 pF then the voltage drop across the resistor should be about 3.86 v. When the cap is at 3 pF then the voltage drop across the resistor should be 0.67 v. This way you will know when the 3 pF starts and when the 18 pF ends.

If you don't get the same values then remember that the higher the value of the cap the higher the voltege drope across the resistor.

> www.qsl.net/pd2mey

Ok, nice idea you have there! However don't claim you have all European repeaters on your site! I don't see any Bulgarin repeaters and I have used at least 10 LZs.

Citing by memory the three "national" repeaters are:
RV52 Peak of Botev (Kalofer)
RV58 Peak of Chumerna
RV50 Peak of Cherni wrah (Sofia)

I will try to get you a more detailed list in the near future.

However two things you HAVE to consider:
1. Don't use Java for the navigation frame! This is an overkill and many people, like me, have it turned off usually when they browse. For the rollovers you can do away just with JavaScript. And what is wrong with the plain old text for the links.
2. Why not instead of the main right frame, put a clicable map of Europe? Or something else?

I won't get into things like structured HTML and use of tag, as I see you are using M$ Front Page, but that is what I see as a semi-pro web designer.

Have fun!

Hello all,

My computer speaker is really crazy when its in combination with this computer.. This computer plus other speaker or this speaker plus other computer produces no same effect. The speaker demodulate what ever thats on RF portable communication device frequency(whats the frequency of this thing BTW?) It is 11:50PM right now and in the past ten min or so I have heared things like "do you want to go up and close the ramp?", "dig" "standback". I'm guessing its from some kind of construction going somehwere. My FM radio doesn't even pick up this so why should my computer speaker pick these up? Why is it demodulating all these weird sound? I can't understand how this is the only device in the house that picks up so much noise. Any RF guru with explanations??

Jeremy

Lee,
Sounds like your talking about a 'trimmer' capacitor. If
so, then they usually have a multi-turn adjustment.

So *YOU* say. My mom's still living, unlike yours. BWHAHAHAHAHAHAHAHA!!!

You know ALL about having sex with your dead mother, don't you, Raoul?

Poor little "Save the children" immigrant......Raoul was one of those poor, barefooted (in his case clubfooted) kids you see that are starving on t.v., the ones they BEG for somebody in the States to adopt, because noone in their own country wants them. Even some people in those Third World countries where Raoul hails from have some sense of decency, I suppose. He was adopted by some American foster parents, who helped him bring along the corpse of his Hispanic mother to the states, he had to have his penis surgically removed from her rotting, stinking corpse... Raoul just spends his day, grinning like the monkey that knows where all the bananas are hid. Usually, this lazy, mumbling dolt spends the day with his she-male friends, like "George Jones" and the wastes the day away emptying wastebaskets for the system administrator. Raoul never did complete his schooling, so he's always on the dole, begging on the streets for money to support his alcohol habit. You have to feel sorry for Raoul, who thinks that everybody is as ill-educated as he is. Raoul thinks everybody HAS to go to the library to look something up...You'll never find a book or anything educational in Raoul's hovel. He can't leave his state, mainly because his parole officer won't let him, so he never has been to "West Virginia," and has absolutely no idea how the people are here. He wouldn't come here and run his mouth anyways, mainly becuase he's a draft-dodging, squats to pee coward.

Poor widdle balding, sawed-off Jeffy-weffy, so bitter about his tenure as an indentured servant in the land of the rising sun. Which is quite ironic, since Jeffy-weffy's "career" was on the skids and heading downhill faster than a skier at Vail when he was "assigned" to his current assignment. Jeffy-weffy's only sure way back home is in a pine box after ingesting that poisonous fish they serve over there.
Jeffy-weffy, fyi, I went to a protest in a nearby town a while back, because the Klan was going to march in that town. I supported the protesters AGAINST that sort of thing. I think YOU're a fucking closet klan supporter, Jeffy-weffy. Now go pay those enormously inflated prices in Tokyo, Geisha-boy. Mwhahahahahahahahahaha!

How about that. But there are multi-turn trimmer caps.

Hi All.

Just to say that Mako JA3HHT has released his Alpha test versions of his new SSTV software called MM-SSTV. I have it on my download page if you are interested in having a play :-).

http://www.btinternet.com/~g3vfp

Cheers,

Dave G3VFP

"B-Squared" <rbethman@home.com>
shared these priceless pearls of wisdom:

->Sorry Doc! But every rig I have here now and have ever had - trimmers are
->NOT multi turn.

Most vintage and some notsovintage radios have the Arco mica trimmers in them
and they are all multiturn multiplate capacitors. As you get up into microwave,
the quality piston trimmers (JFD et al) are all multiturn.

Greetings...
I've had a few bites, but nothing concrete yet. Still looking for offers.

Up for trade is a beautiful Yaesu FT-920 with TXCO board and FM board installed. I am the original owner of this rig, and bought it in late November, 2000 from AES Milwaukee. Includes original box and manuals in perfect shape!

Looking to trade for another 'Big Rig'...in particular a Kenwood TS-870S, Kenwood TS-950SD, or perhaps an Icom IC-756. For the right deal I'll throw in the matching Yaesu MD-100A8C desk microphone, also bought new in November.

Reason for trade? I just like playing with new equipment! Would prefer an 'in-person' trade. I am within driving distance of Chicago, Milwaukee, Madison, WI, or perhaps even Twin Cities area if you want to meet half way. Will listen to offers from anywhere, however. E-mail w/ offers.

It's difficult to find one logging program which has all the features
you need. I never found one; you have to compromise, or write your own.
For example my biggest problem with Logger is that it does not have
separate fields for comments, name and QTH, just one big comment field.

I settled on VQLog; http://www.vqlog.com/ .. cheap and quite good.

Maybe a shorted filter capacitor, but something would probably be getting hot. An open diode in a bridge? If the transformer primary has a switch for 110/220, it probably shifts primary windings from series to parallel, and would be parallel for 110 operation. What if one of the windings were open? Or maybe there's a voltage reference where either a zener or its bypass cap is shorted, or the resistor supplying it current is open, making a reference voltage be too low or zero. Or if there were some load shorted, which is causing foldback current limiting, which might not make anything real hot, but would still keep it from working. Might there be other internal fuses, like the real small ones that solder in and look like 1/4 watt resistors?

john

3017. AC Inverter with Car/Sinusoids

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-14 01:20:47 UTC
From: Wayne Watson <mtn_view@sirius.com>
Message-ID: <3A89DD6F.4B1E2CE4@sirius.com>
Source record: 93496

We recently had a power outage. Although I have some 12v rechargeable batteries for powering some
light bulbs (either DC bulbs or AC with an inverter), I thought I try an experiment using my truck
to provide power through an inverter. I hooked up the inverter and a 75 watt AC bulb and had no
trouble providing light through a 200w inverter. I did this for about 5 minutes. After the outage
decided to call a local electrical store about using a 500w inverter so I could power even larger
pieces of equipment. They said this use was not good for the battery, and suggested at least doing
it with some more 12v rechargeable batteries. What's the problem with using my truck battery as I
did? The car was outside the garage and house.

Down the road I can see trying to power some PC equipment with batteries or even a gas driven power
generator. I've been told that using a generator that does not provide a sinusoidal waves is not a
good idea for computer equipment and their motors that drive the CD-ROM, disk drives etc. In fact,
it's not a good idea with conventional motors. Any comments on the necessity of using sinusoidal
waves in such a manner?

Bruce W,
I assume from your email address, and the subject of your post, that you advocate discrimination against the B.S.A. Can you give me one good reason why a private organization can not limit it's membership? You know, like the U.S. Supreme Court said that they can do? Seems ~you~ and your fellows(?) are the ones doing the discrimination simply because you are not eligible for membership. Sounds like 'sour grapes' to me. Or, you want your cake and ... on second thought, I don't think I wanna go there. So, since you don't have any legal grounds for your opinions about the B.S.A., why don't you go hide in a closet, and take your friends with you.
'Doc / W5LZ

PS - I can't care less about your sexual preferences. I DO care when you get 'in my face' with them. You keep your preferences to your self, and I'll keep how I feel about your 'type' of perversion to my self. Hows that?

>Any help is appreciated.

Reset it. Look in the manual for instructions.

One other technique not so drastic if you have one of the controllers is to
just upload a basically blank template to the radio. There is at least one
freeware version which will do this for you. You do however need the cord
going from your radio to the computer with the hard part being getting a four
ring 3/8" plug, the easiest source is Yaesu, now Vertex.

Ok Heres my problem. I recently came into possession of a yaesu ft-2600m radio. When the radio was sold to me I was told that it would go into the transmission ranges of 109-134 with these being receive as well. I got the radio with the one published mod and it will transmit into the 134-174 mhz area but will not go down into the 109-134 which is where I also do a bit of listening. Can I get this radio to do it and how and should I just chuck it and get one that will and take a 200.00 hit. Any help would be appreciated.

How do you know? Have you been aboard every transoceanic flight
every day for the past 30 years? If not, then you have absolutely
no knowledge of whether any flights encountered communication
difficulties because of you and your friends. Even if just one
flight was interfered with because of you, that's one too many.

No 73 for you.

Unless the discussion is how well an HT works stuck up some homosexual's ass, I fail to see the relevance in discussing homosexualty, destroying the fine reputation of the Boy Scouts, etc., in a ham radio newsgroup.

Let's discuss the hobby, communication methods, etc. The hobby is the purpose of this newsgroup.

iam interested in a ham radio!
what are some of the typical ranges in miles that they can reach??
what would be the best type of radio to purchace??

i have seen lots and lots of ham radio stuff and i was just looking for some
input from the hams that are out there on what would be that best radio to
get. iam new to the 2way radio thing, playing with cb's
and would like to take the next step.
i do have freind that live about 50 mile from me i would like to keep
in touch with.

thanks

sal

The earlier group of 2XXX series Yaesu would go there and FAA complained
about FM transmissions on the AM Aircraft Band. Unless you are MARS/CAP
certified, the "mod" should be unneeded. The FT-3000 has extended
recieve however.

Homophobia?

I don't believe that I, or anyone else that frequents this newsgroup have "fear" of queers. I, for one, don't happen to believe that homos are discriminated against. Yeah, that's right, NOT discriminated against. You can hold a job, you can do what you like in private, you have freedom of speech--all the rights of any other American. What the "gays" ARE doing is trying to push a filthy, perverted, Godless, and WRONG lifestyle onto the public. But again you have the right to believe what you want, and I have the same right. One of the things that let this particular "cat" out of the bag was the trend in society to blame somebody else for their own actions--relegating responsibility to "others", or some "factor" in their past. The thing here that is missing is personal R-E-S-P-O-N-S-I-B-I-L-I-T-Y. Regardless of one's so-called "orientation", one can CHOOSE how one will act in and towards the public. The simple fact is, normal people, that is, Heterosexual people (the way GOD intended) will NEVER accept sodomy. It is not so much the fact that homos have been around forever, but the fact that they try to ram it down our throats where our gut reaction is similar to coming across a rotted corpse in the woods. It is a NATURAL reaction and will not be changed.

The thing that separates so-called homosexual discrimination, or homo-phobia, as you put it, from racial, female, or age discrimination is that people subject to that kind of discrimination can't CHOOSE their race, or gender, or age. These things are natural, homosexuality is not. Homosexuals may, or may not, "choose" their orientation, BUT they CAN choose whether to engage in sodomy, or whether to try to ram it in the public's face. As to the Boy Scout issue, they are a private organization, and private organizations still have the right to freedom of association--as do individuals. A heterosexual has to wonder WHY it was so important for gays to have access to BSA--especially as it pertains to Scoutmasters. Sorry, we can't help but wonder if it was the temptation of those tender young "sweet" virgin boys that made such access so important. Again, the issue is, not one's orientation, but the attempt to force it upon others. OK, so you're gay. Fine. Just keep it to yourself. People will likely "know" you are gay anyhow. But you are less likely to have trouble if you keep it to yourself. That's ALL. I would not harm a "gay" person just because he is that way--only if he attempts to make a "move" on me might I knock hell out of him.

The Bible says this is wrong. As with everything else, each person can choose to believe this Book or not. But for a quite convincing dis-course against it, read the book of Romans, Chapter 1, starting about

verse 18. After reading that, I cannot help that the "diet" related
to homosexuality IS related--you know, the one that guarantees to make
one slim. Trouble is, you just don't survive it.

Try resetting the radio - if THAT doesn't work, you might try finding
where the lithium cell is at (the battery that holds all the channel
information in the CPU) and removing it for a few minutes - this may
reset the CPU and let the radio operate correctly again...

On the contrary, Jerry, I'll bet that the majority of the world's
heterosexuals practice sodomy (as defined by the sodomy laws).

Hi Folks,

it seems the "Good Ol' Boy Group" AKA... The ARRL world never changes....

The history:

I was interested in becoming a OO, and I figured with my experience with Amateur Radio. I could offer my assistance.

This is the REAL deal... I was reading the paperwork in becoming a OO. and It seems, Me, a Licensed Amateur Radio Operator for 12 years, cannot be an OO for one stupid reason..... I haven't been a ARRL Member for at least 4 YEARS!

MY QUESTION TO THE ARRL BOARD...

WHY THE HECK SHOULD I BE A MEMBER OF A CLUB OR ORGANZATION TO BE A OO?????

I MEAN, WHY SHOULD I GREASE YOU PALMS WITH MY HARD EARNED CASH, JUST TO PROVE I'M ABLE TO BE A OO?????!?!?!?!?

WHEN IN ALL TRUTH, THE DAMN ARRL DOSEN'T GIVE A DAMN ABOUT IT'S MEMBERS, GEORGE RACE PROVED THAT WHEN HE TOLD ME AT A APPEARANCE HE MADE HERE IN DETROIT AND SAID THE FCC WAS GOING TO DO WHAT THEY WANTED, (ABOUT THE LICENSING CHANGES...) NOT MATTER WHAT THE PEOPLE WANTED AND THE ARRL DIDN'T DO ANYTHING ABOUT THIS....

BOTTOM LINE???

THE ARRL IS MORE INTERESTED IN THE BOTTOM LINE: MONEY!!!!

WE DON'T WANT YOUR HELP, UNLESS YOU ARE PAYING US MONEY!

SIGNED,

A SOON TO BE FORMER ARRL MEMBER!

From http://www.arrl.org/FandES/field/org/oo.html:

2.Must be an ARRL Full Member and have been a licensee of Technician
Class or higher for at least four years.

The four-year requirement applies to being licensed, not to ARRL
membership. You need only be a current ARRL member, which is true for
any ARRL field organization appointment.

> MY QUESTION TO THE ARRL BOARD...

...should probably be addressed to the Board.

> WHY THE HECK SHOULD I BE A MEMBER OF A CLUB OR ORGANZATION TO BE A
> OO?????

Nothing prevents anyone from notifying (politely, one hopes) a ham of a
problem in his or her station operation. You just can't do so under the
auspices of an ARRL appointment unless you are a member and have been
appointed. That doesn't seem unreasonable to me. If you are still
interested, your SM is the place to start.

It depends on which band you are operating on, time of day, season, solar propagation, etc.

> what would be the best type of radio to purchace??

It depends on your license. Stay with one of the big three: Yaesu, Kenwood, Icom, imho. I'm partial to the Yaesu brand.

> i have seen lots and lots of ham radio stuff and i was just looking for some
> input from the hams that are out there on what would be that best radio to

> and would like to take the next step.

Study and get your license if you already haven't done so. Then shop around.

> i do have freind that live about 50 mile from me i would like to keep
> in touch with.

You should be able to do that, depending on the repeaters in your area.

3047. Errors with FCC ULS?

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-14 20:42:16 UTC
From: willieb@org.net
Message-ID: <3a8aec53.2476141@news.accessnv.com>
Source record: 93524

I want to apply for a vanity call sign.
When I try to register with the FCC Universal Licensing System - TIN/Call Sign/ASR Registration, I get the following error after hitting the "submit" button:

"This TIN and SGIN has been previously registered with the FCC"

I have never registered or tried to register prior to today.

When I try to log in (which of course doesn't work because I can't register) I get the following error:

"TIN, SGIN and Password combination is not registered with the FCC"

Any ideas? Is someone using my TIN? I used my SSN for my TIN. Is that what I am supposed to use?

3048. Public Retraction (WAS: This is TOO FUNNY!)

I'll bet the bastards
an ARRL member too. Probably got in on the League discount membership plan.
All this started me wondering, What make a ham a ham? Is a ham someone
that's working to improve their knowledge of radio theory, electronics and
operating skills?

Well guess what guy? All of us ham have different drives. Some of you might
obsess with code practice and technical details but surprisingly there are those
of us who just enjoy the friendly banter with folks just like us from around the
world. You did recall that part of being a ham was being able to do that right?
Yes, we do good work in times of disaster and we try to be upstanding citizens but
the bottom line is we are human with human needs. Relax my friend and enjoy the
hobby your way and others will enjoy it their way. A little tolerance goes a long
way.

And the facts are that despite your attempts to normalize your perversions, you are still a sodomite promoting unnatural sexual practices. You never will be able to have kids of your own making but rather promote adoption of children. One has to wonder why the selfish perverts want to adopt children, because perhaps they can recruit more fawning fags into their movement. Keep your perversions to yourself and your filthy friends. Sicko.

Yes it just shows that Bruce W is supporting and promoting his homosexual lifestyle on others. Perhaps he is also promoting his lifestyle to young men and very impressionable kids. Its not natural to be queer but rather it is a lifestyle choice. There is no gay gene even though the homosexual lobby desperately grasps for legitimacy.
That is why they have to get the politicians on their side so they can give homos special treatment

Typical homosexual/Lambda response. Anybody that says anything about homosexuals that does not support there choice in life is automatically a "homophobe". Does that then make every homosexual a "heterophobe"? Homosexuals try to take every opportunity to shove their choice on everyone else with the purpose of trying to get everyone to accept the choice as natural. It's not. And the discussion of it does not belong here. You're right Bruce, this is not my choice, but it is the decision of the folks that started the newsgroup and I can find nothing that says this newsgroup is for the discussion of anything but amateur radio, not people's political beliefs or their sexual preferences or choices.

Furthermore, you criticize me for making proclamations, then you make a proclamation "it has been long claimed by members of both news groups that hams are political....yada, yada, yada. Well it has been long claimed by these same hams that discussions on homosexuality and other sexual choices do not belong here.

Taking your absurd position, any topic should be discussed in the ham newsgroup. Because hams have pets, we should discuss pets. Because hams drives cars, we should discuss cars here. Keep the homosexual discussions in homosexual newsgroups where it belongs. Keep the radio discussions here.

Max,
Very basically, it's used as a switch to turn on/off
various things which are 'tone' controled. A particular
tone turns on/off this, another tone turnes on/off that.

These are the tones used to control autpatch on repeaters and dial numbers.
They are the same as on a touch tone telephone.

They are also used to control repeaters and many other things.

I don't believe we need to discuss Fudge Packers & Colon Cappers in this newgroup, they're off-topic. We should be discussing the decline of the ARRL and why they don't want to petition the FCC to help improve amateur radio operators and their operating practices.

Just a thought.

Yep, and all the "predictions" become false. But don't tell Mr. Davies this or else he'll give you a piece of his mind. Cause profit Stair is his spiritual leader.

>I marveled at how God used the EXACT same catch phrases as Bro. Stair. Isn't
>that amazing??

Your speakers are acting as a detector for RF. I have the same problem with
a set here. I replaced them with another type. That fixed it. You may or
may not be that lucky.

You can try ferit beads on ALL leads going to/from the speaker. Or capacitors

to by-pass the RF. Thats about all there is. It is poor design of the
speakers that is your problem.

Hi all,

I need some input on the Drake L7 HF amp. I can't find much in the way of reviews, complaints, etc. on the amp (online). The nice look of the amp and a few other things caught my eye and I was thinking about purchasing one. What are the pros / cons of this amp? Would I be better off with a Kenwood TL-922A ?

I have looked at the online Drake muesum already.

Thanks,

Scott.

3085. Help : TS440S display fault

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-15 19:51:01 UTC
From: gaetan horlin <cesgai@swing.be>
Message-ID: <3a8c33c3$0$19277$5a62924d@news.skynet.be>

Cross-posted to: rec.radio.amateur.misc,alt.ham-radio.vhf-uhf,fr.rec.radio.amateur,rec.radio.amateur.dx,uk.radio.amateur

Hi all and thanks for reading this message,

I own a TS440S and I have a problem with it. When I switch the power ON, the display shows many strange characters. Also, when pressing buttons on the keyboard or turning the tuning knob, there is no change; they just not respond.
The only solution to solve the problem is to switch it OFF and to switch it ON again while pressing the A=B button. So, a reset of the µprocessor is done and the transceiver works again but all the memory has been reset and lost also. I thought the problem comes from the reset circuit of the µP and I tried to do a manual reset instead but the problem was not fixed.
Once the transceiver has been reseted, it works fine all the time it is ON.
If one of you experienced the same problem, I should be very happy to know how you fixed it.
On the other hand, I also had PLL lock problems (dots on the display) which I could solve; if you want to know how, just ask me.

Thanks in advance for you help.

3090. Jesse Jackson has a second child....

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-15 23:48:33 UTC
From: Buzzsaw <"Catch Me."@edu.com>
Message-ID: <96hppk$u17$0@pita.alt.net>
Source record: 93468

Atlanta: AP Representatives of Jesse Jackson have admitted that Reverend Jackson is indeed the father of yet another "love child", though this child is much older than the most recently reported upon daughter. This child, a male, was conceived some thirty years ago when the Reverend Jackson was visiting a mental facility in Glendale, West Virginia during a good will tour. Jackson admits to a sexual liaison with the mother of Roger Wiseman while she was confined to the facility for treatment in January, 1955. Little Roger was born nine months later, shortly after her release from the facility. Jackson was unavailable for comment, but his spokesman said that Mr. Jackson "deeply regrets" what occurred so many years ago. When asked why, the spokesman said, "If you have seen Roger, you will understand."

3091. Olde Tyme Radio Online

Newsgroup: rec.radio.amateur.misc

If you are a fan of Olde Tyme Radio, or if you are simply curious about the golden years of USA Radio, then this is definetally something you will not want to miss. Classic Stars Radio is an internet based radio station on iM-Networks which concentrates on 30's, 40's, & 50's radio serials. You will hear shows like Jack Benny, Amos & Andy, The Bing Crosby Program, as well as Groucho Marx in You Bet Your Life. Each week is a trip back into the golden age of radio some 70 years back. Classic Stars Radio is on 24 hours a day, 7 days a week, 365 days a year. If you'd like to listen, all you have to do is go to http://www.sonicbox.com, download their iM_Tuner, and tune to station V 8. There you will find Classic Stars Radio. If you don't like what's on our station, hell, there are 800 other stations on the tuner, I'm sure you'll find something you will like! In any case, we hope you enjoy the station!

As I type this, WA9KJI and K5MVK are having a lover's spat on 3950. Seems that Dimwit Dave is mad at K5MVK for participating in and praising the Liberty Net. Ah, nothing worse than a woman scorned. LOL!

"Political Correctness is nothing but tyranny with manners."

I think David needs to get it
out of his system via a repeat of his
famous "jogs around the block" in his
underwear like he did a few years ago.
(or did he do that time neekid as a jaybird?)

Yes Roger, I seem to see a significant increase in the quality of articles in this NG now that only people with the wherewithal to use their news servers can post! It's not that difficult but this shows that even a little filter is a good filter in situations like this.

I just recently got back into ham radio after a twenty year absence
and I am amazed at what I have heard so far (in a week) on 2m
and up on 440. On the local 2m machine there is a guy from the
local club with a stopwatch running 24/7 who butts in and orders
users to identify if they run over the ten minute limit by 15 seconds
or so. I guess he's a repeater cop or something. Gotta love that.
On the University of PA linked repeater system on the other hand,
443.700 it sounds like channel 19 of the cb. Nobody identifies and
I swear I even hear them using echo mics. (They need a repeater
cop) I have yet to set up a 10-80 m rig and I am half afraid of what
I will hear there.
The Phoneman

I have a Drake L7 and would not part with it. Drake runs the 3-500Z's conservatively. You are unlikely to ever see 1500 watts output on any band- 800 to 1200w is more likely. It is a nice-looking, compact amp. Mine has been extremely reliable. I believe you would see a little more power output with the Kenwood TL-922. I would still choose the L7 anyway. 73, David K3KY

As most of you know by now, Deja.com has been sold and the name changed to Google.

Notice that, as currently structured under Google, the new system does not allow postiing...only retrieving of previously-archived messages.

Me thinks someone got smart and realized the huge potential legal liability of all the libelous and defamatory content which has been posted anonymously from deja.com.

Much of this crapola has been posted in the radio newsgroups over the past few years. Good riddance!

Sigh. It sure got very hot. What is sad is so many folks wanted to hide behind various identities whilst they posted anything from simple flames to URLS with what could best be described (in some cases) as porn. One of the last posts I read before deja.com sold out was the fact that the filter could be set to eliminate anything from deja (which I was posting through). Oh well - I second the good riddance!

Heh .. well, I also got back into the ham radio game (in 1993) after being off the air since 1969. Although I passed the extra, I have been only on 440 FM. Great bunch. The repeaters are set to time out around here after only 3 to 5 minutes, and, sure enough, I did it once. Most embarassing! Good bunch of folks though - probably all of us have done it at one time (even one of the repeater owners did it!), but no cops needed. The closest we got was one guy going on and on about the need for CW. Fortunately, the repeater owner was present for the discussion (we go back as friends to 1963) and, being friendly and helpful fellows, switched to F2 at about 40 per! Just breaking the chops, so to speak. I don't think we have ever had cross words between guys however. Maybe we are just lucky. We do have linked systems (10, 6, 2, 220, and 440) and have probably had a problem at some point, but I have never heard one.

Sal, assuming you will be going for a general (or higher) class ticket since the code requirements have dropped to 5 wpm, you will find virtually no limit running modest power (100 watts, typical of many transceivers). I called for a phone patch from Guam Island when stationed there in 1968 and raised a station in Webster, NY. I was running all of 15 watts into a beam. My signal was quite low (hey, close to halfway around the earth with 15 watts, I would expect that), but the station said he'd try the patch if it was local traffic (it was - to Pittsford, NY). I had 3 choices. Leave everything alone and try the patch, or tune the Collins transmitter up to rated output of around 100 watts), OR - since it was pre-tuned for max smoke - hit the switch on the Henry 2K. I hit the switch - and knocked the speaker off the Webster stations' desk! We did have one guy who regularly ran phone patches running 15 to 20 watts on an all transistor transmitter (that was big power for a transistor back in 1968). Yes, he ran patches with 20 watts or less from Guam to the US. It helped, of course, that he 'borrowed' the BIG rhombic antennas on base for that operation. They were 600 feet on a leg and 200 feet in the air. Many, many patches were run on 100 watts, however. I ran a bunch from KG6NAC (the US Naval hospital on Guam) and KG6AAY (the naval receiver site on Guam). Most, but not all, were on 20 meters. The one to Webster which started with 15 watts was on 10 meters. For a range of 50 miles, you could probably use a repeater on VHF or UHF if it is located somewhere between you and your friend; otherwise, 75 or 160 meters will work just fine. I used to talk to some buddies in Buffalo (50 or 60 miles) once or twice a week back in 1964 during the daytime on 160. If you have some good space for a big antenna, 160 can work some wonders. 75, of course, will do this on a smaller antenna. Either band will do well day or night, but evenings will find 160 quite a bit less crowded. By the way, the limits on 160 back then was 25 watts at night for my location. I ran 25 watts at night and a bit more during the daytime (I had a Johnson Ranger, max 65 watts AM, 75 watts CW). I did manage to break into a gang from the South on 80 meter CW in the evening IN STANDBY, likely running less than 100 milliwatts to the antenna. A good friend, Tim, WB2KAO was in the shack with me. Several hundred miles on 100 milliwatts ain't bad!

3116. QUESTION: SWR reading for HT and RS 20-176 ground plane

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-16 23:52:16 UTC
From: athasa@massed.net
Message-ID: <3A8DBD29.F84@massed.net>
Source record: 93404

I have an Alinco DL-V5 handheld and have it connected to the Radio Shack 20-176 ground plane in my attic. Its receive is fantastic, but I have read (Monitoring Times) that it also does a great job for transmitting as well. I am reluctant to transmit out on it for fear that perhaps the SWR is off and I could damage my radio. Am I worrying needlessly? I'd prefer not to spend $80.00 on a SWR meter to test a $20 antenna.
Much Appreciated, Artie

Why do you think Dimmy O'brainless stopped posting his trash using suzy the pig. The pig that he is, pig vomit I should say. I believe that the anonymously posting are bad for the news group and bad for the name of AMATEUR RADIO. This news group is probably the first exposure the public might get to see amateur radio. All we do is fight and call each names.

Definitely audible in NE Pennsylvania. Sounds like packet bursts.
Have any Public Safety departments there recently acquired MDTs? Just a
suggestion.
Hearing a lot of Morse IDs lately also.
By the way, I hear Orange County loud and clear and most of these signals
are on Orange frequencies.

Bullcrap. You and your butt-buddy George have been going through Deja for years with about five aliases each. Do either one of you ever embrace the truth? I doubt it. Off to the killfile you go, along with poor Georgie's pathetic aliases.

The porcine, newly reconciled unemployed blusterer posted this. Tubby can, now that a reconciliation has taken place, stay up to all odd hours of the night, drink cheap Old Milwaukee and spew hatred while knowing that his Georgia Peach will get up tomorrow and go to work to support his nasty habits. Who knows? Maybe a "twistie" or two will work the way into this, also.

That would explain his never ending "munchies".

Since Deja.com has sold the newsgroup archives to google.com, obviously there can't be any more anonymous posts from Deja.com. However, since google.com has announced they intend to add posting capability in the near future, we can expect to see anonymous posts from them in the not so distant future instead.

3144. Public apology to Iraq from Britain

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-17 14:58:41 UTC
From: Radio Ham <nospam@nospam.demon.co.uk>
Message-ID: <982422586.8881.0.nnrp-12.9e98250c@news.demon.co.uk>
Source record: 93423
Cross-posted to: uk.radio.amateur,rec.radio.amateur.misc

Ham Radio has a tradition of encouraging international links and friendship.
As a radio ham, I am appalled by the sickening and unprovoked attack
by 8 British war-planes on the country of Iraq, and I unreservedly
apologise to Iraq from Britain for this murderous and criminal activity.

Was Iraq guilty of flying in the so-called "No Fly" zone? No!!
Was Britain guilty of flying in the so-called "No Fly" zone? Yes!!

Who, then, is the real criminal in this matter?

Britain has recently pursued, with great publicity, a kangaroo court
against those who were accused of the Lockerbie bombing.

Who, now, therefore, should be pursued and be SUBJECT TO THE
IRAQIAN PENALTY FOR MURDER?

It must be none other than the head of state, who, in the case of Britain,
is ELIZABETH WINDSOR. This woman has been directly responsible for
countless murders and atrocities for nearly 50 years, and it is high time
that she was dealt with.

(If you want to make your own feelings known to her, she is
coming here to Chippenham, Wilts, UK on March 16th. If you
_DO_ come, I exhort you to behave in a peaceful law-abiding manner,
and not in the criminal war-mongering way which she herself has displayed
for nearly 50 years and which is distasteful. I suggest that what you
should do is to line the streets, and when she approaches, to turn
your back on her, as in the style of a Mexican Wave)

Whoops, sure misread the orginal quote. It IS parental responsibility that is required, not more laws that give lawyers more ways to extort money from sellers or manufactures.

Still, laws don't save lives. That unfortunately requires people with common sense. It is easier to get a gun that to learn how to handle it properly.

In the wild, children (read baby animals) are always easy targets for
preditors. The same is true with humans, whether it's a child molester or a
politician.

Well I for one am PROUD of the stance Britain and her ally have taken with
this murdering despot. My criticism is that we failed to do the job
properly when we had the chance. The sooner this evil dictator gets his
ticket out of this world the better. My other regret is that we did not do
the same with the murdering IRA. Still, there's time. My personal thanks go
to all who stand up for what is right.

3155. ???HF Remote Base Controller Recomendations???

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-17 17:30:12 UTC
From: "Thomas M. Alldread" <tma@mail.island.net>
Message-ID: <29dt8t83g6sae985q7fbho8h8pnopnvh35@4ax.com>
Source record: 93344

Greetings to All on this List:

A group of us have just started to look at setting up a 440MHz repeater as the nucleus for an HF remote base system. Ultimately we want to link this system to a 2M repeater to provide VHF access to the HF remote base as well. We currently have a couple of modern ICOM HF rigs within the group to choose from that we would like to use for the remote base rig. It has been already decided to use Motorola equipment for the UHF repeater and full duplex link equipment with commercial antennas and duplexers.

We have not decided on the controller equipment to use. I would like to hear recommendations from those that have experience with setting up a similar HF remote base system. We basically would like to be able to remotely DTMF control all the serial port controllable features of the HF rig, to remotely select antennas, to remotely control at least one antenna rotator and to be able to keep tabs on the status of the site. Digitally generated voice confirmation for all the remote commands would be needed for feedback to the operator.

Although I have done some Internet searches I have not yet recognized an off-the-shelf controller package that will do the whole job. A friend of mine set up a similar remote base about a decade ago that used a Commodore 64 with a custom interface that does pretty well everything we need but I am wondering if there is a more modern alternative. Are there modern embedded controller systems available for this application or alternatively a PC software package possibly using a pair of sound cards for audio interfaces available off-the-shelf? I guess basically I would like to identify all currently available modern controller equipment packages that are designed to do the job and hear recommendations plus pros and cons from those that are experienced with HF remote bases.

Thanks in advance for all your help!

73 & Enjoy!
Tom, VA7TA
Very Best Regards,

John, I'm a member of the NRA and I think parents should be held
responsible for the actions of their minor children. I'm sure the
NRA is opposed to putting loaded guns into the hands of children.
I never allowed my minor children access to my guns and now I
don't allow my grandchildren access to my guns.

Hiram, Georgia is a dirty little dot on the map that most folks would prefer to drive around. It is marked by one liquor store (Mike's), a couple of barn red dirty little hovels with junk cars in the driveways, and a few stray dogs of the two-legged variety. One of the dogs has four legs and is the only Hiram resident that has a complete set of teeth.

Artie,

First I would make sure that I had a license to transmit
before I started to worry about SWR problems.

But, in general I would never use an antenna that
I had not checked for tune. By all means, buy, barter,
or borrow an SWR meter to check the antenna.

You will find that SWR is not really important to
receive, but is very important for transmitting.

The receiver also works best into a 50 ohm load
but no damage will occur if the load is not matched.

Nice troll, but remember, unlike most countries, when you fire at the US, we fire back. How long did you think we would tolerate Saddam's daily firing at our planes before we did something about it? We could ignore it when he was just shooting wildly into the air, but when he added numerous computer linked radar tracking stations to give him better ability to aim his missiles accurately, he knew damn well what would happen.

Being the chicken sh.t he is, he made a big mistake in thinking that he could escape retaliation by hiding his radar control stations among the civilians in and around Baghdad. Wrong... Then, as usual, he rolls out his phony hospital footage which we have all seen time and again. Too bad nobody believes it except the media controlled ignorants in Iraq...

Thankfully, there's still a few people left in Britain who have not lost their "stones"

Well your class of ticket is higher than a General class but less than a Extra.
Basically it means that you don't have to take a CW test for the extra test, just
the written. You still have all the same privileges. The generals still have to
respect the advanced portion of the bands. Your still a advanced class operator.
There will be no more new advanced operators.
73 I hope I helped you

Sporting firearms in the hands of children is NOT a bad
thing.

My children (when they were minors) and my grandchildren all
did/do have access to my weapons after I have satisfied
myself
by instruction and observation that they are competent and
responsible. Just as my dad/grandad did for me.

I am totally comfortable with accepting the consequences
of my kids/grandkids use of sporting firearms. Those
consequences
have been very tasty.

Cotse does not care about flamewars, unless they violate our policies.
You are involved in a flamewar and you want to win it by terminating
your opponents account. Sorry, we do not take sides in flamewars.
Radio operators are always feuding, both on and off the air.

You claim all this libel. Well, if that is true then you need to
subpoena our logs and sue the person for libel. We will turn over logs
upon subpoena after giving our user 14 days to quash if they desire.
That is under the law. Then you can properly address all this claimed
libel.

The only one who can judge libel is a judge in a court of law who has
fully heard both sides. We are not a judge. If you sue and win,
meaning it is shown by a court of law to be libel then we will terminate
the account for libel. We cannot play judge and investigate every shout
of libel. Libel is for a court to decide, not an ISP.

Also, you have it correct in your later post. If you do not wish to
read this posters posts then add @cotse.com to your kill file and you

won't see any more. Stop it by killfiling , ignoring, and not playing the flame game. But, I don't believe that you want to stop the flamewar. This is evidenced by the crossposts to the nose and all kinds of other groups to fan the flames by you numerous times (not just this post).

We will only terminate if they violate our policies on:

http://www.cotse.com/abusepolicies.html

We will not terminate so you can win your flamewar.

An item regarding the attachment opening. I never open attachments from someone I don't know. Including Doc attachments. If you believe this is paranoid and clueless, a demonstration can be arranged as to why it is bad to open unknown attachments if you desire. It can even be made to look like it came from webTV if you feel that would be safer.

Now, allow me to demonstrate the proper use of a kill file, watch learn, and copy.

/steve

Is it not strange that Iraq which claimed to need such massive armed
forces to prevent itself from being over-run still finds that it has not
been over-run now that it lost most of them as a consequence of its own
aggression? Iraq is still firing missiles at UN approved aircraft and so
incurred the current mild punishment.

I do not accept that any-one can apologise on my behalf.

Dont apologise on my behalf. Im all for bombing the bastards. As for the ham radio bit, it dosnt say anything about encouraging international friendship in my BR68. However it does menton a bit about NOT talking politics.

Are suggesting that a 16-year-old can be trusted with a car but not a
pistol?

Under this law, a "child" is any person under 18.

You can use any terminal program to run the PK 232. I use Procom to run mine.
But windows hyperterminal will work fine.
I hope that helps

Depends on how you define minor children, Cecil. Nobody has a problem with keeping guns out of the hands of _young_ children, but I was 13 when I first started hunting on the farm alone. I would really hate to see laws that might cause parents to be more restrictive when it comes to this.

Furthermore, this law would make you responsible for the actions of your 17 year old. Can any parent honestly say that they can truly control the behavior of a 17 year old that is determined to do something?

Hell, for that matter, can any parent really control a determined 12 year old? When I was ten, there wasn't a lock in my parent's home that I couldn't get past. I figured out how to pick most locks and simply took the keys to locks I couldn't pick.

The only way to be truly safe from this law is to eliminate guns in a home with children, which is exactly the agenda of those pushing these laws.

3212. Intercom Interference Potential?

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-18 04:21:48 UTC
From: njradiodude@aol.com
Message-ID: <20010217232148.05885.00000037@ng-fm1.aol.com>
Source record: 93290

Hi and thanks for reading. My shack is in the basement, although with 2 kids in diapers, I'm at the washer and dryer more than the radios. I'm considering a "wireless" intercom system, not the over-the-air type (49mHz band or whatever they offer), but the kind that uses the house wiring as the conduit for the voice communications. But, of course, the over-the-air type is not out of the question. I will have three units, 2 on the first floor and one in the basement.

Before I make the purchase, I'm looking for those who have had employed similar intercom systems and and to learn what, if any problems they have incured with RFI from their stations. Any problems with radio-generated RFI? Intercom-generated interference?

Right now I'm fortunate not to have an RFI problem in my house or with neighbors.
Generally, I run no more than, but usually less than 1000w on 40m, never more than 500w on 20 or 15m, around 200w on 17 but mostly just 100-150w, and 100-300w on 10m. My antennas are an R7 for all HF bands, but a 40m coax-fed dipole, and separate dipoles for 20, 15, and 17m. Right now my 80/75m dipole is in a coil in may garage and no real threat to RFI world. I do play a bit on 2m and 432 mHz ssb with both verticals and Yagis and 150w on each band.

Any thoughts most certainly appreciated.
Thanks.

Under this law, we'll have to take a harder look at all those new, 17 year old, recruits in the military who are required to handle weapons. If they make a mistake, are their parents going to be held accountable?

Story we hear is that Roger Wiseman, KC8JBO is a 45 year old virgin.
(Having intimate relations with his right hand does not count.)
It seems that Rotund Roger is physically challenged and even his own cousins have laughed at his mini appendage....thus the reason for Roger's unchecked anger.
Roger did attempt to make his male appendage larger by tying a brick to the end of it and waiting for results. The trouble is that the string that Roger attached between his mini member and the brick rotted off....all that effort for nothing.
Roger's mom told him to not worry, and that she still loves him despite his "shortcomings." Roger's dad, the Reverend Jesse Jackson has disowned Roger, saying that, "My son couldn't get a cat pregnant." At last report Roger was still trying to disprove his dad's statement and the neighbors have been keeping their kitties in the house. Roger was last seen running to and fro in the area alleys with a can of tuna and calling, "Here, Kitty, Kitty..."

OK...you have me here. Where is the Dalton hamfest? Is this a new hamfest? Is Dalton near Hiram? Does the Dalton hamfest sell CB's?
Speaking of barefooted....how about good old AMP? Got his mommy back (and the only operating vehicle they own) and he is now in high cotton....tell Mike's booze store to open up their charge account again.
Oris has a nice shack...the result of being gainfully employed and having a work ethic. By the way...you ever see Oris's wife? She is as pretty as a model and this must infuriate you duds who denigrate him. When Oris wakes up in the morning he has a cutie to look at....unlike you guys who mess with your three-legged coyotes with foul morning breath.

Just tellin' the truth and they cain't stand it......

I don't consider teenagers to be children. Webster's says a child is
"an unborn or recently born person - between infancy and youth".

I agree with Webster's. A teenager is a youth, not a child.
A child is between infancy and youth.

Ya know? I'm tired of most of the bull shit in most of the groups. You say you're not a victim and yet you complain him?? You are his biggest victim of them all. I bet you come here after getting chewed on for a little while on 11 and 40 meters and now you will be chewed on some more. Ya know why? Yep, it's because YOU'RE A VICTIM!!

Be realistic...most kids, drivers under the age of 18 cause more vehicular deaths than any other age group. They are responsible, and their parents are liable for whatever damage they do. Why not carry this over to "Little Johnny" taking his dad's gun from the bedroom and killing somebody? Same principle.
Dad should keep his guns locked up and have better control over his little darling just the same as Dad has to answer for his little darling using the family car.
This reverts to my argument that stupid people beget stupid kids.....they should not be allowed to breed.

I'm certain this is some kind of Code.

I'm afraid to ask for more details. :)

Perhaps someone could answer if the poster would define what he/she means by "Georgia area".

Georgia is a state. I suppose the Georgia Area therefore would be Florida, South Carolina, Tennessee, and Alabama.

Surely there is a Greyhound Bus Station somewhere....

While I don't agree with this guy's apology nonsense, I do have to admit that I just don't understand this attack. As I understand it...

1. The Iraqi military was deploying new computer-linked radar tracking systems that posed a great threat to any aircraft flying over Iraqi airspace.

2. In response to that threat, our military flew aircraft into Baghdad, the most heavily defended city in Iraq, to attack night duty officers and janitors at several military locations (which I assume had something to do with these new radar systems).

3. They then flew those same aircraft back out of Iraq, all of the above without so much as a scratch on the paint caused by those "dangerious" new radar systems (or any other weapon in the Iraqi military).

Now, unless I'm missing something, this just doesn't make sense. If these new computer-linked radar tracking systems were so dangerious to our aircraft, how were those planes able to fly in and out of Iraq without so much as a scratch on the paint? On the other hand, if those radar systems were not as dangerious as our military claims, then why were we bombing the hell out of that third world country again?

Greetings...

I have 'just missed' several of the above radios at a real good price. If you have one of these to sell at a good price, please e-mail me! Desk mic would be a plus with whatever rig you have to sell. I might even consider an FT-847 or an Icom IC-746 for the right price. Also looking for an MFJ 989C tuner for a decent price. Nothing over $175 for the tuner, please. Will negotiate. Prefer a seller that will take PayPal.com for a good tuner (doesn't HAVE to be a 989C) that has coax 1 and coax 2 bypass...

Simple, for many months Saddam's guys have been firing at our planes on a regular basis, and the frequency of firings had become a daily occurrence. In the beginning, their shots were nothing more than a wild attempt at shooting blind, but lately they have been getting close enough to our planes on some of these shots that the pilots had to take evasive actions to avoid a hit.

As to how we can go in and take out the sites without suffering any damage is typical of our air power, it's American planes, American technology, and American pilots. It didn't mean that Saddam wasn't trying to take them out, he just hasn't got expert enough at his new systems to do so - yet.

And by the way, we never went into Baghdad, we stayed inside our regularly patrolled airspace and took the sites out with precision "stand off" munitions which can be fired many miles away from the actual targets. By the time the first missiles hit, our planes were already returning to base :>)

What would you have us do, let Saddam keep up his daily target practice until he gets good enough to take out a few planes and then react?

These are the people who need your apology. When the troops of Iraq invaded Kuwait, raped robbed murdered. Where were you? When he sent the scuds to Israel did you apoligize to them.? When Kurds were being murdered, did you apologize? When our peace keeping troops were bombed in Lebenon did you apoligize? The Iraq learer is a cruel, warped minded slave driver. He needs to apologize for his war crimes and be puninished to the max.You need to wake up and get with the living. You have a poor sense of justice and need to be set straight. Sounds like Hitler was your hero.

And whilst we are on the subject, it was nice of our US buddies to
supply us with over a 100 tonnes of of contaminated Depleted Uranium
for military use. The DU made here, by BNFL for example, has been
found to be pure. Traces of Plutonium and other nasty reprocessing
products are being found at sites of vaporised DU shells and warheads.
No doubt there are, rightly, a lot of very worried servicemen and
civilians out there.

the biggest diff is one piece vs two piece..
second is the drake is easier to work on..
third the kenwood has better metal workmanship..
both are good amps..
you can't go wrong with eiher..
let your heart lead you..

What you consider means nothing. The law is the law, whether you agree with it or not. A child is anyone under the age of consent.

3243. Amateur radio needs new blood

We are a dying breed and the only thing that makes sense is to take a tip from the cbers. Yes, the cbers. I realize I made disparaging remarks about some of them in the past, but some of them have demonstrated innovations and abilities that are almost extinct among amateurs today, especially with their mobile applications, absolutely remarkable. I will continue my crusade against illegal operators but we need to convert as many as we can to amateurs before they pass us. They are going to be organized very soon, and there are far more cbers than us. Even a half effort by them will be way more powerful than the ARRL. They keep gaining ground and frequencies, we keep losing them. Wake up fellow ops, the time is here, the time is now. Elmer a cber, freebander, or keydowner today. Email me for more information, as I have all this top notch equipment I am willing to part with, CHEAP, as I am in the process of upgrading everything. I also am looking for a used MFJ antenna tuner, a Ringo base antenna for 440, and a good, FAST reliable source for tubes. JRC HF amplifier for sale only 3 years old, will consider trades. Also am looking for any Gordon West tapes. FUll quieting from Toledo.

Too bad HCI doesn't share this definition -- they consider all persons under 21 in their figures of "children" killed by gunfire (thus to include gang-bangers in the number).

The funny thing about dictionaries, not one of their publishers will stand with you in court to claim that your interpretation of a word (based on their definition) is more correct than the definition in the law.

Hey Gielda, how about you put a hinge on that piece of crap "COTSE" and swing it right up your rear end. There is one individual posting through "COTSE" that violates a court order every time he does so. And "YOU" are responsibile for that. Thanks for the lesson in killfiling jerk. You will soon learn a legal lesson of your own.

Uh, I'm as patriotic as any American, but you are leaving out the British. Their technology is first rate as well--not All great weaponry is developed in the USA. I'll also point out to you that, while American foreign policy in the middle east--especially concerning Iraq--is being attacked by former Desert Storm allies, Britain has stood with us as they have in the past--even when that policy goes against world opinion.

Speaking of non-American developments, do you remember RADAR? Developed by the British and adapted by us in WWII, I believe. Pity the duty officer at Pearl Harbor dismissed the blips the operators were seeing as "B17's" even thought the blips were coming from the WRONG direction.

>
>You must be a Windows "hacker" ..... Point and drool.

And you must be clueless. If you meant that you can't use a firewall if you are connected through a cable modem, why not? If I have a firewall (and, no, not a Windows based one, thank you) on my dialup, you can have one wherever you want.

Or, if you mean that the cable modem can't have one built in, no, that's wrong too. Some companies (Lynksys, maybe) sell cable routers (yes, routers) that have built in firewalls.

--
Bill "Houdini" Weiss

This reminds me of the high-point of my psychosis. You all know the (ms-dos) game Syndicate Wars of course. Well, at the train station in Amsterdam Central after returning late from the university, I would imagine all these people with long leather coats on the platforms of the train station. Then the intercom would announce (in dutch) "Wil de heer Jansen zich a.u.b. melden bij loket 4", and all these long coated people would draw their mini-gun like Neo in the Matrix and in the syndicate wars game and start firing until everybody laid bleeding on the floor.

Hi,

I would like to obtain a copy of the Spring 2000 issue of QRPp. I
am specifically interested in seeing the construction article on
the St. Louis Pocket Vertical antenna. (This is different from the
St. Louis Vertical.)

Can anyone help me obtain this article in one form or another?
I'll do whatever it takes to get a copy of this article.

Backissues of QRPp are available from NorCal only from 1998 back,
nothing yet for '99 or '00. Thanks for your help,

73,

Jerry, an interesting point has been made. Of course, anyone can argue over the internet about the 'welfare extras' - it really doesn't bother me. However, if someone wishes to argue on an SSB contact, things might just get interesting. We had a guy on 440 FM going on and on about needing CW. Fortunately, the repeater owner was in the gang so ... away we went at about 40 WPM F2 emission! Same will happen on the SSB contact. CW does happen to be 'legal' and I could put an end to the 'welfare' issue quite rapidly. Of course, we all argue about the merits (or lack thereof) of CW and have an endless barrage of 'ideas' for licensing. I've seen one arguement for issuing higher classes of licenses based on dx contests (oh, great!), WAS above 50 MHz (this from a guy with a private plane. Undoubtedly, he could simply fly over the lower 48 and get WAS in a few days!). Nowhere has anyone suggested basing it upon public service. Backup AC generator? Mobil rig? HT? Ever served helping in a walk-a-thon? How about a real emergency? Probably that would require actual WORK, something a lot of folks avoid. Oh well .... sigh.

73 from Rochester, NY

Why not? Your "prior class" entry in the FCC database will still indicate that you had an advanced license, so the public will still know that you had passed at least 13 wpm code. Also, note that there are actually some people who upgraded from advanced to extra around (just before) April 15, 2000 who's licenses were issued after that date who got there by passing 20 wpm before the change occurred (as well as many who waited until the magic date with a written test only upgrade). The first no-additional-code extra class licenses were actually issued by the FCC on April 19, 2000.

With the implementation of restructuring, some people only had a 4 day turnaround, while others, due to the VEC's being swamped with upgrades and other problems (GLAARG VEC had an undocumented software problem), had as much as a 60+ day turnaround. I personally upgraded from Advanced to Extra but suffered a 60+ day turnaround time for the new class to show - well into June 2000 by then. In my case, you can't tell if I passed 20 wpm (say on April 8, 2000) or not (simply upgrading w/o additional code on April 15th) without me telling you how many days it actually took.

On Sat, 17 Feb 2001, Jerry Oxendine wrote:

A firewall with a cable modem is a necessity! I get at least 20 3l337
H4X0r dudz trying to get into my system every day scanning for lame
trojans and the latest "sploits". The Linksys Cable/DSL router is an
excellent OS independant choice for a hardware firewall, and zonealarm
is OK to stop those pesky programs which "call home".

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, WZ3AR, N4AA & QRZ DX, WD4NGB, K5RT, W5PF, K6IPV, K6KM, KH6BZF, K8PT, K8YSE, K9LSB, CE6TBN, CO8TW, DL1EK & DX News Letter, DL2VFR, DL7VOA, EI4GK, F6AJA & Les Novelles DX, F6EPY, FM5GU, GW0VSW, PA5ET, PY1NEZ, VE3EXY, VE7DP, VK3EW VK4AAR, VK0MM, XE1KK and ZR1DQ for the following DX information.

MESSAGE FROM EDITOR: Did you ever wonder "How many DXCC Countries/Entities were active last week?" and "Is it possible to achieve DXCC in a week?". Well now OPDX and Terry/AB5K's AR TelNet Cluster Network will have the answer for you every week? Look below:

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11/February, through Sunday, 18/February there were 252 countries active. Countries available: 1S, 3A, 3B8, 3B9, 3C0, 3D2, 3D2/r, 3V, 3W, 3Y/b, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0A, CE0X, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FO/m, FP, FR, FR/j, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HM, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH1, KH2, KH4, KH5K, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0S, PZ, R1FJ, S0, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T31, T32, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, VU4, XE, XF4, XT, XU, XX9, XZ, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, and ZS.

OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity". OPDX would like to send a special thanks to Terry for his time and input for this new feature. Also, Terry and your editor (KB8NW) would like to hear your comments (and suggestions) on this new feature. Send them to: kb8nw@arrl.net

3A, MONACO. Reports indicate that the administration of Monaco has now authorized operations on 6 meters for amateur. This is after a 1 month test which proved that there was no interference to other services. Laura, 3A2MD, who is genrally active on all bands, is attempting to get something up for this band. Until then, look for her on 10 meters (28016 or 28446 kHz) between 0630-0700z and on 15 meters (around 21032 kHz) between 1000-1100z before she moves to 20 meters CW/SSB.

3B, MARURITIUS. Jacky, 3B8CF, can be found almost daily on 30 and 20 meters CW between 0230-0400z. Check around 10106 and 14027. QSL via CBA.

3B9, RODRIGUES ISLAND. Robert, 3B9FR, usually can be found on 15/17/20 meters between 1530-1930z. Check 14025, 18073 and 21295 kHz. QSL via CBA.

3D2, CONWAY. By the time you read this the DXpedition team will be gathering in Nadi, Fiji. It seems that there may be a delay due to one of team members did not get the U.S. visa, and had to travel a different way. The whole team will have to stay on Fiji until he arrives which will cause late DXpedition start (about 12 hours). Operation was expected to start February 22nd. Their final itinerary is posted on: http://www.kragujevac.co.yu/3d2/general/general.htm

3Y, BOUVET. Chuck, 3Y0C, still continues to be active more so than past weeks. He has been hitting almost every band CW/SSB. He is even taking requests for CW contacts after working him on SSB. Chuck was heard this past weekend on 28495, 21295, 18130, 14195, 10115 and 3772 kHz at various times. It was mentioned this past week on one of the severval "DX Reflectors" that Chuck is expected to leave Bouvet March 2nd (not firm) and arrive in Cape Town on March 7th.

3W, VIETNAM. Three stations were heard this past week. 3W2LI was heard on 28480 kHz around 0915z. Hans, 3W2LWS, on 14010 kHz between 1530-1700z (QSL via WA1LWS). His activity will last until March 6th. Tom, 3W7CW, was heard on 28007 and 14028 kHz between 1330-1400z (QSL via SP5JTF).

4H/4I, PHILIPPINES (IOTA Activity/Update). Frank, VE7DP, provided OPDX with another update on his and local Philippine ham activity. The activity on the Island of Marinduque as 4I1P made about 3800 QSOs from the new IOTA OC-244. This past weekend (Feb. 17-19th), operators VE7DP, DU1KGJ, 4F1FZ and 4F1OZ were expected to activate Lubang Island (OC-126) using the 4I1P callsign again. QSL to VE7DP or DX1CW. Frank states arrangements have been finalized for an expedition to Batan Islands (OC-093) on February 24-27th. Ten members of the DX1CW club will be participating and VE7DP will be one of the operators. The CW Philippines have applied for 4H2B callsign. QSL via VE7DP or DX1CW.

4S, SRI LANKA. Ernest/4S7EA and Nelson/4S7NE have been keeping the CW crowd happy on 30 meters (arond 10106 kHz). Look for Nelson around 1245z and between 1930-2015z. Look for Ernest between 2300-0100z, if not there check 20 meters on 14025 kHz.

8Q, MALDIVES. Mike, OE3MZC, continues to be active as 8Q7MZ until February 21st. Activity has been on 15/17/20 meters SSB between 1200-1700z. QSL via home callsign.

9M6, EAST MALAYSIA (Update). Don/K6IPV and Dave/W6AQ are now active from here as 9M6IPT and 9M6AQT, respectively. Over the past weekend, they were active in the ARRL DX CW Contest using the special callsign 9M6V. Activity is expected to last until February 22nd. There are no other updates on whether they will travel to Brunei (V8) for a few days. QSL the contest callsign and their individual 9M6 callsigns to W6ORD, good in all callbooks and databases for the last four years.

ATTENTION ALL DXERS.... Paul, K5RT, CQ WAZ Awards Manager, reports the following: "PLEASE do NOT send WAZ applications to K1MEM's address. Jim has been deceased for over a year now. WAZ applications continue to arrive at his QTH nearly every week. Please help us spread the word. We at CQ have tried very hard to make sure that the revised WAZ rules received a very wide audience since last January. The WAZ rules can be found on several national radio society web pages, in several amateur radio magazines and on CQ's own web page (in 7 languages even!). The URL for the CQ web site is: http:www.cq-amateur-radio.com
Once again, please help get the word out to the DX Community at large. Jim's widow should not have to be bothered with having to forward WAZ applications after this long a period..... DX is! Vy 73 Paul K5RT
CQ WAZ Awards Manager"

BQ9, PRATAS ISLAND. Reports indicate that Paul, BV4FH, has the authorization for another operation from here beginning March 6th through March 15th. There will be 8 operators on this trip: BV2OO, BV4FH, BV5CR, BX2AX, AA4NN, JA1AYC, RK3DT and W4NZC. QSL via KU9C.

CE0X, SAN AMBROSIO ISLAND. Mark, CE6TBN, sent out a brief statement this past week. He said, "I'm sorry but CE0XT is cancelled for transporting problem."

CE0Y, EASTER ISLAND. This will probably be the last week to work Dick/ DJ2EH and his wife Ann/DL8NBH as CE0YEH. Activity has been on all bands including the WARC bands mostly on CW (with some SSB) at various times. Most of the SSB activity has been on 15/12/10 meters.

D6, COMOROS. The D68C team continues to be very active until February 28th. They have kept their promise to be active on all bands and modes. They were even heard on 10 meter FM. They are easy to find, usually begging for QSOs, and easy to work. They will probably break a QSO record. Last heard, they were over 61,000 QSOs.

EL, LIBERIA. Dickson, EL2DT, has been active on 21255 kHz between 0930-1030z. QSL via IK0PHY.

EP, IRAN. Hamid, EP3HR, has been active on 12 meters. Check 24950 kHz between 0900-0930z. QSL via I2MQP.

FM, MARTINIQUE (Update). Dennis, FM5GU, informs OPDX that FM5GU will participate in the 2001 CQ WPX SSB Contest in the Multi-Single category. The operators will be: IV3TDM, IV3FHH, IV3JVJ, FM5DN, FM5WD, FM5FJ and FM5GU. All QSLs should go to KU9C's callbook address.

FO & ZK, FRENCH POLYNESIA AND SOUTH COOK ISLANDS. Dominique, F6EPY, will be on a "South Pacific DXpedition" during the first fews of March. Look for him between March 3-7th, as FO/F6EPY (?), from Moorea Island (OC-046), French Polynesia. Also, look for him between March 8-16th, as ZK1EPY from Rarotonga Island (OC-013), South Cook (and possibly Aitutaki Atoll). Operations will be mainly on CW on 80-10 meters including WARC bands. Look for him 18 kHz from the lower band edge (7018, 10118, 14018....etc.). There is a possibility of some SSB, digital modes (PSK31, RTTY) and 6m SSB. Activity will be concentrated on European propagation. His equipment is a IC-706 MK2G, Butternut HF9V and 2 x 20m center feeded Zeppelin and a 3 element beam for 6m. A Web site is available at: http://perso.wanadoo.fr/dominique.auprince/SP_DXPED.htm

FO5, FRENCH POLYNESIA. F5DYD is now active as FO5RA from Tahiti for the next 2 years. He uses a FT-847 and a 2 element Quad antenna and seems to like 10 meters. Check 28560 and 28480 kHz between 1630 and 1930z. Also, look for him on 6 meters between 0700-1700z.

FO/M, MARQUESAS ISLAND. Wulf, DL1AWI, continues to be very active from here as FO/DL1AWI and is expected to be active until February 28th. During recent days, activity seemed to be mainly 30/40/80 meters CW. Watch these bands beginning around 0300z. QSL via DL1AWI.

H4, SOLOMON ISLAND. Bernard, H44MS, has been quite active lately on 12 meters. Look for him between 24937 and 24955 kHz starting around 1000z. He has also been active on 75 meters on 3799 kHz after 1100z. Also, watch 40/17/15/10 meters. QSL via DL2GAC.

IOTA NEWS.....
EU-002. Frank/DL2SWW and Ric/DL2VFR will be activating Aland Island from April 14-20th using the callsigns OH0/homecall. Activity will be on 160-6 meters on CW (mostly), SSB and RTTY. QSL via home callsigns. Detailed information can be found on the Web site: http://www.iota-expedition.com

EU-037. Frank/DL2SWW and Ric/DL2VFR will be activating Oland Island from April 21-28th using the callsigns SM7/homecall. Activity will be on 160-6 meters on CW (mostly), SSB and RTTY. QSL via home callsigns. Detailed information can be found on the Web site: http://www.iota-expedition.com

SA-028. Operators Carl/PU1NEZ, Zeca/PY1LVF, Pete/PY1NEW and Lima/PY1NEZ will activate Sao Sebastiao Island (Ilha Bela), located in the central coast of Sao Paulo State, March 15-19th. Operators will sign homecall/2. Activity will be on 80-10 meters CW/SSB including the WARC bands, depending on propagation. Suggested fre-

quencies are:
CW - 3530, 7030, 10115, 14040, 18098, 21040, 24920 and 28040
SSB - 3755, 7055, 14260, 18128, 21260, 24950 and 28460 kHz
QSL via home callsign or through the Bureau. Addresses are:
PU1NEZ - Carlos Guilherme Correa, 9/306 Presidente Backer,
24220-045 Niteroi, RJ
PY1LVF - Jose Luiz V. Fernandes, P.O. Box 18009, 20722-970
Rio de Janeiro, RJ
PY1NEW - Emanuel Tavares Filho, P. O. Box 100659, 24001-970
Niteroi, RJ
PY1NEZ - Rogaciano Lima C. Filho, 91/1101 Belizario Augusto,
24230-200 Niteroi, RJ

J2, DJIBOUTI. David/J28EX/F5THR and Jean/J28NH/F5NHJ, who are active from here, will activate Maskali Island (IOTA AF-053) next weekend. They will leave Djibouti around 1500 local time on Friday and they will come back on Sunday in the afternoon. They hope to be active on 80-6 meters.

J3, GRENADA. A two-week mini-DXpedition is planned for Grenada, the West Indies, by Dee/W1HEO and Paul/W5PF from March 30th through April 11th. Operations will be on 40-10 meters, SSB/CW. Special attention will be given to the WARC bands and the General-class portions of the phone bands. They will have two 100 watt transceivers plus a beam for 10/15/20 meters and inverted Vees for 12/17/40 meters. Their J3 callsigns will be assigned upon their arrival, but they are expected to be J3/W1HEO and J3/W5PF. QSL with SASE direct to the respective callbook addresses or via the bureau.

JD1, MINAMI TORISHIMA. JD1BCK has been active on 10 meters between 28433 and 28460 kHz, usually after 0230z but as late as 0600z. QSL via JM1TUK.

KH6 CONVENTION. Propagation Guru Lee, KH6BZF, informs OPDX that there will be a "HAWAII STATE AMATEUR RADIO CONVENTION" at Pearl Harbor, Hawaii, on Saturday, October 13, 2001. Lee states:
"WHO: Everyone Be there! WHY? Good warm weather and good fellowship! Please mark you Upcoming Events Calendars Early...we'll appreciate that fact. More will follow: Mid March, June, July and September updates."

MJ, JERSEY. Pete/K8PT and Craig/K3PLV will again trek to the Channel Island of Jersey and be active on March 14-20th. Emphasis will be on digital modes (CW/RTTY/PSK31). Operations will be on 160-10 meters with an emphasis on the WARC bands and IOTA frequency 14260 kHz. Please QSL via their respective home callsign.

QSL INFO AND NEWS.....
Juan, CO8TW, was active in this past weekend's ARRL CW Contest as a Single Band/Low Power (10 meters) entry. QSL via IZ8CCW. Log will be available at: http://www.qsl.net/co8tw/

The QSL Manager for EI9KLH (Kinsale Light House) reports that all direct QSL requests have now been dealt with, and all bureau cards received prior to February 1st have been responded to. The Manager

apologizes for the delay in dealing with the large volume of cards received.

Rob Snieder, PA5ET, informs OPDX that all direct QSLs for V26EA, V26ET, V26FM, V26WP, VP2MPA, 8P9JR, 8P9JS, 8P9JT and 8P9JU contacts are mailed. The bureau cards will be processed in the coming weeks. QSLs can still be requested via PA5ET: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands.

Bill/K6KM and Ginny/N6RER have just return from Norfolk Island and operated as VK9NOO and VK9NNN, respectively. Bill states to QSL VK9NNN and VK9NOO to K6KM or N6RER (same address). They want to have picture cards printed, so it will be at least a couple of months before they can start sending cards to the deserving. If you have an urgent need for a VK9NNN or VK9NOO QSL, Bill states, "Send us a SASE with 'URGENT' on the envelope and we will edit an old VK9LOO card for you. An e-mail follow up would be helpful."

Nat, WZ3AR, was active from Chinoteaque Island, VA (USI# VA-002S) over the past weekend. This operation counts for IOTA NA-083 (the VA State Group) as well as the very rare Accomack County, VA. All QSLs are via WZ3AR either direct or through the bureau. ADDED NOTE: Chinoteaque Island is often confused with Assateaque Island. Assateaque Island is a National Seashore that runs on the coast of both MD and VA less then one-mile from Chinoteaque at their closest point. Chinoteaque Island counts for NA-083 and Assateaque Island as NA-139. No WZ3AR/4 operation will be from Assateaque Island.

VK0MM QSL UPDATE: Alan, VK0MM, reports the following and requests to "PLEASE PASS ON AS YOU SEE FIT" the update:
1) Alan (VK4AAR) is presently flooded under with QSL requests... his turnaround time is thus likely to be a bit longer until the initial rush has died down. Alan (VK4AAR) requests the following points be noted which will speed up the QSLing considerably:
2) Please include a self addressed envelope.
3) Please DO NOT stick Australian stamps on the envelope. A Goods & Services Tax was recently introduced in Australia and Australia Post is now issuing new "International Only" stamps. The older "standard" Australian stamps being sent with some requests ARE NO LONGER VALID for postage in Australia.
4) Please DO NOT send Yen, Lira, Deutsch Mark, Marrka, Pounds, Roubles etc. etc. The Bank charges involved in exchanging these to A$ are considerable. If you want a VK0MM QSL card, then US$ or A$ ONLY please, or if you really insist, then IRCs (which MUST be franked at the originating office and MUST be less than one year old to be accepted by Australia Post).
5) For the umpteenth time, VK4AAR is NOT the QSL manager for VK0LD and does not have the log for this station, so please do not send cards to him. QSL for VK0LD is at: http://www.eQSL.cc/qslcard
Thanks & 73, Alan ... VK0MM

YK9A is now QRT. The group made over 27,000 QSOs during 7 days of operating time. Final statistics will be available on the web site by the end of the month. The team thanks the DX community for keeping the pileups going 24 hours per day, and it was a truly exciting event. They also thank their host Omar Shabsigh, YK1AO for his hospitality and friendship. The expedition would not have happened without his support, and that of the Technical Institute of Radio. QSL via K9LA.

SU, EGYPT. SU/ZS6WPX has been heard on 20/12/10 meters during the past week. Check between 28475 and 28490 kHz between 1330-1730z. Check around 24940-24950 kHz after 1100z and 14180 kHz after 1915z. QSL via ZS6WPX.

SV5, DODECANESE. Carl, GW0VSW, will be active as SV5/GW0VSW from the Island of Rhodes (EU-001), June 16-30th. Activity will be mainly CW on all bands 40-10 meters. Operation should be around 0500-1600z family permitting. The rig will be an IC-706 with dipole antennas. Look for Carl on the IOTA and QRP frequencies. QSL via homecall.

SV9, CRETE. Dick, G3URA, will be active as SV9/G3URA between February 22-27th. He reportedly likes CW, so watch for him, especially on 14035 kHz. QSL via G3URA.

T32, EASTERN KIRIBATI. The OK operators now active as T32RD will continue to be active until March 4th. Activity in recent days has been on 80/40/15/10 meters CW. However, they have been on the other bands and phone. Also, look for them on 6 meters (check 50105 and 50125). QSL via OK1RD.

T8, PALAU. Yukio, JA6ENF, is expected to be active this week as T88NF. He will be here on holiday (with his family) between February 21-26th. Activity will be mostly CW on 80-10 meters. QSL via CBA direct or JARL.

TR, GABON. Alain, TR8CA, has been active on 10 meters (around 28462 kHz) between 1530-1600z. QSL via F6CBC. Xavier, TR8CX, is another station who has been active but on 15 meters (around 21260 kHz) after 2130z.

XE, MEXICO. The Mexican "Radio Club Satelites, A.C.", XE1RCS, will be active once more in the CQ WW 160m Phone Conetst. Last year they obtained "Second Place World Multi Operator" category. They will be especially looking for Europe, Asia and Africa with improved antennas. QSL via XE1KK.

XX9, MACAU. There are only a few days left to work Ulf, SM0GNU, as XX9TDX. He will leave on the 20th. During the weekend, he was heard on 30/17/10 meters CW. QSL via SM0GNU.

I can read, and what I see in front of me are the ramblings of a
shallow little loser who likes to get his own way and gets rahter
pissed off when things don't go exactly as he wants, or when no one
listens to him.

Your problem, you need a life.

I also don't give a flying fuck about you, or your pathetic attempts
to make libelous remarks.

BTW: want to sue me for libel you incestous little mother fucking
father felching wannabe?

You're bombing shit out a third world country because a
right-wing arsehole has seized power in your country
and wants to show the world who's now in charge of it!

The answer to why they were able to get in and out despite
SH's shiny new radar was because of a new missile design
which works on the cruise-missile principle: it can be
launched from well outside a radar-defended perimeter.
That perimeter defence is designed to detect and shoot
down aircraft, not missiles, so the missiles get through.

It seems that the injuries to civilians on the ground were
caused by fallout from anti-aircraft stuff and not from
the missiles - but it's good propaganda for SH to promote
the idea that the missiles caused the casualties.

Who supplied SH with this new radar system, anyway?

>deal with Saddam now.

But you're not dealing with him, Roger. The more they bomb,
the more his popularity at home increases. And it's just too late
to do anything about him now. 'Desert Storm' should have ended
in Baghdad, not where it did, just as the Kosovo thing should have
ended in Belgrade.

'Old Man Bush' was only really interested in protecting his
oil supplies; and wasn't it his r&#65533;gime that sold to Iraq the
technology for weapons production in the first place!

Don't forget also that America supports, arms and encourages
other UN resolutions violators, some of whom are not a million

miles from Iraq.

How about bringing this thread to a close now?

That is true, and I apologize for failing to include the Brits' many contributions and consistent loyalty. And although they have some excellent planes and pilots, the fact remains that this particular mission was flown under the cover and concealment created by our airborne command and control planes, whose advanced electronics provided the ECM and tracking abilities which gave the fighter planes the "big picture" in order to coordinate the attack. Additionally, the weapons fired were US designed precision "stand off" missiles. These weapons, along with our airborne ECM planes, allowed the fighter planes to deliver their payloads while staying well out of the way of Saddams' defenses.

Rather defensive...
Say, was what Bill said bothering you?
I mean, you posted the identical article twice,
separated by 26 minutes. Were you really anxious and
couldn't wait for your post to appear? I can just picture
you fuming over it.
Maybe in the future you'll want to be more patient so that
you don't make these posts, because you're looking really
stupid now. Especially after that incoherent rant you made
when Steve put you in your place.

Sorry Josk, I have the raving Mr lee kill filed. So I'll follow him up
piggy backing off you.

w4amp can sue us if he desires, but I'm sure he would get much better
results and it would cost him a hell of a lot less if he subpoenaed logs
and properly went after the individual actually making the posts if he
is being libeled. Suing us would just cost him extra subpoenas and
would most likely boil down to "Why didn't you follow proper procedure
and subpoena the logs of the poster in the first place?" In our case we
will provide you with logs upon US subpoena after first giving our user
14 days to quash.

We only have logs for 7 days, but we will hold them for an additional 14
days upon proper notification by an attorney pending subpoena. We will
also notify our user of the pending subpoena while still giving them 14
days to quash after we reveive it.

Regarding the claim of someone violating court orders by posting via us:
If you provide court documented proof of someone violating a court order
by posting via us we will terminate the account. However, like in all
other aspects of life you have to follow proper procedure. This
includes proper court documentation and indisputable proof that the

person in that court order is the one doing the posting. Proof is not "he sounds like that person", "he types and uses phrases like that person", or "It is him because I said so".

If this is what you people are claiming it is, then the burden of proof lies on you. You must follow proper legal procedures, we are not a court of law and make no claims of being one. Therefore we cannot judge legal matters, especially civil ones.

However, [proper] notification by US law enforcement that someone was violating criminal law is enough proof for us to terminate that users account. But again, that is proper notification, which means documentation from law enforcement that is independently verifiable, not someone in e-mail claiming to be a cop. E-mail is not a legal document.

Any subpoenas or legal notifications can be sent to our parent company:

Packetderm, LLC
210 Park Ave #308
Worcester, MA 01609
ATTN: Legal

Any other issues with posts are only subject to our abuse policies. Posts that are simply distasteful to you should be kill filed, just the same as you request others to kill file your posts if they do not like them.

/steve

WHOA Jim!

"Right-wing arsehole"? I SAY, OM, you just don't have any idea how relieved most of us(maybe the right word is "more") are to be rid of the Clintonistas! Mr Bush is not so right-winged as you might imagine, but he beats HELL outta what we had. And, yes, I think he will right the disasters wrought in the last 8 years on our military by the el pinko Clintons. He WILL restore dignity to the office so besmirched by "randy" Bill. There will be no more dungarees and sneakers, or pizza boxes strewn in the corridors of the White House. Evidence of this is already manifest. No more keeping press waiting for a late President who was always on CST--no, not Central Standard Time, but CLINTON Standard time! Newsmen are already remarking about being able to finish up at the White House and be home in time for dinner. That's because Mr. Bush sets a schedule and keeps to it--beginning at around 7:30 AM EST. The "darling" of the liberals NEVER was on time. Even some of the DEMOCRATIC members of the old White House staff are describing the Clinton White House as "in a perpetual state of confusion".

BTW, we Americans are not ALL of the opinion that "we" run the world. No man, or nation, can be an island arsenal if the rest of the world is against it. I only have the greatest respect for Britain, its people culture, and rich history. For the friendship and support Britain has shown us over the years, I, for one, am grateful.

Sincere 73,

Jerry

I know the pizza talks sometimes went to real late hours, because Arafat and
that other guy couldn't decide on mushroom vs anchovy so they would order
pizza out, plain, especially for those secret service guys, who would be
starving.

but why were there dungarees and sneakers strewn in the corridors?

Either way, Larry Tribe rocks and he did a good job. He should be on the
cover of Rolling Stone

But these law are often different, Buzzsaw. In the vehicle situation, the parent may be held financially liable, but there are no criminal charges brought against the parents.

Under most of these new "kids & guns" laws, the parents can face criminal charges in addition to any civil action. In other words, these laws often make it a crime, for you, if your child gains access to your guns.

Do you really want to face the risk of a criminal trial, and prison, because of something your child did? Many people will not want to take that risk and will simply get rid of the guns in the home.

Of course, that is exactly what those backing these laws want - to get rid of the guns. They see these laws as a back door way of getting rid of guns (another way to break America's long standing tradition of gun ownership).

Cross-posted to: alt.ham-radio.vhf-uhf,rec.radio.amateur.misc

I am installing an alinco DR135T in my 2000 Mitsubishi Galant. Just below the FM/CD and ac contols is a storage space which is large enough for the alinco. The problem is that once I remove the storage box there is no place to put the mounting bracket for the radio and since the radio is much smaller than the hole I'll need some sort of bezel to fill in the gap around the radio. One solution I am thinking of is using a universal sterio mounting kit from Radio Shack which appears to have a bezel which can be cut out to fit the radio. I'm concerned that any installation be both mechanically sound and cosmetically acceptable. Has any one ever used a sterio mounting kit for this purpose? Or can you suggest an alternative installation method or kit?

Thanks
Dwight Hebert

Dwight,
Can you cut out the back of the box to allow access to the back of the radio, but leave the front part of the box intact? This will give you a place to fasten the mounting bracket and make the hole less obvious. If you cut the box off at least 3" back from the front, then stuff a little black foam weather-strip around the radio, the butchering job won't be apparent. Or. if you use the stereo trim plate, cut the hole slightly oversized. Then get some door edge molding from a auto paint and supply store, the "U" channel type that's about 1/4" is a good size. Run the molding around the hole, install the radio, then push the molding up against the radio chassis. This gives you a clean-looking installation. The hardware store has some stuff called plumbers strap or tape, which is a metal strap 3/4' to 1" wide, with 1/4" holes every inch or so. This stuff is handy for quick and dirty radio brackets that can be hung from existing equipment to support the added radio.

Why mount the radio in the dashboard at all? Wouldn't it be a lot
easier to do what I did with my Alinco and mount it vertically in the console
between the seats? Or - if not that - mount it vertically to the exterior of
that console?

You make it sound like they're doing something wrong. Of course the Iraqi military is shooting at our aircraft. After all, our planes are flying over Iraqi airspace and we are the enemy. They are doing exactly what we would expect our military to do if the situation were reversed.

If you don't want them to shoot at our aircraft, don't have those aircraft fly over their airspace. Keep those airplanes in the US, where they belong, and you can be certain they won't shoot at those airplanes anymore.

Okay, I guess I should have been more specific - we hit targets in Baghdad, fired from aircraft well within the area covered by these new computer-linked radar tracking systems. Which still doesn't change the basic question - how our planes were able to fly into those areas if those new radar tracking systems that dangerious (dangerious enough to justify the attack)?

However, I'll accept your explination that it was our brillant pilots flying that wonderful American technology that made it all possible. Of course, that still means those radar sites were still not that much of a threat (against our pilots flying that wonderful technology), but I guess any old excuse is all the justification most people need to kill people in Iraq today.

The aircraft which launched those missiles were well within the range of the new radar system, and the Iraqi air defense system.

Wrong. As part of Iraq's cease fire agreement, two "no fly" zones were established and it was agreed that these zones would be patrolled to ensure Iraqs' compliance. Additionally, they agreed to have on-site inspectors to oversee the detection and destruction of their stockpiles of "mass destruction" weapons. From the start, Iraq has never lived up to any of their agreements, and has used every method of evasion, lie, deceipt, excuse, etc. to keep developing these weapons.

They have had eight years to develop more of the stuff, and now are estimated to have at least two nuclear weapons at the ready. So, do we just wait until they nuke Israel, or maybe bring one of them into the US ?

Because they had not become good enough at operating them yet, but the frequency of near misses was increasing to the point that they would have hit something before long.

> However, I'll accept your explination that it was our brillant pilots

If Saddam had complied with any of his ceasefire agreements, we would not have to take these enforcement actions.

Saddams' intent has been clear for many years, and if somebody does not contain his actions, what we have seen so far will seem insignificant compared to what he will try in the future.

How hypoBritical can you get? Brit has determined that
there is a no-fly zone, and has said that anyone who flies
in it will be shot down.

Well, Brit planes are flying in it, and Iraq is defending its
territory. Quite rightly.

It's not a troll. Your planes are flying in the no-fly zone, and in
so doing are invading the sovereign territory of Iraq.

Still, with a president who happily sends people to a death
sentence to guarantee himself votes, what else can we
expect from the USA?

W6DKN <w6dkn@qsl.net> wrote in message
news:gWzj6.2692$Mu5.135788@paloalto-snr1.gtei.net...

Nice troll, but remember, unlike most countries, when you fire at the US, we
fire back. How long did you think we would tolerate Saddam's daily firing at
our planes before we did something about it? We could ignore it when he was
just shooting wildly into the air, but when he added numerous computer
linked radar tracking stations to give him better ability to aim his
missiles accurately, he knew damn well what would happen.

Being the chicken sh.t he is, he made a big mistake in thinking that he
could escape retaliation by hiding his radar control stations among the
civilians in and around Baghdad. Wrong... Then, as usual, he rolls out his
phony hospital footage which we have all seen time and again. Too bad nobody
believes it except the media controlled ignorants in Iraq...

Thankfully, there's still a few people left in Britain who have not lost
their "stones"

Hello Dwight:

I mounted my DR-605TQ Alinco mobile radio sideways on the right side of the center console using two large pieces of Velcro (Cut to about the entire size of the bottom case of the radio). Its been about a year and its holding up just fine. This installation makes for easy retrieval of the radio. You can gat large pieces of Velcro at Home Depot or Kmart. I wouldnt mount any radio that has a rear heat sink in a dashboard because of the obvious reasons.

Good luck and 73

1. The "no fly zone" was created by the allies to create a buffer between Iraq and certain neighbor states.

2. Agreeing NOT to enter these zones was a condition to which Iraq agreed in order to have a cease fire.

3. Mr. Saddam Hussein agreed to it because his army was virtually destroyed, much of his command and control structure gone, and he basically had NO choice.

4. Had Britain and the USA just packed up and walked away, Iraq would've already re-embarked upon its aggression against its neighbors.

5. Among other reasons.

It is quite amazing how leftists think(?) when it comes to foreign policy. Their bleeding-heart, colored-glasses, pot smoking teachers and college professors drill it into them that only if the BIG BAD USA and Britain would just lay down their arms, the world would be overwhelmed with "peace". It is just as true today as it was in ancient/medevial times: The stronger (usually tyrants and despots like Saddam) will over run the weak. I seem to remember a certain Prime Minister, was it, that traveled to Germany in 1939 , made certain concessions, and returned home crowing "Peace in our time". Tanks rolled into Poland in September of that year. By 1940, London was burning under the blitz (DAMN those bastards--they signed an "agreement").

It is the presence of Britain and the USA in the Middle East, primarily, that prevents Hussein from invading or attacking another country.

My friend, you can't have an "agreement" when one party has a gun pointed at its head. We told the Iraqis that there would be a "no-fly" zones, with the understanding that the Iraqi people would continue to die if they didn't accept those terms.

> From the start, Iraq has never lived up to any
> of their agreements, and has used every method
> of evasion, lie, deceipt, excuse, etc. to keep
> developing these weapons.

Again, which is exactly what we would expect our military to do if the situation were reversed. If it were Iraqi planes flying over the US, instead of US planes flying over Iraq, we would expect our military to resist in every way possible, regardless of any such agreement.

Sorry, I missed this before. So, you admit the US is killing the Iraqi people to supposedly protect Israel from a perceived threat. Why should our soldiers fight with Iraq to protect Israel? If Israel cannot get along with its neighbors, let them deal with the consequenses of that. It is none of our business and our soldiers should stay out of it.

And please don't give me this "those other countries are monsters," and Israel is the "innocent victim," nonsense, because I'm not stupid enough to buy it. The history of political, social, and economic, relations between Israel and its neighbors simply does not support that claim.

Hey, this is serious stuff! We'd all do well to start wearing aluminum foil underwear, so that the black helicopters can't activate the anal probes that the government has implanted in us.

3320. Re: AC Inverter with Car/Sinusoids

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-20 06:47:48 UTC

Message-ID: <oqok6.5595$Aj2.169462@typhoon.columbus.rr.com>
Source record: 93199

Hi, Wayne
As far as I know, you shouldn't have a problem powering a larger inverter with your truck battery as you did. However the reason that you were discouraged from doing this was because that the battery in your truck is not a "deep-cycle" battery. That means that the battery in your truck is designed for brief, heavy loads (starting the engine) and not for continuous, steady loads (like power inverters). The way to get around this is to keep your truck's engine running, and make sure you have a HIGH output alternator if you want to run a 500w inverter. 100+ amp alternators are available as an aftermarket accessory for most cars and trucks, and if you have a newer truck you may already have a high output alternator. This will keep your trucks battery from discharging, thus eliminating the need for a deep cycle battery. As far as sinewaves and the like go, if you are just running lights, that won't matter much. If you want to run more sensitive equipment like TV sets and radio gear, you should still be ok, as almost all modern inverters have "modified sinewave" output, meaning you'll get nice, clean AC suitable for running computers, etc. Computer innards and motors run off DC and your computer's power supply will keep them happy even if the AC power it receives is not all that great. Computers always have an ample supply of clean DC current, and in most cases the consistency of the frequency of the AC into the supply won't matter too much. Most computer supplies have a good filtering setup. The only reason that people will warn you about using a generator or inverter to power an AC motor is that motors are very power hungry when they start up, and generators and inverters sometimes can't provide them with the high turn-on current they desire. This leads to stress on your inverter or generator and your motor. For that you want to look at surge current ratings on generating equipment and max or peak power output for inverters. Hope that helps you some.

No reason at all. Let's just tell the Israelis that the Iraqi army
consists solely of Palestinians. That'll take care of the whole
problem without spending any more of our tax dollars.

3327. Question about 6146 final neutralization??????

Newsgroup: rec.radio.amateur.misc

Greetings,
I purchased a Kenwood TS830S and I have a question about neutralizing the finals when they have to be replaced since I haven't done this in years. I know you are supposed to use a RF Volt meter (which I don't have)BUT I seem to remember using another receiver to do this as well I think I also remember using a field strength meter also. Is my memory going or can it be done this way? If I'm right can anyone give me a run down on the process. Any input would be appreciated and thanks.

Simple, for many months Saddam's guys have been firing at our planes on a regular basis, and the frequency of firings had become a daily occurrence. In the beginning, their shots were nothing more than a wild attempt at shooting blind, but lately they have been getting close enough to our planes on some of these shots that the pilots had to take evasive actions to avoid a hit.

As to how we can go in and take out the sites without suffering any damage is typical of our air power, it's American planes, American technology, and American pilots. It didn't mean that Saddam wasn't trying to take them out, he just hasn't got expert enough at his new systems to do so - yet.

And by the way, we never went into Baghdad, we stayed inside our regularly patrolled airspace and took the sites out with precision "stand off" munitions which can be fired many miles away from the actual targets. By the time the first missiles hit, our planes were already returning to base :>)

What would you have us do, let Saddam keep up his daily target practice until he gets good enough to take out a few planes and then react?

Our ! Our ! Our ! You didn't do it ALL on your own you know. Some of 'Our' lads were there too.

Al,
From the Kenwood manual:

1. Tune into a 50 ohm dummy load on 28.5 MHz.

2. Set the SG switch on the rear panel to off.

3. If an RF voltmeter is not available, use a receiver tuned to 28.5
MHz. Adjust TC1 at the bottom of the final section for minimum
S meter reading.

4. After neutralization, slide SG back to the on position.

And that's it.

If your aircraft weren't in their airspace they wouldn't be
firing at them, would they?

The Iraqis have every right to defend themselves, I would
have thought! Even if they're not very good at it.

How accurate do you want the missiles to be ?
If they land within the correct country, that's good enough.

3342. Classic Sounds Hour

Classic Sounds Hour
Weekdays at 4:00pm EST
Channel V 8 on The iM_Tuner
http://www.sonicbox.com

Re-live the wonderful sounds of yesterday. Classic Sounds Hour is on every weekday from 4:00pm until 6:00pm EST. Join us as we celebrate the rich cultural heritage that we have from the 1930's, 1940's, and 1950's. The music, the news, the sports, you will hear it all here at some point in time. You can also join our live chat and request things you'd like to hear. Such as sporting events, music, or special news broadcasts. If we have it, or if we can find it, we'll try to get it on that same day. Our stations webpage is at http://www.titanicstreams.com, where you can get a complete schedule of all the wonderful olde tyme radio serials that play 24/7/365 on our station! Enjoy!

The short answer to your question is 'NO'.

This nice fellow apparently does not realize that Iraq is the artificial creation of the Foreign Office bent on splitting the Sunni Arabs between two states, Transjordan and Iraq, and saddling the latter with Kurds to whom Lawrence among others had promised a state as well as a bunch of Shi Moslems around Basra that even the Turks never figured out what to do with. Just as WW2 grew out of previous diplomatic atrocities (and for that reason tends to be viewed as the Great War redux), the present problems in the old British and French mandates were quite predictable. For that matter, the present problems in the Philippines are to some extent the outgrowth of American occupation. The Dutch are quite willing to admit their goofs in the East Indies; perhaps we all need to admit that the 'white man's burden' was not handled particularly well by anyone.

At the present rate of progress, he will also get his wish re the US military; Brussels couldn't find its collective arse in a phone booth at high noon. It would not take a hell of a lot of French politics to convince a lot of us in the US to return to being what we have been for well over 150 years, a Pacific nation. Special relationship my starched pink tutu.

A much more interesting aspect of the whole Middle East caper is that while we are focused on the larger nations, the smaller ones and the Emirates are pioneering economic and political reforms on a scale unseen in centuries. It is not a huge accident that trade and international activities are increasingly centered on the periphery of the great Arab nation. Similarly, while the world is watching France, Germany, and Britain move and shake, the Spanish and the Baltic States could very easily steal your lunch.

As far as multi-nationals, I seem to recall Unilever and Royal Dutch Shell off the top of my head and a certain company calling itself Beyond

Petroleum owning a pretty good hunk of the old Standard Oil Company in this part of the US, Amoco and Sohio. Before they got themselves in trouble Sieg Heiling, an awful lot of German chemical companies had ties to the US and their grocery companies are a major factor in the US right now. I will grant you, however, that we still follow the 14th rule of Engineering -- give a Frenchman a piece of plastic and he will do something stupid with it.

And of course, the late and non-lamented British auto industry: there will always be an England; when the key is turned off the engine will run on, and on, and on. At the present rate of American engineering, our devices will close with a 'crick' and sing Allah Akbar three times when the warranty expires.

Fun world, isn't it.

I could think of a certain radio ham that I would be happy to see used for
practice.

This is what this site is full of, don't waste your time

The page cannot be found
The page you are looking for might have been removed, had its name changed,
or is temporarily unavailable.

Please visit my World Wide Web Site, you have never seen a page like it. You
will see:

1. Access to oldies mp3 (albeit on an irregular basis)
2. Really interesting answering machine messages
3. A blond naked chick with really big knockers
4. A guide to the best ham pages ever.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in". 7. The writings of me
and others on ham radio, hear a typical ham contact. 8. The warm side of
K1OIK, hear me speak, see me with famous people. 9. An amazing card game
that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.
13. How to pass the Net+ Certification

Burt Fisher
A Plus Certified Teacher of video, broadcasting and electronics
Net Plus Certified
Amateur call South Dennis, Ma. (Cape Cod)
K1OIK Bacteria-the only culture most hams have

Those who do not know their History are condemned to relive it.

Had America not come in on our side, and we were damned lucky that they did considering we still owed them for WWI, none of us English would be posting here.
For those young people that were note around Shirer in "Rise and Fall of the Third Reich" reports what Hitler and his gang had in store for us.

So Walt it looks like some learned nothing from history.
The German people had learned nothing from History and compounded their ignorance by complacency. It was mainly the later on the part of the majority that was responsible for the events that followed the xenophobia etc.

T E Lawrence made the promise on behalf of the British Government.
When they reneged on that promise, Lawrence left high office and found a
place as a lowly soldier and later when discovered, through the good offices
of WS Churchill a lowly Airman.
For Lawrences' own views read his book
"The Mint" by 352087 A/c Ross (aka Lawrence).
The literature contains much of Lawrences' opinion of the betrayal.

Did you know that Lawrence was on the Schneider trophy team?
He remains a leading reference work on the Castles of France.

A good friend, (retired WO radio trades), that served with Lawrence in
India, informed me that Lawrence had a passion for cheese, so much so that
he was driven to use laxatives in order to regulate himself.

3380. Tube disposal

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-22 01:02:00 UTC
From: nightrunner@mindspring.com
Message-ID: <3a9464fc.6922871@news.mindspring.com>
Source record: 93159

Do not try this at home kids...as a mater of fact, do not even read it.

Found a way to get a few last moments of entertainment out of those old tubes before they hit the trash.
I tossed a few 12DQ6B vacuum tubes (one at the time, though not entirely neccessary I geuss) into the microwave and nuked em on high power for an average of 30 seconds each. Produced a very colorfull light show.
Tubes are very hot after this and the glass usually cracks so there are at least a couple of ways you could injure yourself.
Should not harm most modern microwaves, but don't cry to me if does just because you are stupid enough to try things you read in news groups.

Disclaimer: The above is just a personal observation of mine and in no way do I recomend anyone try this anywhere at any time.

Allen

You can't fix stupid. We all know that this guy that subscribes you to magazines is a loser. We all know he doesn't have a life. We all know he doesn't work. We all know that he is worthless pig vomit. We all know that his letters just show how stupid he really is. Lets just face it Dimmy is a loser.

Hello...

I am writing this out of pure disgust, plain and simple. I am sure I will get flamed or called a 'troll', but so be it. I have major concerns regarding this NewsGroup forum, however...I've seen some of them brought up before, but I feel the need to express my views also.

When a person who is interested in amateur radio and is familiar with NewsGroups, what is the first thing they're going to do? A search. And what will look most appealing to a newbie? Of course rec.radio.amateur.misc, as the title states, because it sounds like a good place to find general info on the hobby, as opposed to marketplace or some of the swap NG's. They're probably not looking to buy any gear yet, just want to get an idea of what this hobby is all about. I would imagine that there are alot of 11 meter operators who come in here, among others, who leave totally disgusted and miserably mis-guided as to what this hobby is all about, and the people who engage in Amateur Radio.

How many potential hams have we lost because of the nonsense that goes on in this forum? I realize it would be impossible to even venture a guess, but I would imagine the number is quite high! I'm glad a had an elmer to guide me in the right direction when I took the plunge in the early '90's.

I just feel that many of the posts that are placed in this NG are totally irresponsible, and a disgrace to the hobby of Amateur Radio. I could go on and on, but I won't. I know the flames are a 'comin but that's okay. I expressed my opinion. Please guys (and gals, if applicable), let's make this great hobby look more attractive to prospective hams, and stop this nonsense.

Respectfully,

R. Blaine Fox (N9LXX)
Beloit, WI

Well put. I think a vote on the charter to make this group moderated would be a
good first step in the right direction. What is really bizarre is that one you
killfile about four morons and all the sockpuppets they use, the posts slow to
trickle. As far as I know the moderator is Paul Schleck, cannot remember his call.
I know he is in three land.
Found this info via Google:
Newsgroups: rec.radio.amateur.misc,rec.radio.info,rec.answers,news.answers
Subject: Amateur Radio: Changes to Elmers Resource Directory
From: pschleck@novia.net (Paul W Schleck K3FU)
Frequency: posted on the first Monday of each even-numbered month

Summary: A contextual difference (diff -c) file for the Elmers
Resource Directory, a list of mentors, experts, and
gurus for the various technical subjects that come up
in this newsgroup.
Archive-name: radio/ham-radio/elmers/diff
Date: 1 Jun 2000 00:18:23 -0500

Do not know if he is currently the moderator or not.

On 22 Feb 2001 03:00:13 GMT, R. Blaine Fox <foxblaine@aol.com> wrote:
: Hello...
[snip]

Your "can't we all get along" topic is a Usenet classic: It crops up at least once per year in almost every news group.

Let me see if I can put your position into a slightly different perspective:

1. You don't like what you read in r.r.a.m., and so you basically want to see the group censored, and you want someone else to do your censoring for you (the censor is called a "moderator");

2. you think that moderating r.r.a.m. is possible (it isn't, because Usenet doesn't work that way; you have to start a NEW moderated group), and

3. you think that a moderated group will keep all of those nasty posters of whom you don't approve at bay (it won't, because anyone who can forge an "Approved" header can still post).

My answer to your query is simple: Moderation doesn't work the way you think it does, and in fact moderation doesn't work at all. Usenet has largely abandoned moderated news groups for that reason.

Instead, you would do well to do your own censoring. Get a good news reader with sophisticated filters and USE them. That probably means eschewing any software AOL provides for that purpose and finding your own. It means you'll have to do some work.

It also means that you'll have to take responsibility yourself for seeing what you don't like to see, instead of depending upon someone else to remove it for you. Actually, I think that's much better, because I don't want to be limited by your's or a moderator's opinions of what I ought to or ought not to read.

I prefer to make my own choices, using my own filters if need be, thank you.

As the local product would more than likely be grim if not non-existent he probably had to have it imported. Good Cheddar would require Epsom salts mixed with nitro to do any good.

One who did recognize the folly of Versailles and got into a lot of hot water over it was John Maynard Keynes. He was a character himself aside from being perhaps the only economist who ever made any money. He reputedly did his investing from his bed over breakfast and never looked

at it again over the day.

My whole point is that it is easy to get hung up on the details, one bombing or whatever, and miss the sweep of history at work. I expected a bit more of a reaction to the statement that the US is a Pacific nation although there is ample evidence for it, not the least being the Panama Canal and the Union Pacific Railroad (I live in a city that exists because it was the eastern terminus of that railway). One of the great what ifs is whether Roosevelt could have gotten a declaration of war against Germany out of Congress after Pearl Harbor had not Der Fuehrer beaten them to the punch.

Europe in general, I think, overestimates its importance to the US in the grand scheme of things. We are about to embark on a military review that among other things is going to ask just why the hell we need 70k troops in Germany to protect an area with more population and GDP than we have. Providing airlift capacity for European forces to go to remote parts of Europe to solve a distinctly European problem is certainly interesting but just how far does one go for people who can't figure out how to cross the Danube or patrol the Adriatic? Getting the Bundeswehr into position to defend something other than the German national parks (the only places left uncongested enough to fight an armored tussle with Russia) is certainly a problem both financially and politically but is it an American problem? As we head toward a commitment in Indonesia (note Australia looking to modernize its forces for precisely that reason) just as surely as the sun rising in the East the status of these forces is questionable at best. And beneath our starry flag, civilize them with a Krag.

What's needed is not moderation of the group, but moderation on the part of the participants. I'm not particularly offended by the material of the "core" participants - I don't read it. But I am really tired of the general attitude - I don't like someone so I'm going to post and post and post and post - drivel on top of drivel, on and on.

Good God, give it a rest. From what I can see there are maybe 8 people who simply can't stand each other (and maybe people in general) due to politics, religion or sexual preference - people whose original arguments appear to have been lost over time and been reduced to repetitive name-calling and childish insults. I'm not sure that even THEY remember what they are mad about.

It's not offensive as much as it is hopelessly boring and pointless. Kind of like scrounging through bins at a hamfest, looking for good, usable items amongst the obsolete, rusty,. broken, worn-out junk. But, like the hamfest, we still continue to rummage through the trash in search of that one item of value.

I think the best we can hope for is that maintaining a constant sour and vindictive attitude results in dramatically shortened lifespan and they all die off soon from their brain atrophy.

Try it with old mercury vapor rectifiers. This way your already
contaminated microwave oven will be even more so when you
use it to warm up a slice of pizza that you will eat. I'll give you
a hint knucklhead, tubes were made with poisonous elements
among them lead, selenium, nickel, strontium and other nice
stuff. Better toss away that microwave in the trash. It's likely
so contaminated by now that I'd not put *anything* related to
food inside of it. If you want to give it last rites however, put it
in the backyard on an extension cord with a bic disposable lighter
in it. That should amuse the local retards.

no, moderation doesn't work the way you think it does. have you ever
heard of pgpmoose? it uses pgp signatures on approved posts to
thwart forged approvals and automatically cancels posts with forged
approvals.

in fact, i know a moderator of a pgpmoose newsgroup, and i could probably
assist in establishing the path of trust required to get this newsgroup
moderated in that way.

True, if you want your group to be widely accepted by Usenet servers.
In effect, the old group is "rmgroup"ed and then recreated -- a process
which is fraught with failure paths. As a result (see news.answers),
the standard recommendation is to simply create a new group.

: no, moderation doesn't work the way you think it does. have you ever
: heard of pgpmoose? it uses pgp signatures on approved posts to

Pgpmoose was invented precisely because moderation hasn't been working
well at all. Like spam hippo, it depends upon auxiliary servers and is
not a part of the original Usenet specification. There are many servers
which don't honor it at all, and if you use it you're part of a Usenet
minority.

: thwart forged approvals and automatically cancels posts with forged
: approvals.

Cancels are not honored by many, many news servers these days, not even
those with PGP signatures. Abuse of them has been too rampant.

On those servers, where will your cancels get you?

: in fact, i know a moderator of a pgpmoose newsgroup, and i could probably
: assist in establishing the path of trust required to get this newsgroup
: moderated in that way.

Please take your moderation and shove it. Create a new newsgroup if you
want, but don't presume to do anything to this one.

The arrogance of would-be censors always angers me. Aside from the fact
that there's no way you'll even come close to succeeding, people like
you earn nothing but my contempt.

I tried this with my ex-wife. I had trouble explaining the presence of her being in the microwave as an accident, but all it did was p*ss her off and curl her hair.

Another stupid microwave trick, (discovered in another lifetime back in 1986 or so)...put a Gummy Bear in a microwave and give just enough time on high for it to become a Gummy Lump. Don't touch it. Watch it cool. It takes the form of a Gummy Bear again.

This is your brain.
This is your brain on Beer, Bean Dip, NyQuil, and Coffee.
Any questions?

Usual disclaimer: Don't do this if you care about your personal safety.

Take a gas tube used for lightning arresters. Microwave it. It will glow a brilliant purple. I suspect most neon bulbs would be just as interesting.

Take a CD you want to destroy. Place it in the microwave. Watch in amazement when the sparks fly all over the surface. Don't breath the burning plastic vapors... Foil gum wrappers may be just as interesting.

This is all in fun, folks. Yes, placing anything but microwave-safe food in a microwave oven can be an invitation to get hurt. Use all appropriate precautions, or better yet, just don't try it.

Oy vey, what bullsnot! You are definitely on the right track concerning e-QSLs but all this damn bureaucratic rigamarole red tape nonsense over them is preposterous.

You work a guy and he sends a plain and simple e-mail conformation. "This is to acknowledge my SSB contact with WX56Fink on 14.279 at 0046 UTC, Feb.20,2001. Ur sig 5/7 and so forth and so on." You then print it out and if need be send it to the ARRL for your WAS or WAC or whatever. If they accept it,fine. If not, they're cutting off their nose to spite their face. Why my cavalier attitude?

One has to be just plain stupid not to know that computers are overwhelming ham radio in interest/popularity. The ARRL wants to do everything possible to keep their own tuchuses afloat so why would they reject such down to earth e-QSLs? You think they're out to make it tougher on Joe Ham? And besides, we are a cut above the rest, aren't we?

By nature, QSL collectors are Boy Scouts except of course if they nowadays lean toward homosexuality which is taboo. At any rate this whole concept of e-QSLs is excellent. The price of postage keeps rising and so do QSL cards. Naturally if the ARRL goes along with the idea, their QSL printer advertisers will go crazy and try to convince them of the fact that every e-one will be bogus. But in the long run they'll shut up because it's a losing battle for them.

"Wags" you're a flaming genius but enough with all this pomp and circumstance regarding the formalization and authenticity of those cards. Want to work the country of "Goochaboola." Nowadays one can either listen for it on the bands and send a signal at 186,000 miles per second to snag it or look for a newsgroup, alt.goochaboola.politics and work it that way. Want to keep ham radio alive? INCORPORATE computer QSLs into it instead of scoffing at the idea. How about an autograph, "Wags?" You're a mover and shaker.

Now let me get this straight Darryl....

We now need a system of "E-QSL's" because (really) hams are
too stinking *cheap* to spend 34 cents postage to put their QSL
in a envelope..??

This is the root cause (above) which is REALLY driving this issue!
Is it no? Be honest now. What a bunch of tightwads you
hams are. When's the last time GW saw sunlight opening up your moldy
wallets? And I thought all these guys were tighter than a crab's asshole
at hamfests - hoy.

Er, I think you have that wrong OM. I am a keen supporter of the US but it seems to me that the US has it on it's mind to export its rules, regulations and laws to the rest of us whether we want them or not.

Well I certainly think that Europe should look after its own affairs. However, should that mean that the US should not rely on europe to provide a site for its new anti missile system ? The last administration seemed mighty pleased that lil'ole'Britain could provide them with a foothold. Personally I feel more aligned with America than Europe. After all we fought against most of them often enough, and against our Colony only once. The outcome of that was the US

I really think cost is a secondary factor. The main factor is that e-QSLs
are
easy and fast. I known hams who have waited over a year for a QSL card.
Cost is important as well. There is the cost of printing and the cost
of mailing. $0.34 isn't much until you have to mail out 30,000 cards, then
we are talking real money. Even someone like me who only makes
a few thousand contacts per year it still adds up.

The other issue is Trusted E-QSLs will help streamline the awards process.
Not only in the amount of time it takes to process the award, but in
the time required to collect the QSL cards.

I have been getting a lot of interest in email about this concept.

You took my post entirely in the wrong context. Believe me, I am a FIRM
believer in the right to state one's opinion and do NOT condone censorship.
The point I was trying to make is simply that the mindless drivel that occurs
here on a daily basis is a very bad indication of the status of our hobby, and
I'm sure it's driven many a new-comer away. I think it was said best in
another post...I think 'self-moderation' is in order here, rather than
censorship.

Hello all.
I have a near mint condition 940SAT for sale in the Detroit area. Unit has a minor scuff on the top and the display light has an occasional problem of remaining unlit when the rig is first turned on after some inactivity (pops on when you toggle the 'dim' button) but otherwise looks and works perfect. I'm moving to a more antenna restrictive apartment so I need to sell my baby. Comes with the power cord and manual. No box or microphone. $1000 OBO. If shipping outside of the Detroit area, I will need some help with shipping costs.
Will also consider trade for an IC-706MkIIG or FT-100

I've already been notified I'd be a pariah if I opposed this idea, so my
continued opposition can't hurt me anymore, I guess.

There are four reasons (at least) why this idea will not be widely adopted.

#1) Traditionalists (like me) who place high value on paper QSLs will not
participate in an eQSL scheme.

#2) Most major DXpeditions derive much of their funding from donations
received in the QSL process. They are unlikely to participate in scheme
which diminishes that funding channel.

#3) Perhaps less than 50% of the DXCC 'entities' have the required telecom
infrastructure to support routine participation by the average resident.

#4) ARRL is well down the path of deploying LOTW which will become the DXCC
"eLog", and thus the 'solution of choice' among serious DX players. Any
other scheme is second-tier right out of the box.

73, Pariah, K0HB

Good luck on this one now!

Hi guys !
I am really interested to operate my HF radio in a field, but I have no idea what stuff I need to have for this. As I know, I have to use some "deep charge" battery like YUASA or EXCIDE instead of regular car battery.
That's it - I don't know anything else ...

Environment: Field or small hill, FT1000MP, 50-100W SSB-CW, medium activity, about one day operation ...

What kind-type-model of battery I do need?
How many Amp-Hours?
Do I need to install fuses in DC cord? How many of them?
How I can recharge the batteries?
Any suggestions about antenna type - multiband dipole, delta, vertical ?

I will really appreciate everything - links, books, magazines, personal stories, dealership names&locations ....

Would it not be a good idea for all the many USA bases around the world, which have housed the USA occupying and strategic bombing forces for the last 55 years, to be withdrawn back to the North American continent and grounded. The World could then sleep better in its beds.

And as we seem to be so concerned about the safety of our brave Purple Heart bomber boys, would not bringing them home be the best way of protecting them, their wives and families, from the non-existent Iraqi and North Korean "Weapons of Mass Destruction"

Or is the multi-national price of oil and gasolene in San Francisco and Washington considered to be of greater importance ?

> What kind-type-model of battery I do need?

Really big to meet your wishes (see below). As you say, deep
discharge rated. Brands are less important. I would not buy a battery
that is only rated for "cranking" and "reserve" amps. I ran across
this for some so called deep discharge batteries. I feel that if they
won't specify the A/H at a given discharge rate, there is a (not so
good) reason.

> How many Amp-Hours?

Check you radio manual for radio current draw on receive and
transmit.
Number of receive hours times (x) amps = xx
Number of transmit hours times (x) amps = xx
---
add, then multiply by 1.25

This is the amp-hour rating which will about suit you needs. Note
that most battery A/H specs are for a 20 hour rate. Shorter times
(higher discharge rates) reduce the effective capacity. The 1.25
factor is an attempt to compensate for this and to avoid completely
discharging the battery during use period (hard on bat life + radio
may not work well on 11 volts or so).

> Do I need to install fuses in DC cord? How many of them?

Fuse both the + and - leads from the battery as close as possible to
the battery. Use heavy duty fuses and large wire to minimize voltage
drop. For a SHORT run using your rig, I would use #10 or larger.

> How I can recharge the batteries?

A battery charger :) Seriously, for a battery of the size you are
requiring, a genset and charger would be best. ...Of course, if you

have the generator, you don't need a battery. A very large solar cell array / charger if you have lots of sunny days between sessions. It could be done with a car/truck, but would take a while and could be dangerous to the vehicle systems if not done just right!!!! Beware of this.

> Any suggestions about antenna type - multiband dipole, delta, vertical ?

This depends entirely on what bands you wish to use and what will be available to mount the antenna. Generally speaking, and given there would be something to hang it from, I would go with dipoles for the desired bands. A vertical would be practical only if it is the type using a "counterpoise" rather than radials. Sufficient radials for a "conventional" vertical, for this mode of operation is not practical.

A (fishing) spinning rig, slingshot with reel/line, or small bow/arrow w/reel line, and some nylon cord can be very useful to hang dipoles. I prefer the bow/arrow for best range and control. Have weighted, blunt tip arrow with hole drilled in nock? (rear) to tie ~17# fishing line. Use that to pull up 1/16" or 1/8" nylon.

SNIP

Wrong again, Eric. You better go search the archives to see about the
Hugh Duff (VA3TO) situation.

> you deliberately tried to stalk Mr. Cheek. You pulled every dumb stunt in
the

I have never stalked the person you mention & have never pulled a dumb
stunt.

> and then when you were passed up for
> moderator of the sacannradio forum (that job went to bill cheek), you lost
it

WRONG!! The person you mention above (now deceased) was the moderator
of the Scanradio echo on Fidonet, & upon his leaving the moderator position
he
ran an election. I was nominated for the moderatorship & he refused to
accept
the nomination or any votes for me. Then another individual became the
moderator.
I was NEVER in competition with the person you mention for the
moderatorship,
rather he acted to hinder the democratic will of the users of the echo who
did
want me for the moderator as he was leaving the position to comply with the
request that he vacate Fidonet.

Why is it that SO MANY PEOPLE HATE YOU, ERIC OYEN (AKA PROUDHAWK)

>"moderation?" Retromoderation has always worked poorly anyway.

of course these cancels are pgp signed, but if a news server is going to
ignore all cancels, then there's not much to be done about that.

Well said, John. I don't agree with a lot of the junk I see in these newsgroups (all newsgroups, not just this one), but the solution is not found in censorship - the solution is to simply not read any message that does not interest you (nobody is forcing anyone to read those messages).

From: Buzzsaw <"Catch Me."@edu.com>
Message-ID: <9751i5$2s2$0@dosa.alt.net>
Source record: 93118

News in of late is that W4AMP was asked to leave the 3.898 HF group after attempting to befriend the users there. He was told in no uncertain terms to leave and not return and his consequent attempts to talk to the guys were met with silence. Aw, Gee!
Locals in the Hiram, Georgia area on the 220 repeaters likewise report that W4AMP is no longer welcome on their repeaters. Seems that his foul language is not appreciated there, just as he is not appreciated on many of the other local bands. Control Ops in the area state that he is given to using foul language and on occasion makes racial comments that are unacceptable. Control Ops state that AMP is often out of control and at times appears to be operating under some sort of "chemical influence". They claim that he has used their repeaters to send his wife to local liquor stores and oftimes gives her "orders" while on the air. Control Ops claim that this is a misuse of their carefully controlled systems and wish for this activity to cease.
AMP should move his activities over to the 11 meter band, tho he is not well liked there, either. Rumor is that AMP and Wrong Way have an ongoing feud on 11 mtrs, but for what we have yet to discover. More news when it becomes available.

>Fuse both the + and - leads from the battery as close as possible to
>the battery.

While it makes sense to fuse both the + and - leads when operating rigs directly from the build in car battery, in case the heavy wire between the car frame and the - pole of battery is broken or disconnected. In this case the starter current would flow from the permanently installed radio frame (or antenna ground plane) through the negative radio power supply wire to the battery, causing a lot of damage.

If the radio is operated from a dedicated deep discharge battery, which is separate from the electric system in the car, I do not see any reason for putting a fuse on the negative pole, since it only increases the loop resistance. The fuse installed close to the positive pole of the battery should be enough to protect the wires in case of failures in the cabling between the battery and the radio. The internal fuse in the radio should protect against failures _inside_ the radio.

I'm quite sure many Americans would agree with you. However the USA has
interests in many parts of the world. They 'look after' them by making it
possible to defend those interests quickly and as effectively as they can.
For that reason they maintain outposts and bases all over the place. In the
case of Britain, we used a small island in the mid Atlantic during our
Falklands War. Very effective it was too. We would have used one a lot
nearer to that island if we had one. However we didn't.
>
> non-existent Iraqi and North Korean "Weapons of Mass Destruction"

You are entitled to believe that if you wish. I do not. Saddam Hussain has
the determination to cause mass destruction. Mercifully he has not the
means. The reason for that is the cause of this string in the first place.
Allied bombing.

Apparently Mr. Cotter Pin, you have never sent a DX QSL, they cost of "one Hellva" (using red neck vernacular) more than $0.34 to send. In fact it is now for just a basic DX QSL as follows:

sending envelope $0.05
SASE $3.05 (up to)
QSL $0.15 (up to)
Total Cost $3.25 (up to)

Now to qualify this "up to" amount, this card was sent to a German QSL manager. I would guess the average cost is around $2.00 per card, if an American Ham is being nice and trying to pay their way.

What I cannot understand is this issue "pisses you off" so much. It just people putting ideas up for evaluation and process improvement. Personally the cheapest people in Ham Radio I have met are the ones who show up to Hamfests and want to give one $5.00 for a piece of equipment that really worth several hundred. These people usually are trying to buy low and then in turn sell high at another Hamfest. This does not have one damn thang (using neck vernacular again) with the cost of QSLing.

I dont know what exactly your problem is but dont take it out on the rest of us.

lak

On 22 Feb 2001 19:39:28 GMT, R. Blaine Fox <foxblaine@aol.com> wrote:

: You took my post entirely in the wrong context. Believe me, I am a FIRM
: believer in the right to state one's opinion and do NOT condone censorship.
: The point I was trying to make is simply that the mindless drivel that occurs
: here on a daily basis is a very bad indication of the status of our hobby, and
: I'm sure it's driven many a new-comer away. I think it was said best in
: another post...I think 'self-moderation' is in order here, rather than
: censorship.

While I agree that the group is inhabited by some jerks who post mindless rants, I think that it has to be viewed in the larger context of Usenet. It seems that drivel can be found in many other newsgroups, and that it isn't a problem unique to rec.radio.amateur.misc or, by extension, to ham operators. It is a "feature" of Usenet itself.

That having been said, it is nonetheless obvious that much of the drivel is being posted here because it can no longer be done on the air, after an FCC crackdown drove some of the warring parties off the ham bands. At least here, they can be 100% filtered out without any attenuation of other posters, and most of us simply ignore the garbage posts.

Newcomers to r.r.a.m. should also realize that they are first and foremost reading a Usenet group, and they should not confuse it with amateur radio itself. If they aren't smart enough to make that distinction, perhaps they aren't much of a loss to the hobby after all.

Or perhaps someone could periodically post a warning to r.r.a.m. that its content is atypical of radio amateurs. That would certainly be easier and probably just as effective as moderation would be to protect the newcomers.

If you'd want to take on the task of posting, say, a monthly warning yourself, I don't think that anyone would object.

Regards,
John

3448. PC-Electronic Morse Code Keyer (elbug)

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-23 15:06:57 UTC
From: Ludwig Szopinski <szopinski@gmx.de>
Message-ID: <3A967C91.51333A5@gmx.de>
Source record: 93126

Hello!

Two Freeware-PC-Electronic Morse Code Keyers (elbug) for download.
** Pages and descriptions in English! **

KV (v0.50) by Uli/DF4KV
This small program will emulate an electronic morse code
keyer (elbug) on your PC. The keyer paddle (either single or twin-
lever type) is connected via the LPT1 printer port, the interface
being compatible to the N6TR contest software.
Description and download via http://www.qsl.net/dk5ke/pckey1.html

CWK (v5.3) by Heiner/DK5LI
CWK emulates an Electronic Morse Keyer (elbug) on your PC.
The program may be used for both, squeeze paddles as well as
conventional single-lever paddles.
Description and download via http://www.qsl.net/dk5ke/cwk1.html

Best wishes!
Ludwig, DK5KE

Boy! Reading Roger's meandering, filth-laden posts must be what it is like to walk through a New York City sewer. Same old s--- time after time after time. Nothing original, no depth of thought. Nothing.
I have to suspect that Roger garnered most of his working vocabulary from the walls of the public mens' rooms he lurks about in.

Tend to agree but our glorified school board called Congress rarely knows when to quit. This is also not a peculiarly American disease, witness Brussels pronouncing upon some uniquely American aspects of a merger of two American companies, or for that matter China insisting upon the great Taiwan myth. Incidentally, Congress has not fared too well in the Supreme Court of late; seems that the good justices have rediscovered state sovereignty. When they step out of line, apply for a writ of habeas horseshit.

Actually you fought us twice, 1775-1783 and 1812-1815, the latter incidentally brought on by some British extraterritorial regulation. Wellington, having disposed of Napoleon, was asked to do in the Yanks but begged off on the theory that he couldn't do much until the Royal Navy could control the seas and Great Lakes. The larger, faster, and more manuverable frigates out of New England gave the RN fits.

In return for a rather stupid attack on York (Toronto) you burned down the White House and most of the malaria-ridden swamp called Washington. There are any number of us who are ready to hire the RN to do it again on the theory that Washington is beyond reformation, leaving only sacking and burning. We had better get to it while the RN still exists.

This raid also produced the only recently-closed Fortress Monroe, Virginia which was the only US military installation with an honest-to-goodness moat.

If nothing else, the Revolution showed you how to do it right later on, relieved a fantastic financial drain, and so bankrupted the French that heads rolled. All in all, you might have gotten the better deal.

You speak of the colonies in the singular. The US became a nation rather than a collection of states July 4, 1863 at Gettysburg and Vicksburg. We can't blame you for that in contrast to Australia and New Zealand who blame you regularly every April 25th on ANZAC Day for turning colonies into nations.

About ten years ago I was in a local pub near Burford west of London on the A-40 having participated in a charity cricket game, a sport that it is on my retirement list to figure out just what in hell I was doing. Phillip had delivered himself of a speech on pollution and I was beset by the classic earnest young man from Oxbridge berating me for our

government's inaction in this vital area. The choice was to spend the next six hours beating a Federal system into his head while asking such questions as why Ford could not get the rented Escort I was driving thru US pollution control and was it true that the Irish Sea and some areas off the Channel Islands glowed at nite from radioactive waste. Probably would have asked what held up lead-free petrol so long as well.

Having no particular wish to undertake the task or for that matter piss off my hosts and other locals to no good purpose, I enlisted him in the Royal Order of US Foreign Policy Watchers which actually serve a salutary purpose.

When, as, and if you see any evidence that the US even has a foreign policy, or you observe at least three actions consistent with any policy (rational or otherwise), you must perform your civic duty and tell the American public about it at once so we will know, too.

Probably got a major chuckle out of the inaccuracy of the new super-duper
and horribly expensive Navy bombs as the sand dunes blew up.

Kind of reminds you of DIVAAD, once known as the Sergeant York til his
family sued to get the name off the turkey, whose radar couldn't find
airplanes but was deadly to any PortaPotty in range.

Here is the deal,
Moderation doesn't work never has worked and probably never will work. So here is what YOU do. If there is a post in the newsgroups from a person you don't like or you don't want to read what they have to say about a topic DON'T open the post! What is so hard about that. That is the problem with the human race today everything is just so complicated. Guess what! Its really very simple. So don't open the post. I love how these clowns all complain about what someone writes and they see that persons name and the first thing they do is open it then complain about what they have read. You don't have to read another person's post.
By having Censorship a persons right to free speech is taken away. The group is a place where ideals are passed around. That doesn't give anyone the right to say one person smokes dope when they don't! But it does give a person the right to say a person has been busted for dope when they have! So free speech isn't the right to slander someone or for the idiot losers like Dimmy Pigvomit Obrainless (who by the way is a convicted doper) out there that are to stupid to understand slander. Slander is the act of telling lies about people for the purpose of causing that person problems.
Oris Grim

"You", of couse meaning the context of the collective US, I am not
suggesting "you" supplied anything, merely that your country did.
I feel you are being oversensitive.
Just to remind you of something you wrote earlier in this thread:-

Quote: "If Old man Bush had finished the job, we wouldn't have to
deal with Saddam now."

Note the use of the collective "we" when it suits. This usage is
indeed common amongst the US population, indicating a sense of
"family" and of belonging. Perhaps you should not use these collective
terms either if you are so uncomfortable with it Roger.
It does not bother me, as I am intelligent enough to understand the
context in which you are using the term "we", for example.

>Learn to read the attribs, Steve....I didn't write the above "quoted" text. I
>did reply to another poster, which you snipped out. Either learn to use your

>damn mouth, twit.
>
>73's de Roger/KC8JBO

Okay Roger, my editorial mistakes were not intentional. I meant to
also snip the top lines (your name etc) and simply leave quoted text.
This is something I do often, to avoid mistakes such as these when
complex quotes are involved.
I apologise unreservedly. However, I do feel your attitude sucks.
Why not simply state what you mean without all the unnecessary
aggression? It achieves little during a debate, antagonising others
rarely produces the desired actions.

Steve.

Does anyone know of an antenna project book/site/source that utilizes Heliax as a construction material? I seem to remember Ken Sessions (73 Magazine) having a publication years ago with vertical collinear projects that replicated commercial antenna construction.

Any help would be appreciated.

Thanks and 73

<mike@pickmere.demon.co.uk> wrote:

>What contamination?

It has been established that the US supplied a quantity of impure
Depleted Uranium (DU) to Europe for warhead/projectile manufacture.
Ongoing studies, as reported in respected UK newspapers, show that
when these shells vapourise, there is considerable airbourne
radioactivity.
The inclusion of heavy metals such as Plutonium and other transuranics
means they are also airbourne. The effects of these on the health of
exposed persons is markedly more dangerous than breathing in Uranium
oxide particles. The real high risk from radioactivity is not from
external exposure (Alpha particles won't even penetrate skin layers),
but from ingested contamination.

Steve.

I don't keep up with this newsgroup on a daily basis, probably more like every couple weeks due to my work schedule. After reading this one though thought I'd better respond. Not sure how long ago it came in but I had a very bad experience with Texas Towers when buying a Yeasu FT 100-D. You'd think that after paying over a 1000 clams for something that you could expect better than "very" rude behavior from the salesperson. The red flag went up in my brain the first time I spoke to him, he was a little curt, but the other salesman had been so nice that I kind of pushed it to the back of my mind and figured he might be acting that way because I was a woman. Then after purchasing the radio and paying over 50 dollars to get it overnight, it didn't come in until Monday. I wanted it for the contest that weekend. I had payed $30 for over night and didn't get it. I also did not get the extra back. He flatly told me he had made one call to ups and he was not wasting anymore of his time calling again. Mind you I had just spent quite a bit of money. I told him that was a pretty bad attitude to take towards a customer and he wouldn't get anymore of my business if he wanted to act that way, his answer to me was I don't want any more of your business. Since then have had several reports from others of similar bad experiences so you might try another source for this antenna if you want one.
After that if you get it I'd love to hear from you how it works out. We have thought of buying one for similar reasons. Sorry so long, Thanks, 73' Kathy AC4LB

> UK) and even that price-level has given rise to public protest. Maybe
> the Americans are just better than we are at organising their affairs

U.S. gallon equal to 4 quarts (3.785 litres).
British Imperial System, equal to 4 quarts (4.546 litres).

So you only get 83% of a real Gallon.
Just paid 80p for a litre of diesel, so that would be £3.03 a US Gallon

At $1.4546 per £ gives $4.40 per US gallon
Or 2.65 times as much,
and that's for Diesel.

No wonder America is the biggest polluter.
No wonder we can't stop them using their cars.

They'll be no burning Bush this term.

Message-ID: <978qkiqlf1@slb3.atl.mindspring.net>
Source record: 93061

In all honesty I have come to the conclusion that W4FQF is suffering from some sort of mental disorder. I base this conclusion on years of observation.

Many years ago he would spend his entire day on 20 meters. Busting up on-going communications, inserting comments. And going on and on about "Herby number one". This in itself is 'sick' behavior.

After a LONG time three SEPERATE groups of amateurs tracked down the 'Parrot' to Memphis Tn. Shortly thereafter he began using his call...W4FQF.

A period of almost normal activity insued. He required all who talked to him to call him George. I began to worry about him at this point. He then latched onto the 3.8945 group of Radio Terrorists called the Abernathy Radio Group, run by K4OKA, a renowned 75meter QRMer.

At the behest of OKA, Polly and his buddies jammed the hell out of 3.901 for years.
This finally stopped when Polly moved from Memphis to the mule barn and could not talk to W4LLI groundwave any longer. He got real real lucky there....Riley didn't show up till later.

Now his latest thing is that "Im innocent, W4NTI did it go me", or something to that effect. The only thing I did to him was call him the asshole he really is. And I don't even own a tape machine. What P/G don't seem to understand is that there are a lot of folks out there that want him to pay. I'm just standing by and watching them self destruct.

Are there any qualified head doctors out there? Is my un-educated opinion even close? I think there are two people living in FQF's head.

Comments?

Dan/W4NTI

3485. Beacon help plus solar reports and forecasts

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-24 18:26:06 UTC
From: J Tabor <denews@taborsoft.com>
Message-ID: <t9fv623b7kcf20@corp.supernews.com>
Source record: 93063

Greetings,

The NCDXF beacon system is an awesome resource. It's also lots of fun.
http://www.ncdxf.org/beacon.htm

We provide a download able software app called Active Beacon Wizard ++, or ABW++ to help listeners make easier use of the beacon network.

ABW++ displays the currently active NCDXF beacon over a topographic map, along with the solar terminator. Tools for setting the system clock, via the net, are also provided.

ABW++ will download and display selected, totaling 14, Space Environment Center (SEC) solar reports and forecasts. In addition, ABW++ provides the comprehensive SEC glossary of solar terrestrial terms. This glossary, along with report explanations, is provided in windows-help-file format and may be of use when interpreting the propagation reports and forecasts.

ABW++ requires win95 or later.

Look for the "Active Beacon Wizard ++" link at the URL below.

Thanks for the heads up!

Such boorish sales people, I am afraid, can set me off pretty badly. That just happens to be one of the "buttons" that *can* set me off. I once called a local attorney's office looking for my own attorney. Instead, I got a particularly grouchy old buzzard who was, in the absence of my normal lawyer, filling in--and VERY unhappy about it. Upon asking very politely some questions, I felt I was under assault by a boar HOG! He was VERY rude, condescending, and even took a threatening tone with me as if he was quite put out because I disturbed his nap(?). I asked him, "Sir, are you having a bad day?", to which it sounded like I was assailed by a junk yard dog--ARF, ARF, ARF, WOOF, GROWL!!!

I hung up the phone and I felt it start. A feeling that begins almost in my feet and, like Old Faithful, rises to the top of my head! I was shaking like a leaf! Not from fear, but from RAGE! I grabbed my jacket and made for the car. I drove uptown and parked the car, then went into the offices of these attorneys. I was still mad, but not like I was at first. But I walked right into the old geezer's office, brushing past the secretary and I pointed my finger right in that old SOB's face and told him this: "Mr. Whitesides, if you worked for my corporation and even looked like you were going to talk to a customer the way you just got thru talking to me, you'd be out on your keister within the hour! Next, if you EVER, EVER talk to me like that again, you old buzzard, you had better file a flight plan because you WILL go on a short TRIP. I WILL bust you right in the mouth and send you skidding across the floor! You have an alligator mouth and a canary a**, and you're fixin' to write a check that canary a** can't cash!"

The old guy was rigid against the back of his leather office chair, knuckles whitely gripping the arms. I scared the dickens out of him! All during this diatribe, all he coud say was, "WHA--, WHA--, WHA--!" I also reported him to the local bar association which put a black mark on his record.

Now that WAS an ugly exchange that I probably shouldn't have engaged in. But. you know, that lawyer has been exceptionally nice to me ever since! LOL!

Best,

Jerry

Hurry, Hurry, Hurry! Step right up! Get it while it's hot! Special Today! Movie and a Beer.

Mike's Liquor Store will be featuring a special sale on Old Milwaukee beer today! Buy two, get one free. Cash sales only.
As a first ever event, Mike's is also announcing a premier showing of a feature-length movie starring one of Mike's very own customers! The movie will be shown at 9:00 and 11:00 p.m. this evening and free popcorn will be served. Due to the content matter and the ugly graphic nature of this movie, those with squeamish stomachs should not view it. Mike says that "barf bags" will be placed beside each seat.

Suzy can answer Yes to all of these but the last two.

1. Have you used drugs other than those required for medical reasons?

yes no
2. Have you abused prescription drugs?

yes no
3. Do you abuse more than one drug at a time?

yes no
4. Can you get through the week without using drugs?

yes no
5. Are you always able to stop using drugs when you want to?

yes no
6. Have you had "blackouts" or "flashbacks" as a result of drug use?

yes no
7. Has drug abuse created problems between you and your spouse/partner or
your parents?

yes no
8. Have you lost friends because of your use of drugs?

yes no
9. Do you ever feel guilty or bad about your drug use?

yes no
10. Does your spouse/partner (or parents) ever complain about your
involvement with drugs?

yes no
11. Have you neglected your family because of your use of drugs?

yes no
12. Have you been in trouble at work because of drug abuse?

yes no
13. Have you lost a job because of drug abuse?

yes no
14. Have you gotten in fights when under the influence of drugs?

yes no
15. Have you ever engaged in illegal activities in order to obtain drugs?

yes no
16. Have you ever been arrested for possession of illegal drugs?

yes no
17. Have you ever experienced withdrawl symptoms (e.g. felt sick) when you stopped taking drugs?

yes no
18. Have you had medical problems as a result of your drug use?

yes no
19. Have you gone to anyone for help for a drug problem.

yes no
20. Have you been involved in a treatment program specifically related to drug use?

Fellow Transmitter Hunters,

For those of you who have not yet heard, the first USA Amateur Radio Direction Finding (ARDF) Championships will take place in beautiful Albuquerque, New Mexico on July 31 - August 4 this year! This exciting event will bring in T-hunters from all over the U.S., as well as from around the world! In fact, the Chinese Radio Sports Association has indicated its intent to send a team to compete in this event, and we have received word that a team of ARDFers from Australia might join the fun, too! A 2-meter hunt, as well as an 80-meter hunt will take place during the Championships.

For those of you who DO know about the event, I would like to remind one and all that if you register for the 2001 USA ARDF Championships by ** MARCH 1st, 2001 **, you will receive a registration fee discount! There is only 5 days left to qualify for this price break before the deadline, so please consider registering soon!

Details about this wonderful Amateur Radio event, including an event schedule, information about Albuquerque, rules and a Printable Registration Form can be found on the world wide web at:

http://groups.yahoo.com/group/abqardf/files/web/index.html

We invite you to participate in this historical and extremely memorable and fun event. If you have any questions, please direct them to the core event planners at abqardf@egroups.com

Isn't that a violation of the court order there dumbo? I guess you have been in violation since you lied under oath about Your webtv account. Gee what ever happened to the Mydeja posts from suzithepig? Aw to bad that you can't post without saying who you really are. Isn't that just to bad.
I love how one day you butter up to Dan than the next day your going to beat him up. My oh my! What other lies have you come up with? Whose computer are you trying to hack into now? Does Bellsouth know that you are over there TRYING TO hack into other peoples computers. Hey fat boy that is a federal offense! Mail fraud is a federal offense too. Gee how much old beer have you had today scum bag? Whose children are you accusing of being truck stop whores. Whose photo have you put up lately and said they where wanted by the FBI when they weren't? Whose wife are you trying to destroy. You wonder why nobody likes you pig vomit. Your a lier cheat and the theif! I'm going to throw one heck of a party when the feds yank your ticket.

Can anyone please give me information regarding where I can find anything regarding Yupiteru radios. I recently spoke with a friend of mine who travels extensively, and he mentioned the Yupiteru name and I was interested in finding out more about the company and their products to see how they stack up against other companies like AOR and Icom. The search I've already done has not given me very many satisfactory sites to go to. I gather that the radios aren't available in the States, but only from Asia or Europe.

If anyone has a Yupiteru, or knows someone that does, I would be interested in chatting with them via e-mail. From what my friend said, they sound like interesting radios.

Thanks.

Oris...you forgot to mention mailing subscriptions to others, mailing
letters to all the neighbors of his enemies that accuse his enemies of being

dangerous and mentally ill, mailing abusive letters to his enemies' employers, harassing midnight hang-up phone calls from pay booths, going to a nursing home and threatening one of his enemy's aged mother, stalking, etc.
Let's see....I just know I left something out. The list is so long.

3501. Re: WANTED 50 OHM ATTENUATIOR

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-25 00:04:50 UTC
From: Reg Edwards <g4fgq.regp@btinternet.com>
Message-ID: <979i50jqm1@uranium.btinternet.com>
Source record: 93078
Cross-posted to: rec.radio.amateur,rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc

Such attenuators do exist. I have in the shack a 0-100 dB
attenuator in 1 dB steps. It was manufactured by Pascall, UK, about
5 years back. I forget the price but it was quite expensive. Don't
know whether the firm still exists. Built into a solid die-cast
aluminium-alloy box.

Cable leakage does not increase with frequency - it decreases.
Worst of all at DC and audio frequencies. Leakage occurs mostly at
connectors. Use threaded types, not simple plug and socket.
Impedance mismatch at connectors is no problem with attenuation
measurements.

I have made measurements up to 160 dB at up to 5 MHz by comparison
with variable attenuators. A 10 watt signal generator is needed.
Without any extraordinary precautions it is possible to make
measurements with an uncertainty of a few tenths of a decibel at
100 dB.

I have also made measurements with a precision of 0.001 decibels at
frequencies up to 10 MHz. Such measurements are necessary to
determining the loss vs temperature coefficients of components and
systems when it is possible to vary the temperature only a few
degrees C. A high precision is also needed when calibrating field
attenuators against laboratory standards.

Dual Band Amateur Ham Radio Handheld
EBAY AUCTION Item #1216996273

For Sale : MAHA-REXON RL-501 with 200 channel memory, Dual Band ht 2mt/440mhz with MAHA's NMH High-output battery pack. Last for aprox. 14hr of listening to the local repeater. I have the original box, packing and owners manual along with the ac charger and a custom leather case, and a speaker mic that I will include in this auction. Has seen little use, mostly during field day. I am selling to upgrade to the new APRS handheld, as I enjoy that aspect of the hobby more theses days. The unit is used but clean, small marks on the original antenna where the speaker mic was clipped for storage, but unharmed in anyway. I would rate this unit a 8 out of 10 on the looks scale, and a 10 for opperation. As with any used gear I will not accept any returns or refunds, and this unit is sold without any warranty, but I will state that this unit is fully functional on my desk as I place this auction listing.. I AM A PAYPAL VERIFIED Seller, I would like the winning accepted bidder to use PayPal with Visa or MasterCard etc.. much Quicker and it protects you against fraud, but will accept money order / certified bank drafts, No personal Checks. Buyer to pay Fixed S/h of $10.00. US Bidders Only. I reserve the right to offer to sell to the next highest bidder if the winner has unexceptable bad feedback Rating.

On Feb-22-01 at 20:06:53 PST, seller added the following information:

I accept PayPal, the #1 payment service in online auctions!

I don't know if the feds are on him or not. But I will notify my good friend who is a special agent with the FBI from the NY office, and also a former Agent who is the former director of the FBI NY Office. And if he had anything to do with money, I will also notify the Secret Service b/c an agent also lives down the street. (Hard to believe, but true) Now, for this guy, this may not be much of a threat, for all you know, I could be bluffing. Hell, why not just to scare him, right? Well when they do get onto you and if these charges are true. Doesn't matter if these posts scare you or not, it's simply that you will be visiting the Grey-bar hotel for a long while.

Thanks there old pal

3511. O'Clueless Lost His Antennas

O'Clueless lost his antennas, rain gutters, and shingles in that bad wx the Southeast had last week. Must be why he didn't attend Dalton this year, too busy patching his roof with cardboard boxes and tar paper. Poor O'Clueless, his threats are as empty as his wallet. Oris was at Dalton and bought all kinds of goodies home. We looked all day for O'Clueless but never saw him.

Monitors are killers.. but I had a lot of noise and I found out it was my
old modem.
Unplugged it and that was fine.
Strange hey?

One thing I do is change the monitor to a different display pattern... It's very interesting, turn your radio volume up and chnage the screen to a DOS window and the noise dissapears... if you need your computer during radio, this obviously own't work... I would buy a good video cable and put a few RF chokes on it to pull down some of the real high transitions....

Good luck, Michael K3MH

If your running your monitor at 800x600 go to the 640 you will notice a
bigggg difference and or change the screen rate IE: 60HZ 56HZ Optimal ,
default.. try it

I guess that it must be quite expensive if you really get such
accuracy as you later claim, even in a controlled constant
temperature.

I also suspect that the VHF/UHF performance is not that spectacular
and since the original poster did not specify the required frequency
range, I originally asked about it.

>Cable leakage does not increase with frequency - it decreases.
>Worst of all at DC and audio frequencies. Leakage occurs mostly at
>connectors. Use threaded types, not simple plug and socket.

DC and audio circuits generally have a much higher impedance levels
than 50 or 75 ohms used in RF circuits, so the capacitive coupling is
a much worse problem. At very low frequencies the coaxial cable does
not work properly as a transmission line, thus the isolation is not
very good. However, due to losses at very high frequencies, the shield
no longer act as a perfect conductor and you can get different
currents flowing on the inside and outside of the shield.

>I have also made measurements with a precision of 0.001 decibels at
>frequencies up to 10 MHz.

I guess that must be the readout resolution in some comparative
measurements but not an actual precision. A 0.001 dB voltage ratio is
115 ppm (0.015 %), so I wonder how this accuracy could be maintained,
especially if some real power levels are involved heating the
attenuator.

3522. Lib Net Getting Nutso?

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-25 08:30:43 UTC
From: Buzzsaw <"Catch Me."@edu.com>
Message-ID: <97afpdlse0@pita.alt.net>
Source record: 93000

Did ya hear the old dudes on the Lib Net this evening? Their false teeth were flopping in their heads as they described hundreds of conspiracy theories. I bet old Vic looks in his closets every night before going to bed...gotta check for Communitsts in case one or more of them sneaked into his house while he was broadcasting. Old Vic must run about in his skivvies...gun in hand, and peers cautiously into every crack and crevice. Gotta also note the oldster dude (KA4NY) who reads garbage garnered from the Web...he must be near-sighted since he takes so much time to read his drivel. Good thing he doesn't take the time to color the pictures or he'd never get done and the Net would be going on well into next week. This Lib Net garbage is long enough as it is....
OOPS! What was that? There it goes again! I saw a Communist running through my back yard! I better go outside and make sure they didn't put any listening devices in my car! I better take a gun with me. Let's see...which gun should I choose? I'll take three of them. Gotta load up with ammo, too. Those Commies are dangerous. Better grab a canteen of water too, just in case they poisened my well.
Those Commies are nuts. I am not.
Oops! My security lights just came on...now I KNOW they are coming for me. Cannot call the local cops. They are part of the New World Order, too. I better get to the basement and head for the bomb shelter. I can hold out there for weeks....got dried foods and ammo to no end.
Oops! The lights just went out! They timed this with the thunder storms...but I know they shut my electric off on purpose. Gotta lock and load and hide in the basement. Where's my bayonet?
Somebody is creeping down my basement stairs...they must have picked the locks on the upstairs doors. I hear the footsteps...closer, closer.... must be somebody from the United Nations...
Boom! Boom! I let them have it with two thirty round clips of .223 ammo...that will show them. What? Did I mess up?
Oh, no! I just shot my wife's pet dog all to shreds. Oh, well. That's what the dog gets for being part of the New World Order. Guess I can go back upstairs and listen to the Liberty Net while I clean my guns.
We can always get another dog.

This will be an open letter to W4AMP of Hiram, Georgia. AMP makes no secret about posting as SuzyDaPig on this group.
Dimmy...prepare to copy this letter so you can whine to whoever you go crying to every time you see a post you do not like.
I want to go on record here...
Dimmy...the midnight hang-up phone calls are not funny. As you know I took steps to cancel your incoming calls, thereby thwarting your harassment attempts.
Dimmy...I also canceled the magazine subscriptons that were being sent to me. I suppose you have no idea about that, do you?
Dimmy...I am still getting the internet spam mailings from several sources...but of course you would have nothing to do with that, would you? Of course not.
Did I not read somewhere along the way that a Judge had ordered some form of mental counseling for you? Obviously you ignored this order....

Dimmy...watch your step. You are soon gonna trip over your own feet.
By the way, Dumbo...you do not have to hide behind anonymous email servers...send your comments directly to me, guts permitting.
Too bad we live so far apart....I'd really like to see you face to face....if you know what I mean.

What do you mean "As with any used gear I will not accept any returns or refunds,".

Since you apparently don't know the difference between For Sale and For Auction, little else you have to say has no meaning.....

Absolute accuracy should not be confused with precision.

To measure attenuation within "a few tenths of a dB" (at any attenuation level) entails detecting a difference between two voltages which are a few percent different from each other. This is an easy job for any voltmeter. Errors are not due to the comparing voltmeter but to the measuring components, cables, connectors and layout.

Accuracy entails comparison with a local standard. There will be uncertainty in the local standard in addition to errors introduced during the comparison process. There will also be uncertainties introduced at each calibration level up to the International standard.

Precision is related only to local effects such as signal to noise ratios. It is relatively easy to detect a difference of 10 microvolts between two voltages of about 1 volt each. This corresponds to a precision better than +/- 0.0001 dB

Trailer park life without any doors or windows making your angry Roger. You should consider making a trip to the local rubber room. Besides, they could assist you with your problem against working, so that you can get that lard ass of the computer and then make some money as in a job. Too bad we have socialistic welfare leeches like you. Hopefully, you would consider getting castrated that way there won't be any more of your slimy ilk running around.

Hello All,

Please excuse cross-posting.

My friend has obtained a Kenwood TK-809 TX-RX but the manual is in French. Consequently I am seeking to assist him in obtaining a copy of the manual in English. If anyone is able to provide a scan of such a beast, or able to provide it for photocopying, then my friend would be most grateful.

I am located in Chesterfield, Derbyshire, UK. The e-mail address is good.

Roger

Close enough. Two-by-three calls are issued to no-code VHF licensees.
They can get them changed to 1x3s via the 'vanity' callsign program so it
appears that Roger is impecunious as well as insane.

>Paul OH3LWR
>

Hi Paul,

Precision, Resolution. These can be the same thing or different;
however neither are a statement of accuracy.

When my old Drake TR-7 VFO gets buggy, I might note some one at
47.1652 MHz and smile at the precision of that reading, and yet it is
off by 40 MHz (an errant 4 is showing). Lots of precision, lots of
error.

However, as your question lies dormant:
> I wonder how this accuracy could be maintained,
>especially if some real power levels are involved heating the
>attenuator.
which is a concern shared by any metrologist. The load is the
defining point of a power measurement. The load must be known and
with power applied - it changes.

The first, and simplest, solution is to over engineer the load's
ability to "DISSIPATE" energy. (sorry to scream in your ear, but
others here needed to hear that) That would suggest using a 100W
continuous service Dummy Load to measure 10W period limited power
measurements. Or simply measure the load under the power applied.

Attenuators, on the other hand, are not 100W and few are 10W devices.
Most are on the order of 0.1-5W. So, I presume you wonder how to get
one of these into the signal path of a 100W rig? You use a
directional coupler to tap a portion of the power (and you need to
know the portion, but accurate determinations are fairly simple) and

feed that tap through the attenuator and add the coupling loss (or that portion) to make a total.

In short, you have a 100W Source, a 100W Load, a 20 dB Directional coupler, a variable attenuator, an attenuator Load (how many miss this one?) and a detector. You can now read applied power at a 1W level instead of the 100W level. And you can measure the variation from that level with reference to your 100W reading to the resolution of the detector. Resolution or precision could run quite high. A measurements of change would also find high "relative" accuracy.

Relative accuracy means you do not need to know where you are, or where you started in absolute terms, merely how far apart they are. There is an interesting implication here in this subject. As we are interested in attenuation, any measurement of an attenuator is both "relatively" and "absolutely" accurate. This is one of Gary Peach's link pins to the absolute measure of received power.

Ohio/Penn DX Bulletin No. 500

The Ohio/Penn DX PacketCluster
DX Bulletin No. 500
BID: $OPDX.500
February 26, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, NC1L, KP2L, N2CY, WB2YQH/WB2RAJ & The 599 DX Report, N3DQU, W3UR & The Daily DX, K4ZLE, K4VUD, N4AA & QRZ DX, WD4NGB, N5FG, W6CUA, K8YSE, W8EB, K9EL, KU9C, K0YR, 9A6AA, DJ7IK, DK1WI, DL1EK & DX News Letter, DL4KQ, DL7NFK, EA5KB, F5NOD, F6AJA & Les Novelles, GM0GAV, I2RFJ, VE3EXY, VE7DP, VK4CP, VU2JOS and ZR1DQ for the following DX information.

MESSAGE FROM EDITOR: Reviews on OPDX's new "DXCC COUNTRY/ENTITY REPORT" and "DXCC/Entities Chart of Activity" (for subscribers) were very favorable, even though, there were a few (not many) QSNs that were not reported right. As always, there were a few who were skepictal of the report. Especially the amount of activity that was reported. First let me say, last week's data was received just before going to print, and I was running behind and did not totally examine the report. Out of 252 DXCC/Entities reported, only 13 were questionable. Most noted were: 1S, 3C0, CE0X, FR/j, HM, JD/o, KH1, KH5K, S0, VU4, XZ, YA and ZD9. The main reason for these few QSNs showing up on the report is because of "BUSTED CALLSIGNS". Other added factors are "Pirate/Slim Reports" and individuals using the "DX" command to announce something (such as receiving a QSL card from KH5K) instead of using the "ANNOUNCEMENT" command on their local Packet/TelNet Cluster. I promise I will "do my best" to weed these out and delete them in future reports..... 73 and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 18/Feb, through Sunday, 25/Feb there were 241 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3D2/r, 3V, 3W, 3Y/b, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FO/m, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a,

HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, T2, T32, T33, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VQ9, VR, VU, XE, XU, XX9, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZK3, ZL, ZL9, ZP and ZS.
PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3C, CONWAY REEF. Operators Raymon/YS1RR, Hrane/YT1AD, Branko/YU1FW, Ratko/YU1NR, Rasa/YU1RL, Gojko/YU6AO, Vojislav/YU7AV, Dragan/Z32AU, and Mome/Z32ZM were now active from Conway as 3D2CI until February 28th, before they leave for Fiji. The team is very busy but has had troubles. Their linears are down earlier, which obviously had an effect on the overall activity of the DXpedition, especially on lower bands. However, on Sunday, February 25th, they announced the linears were back in operation. They also reported that they were having big problems with waves (stating they are more than huge). The boat that was carring the food rolled over and sank. They said that it is very HOT, and members of the team were being sunburned. On Sunday they also mentioned that they were having problems with "birds". In spite of poor conditions, the team keeps busy all the time. Pileups are everywhere on any band. For more information and upto the minute (and I do mean upto the minute) bulletins, check the Web page at: http://www.kragujevac.co.yu/3d2

3W, VIETNAM. Claude, F5PBL, will be in Ho Chi Minh City from March 22nd through the 30th. He will be active on 10 and 15 meters, mostly CW. He hopes to participate in the CQ WPX CW Contest. He is waiting for his callsign. QSL via F5PBL.

3Y, BOUVET. Deon, ZR1DQ, reported on February 22nd, that there is "Good News" to all the operators who have not worked Chuck, 3Y0C. The ship to Cape Town is being delayed by pack ice, and the date of departure from Bouvet seems to be later than March 2nd. Meanwhile, look for Chuck during following schedule:
0300-0530z - working on 3.772 MHz and also looking on 1.837 MHz.
0530-0600z - working on 14.195 MHz to Russia and Europe via long path.
0600-1100z - working 14.336 MHz to JA, VK and ZL.

4U, UNITED NATIONS HQ. Jun, JH4RHF, is now in U.S. on business and is currently in New York. He will try to operate from 4U1UN during the next several days. He was active during the past weekend on 17/15/10 meters.

4W, EAST TIMOR. Thor, 4W6MM, was heard active this past week on 40 meters CW and 15 meters RTTY. Check around 7016 kHz 1030-1200z and 21085 kHz 0700z.

5W & ZK, WESTERN SAMOA AND SOUTH COOK ISLANDS (Change In Plans/Update). We have been informed that Dominique's, F6EPY, plans/schedule have been changed since OPDX.499 (Please refer to it). He will now operate as 5W0 from February 27th through March 6th instead of French Polynesia. He will be active from South Cook Islands between March 7-16th.

7O1YGF STATUS. We continue to receive E-mail requests about the status of this Yemen operation. So, OPDX asked DXCC Manager Bill Moore, NC1L, and he reports: "We still have not received documentation yet, but they still say that they will have it for us. We need to wait and see."

9M6, EAST MALAYSIA. Look for Peter, G4MJS, to be active as 9M6BAA from March 21st through April 4th. Bands and modes of activity were not mentioned. QSL via G4SHF.

A5, BHUTAN. Charly, K4VUD (aka A52UD), reports that Kesang, A51KC, a newly licensed ham in Bhutan, is willing to make skeds for 10 meters (where he can only operate SSB) via E-mail. Kesang's E-mail address is: sophun@druknet.net.bt
Charly recommends to strike now while winter propagation is still active. Meanwhile, A51AA has been on during the past week on 15 meters. The operator was Yesney. Check 21265 kHz between 1130 and 1400z. Activity by A51AA was also heard on 10 meters on 28480 kHz between 1030 and 1530z.

C5, THE GAMBIA. Mike/DL2OE and Hans/DL7CM are now active from here as C56/homecall until March 5th. Activity is expect to be on 160-6 meters CW, SSB and RTTY. QSL via homecalls.

D6, COMOROS. The D68C operation continues to tear-up the bands with a high QSO count. The D68C online log can be found at the following address: http://www.dxbands.com/comoros/logbook.shtml

EM, ANTARCTICA. Paul, UX2HO, is now active signing EM1HO. He is located at the Ukrainian Base on an Argentine Island in the Antarctica. He just arrived on the island two weeks ago and is active on HF with 200w and a vertical. He is also active on 6 meters with 100w and a simple dipole. He will be installing a 4 element yagi on six meters in the future. On HF, he will be on SSB, CW and the digital modes (including RTTY and PSK31). Paul will be here for one year. QSL via I2PJA.

FS & PJ7, ST. MARTIN AND ST. MAARTEN. Joe, W3HNK, and his XYL are taking a well-deserved few weeks from the snow in W3 land to enjoy the sun in FS/PJ7 land. While there, Joe will be active from both the French and Dutch sides of the island as PJ7/W3HNK and FS/W3HNK. His activity will include some operations during the ARRL SSB Contest. Look for Joe from February 27th through March 15th. PLEASE NOTE: QSLs for this operation go to KU9C.

H4, SOLOMON ISLANDS. Operator Loti has been activating the club station H44AA recently. He was heard on 21250 kHz between 1200-1330z. QSL to: P.O. Box G-11, Honiara, Solomon Islands.

II2, ITALY. Members of the "Saronno DX Team" will activate their ARI site in Saronno (Varese), Italy (JN45MP), during the ARRL DX SSB Contest, March

3-4th, using the special callsign "II2R". QSL via the Bureau or P.O. Box 37, SARONNO 21047 Varese, ITALY, or the QSL Manager I2RFJ: Ivano Rigoli, Via Spluga 3, 21050 GORLA MAGGIORE (Varese), ITALY.

IOTA NEWS.....
AF-059. After their activity from Maskali Island (AF-053) the operators J28EX (David/F5THR) and J28NH (Jean/F5NHJ) hope to be active from Sept Freres (Seven Brother) IOTA AF-059 at the end of March with the callsign J28CDX.

EU-112. Peter, GM3OFT, has obtained permission to put a station on Eilean Garbh (Shiants OH-18). This will be a 3 day operation during the period May 28th through June 6th. He hopes also to do other Outer Hebrides Islands (possibly 6-7, the more easily accessible ones!) during the 10 days before or after the Shiant event. Look for more details as arrangements get finalized.

EU-136. During the past weekend, Ewald/9A5ID was expected to activate the Island of St. Marko, in the Kvarner Group (IOCA CI-117, located in the north part of Adriatic sea, between main coast and the Island of Krk), for a few hours only on 40 meters SSB.

OC-129. Look for Arnold, LA7YX, to be active as DU5/LA7YX from Leyte Island until March 3rd. Activity will be on 80-10 meters (mostly on 3790/7050/14190/21290/28490 kHz). QSL via homecall.

SA-028. Look Carlos/PU1NEZ, Zeca/PY1LVF, Pete/PY1NEW and Lima/PY1NEZ to sign homecall/2 from Sebastiao Island (DIB-16), March 15-19th. Activity will be 80-10 meters CW/SSB. Suggested frequencies are:
SSB - 3755/7055/14260/18128/21260/24950/28460 kHz.
CW - 3530/7030/10115/14040/18098/21040/24920/28040 kHz.
QSL via the Bureau or direct to operator:
PU1NEZ - Carlos Guilherme Correa, R. Presidente Backer 9, apto. 306, 24220-045 Niter=F3i, RJ,
PY1LVF - Jose Luiz Vieira Fernandes, Caixa Postal 18009, 20722-970 Rio de Janeiro, RJ,
PY1NEW - Emanuel Tavares Filho, Caixa Postal 100659, 24001-970 Niteroi, RJ,
PY1NEZ - Rogaciano de Lima C. Filho, R.Belizario Augusto 91 apto. 1101, 24230-200 Niteroi, RJ.

KG4, GUANTANAMO BAY. Pick/WA5PAE and Jay/K4ZLE expect to be active from Guantanamo Bay, Cuba, as KG4IZ and KG4MO respectively from March 16-25th. They plan to work 160-6 meters, mostly CW, some PSK31 and even a little SSB (but 'nyet' nets). Jay will make an appearance in CQ WPX SSB Contest. Pick says he will slow down to 5 wpm at times for the new "Extras". :-) QSL via home calls.

MJ, JERSEY ISLAND. Bernard/K8PT and Craig/K3PLV will be active March 14-20th as MJ/homecall. Look for them to be on 160-10 meters, with an emphasis on CW, RTTY and PSK31 and the WARC bands. QSL via their home callsigns.

NEW DX SPOTTING RECORD! Terry, AB5K, from AR-Technology, reports:
Since August 1, 1999, we have run over 1 million spots on the AR-Cluster backbone. Thanks to all of the hub nodes, regional networks, nodes, sysops and users who have made this possible. The results from this past week's ARRL CW Contest were:
Saturday Sunday Peak Spots/Hr
Worldwide Spots - 11,544 12,387 700
U.S. Spots - 6,364 8,756 550

PJ7, ST. MAARTEN. Ron/ND5S, his wife Sue/KF5LG, Bil/W8EB and his wife Dorothy/W8DVC plan to be here over the next few weeks. Ron operated as FS/ND5S last week from the French side of the island and participated in the ARRL DX CW Contest. He will operate from the Dutch side as PJ7/ND5S until March 3rd. Bil, W8EB, will arrive on the island February 26th and will operate from the Dutch side as PJ7WB and will participate in the ARRL DX Phone Contest as Single Op/Low Power entry with the callsign of PJ7B. There will be daily skeds with these Michigan hams now through March 18th on the frequency of 14273 at 2030z. Look for them on all bands, 160-10 meters, CW, SSB and RTTY. All QSLs are via their respective home callsign. Check out their Web site at: http://www.qsl.net/pj8a

PSK31 AWARD. The Penn-Ohio DX Society (PODXS) has something PSK'ers enjoy working for. The "PODXS" has a free 070 Club PSK Award program available. For info about the "PODXS" and the 070 Club PSK Award, visit their Web site at: http://hometown.aol.com/n3dqu/podxs.htm

QSL INFO AND NEWS.....
During last weekend's contest, a group from the radio club in Las-Tunas, Cuba, was active with the special callsign T48K. The station was operated by CO8ZZ, CO8DM and others. QSLs will be managed by Erhard/DK1WI and/or Uwe/DL9US by the bureau or direct. Erhard states, "Please note, that the return postage needed is 1 IRC or 2 USD, for using Air-Mail. Using the 'Land-Way', 1 USD is enough."

EA5KB was active from the Castellon/Valencia Province Group (EU-151) this past week. QSL via EA5KB.

FR/F6KDF/T QSL STATUS. Gil, F5NOB, reports that 3000 more QSLs were mailed this past weekend. QSLs received this month and in January will be mailed next time (at the end of March). He still recommends NOT to resend QSL cards yet. If they received it, you will get it.

NOT THE MANAGER! Randy, W6CUA, reports he is receiving QSL cards for C21NI or HZ1AB. He is NOT the QSL Manager for these stations. The correct QSL Manager for HZ1AB is K8PYD. QSLs for C21NI go direct to him via his CBA.

The Magnolia DX Association was active from Dauphin Island, AL, (NA-143) as W4D this past weekend. QSL to W5UE (CBA) or via the W FIVE Bureau (P O Box 999, Wiggins, MS). Full details of the operation are available on their Web site at: http://www.mdxa.org

S2, BANGLADESH. Stig, S21YJ, still continues to be active for a few more weeks. He has been on almost daily on 14318 kHz between 1400-1500z. He will

take down his antennas in early March. QSL via SM4AIO.

SPECIAL EVENT. Look for special event station, VI3GP, to be active on Wednesday, February 28, at 1300z through Sunday, March 4th, at 1300z. This special event callsign will be operated by the Eastern and Mountain District Radio Club Melbourne (EMDRC). The callsign has been issued to commemorate the running of the 2001 Australian Formula 1 Grand Prix in Melbourne on Sunday, March 4th. QSL via the VK3 Bureau, or direct to the EMDRC (QTHR), with SAE and return postage. If insufficient postage is received, the Special Event QSL card will be returned via the Bureau.

TR, GABON. Xavier, TR8CX, has been active on 10 meter FM lately. Check around/between 29175 and 29235 kHz between 1200-1600z.

V2, ANTIGUA (Operation Cancelled). Chuck, N2CY, informs OPDX that due to an unexpected trip he must make for his work, he will have to cancel his plans to operate the ARRL SSB Contest from V26. Chuck hopes to be able to try again during another contest and to put V26CY on the air.

V4, ST. KITTS AND NEVIS. Look for Joe, VE3BW, to sign V47CA from April 9-24th. Activity will be on all bands, but he also plans to be on 6 meters too.

VK9M, MELLISH REEF. The VK9WI team who bought you Willis Island in May, 2000, are at it again! Team members are David/VK4ZEK, Alan/VK4BKM, Peter/ VK4APG and Harris/VK4CWT. They will be active on Mellish Reef on 80-6 meters, April 21-24, 2001. This trip is primarily a survey trip to help facilitate the planning of a larger "full-on" DXpedition back to Mellish Reef in either late 2001 or early 2002. The team plans to be on the reef for approximately four days only. There will be one HF station operating continuously along with one 6 meter station. Suggested frequencies are:
CW - 3504, 7025, 14025, 21025, 28025, 50105 kHz
SSB - 3799, 7085, 14195, 21295, 28480, 50145 kHz
Your pilots stations for this operations will be:
Bill Rothwell, G0VDE (Europe) mailto:BillRothwell@radioham.screaming.net
Adam MAURER, VK4CP (Rest of World) mailto:vk4cp@one.net.au
Please, no individual sked requests accepted. For the latest news on the VK9ML Mellish Reef Site-Survey/Activation in April 2001, visit the VK9ML Web site at: http://www.qsl.net/vk9ml

VP2V, BRITISH VIRGIN ISLANDS (Special Anniversary). To celebrate its 82nd birthday on February 26th, Bob Denniston, VP2VI, will re-create his first ever DXpedition on March 10-11th, on all bands, 160-10 meters. His first DXpedition was held during the ARRL DX Contest, the second weekend in March, 1948, from VP7NG in the Bahamas, lead by Bob Denniston, W4NNN, now VP2VI/W0DX. Denniston will re-create the original expedition conditions as much as possible, while operating from his Tortola QTH with 100 watts to 138 ft. and 66 ft. wire antennas and hand keying. The original expedition "Meissner Signal Shifter", 100 watt home brew amplifier, and Hallicrafters SX-28A will share the operating desk with contemporary gear. Some long-time friends have been invited to fill shifts during the 48-hour CW-only event. Look for them on 24 kHz up from band edges, except on the

WARC bands. A commemorative QSL will be available with a SASE to QSL
Manager W6RKC: Rick Casey, 10640 Tabeaud Road, Pine Grove, CA 95665.
For more information, contact Jim Livengood at: kp2l@arrl.net

VP8, FALKLAND ISLANDS. Look for 4 members of the GMDX to be active from the Falkland Islands (SA-002) as VP8SDX, between April 23rd and May 8th. The operators will be Rob/GM3YTS, Jack/GM4COX, Tom/GM4FDM and Gavin/GM0GAV. They plan to have 2 stations active. Their main focus will be on CW, LF and the WARC bands. QSL via GM4FDM. Further information can be found on the Web page at: http://www.hfdx.co.uk/vp8sdx

VU, INDIA. Jose, VU2JOS, reports that permission to use the following frequencies by VU Amateurs have been extended up to 1830z of July 31, 2001. Frequencies extend: 3790-3800 kHz, 10100-10150 kHz and 50.35 and 50.55 MHz.

XU, CAMBODIA. A small group of Germans (2-4 operators) will be active from here July 15th through August 3rd. The first 4 days will be limited to highband activities from Siem Reap (Angkor Wat). The all band activity will be from Sihanoukville on 160-6 meters (with an emphasis on the low bands), CW/SSB and possibly RTTY. So far only one operator's callsign has been confirmed, Frank/DL4KQ will be active as XU7ABR. QSL via DL4KQ. For updates, check the Web page: http://www.DL4KQ.de

ZK1, NORTH AND SOUTH COOK ISLANDS. Two members of the Bavarian Contest Club (BCC), Uwe/DL9NDS and Klaus/DL7NFK, will be active from these islands between April 28th through May 18th, as ZK1NDS and ZK1NFK, respectively. They plan to activate the following islands from the South Cook Island Group: Rarotonga (OC-013), Mangaja Island (OC-159) and Aitutaki-Island (OC-083). They will also activate Manihiki Atoll (OC-014) in the North Cook Island Group. Their equipment consists of two 400W PAs, a 1Kw PA, LP5, V80E vertical and some wires. There will also be a lots of activity on RTTY, PSK31 and MFSK16. QSL via their home callsigns. For up-to-date information and an online logs, check the Web site at:
http://www.dl9nds.de/Cook/cook.html

It's kind of strange that no one has responded to this, especially since most of them are fully aware that the signal originates in Hiram, GA.

No one is completely sure what the signal contains, but the smart money is betting that it is the encrypted sound track of porno movies being shown by a local ham.

Of course, that's just a guess, but a smart one nonetheless.

However, sometimes, they don't know what price the market will support.

I do agree that even something such as "$100 obo" (or best offer) is better
than nothing.

I cannot comment on the swap meet/hamfest that you attended since I'm on the
other side of the country and don't attend that one.

Actually Roger, I know of Mr. Perry. I don't know him personally but you are accusing me of being Mr. Perry. Not too smart to be making accusations about other people based on very little knowledge. You should consider getting all your facts straight before making accusations.

3564. The Hiram Parrot

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-26 00:08:31 UTC
From: Stagger Lee <SLee@houston.net>
Message-ID: <3A999E7F.FFC71F63@houston.net>
Source record: 92941

A bird seed salesman was talking to a parrot owner when he looked over in the corner and saw a parrot wearing pants, a shirt, and suspenders.

He asked, "What on earth is that all about?"

Dimmy said, "We had a fire in the main cage two months ago and all his feathers got singed off, so the wife made him some clothes to keep him warm."

"Okay, but that was two months ago. Why does he still wear them?"

Dimmy replied, "There ain't nothing funnier than watching him try to hold down a female with one foot and get his pants down with the other."

Hi,

Actually its a Becker Mexico 2340 car radio which happens to cover the
49m -15m shortwave bands. I have it installed in a 91 Honda CRX Si 1.6L.
There is some annoying RFI on weaker signals which is being induced via the
antenna and not the +12V.
It appears to be ignition noise and I'm thinking about installing some
Magnecor ignition wires (either the KV85 or the KV85/CN25).
I'd be interested in anyones experiences with Magnecor wires or with RFI in
a similar automobile.

Thanks

Dave

If you can give me info on this model. perhaps web site, and availability of tuning cards this radio uses, I would be most grateful.
I cant get anytthing off the sony site for this model.

Also, have you used this particular radio ?
If so, do you recommend it as a used unit ?
I need one mostly to pick up major SW stations ,. BBC CBC, etc. in central Ohio.
THANKS -
MIke

I wonder if the KC8JBO was bought and paid for in an ILLEGAL manner.
Judging by what I've seen so far, he looks like someone I would rather
NOT meet in a dark alley (and if I did somehow run into him, I'd want an
HT handy so I can call 911).

Just my opinion....

If you plan for war you are certain to have one.

The only reason we are not contiuously at war is that we can't afford it - yet ! In the meantime, let's continue ethnic cleansing in tropical Africa, Iraq, etc.

Our Rulers, the Multi-nationals, win either way.

Blair has just returned from Washington with his unwritten orders. What those orders are are quite predictable. And their effects will squash the, supposedly vote-winning, increase in pensions into oblivion.

Hmmm...the man has a ham license, and is selling a product that is legal to use on the amateur bands. Sure, MANY of these amps are used illegally on 11 meters, but he has EVERY right to sell 'em here. Hope ya sell 'em, Art.

I would invite your attention to the regs on amplifiers, and then let me know if you think they are legal. If you still feel the same way after perusing the regs, let me know so that I may enlighten you. These particular amplifiers are illegal to sell.

From: Ed Lyons <elyons@sympatico.ca>
Message-ID: <3A9A6312.3A0D50F8@sympatico.ca>
Source record: 92964

I have been searching for a simple program for awhile.
At this point in time, I am not very much interested in contesting.

Here are the requirements for me that I am looking for.

I can log date, time(utc),call signs , grid squares , address,
notes,etc..., and all the other standard stuff.

But what I am looking for especially is a feature that with the other
contacts grid squares, the program could calculate the distance between
me and him.

I am sure that there is a program that does this already.

Thanks in advanced!!

I'm sure you're looking for a more direct way to do this, but I note that
there is a web site to convert grids squares to lat/lon:
http://www.amsat.org/cgi-bin/gridconv
and another to convert lat/lon to great circle distance:
http://www.vsv.slu.se/johnb/java/lat-long.htm

From part 97.315: "... this requirement (certifiction) does not apply if one or more of the following conditions are met: ...(4) The amplifier is sold by an amateur operator to another amateur operator. (5) The amplifier is purchased in used condition by an equipment dealer from an amateur operator and the amplifier is further sold to another amateur operator for use at that operator's station."

Seems to me that if the amplifiers qualifiy under either (4) or (5) the sale is quite legal. They could also be in the FCC database, and under 97.315(c) be quite legal.

I think you need to enlighten us, because it appears that you have not proven the sale to be illegal.

>

No, it's because the foreign QSL cards now cost so much. In order to get a QSL card from Germany, I've got to put 80 cents worth of postage on the envelope and 2 dollars inside. $2.80 for one QSL card. Yeah, I know a radio costs a thousand bucks, blah blah blah. Still, 2-3 dollars for each QSL card that I want from a DX station gets expensive. And these days, 90% of these guys have email!

Pretty funny that an illiterate boob of your ilk has confused me with Perry. Real funny considering he has been forwarded the posts from you and other miscreants.
Actually, he is not too happy with being accused of being me. The funny thing about it is that myself and Perry are not the same person. Of course, the unwitting boobs such as yourself follow along in the best ass kissing tradition of your masters. He already mentioned to me that any harassment by anyone will be met with legal means such as reporting any harassment to the proper authorities. Keep it up boy, thats not too smart of you.

From: Buzzsaw <"Catch Me."@edu.com>
Message-ID: <97f85g$ui0$0@pita.alt.net>
Source record: 92982

Due to the overwhelmingly successful premier of the "adult" style movie that was shown at Mike's last Saturday night, Mike has announced that he will be showing this film again next Saturday. The show times will remain as they were with one exception. Mike says he will show a special matinee feature at two p.m. for those who cannot stay up late. Mike says that again he will be serving free popcorn and may even give away free hot dogs. Mike further stated that he is attempting to contact the star of the movie, who ironically lives only a mile away, in hopes of having her in the lobby so she can sign autographs.
The Star's agent, Wrong Way, is still working out the details and a limited number of autographed 8 by 10 photos may be available. Wrong Way even hinted that a hot dog eating contest may be in the offing.

Like last week, in-flight bags will be placed beside each seat just in case.

Naw, just wait 3 months, and you'll get 15 cards from Germany in
your "Buro" envelope, 34cents for the whole stack. You're just too
eager to spend money.

And it takes too damn long and Germany is an easy one to work. The hard ones
WANT DEMAND more. The whole thing is a racket. EQsl Must and soon WILL
exist. If ARRL does not do it soon some will and start independent awards
that will destroy the ARRL monopoly. Yes the Dxers will have to find another
way to make money, BUT , they will save a LOT by not printing cards.

A lot of those rare dx-peditions might not wanna use a freebie
service because some of the excess 'green stamp' proceeds aid in
defraying the cost of the expedition.

Well war makes curious bedfellows. During the Second World War Russia and
Germany were allies. Until Hitler changed his mind. The Italians fought
alongside the Germans until Mussolini got his cumuppance, then they
(Italians) changed sides. Personally I fell that the Israelis are now the
bully boys of the middle east. They steal land they are not entitled to and
build settlements on it. They deny the Palestinians basic rights leaving
them little choice but to fight for what should be theirs. If the USA would

stop protecting the Israelis and make a serious attempt to a broker a fair settlement in that part of the world I am sure much tension and unrest would subside. Fat chance that though. I am not anti Israeli. Everyone has the right to live in peace. Including the Palestinians.

I fail to see the reason for that logic. Planning for an event does not ensure it happens. Merely that, if it does, certain contingency measures can be put into effect to minimise the dangers. This can be done quickly and efficiently. The recent outbreak of foot and mouth triggered contingency plans which are well rehearsed (unfortunately). If no planning for that had taken place we would all be much worse off.

If you had a hand in things during WW11 the Germans would have been marching up Whitehall whilst you were still trying to get a quorum together to decide what to do about Poland.

Didn't anyone ever tell you that personal attacks are nothing more than the weapon of choice for the person who has no true defense of his position? Just goes to show how knowledgeable these people are about the issues they discuss (or, in this case, don't discuss).

Since its been going on for years, it is not going to go away anytime soon. So, if it really bothers you, either learn to ignore those threads or use the filtering in your newsgroup reader.

TV and Radio Tower Pictures!

Ever wondered where the television and radio signals you receive are generated? Our site shows you original pictures from the transmitter towers on locations in The Netherlands, Germany, Belgium and the United Kingdom. For many sites a photograph of the antenna tower and its surroundings and a detailed close-up of the aerial system is provided.

These can be hard to find, just as you specifiy (2W carbon comp).
I assume you want carbon comp so that they are non-inductive.

If so, you could probably use ceramic composition... can anyone comment
on how these are made, and if they are non-inductive? Mouser sells these,
for example Stock No. 588-22J50R is a 2W 50 ohm ceramic comp.

Alternatively, if you can't find exactly what you want, you might have to
end up putting together a bunch of lower wattage carbon comps in parallel
of the appropriate value to get 51 ohms.

It's here (as well as in alt.radio.scanner.flame-fest) because
K4ZDH has made the traditional cesspools of ham radio (like
14.313 and a good chunk of 75 Metres) much too hot for on
the air mayhem, thus the newsgroups are the new home.

An this is the truth.

Dual Band Amateur Ham Radio Handheld
EBAY AUCTION Item #1216996273

For Sale : MAHA-REXON RL-501 with 200 channel memory, Dual Band ht
2mt/440mhz with MAHA's NMH High-output battery pack. Last for aprox. 14hr
of
listening to the local repeater. I have the original box, packing and
owners
manual along with the ac charger and a custom leather case, and a speaker
mic that I will include in this auction. Has seen little use, mostly during
field day. I am selling to upgrade to the new APRS handheld, as I enjoy
that
aspect of the hobby more theses days. The unit is used but clean, small
marks on the original antenna where the speaker mic was clipped for
storage,
but unharmed in anyway. I would rate this unit a 8 out of 10 on the looks
scale, and a 10 for opperation. As with any used gear I will not accept any
returns or refunds, and this unit is sold without any warranty, but I will
state that this unit is fully functional on my desk as I place this auction
listing.. I AM A PAYPAL VERIFIED Seller, I would like the winning accepted
bidder to use PayPal with Visa or MasterCard etc.. much Quicker and it
protects you against fraud, but will accept money order / certified bank
drafts, No personal Checks. Buyer to pay Fixed S/h of $10.00. US Bidders
Only. I reserve the right to offer to sell to the next highest bidder if the
winner has unexceptable bad feedback Rating.

-

On Feb-22-01 at 20:06:53 PST, seller added the following information:

I accept PayPal, the #1 payment service in online auctions!

On Feb-27-01 at 18:35:50 PST, seller added the following information:
Here is a link to the specs as per some peoples request for more specs on
this unit : http://www.maha-comm.com/rexon/rl501/index.htm Just cut and
paste in to the address line and all will be provided the information you
request. By the way the 800mhz mod/out of band mod has completed.

I saw this still being quoted and I noticed that the follow up I had posted is not being included in these quotes.

After a few days of back and forth and after having Cushcraft send me back my original Matching network I did get a call from the Tech and he said I was shipped the wrong box. He then sent me a New Matching network and I installed it. It did the trick and the antenna is working fine (Over 3 months later).

1) I think the entire problem was caused by poor quality control, also the circuit board on the new matching network seems to be made out of a different material.
2) I understand that I could have made my own Vertical but I did not want to take the time and I wanted the best performance I could get. So I paid my 400$ to have a product that should have been trouble free.
3) I am in the market for a second Vertical (For our Cabin) I must say that even though the R8 Performs very well I am not going to purchased another one. I am looking at The Gap Verticals and the Butternet Verticals. I still have not figured out if the Betternet uses a Matching Network like the Cushcraft.

If you want the contributors of this NG to be technically competent then
effectively precludes about 90% of them . I passed the RAE yet I do not
feel competent to answer many of serious questions posed here.

Ebate, I love ebate, swapbate .

How much do you want for the 2meter radio.

Thank you

Thanks much for all your help and smart ass answers!
rat shack doesn't carry any 2 watt resistors and most other mail order
places require a $20 minimum order or sell @100 min parts
Oris I did check http://www.don't you how to use the internet.com and I
found no such page, maybe you meant http://www.don't you KNOW how to
use the internet.com where I found that this news group wasn't about
help but to only bad mouth each other!
Thanks again for all the helpful info!

In all honesty, you will probably never find a service manual for that piece
of equipment. The manufacturer doesn't want the public to have them. I'm
going through the crap with APC. Good luck.

Hi!

My R5 came down last week because of high winds, broken at the antenna-foot.
I will never by an antenna again with the centrte of gravity at the top.
I want to by a titanex HP5. There are no traps and it has an element for
each of the five bands.
Maybe this is a good solution for cushcraft victims.
Has anybody experience with this type of antenna ?

Now that changes things. Put 8 470 ohm and 2 680 ohm resistors in parallel
and you get 50.09 ohms. If they are all 1/4 watt, then you'll have around 2
W equivalent.

I stand by my original post , you can find a 51 ohm in a bag of 50 ohms
resistors.

Info on the Butternut antennas is at:

http://www.bencher.com/ant_select.html

Very good writeups, including their manuals in PDF format.

I use a HF6V Butternut as backup for my tree-mounted dipoles. This ground-mounted HF6V is now 20 years old, never been guyed. It needed minor maintenance on some plastic insulators last year.

There is no "matching network", but there is a short section of 75 ohm coax used to transform 20 meter feed impedance down to 50 ohms. The various components of the HF6V look pretty rugged, and Butternut even rates it for the full 2KW. I have fed mine with 500 - 600 watts RTTY years ago with no problems.

Just try to find one in a new area these days. These restrictions suck and yes it your fault at this item but they OUGHT to be overturned by federal pre-emption. One day they will be.
Many of these rules are buried and many realtors will sadly mislead you so GET A LAWYER, buying a house without a GOOD real-estate Lawyer (WORKING ONLY FOR YOU) is STUPID.

No reason not to have both. Get the card , get the proof, remove the risk of mailing cards to ARRL , AND IF YOU WISH , get the wallpaper too. Since the electronic response will be basically free everybody wins.

That's another advantage of an electronic QSL card. Make one copy
for the ARRL and another copy for the wall.

Hello. I have a very good condition clean HW-7 (no mods) and matching power supply, no manual (I have it just can't find it at the moment), Ham key, Murdock headphones and a HW-7 parts unit (Good VFO cap. and front panel, no top cover.) for trade for a VGC HW-12A, 22A or 32A with NO MODS. My first choice is a HW-12A, 2nd 32A, 3rd 22A. I will be able to supply pictures upon request. Please respond off list.

Thank you,
Randy KB8ASO.

p.s. I will consider a HW-12 (Non A version) if it is near mint.

Source record: 92931

Thanks for that info also? I'm very sorry I didn't see your original post, not that I didn't read it, it just never showed here. Maybe I got off on the wrong foot? I really didn't mean any harm! I don't have a bag of 50 ohm resistors to look in. 51 ohms is a standard value, I just didn't want to buy a 100 count bag for $20 when I only wanted 1. I'll see if I can retract my original post as I'm not smart enough to post here! Thanks again for all the great ideas !

jimmy john wrote:

Cushcraft says to guy the antenna if you use it in windy environments.
Hustler and Butternut advise to guy also. I have had a Hustler 5BTV survive
60mph wind with no guys. I guyed a Cushcraft R7 about 10 or 12 feet from
the top it was invisible to 50mph wind. Especially guy if your area is
prone to high winds and ice or snow loading.

Since cabins tend to get vandalized and a big commercial antenna is a sign
of possible goodies hooked to it inside, you should consider an ladder line
fed dipole antenna. Take your rig and tuner home with you. On the other
hand, look for a good used Cushcraft R7.

Fellow ARDFers/T-Hunters,

I would like to remind one and all that tomorrow (MARCH 1) is the LAST day to receive a $30 registration fee discount for the 2001 United States ARDF Championships! If you have not registered yet, please do so soon! All registration forms must be postmarked NO LATER than March 1st to receive the discount. So fill yours out and drop it in the mail ASAP!

Once again, the 2001 USA Amateur Radio Direction Finding Championships take place in Albuquerque, New Mexico from July 31 - August 4! T-Hunters from across the US, as well as the world (T-Hunters from China and Australia plan to compete!) are making plans for this event, which is open to ANY T-Hunting enthusiast from anywhere in the world.

More information -- and printable registration forms -- can be obtained by visiting the 2001 USA ARDF website at:

http://groups.yahoo.com/group/abqardf/files/web/index.html

Spread the word, and register today! Don't forget about the discount we are offering up until tomorrow (March 1st)!

73,
Brian, N5ZGT
2001 USA ARDF Championships Core Planning member

I recently cancelled my League membership for a while, by not
re-subscribing. I was surprised that I didn't get tons of
snail mail encouraging me to rejoin.
But I figure that I probably will renew in another few months anyway.
Perhaps they know that, as the League might get on-and-off subscribers regularly.
Especially if you are not a big winter ham, and then succumb to spring fever.
Al

My club is in the process of constructing a new repeater, and we're torn between two controllers. Ultimately we'd like to do some linking to other sites and we've come down to the LinkComm RLC-4 or the SCOM 7K. Some people have told us that the RLC is very buggy and that they come out with new software all the time... otherwise we like that model. The SCOM is nice, but only has one link port on it.. not quite what we wanted, but if it's more reliable we'll go with it.

Ideas, suggestions?

3674. Re: Open Source Trusted E-QSL System proposal

So why are we fixing something that isn't broke?
ARRL handles QSL's by the pound.
I get cards from Germany and Japan twelve to a envelope from the Incoming bureau.
Les http://www.qsl.net/wf5e/ handles outgoing cards 4 for a Dollar. ARRL isn't only game in town,
I have likes/dislikes about the ARRL but their QSL bureau is a nice service. Still have the first card I ever received. How many Hard drives have you crashed? How many times have you had to reload Bill's Winders? Just dumped DOS QSL Labeling program and 24 pin printer for up-to-date program/in-jet. Since when is anything FREE? Some turkeys cheap homemade
QSL's rubbed off on some of my rare cards.

Last year I ran into a fella in his seventies I worked in 1974, his nice card from that first contact is my card from Ireland. Just waited 9 months for a card from Taiwan, but BV2RS is in my collection and got a nice stamped envelope to boot.

As I thumb through these cards, I realize they represent other people that share a common interest. They also represent time slices of my life as a Ham. Like first contact jitters. Like coming home from school to have my Mom with a smile on her face hand me the bureau envelope (BTW-No computers then handmark receipt in log). Like the card from South Africa of a recent contact during Christmas with my new Bencher Paddle, that one especially, as my Dad after running squalling lathes all day didn't like the "music" of the Hallicrafters SX-99 when I was getting into Ham radio in the seventies, sat with me and watched the monitor and KAM display the conversation, he could see the enthusiasm in my eyes, and no that wasn't my first contact with S.Africa nor was it my first card. But, It was the last Christmas I spent with my Dad as a few months later he succumbed to the cancer that had already weakened him. Think a e-mail QSL will replace a real one? I hope not!

QSLing isn't about instant gratification, we can all work 10 contests a year and could confirm all states all provinces and 100 countries per week end contest, if qsling is immediate what is point?

Sometimes I wish computers were never invented.
e-qsl's Phhhhhhffffff!

Mike WB5GMK
Why do we bash our hobby, the magic of hf communications is still there.

It's just poor George trying to shop around his latest altered tape. The 5' tall jerk has absolutely no life Roger. You have to feel sorry for the little OCD wacko. I know I do.His life has been over for quite some time.He is so pathetic. It sure was easy getting his anon posts. He is such a clueless loser. You spanked him off of misc well. cul

I absolutely agree. I subscribe to all of these newsgroups, and my
current newsgroup reader does not automatically delete crossposted messages
once they've been deleted elsewhere, so I have to delete the same messages
over and over in each newsgroup.

Lets break this thread up guys. Before replying, please delete all
newsgroups other than the one you're in. Either that or simply stop
responding to this thing (its a darn silly subject line anyway).

Boy! is that ever the truth!

I for one, get very tired of the incessant demands for
this or that tid-bit of information, usually facts that
would be readily available if those asking would
only pick up a book and READ!

Then there are those that want the quick answer and
who have no apparent desire to try and experiment.
These people would be better off with a cell-phone.

Fie on them, I say!

Grumble, grumble, Harrumph!

> bureau.

I don't think anyone would call for getting rid of paper QSL cards. Even at 4 for
a buck that runs up quick. During a contest a station may work 4000 or more
stations. If you QSLed all those it would cost close to $1000.00. Of course
we don't QSL all the contacts on a contest, but we eQSLs we could.

Also will an EQSL card mean any less to you in 20 years than a paper one
if it has a personal note that is digital signed?

As far as disk crashing, I do backups. I make sure everything I care about
is backup. My online log is one of the things that gets backed up after
each and every update. eQSL cards will be the same way.

I haven't been a ham for long, but long enough to know that I have QSL
cards that are special to me, and I have QSL cards that I don't care
if I look at again, but may be worth credit for some award. Let's say
that it is the future and eqsl are accepted and common place. I work
a station in Okinawa for the first time. This is special to me. I was
station there in Navy. Almost before I get off the air with the ham,
I get an eqsl, I send a message back saying it was really great to
make a contact with you! Would you mind doing a paper QSL.
I sure the response is going to be no problem. This because he/she
knows it is important beyond just another notch on the old belt. I also
think it will allow for people to do better QSL cards. If I only have to
send out a few hundred a year, I can afford to go all out on them, but
if I have to send 20 times that amount or more, then I can't afford
to send out a card that cost $.30 to have printed and $.20+ to mail.

I think even if you don't like eqsls as keep sakes you will still
win from having an eqsl system.

**** Important Point ****
Trusted QSL are not limited to E-QSLs. Trusted QSLs can also
be paper QSLs with a digital signature printed on it.

K S ï¿½ F (The The Infamous Internet Liar!!) wrote:

> Richard - YOU have been the one causing the problems. I have NEVER
> lied, forged, canceled posts, or abused here on usenet.

> YOU have caused MANY problems here.

Because I (and many others) won't let you get away with your inane behaviour, you think I (and others) are causing trouble in the newsgroups. The truth is, it is YOU Toilet Boy who is the trouble maker.

> WHEN was the last time YOU posted ON TOPIC to this newsgroup?

ROTFLAMO!

When you get caught in one of your lies, you always do one of three things.

You: 1. Absolutely deny any wrong doing.

2. Divert attention from your lie(s) by demanding to know when your accuser has posted on topic.

3. Do both number 1 and number 2 above.

You think if you deny the lie(s), they didn't happen and if you deny them long enough, they'll go away. Guess again, Toilet Boy. The lies won't go away and the people telling you they remember your lies won't go away.

It continues to boil down to this inescapable fact: You, John 'Toilet Boy' Mackey are still a liar, fraud, and a hypocrite. Now we can add wuss to that list.

3694. New mail list is up: Novice-Rigs at QTH.net! Come on and join!

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-02 04:39:32 UTC
From: Dave WB7AWK <Newsgroups@boatanchors.com>
Message-ID: <uxFn6.4980$aH2.608581@news.uswest.net>
Source record: 92873
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.swap,rec.radio.amateur.misc

Hello all,

A new list is up at QTH.net - Novice-Rigs - devoted to all the old
Novice gear of the past. Buy, sell, discuss, shack photos, recreations,
or folks new to old gear wanting to find out more about the rigs
of yesteryear!

Rigs like:

Conar Twins (my faves!)
Heathkit DX-60 / HR-10
Drake 2C / 2B
Globe Scout 640
Ameco AC-1

and all those other 'little' rigs that Novices of old put on the
air.

If any of that is of interest, come join the group!

To join just send an email to: majordomo@qth.net
No need for a subject
In the message body enter: subscribe Novice-Rigs <your email address>

That's it! Hope to see you there for lots of discussions, sales and yakking
about the old Novice rigs!

Best regards,

Dave WB7AWK
http://www.boatanchors.com

There is a standing court order here in Georgia protecting myself and my family against these types of libelous attacks. Violators of this order will see a swift contempt citation sent their way. Two were served today and more will follow if these attacks continue. Better stick to submitting faked tapes, and more outright perjury. Thanks

U.S. energy beam lightly scorches protesters - "Easier than an a-bomb"
by John Chipman The National Post 03/01/2001

http://www.nationalpost.com/home/story.html?f=/stories/20010302/489908.html

The Pentagon unveiled its latest weapon yesterday, a non-lethal beam that fires electromagnetic
waves at the skin, heating it instantly to painful levels without internal or permanent damage.

Touted by enthusiasts as the biggest military development since the atomic bomb, the Vehicle
Mounted Active Denial System (V-MADS) is easily transportable and is considered ideal for "crowd
control."

By using certain portions of the electromagnetic spectrum, it penetrates the skin to a depth of
about 1/64th of an inch.

Used properly -- that is, for less than three seconds -- it causes no serious long-term injuries.
The U.S. Marine Corps, which developed the V-MADS over the past 10 years along with the U.S. Air
Force, would not say what happens if the weapon is misused.

"This is going to save lives," said Major Dave Anderson at a briefing in Washington yesterday,
where a model of the weapon was on display. "It gives the commander another option that is not
deadly force ... We are very excited."

Easily mounted on a vehicle or a roof, it can be fired from up to 750 metres away, making it
especially useful in dispersing crowds.

"I can tell you we have no plans on using this on Canadians," noted one U.S. official yesterday.
"We don't see our embassy in Ottawa being besieged any time soon."

Maj. Anderson said the waves utilized by the V-MADS fall between microwave and infrared rays on
the spectrum.

The waves, whose exact length, frequency and amplitude are classified, cause water molecules in
the skin cells to vibrate. That rapidly produces heat and causes discomfort. The invisible waves
can pass through clothing but halt just beneath the skin's surface.

Maj. Anderson said the heat irritates nerve sensors in the skin but does not damage internal or
reproductive organs. The weapon's beam has no effect on electrical equipment, such as pacemakers
or computers.

Project officials said the human body begins to feel pain at about 113 degrees Fahrenheit. The
V-MADS weapon heats the skin to about 130 degrees Fahrenheit in less than three seconds.

"I lasted about a second before I pulled my hand away," said Maj. Anderson, who described the
sensation as similar to touching a hot light bulb. The sensation stops, with no lingering effects,
as soon as the person leaves the beam's path.

A report this week in Marine Corps Times described the technology as rivaling the atomic bomb.

"That's a bit of a stretch, but it's in the ball park at least," said John Pike, director of
GlobalSecurity.org, a Washington defence policy organization.

He said it could be a very useful tool during peacekeeping missions in which outnumbered soldiers
must disperse a hostile crowd without causing any permanent injuries.

"What they want is something that will heat people up enough that they will run away, but not heat
them up so much that they will explode," Mr. Pike said, adding it is too early to tell whether it
will be effective.

First, scientists must continue tests to guarantee V-MADS is truly non-lethal, he said, and then
convince a skeptical public.

"I think the first problem will be difficult and the second problem will be very difficult," Mr.
Pike said.

Military officials say the effective range of 750 metres means V-MADS would allow soldiers to
remain outside the reach of most small arms fire.

Scientists are developing a vehicle-mounted version, and Maj. Anderson added they are also looking
at plane-, ship-mounted and hand-held models. The weapon will not be ready for field use until at

least 2008.

Maj. Anderson maintained that people's involuntary reaction to resist pain will force subjects to
flee before the weapon can do any permanent damage. But the V-MADS' operator will determine how
long it is trained on a subject, and when pressed, Maj. Anderson admitted it could be dangerous if
used improperly.

While military officials say its development cost -- US$40-million over 10 years so far -- and
complexity will keep it out of enemy hands, Mr. Pike was not convinced.

"It's a heck of a lot easier than an atomic bomb. Just do the math, the military said it spent
less than $50-million developing this thing. There's a heck of a lot of countries that have
$50-million to spend."

And with that comes the threat a rogue state such as Iraq could develop a more dangerous version
and use it against American troops, he said.

"The fact that Captain Kirk says set the phasers on stun, definitely means the phasers have
another setting. Just because the Americans have them set on stun does not mean the Iraqis
would."

What a wonderful time we live in. What type of monster would sit around thinking of ways to heat people up in an effort to control them? I guess madmen like this will never be happy until they either kill us all off or are able to fully control us with their technology. If these people are not stopped, can you even imagine what our future will be like? Concepts like freedom, individual rights, and self-determination, will cease to exist.

Dimmy said in a post:

"There is a standing court order here in Georgia protecting myself and my family
against these types of libelous attacks. Violators of this order will see a swift
contempt citation sent their way. Two were served today and more will follow if
these attacks continue. Better stick to submitting faked tapes, and more outright
perjury. Thanks"

OK, Dimmy. You sure scared me off! I don't need another contempt citation...even though I do hold you in such great contempt. How about I sent YOU one? You are contemptible, are you not?
Hey...how you gonna pay the attorney to go to the Judge and have him file such a charge? Is this a 'blanket' protection order that covers all the media? How you gonna prove the source? That will require a subpoena of some sort, eh? How you gonna get that since you were already spanked by the news group administrator who refused to give you any information about posters? Wah!
Dimmy...the standing court order is against YOU, truth be known. You have stalked, threatened, and harassed so many that YOU are the one who has been put on notice by the Court. Tell the truth, now, dimmy. Nobody "faked" any tapes. You know that, we know that, and best of all, Riley knows that!
Denial is so bitter and self-delusional fantasies are what you do best. You send magazine subscriptions to others, open fake email accounts using their names, spam them, lie about them, and even stalk them.
Threatened any helpless little old ladies lately?
By the way, dimmy. You have no family. Just a couple of birds and an old, worn out hog.

Three seconds is a long time to hold a narrow beam on a moving target.

Especially if that target is merrily cranking off lead in the direction
of the one with the scrooch gun.

What makes you think it is limited to a narrow beam ?

>
> Especially if that target is merrily cranking off lead in the direction
> of the one with the scrooch gun.

And what makes you think that a different setting of the "scrooch" gun wouldn't cook you instantly? You really think the military would spend the time and money to develop a weapon that couldn't kill, but only warm you up?

I heard about this about a month ago, but it's been around for awhile.
Masers were the first indication that this stuff existed. Add a simple
focusing lens and a bit of research, and you have a long-range BBQ ray
gun. The scary part is that different organs resonate at different
frequencies - the skin, brain, eyeballs, liver, etc. The operator can
simply dial up a menu, point and fire. With good selectivity, it could
possibly nuke someone without damaging their surroundings, even inside
their home. I can only speculate, but the US govt habit of testing its
secret weapons on an unsuspecting public makes me think that this
weapon may be responsible for some cases of "spontaneous combustion".

3719. Dimmy's Dad A Naval Fighter Pilot?

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-03 05:27:48 UTC
From: Buzzsaw <"Catch Me."@edu.com>
Message-ID: <97pv90$o6q$0@pita.alt.net>
Source record: 92798

Dimmy babbled that his dad was a Naval Hero fighter pilot during WW II.
Dimmy said that his dad flew combat missions in two theatres of the war.
Dimmy is fabricating again.
Dimmy's dad, IF he was a Naval "hero" as proclaimed, must have not have enjoyed life in a trailer park. Dimmy's dad left him and his mudder to fend for themselves...this at an early age. Dimmy...stop these visions of grandeur!
Dimmy the Naval Reservist goes on to proclaim that he was in "harms way" during his duties as a deck swabbie. So, Dimmy...what was yer rank? E-2? Did you get a Purple Heart for tripping over the mop?
The only chevrons on dimmy's sleeves was where he wiped his runny nose.

Lo! So it came to pass that Doc was shown to be a fraud. The Gentiles
rejoiced.

3725. How do I stop use of my callsign by someone else?

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-03 09:00:55 UTC
From: The Bastard in Black <BastardNOSPAM@MadBastard.com>
Message-ID: <ta1cm8mp1bp1a0@corp.supernews.com>
Source record: 92804

Hello, everyone. I have received 3 QSLs in the past year (two in the past few months) for QSOs I never had. I don't even operate on 6m! Is there anything at all that I can do to find out who is doing this? It irritates me because I have no clue what this guy is saying to people while pretending to be me, and I have no idea how my callsign got lucky enough to be chosen for such a purpose.

The first thing I want to do is talk with the guys who sent the cards, but I haven't had any luck contacting them. Are hams paranoid or what? Two of these cards have no corresponding phone numbers in their respective cities and states (unlisted) and the one I contacted by phone I never heard back from again. I do have their physical addresses, so I guess I could write them all and ask for any details they might be able to give me.

Beyond that... any other suggestions? This really does feel like a total violation!! :-)

The only thing I can imagine is someone is getting contacts for the cheap thrill of it by advertising their existance from Argyle, Tx. I'm not sure how many hams there are from my area, but I might be a rare contact. Of course, they would never get credit for it, but maybe they just want to work certain other rare contacts for fun or something.

Assuming they are getting my address from the book, doesn't it strike them as odd that a guy they just talked to called Bobby shows up as Mark Lowe in the book? Perhaps he gives them the address info himself in some or all of the cases.

I hope there is something I can do, but I'm starting to think this is one of those things that can never really be tracked down except by patient detective work and getting on 6m and listening for my own callsign once I discover a pattern. Haaaaa... then I will identify myself as KB5III, and perhaps he/she will stop using my callsign (but who knows...)

Thanks,
Mark C. "The Bastard in Black" Lowe
Argyle, TX

Dwight, I am 96% sure that hams were involved in the design of this project.
You know...those strange dweebs who wear 3 or more HT's on their belt
with coke-bottle glasses, who are highly sought after by engineering deparments
of defense contractors? They've just found a way to project the "RF burn"
effect outward. Probably by finding the resonant fredquency of the cellular
membrane of human skin and tuning a transmitter to that frequency.
(aKa: it's a microwave oven without a door and little lamp for people)

Probably something dreamed up by an eccentric cloistered ham in NY or NJ who sells
tubes on the weekends at hamfests...

More like big profits for some contractor Dwight, who'll sell this equipment
to the military for a 50,000% inflated price - remember the $1500.00
toilet seats? There back and Busch Jr. is in the white house - scary.

> Dwight Stewart (W5NET)

3729. Re: How do I stop use of my callsign by someone else?

Years ago when I got back from NAM I took a bit of leave before heading for my next assignment. I dug out the SX-111 and tuned around the 40 meter band. I was looking for K8BHH calling CQ or working someone. (That was me back then). I heard it one day on 40 CW. I called the Cleveland office of the FCC and told them the skinny. They began to listen and apparantly tracked him down because it never happened again.

How did I know it was not me or a log error? I got a bunch of QSL's that I could not have possibly worked. I was in Asia for several years.

Is their any chance someone is not copying the call correctly and for whatever reason thinks its you?

Dan/W4NTI

Hmmmm, seems like if this were used in a "crowd" situation, those at
the back (read that closest to weapon) could become "toast" when a
"panic" to evacuate the area ensues (like everybody trying to
'bottle-neck' it thru a door or small escape route). Or when someone
passes out or gets injured from the mad rush, they wouldn't be able to
get out of beam's path.
Bet the guy that came up with this was one of those Dumb-A** people
that stuffed a Poodle in a microwave to dry it off!!!

Doh!!! =---> Poooffff!!

Just think- the quartermaster wouldn't need to pack any comestibles- just tell the soldiers if they want to eat, they have to win. Instead of k-rations or whatever they call them, you could have spice kits with ketchup and mustard and herbs.

john

I don't think Turner painted a picture of George Michael, so that is unlikely.

BTW, If you are trying to insult someone, calling them a "Twit" is likely to leave them feeling quite happy, as it is seen almost as a term of endearment over here.

Have a nice day,

73

Come on, there were never $1500 toilet seats, this is the standard method to hide black projects, inflating prices for authorized non classified projects. At least Bush won't be selling the classified stuff to the Chinese.

Message-ID: <97rvem$8pv$0@dosa.alt.net>
Source record: 92828

Back by popular demand! Mike's is proud to announce that there will be two more showings of the now-famous movie starring one of our very own Georgia Peaches. As we did last week, there will be two showings, one at 9:00 p.m. and at 11:00 p.m. Free popcorn will also served and in-flight barf bags will be beside each seat.
Last week saw standing room only crowds, so arrive early to reserve a seat. Cheers!!!

3750. Mike's Movies

Mikes would like to thank all the attendees who showed up this evening to watch the movie. There was a full house and we gave away over 30 pounds of popcorn! The movie was a resounding success in that only two people had to use the in-flight barf bags and most of the customers said that they will recommend this movie to their friends. They said, "This is one of the best comedies we have ever seen."
Mikes may show this movie again next weekend due to popular demand. Stay tuned for future scheduling.

3760. Re: IS Ham Radio Dying? (Was Newark Store)

Newsgroup: rec.radio.amateur.misc

The stats can lie if you make them lie.

You gave raw figures that do not take into account the population increases in the US over these years.

If instead of raw numbers, one takes the numbers you presented and figures out the percentage of hams in proportion to the US population you get a clearer picture:

Year Hams US Population Percentage
1917 6,000 103,268,000 0.006%
1928 17,000 120,509,000 0.014%
1936 46,000 128,053,180 0.036%
1950 90,000 152,271,417 0.059%
1956 140,000 168,903,031 0.083%
1958 160,000 174,881,904 0.091%
1963 250,000 189,241,798 0.132%
1977 327,000 220,239,425 0.148%
1989 500,000 246,819,230 0.203%
1997 678,473 267,783,607 0.253%
2001 682,240 277,228,212 0.246%

So, even if one takes into account the artificial surge in Ham Population attributable to the "Codeless-Tech Barrier Lowering" of the early 90's, the ham population is beginning to decline.

Stand by to see the numbers decline even more as individuals who came in on the wave of the 90's allow their licenses to expire. Care to make a wager on which way the numbers will move?

Who in the heck would want to be a ham after reading the garbage in this group anyway?

No wonder the ARRL is whining about declining membership! Is this why they keep raising their annual rates? The ARRL is just more of the same old "same old".
Next thing ya know, the "ten-ten" club will see a well-deserved drop in fees, too.
Money wasted on both accounts if you ask me.
Besides..your stats show that the Ham community is actually growing year to year. This is evidenced by the callsigns that are no longer available and as new ones are being issued.
Now go take on the day.

I have the same TNC and use HyperTerminal. I am tempted to break out my old TRS80 color computer since there are instructions for making a cable for it and I still happen to own one. I knew there was a reason I never got rid of that thing... :-)

The TNC itself doesn't need any software as the configuration stuff and operating modes are all built in. You only need a terminal program (of almost any type) to access the TNC.

What difference does it make Toilet-Boy, you will twist it around, demand verification and then when confronted with the truth you will start all over again with a lie. What I am saying is your only supporters don't exist. Never a person that has a known name always a new one and gap tooth slobbering John-Toilet-Boy Mackey pretending someone actually believes his tripe. Lie on Toilet-Boy it is what you do best. It is all you do. Nothing radio related. Nothing of substance just Toilet-Boy in fantasy world. His own personal and private circle jerk. The best a bed pan changer like you can do Toilet-Boy.

Lets not make this a political issue, or divide ourselves by trying to blame individual groups. Its not about Democrats or Republicans (the research had to have started while Clinton was in the White House, but I don't doubt Bush will love it).

Instead, this is about everybody outside of the power elite, and _ALL_ of us will have to live with this stuff in the future.

Your attributed the above to the wrong person, W4JLE. I didn't write the material you quoted - it was written by someone else in reply to something I had written earlier. And you may want to read what I wrote in reply to that (about not turning this into a political debate between the two parties).

So you saying that because the numbers as a percentage of the population is decreasing, that ham radio is on the downhill slide? Have you not listened to all the controversy over the population count? The government took special pains to accurately count the homeless and illegal aliens this time. I don't think that either group has a lot of interest in Ham radio. The raw numbers tell another story. Once again how does one interpret the data. I think you would agree that if we were to cut the number in half we would still be at the level we had in the 60's.

Yes! The ARRL IS a waste of your money! My opinion only...
What do ya get for yer $$? A magazine? Newsline? Unlimited commercials?
Off-beat insurance?
Ya ever try to nail the ARRL down to anything specific?
Don't waste yer $$$.
Wanna waste even more $$? Ask the 10-10 Club for admission! The Ten-Ten
Club takes in hundreds of dollars a year from new wannabes...where does the
money go? Into a pocket, for sure. Who would be so stupid?
Send them your $$ if you are so stupid. Are you dumb enough to send them
a "fee" for a stupid membership number that means nothing???
P.T. Barnum was right...a sucker is born every minute.

Since it's stated purpose is "crowd control," I don't think that the beam on the fully functional unit will be that narrow. Since it's vehicle mounted, one could sit inside an armored vehicle, or in a concealed position, to use it.

Just for kicks, what happens if it is left on for say 2 minutes instead of the recommended 3 seconds. Do you come out looking like a cup of coffee hot from the microwave? What if you put it in a storeroom in a skyscraper, preset a timer, and just left it on?

The possibilities are endless...and a little scary.

With people like you as well as some of the others that have responded in the same manner, it's no wonder the hobby isn't doing as well as you would expect. Maybe your daughter needs to monitor this group for a while, then make a decision whether or not she would like to associate with the losers that spew similar tidbits. Clean it up there, Rev. Roger! Your language indicates your intelligence level!

I subscribe to this newsgroup and at least glance over the messages, but I really don't know what this group is for! The foul language and disgusting messages are a disgrace to the hobby. I even considered un-subscribe to the group but figured it would straighten out and become some value to the hobby. My questions are:

1. What is the purpose of this newsgroup?
2. Does it have a moderator, if so where is he/she?
3. What do you think this newsgroup is doing to advance the hobby of amateur radio?
4. How do we clean this newsgroup up?

I expect I will be flamed, but you will be wasting your time. I will not respond to a bunch of garbage.

Hello ,
I trust you won't consider my message " a bunch of garbage ". Of all the
Ham Radio newsgroups this one is bound to get the left-overs and otherwise "
unwanted " messages and message posters. Since this is the " misc " group
most posters feel that means " anything goes ".

I check this group daily just on the off chance there may be a meaningful
post (like yours) that deserves a decent response.

None of the rec.radio.amateur.* newsgroups are moderated.

The purpose of this newsgroup is for whatever doesn't fit in the other
newsgroups in the hierarchy. I think there was originally a single
ham radio newsgroup, but if I'm wrong about that, there was a single
mailing list that moved to the newsgroups. At some point, there was
a decision to split into a number of newsgroups, covering smaller
subsets of the main group. When there is a split, it is standard
to include a .misc newsgroup to deal with whatever doen't fit in
the other newsgroups.

So you get a newsgroup that doesn't have a lot of purpose to it.
And that tends to attract people who have nothing important to say.
Or things that they think are important, but they can't be bothered
finding the proper newsgroup, so they either cross-post, or bring
off-topic posts to newsgroups.

If you look at the other newsgroups in the hierarchy, generally they
are in pretty good shape. SOme do suffer from too much cross-posting,
a fallout from breaking one newsgroup down into multiple newsgroups.
And there is too much selling going on, when the proper newsgroup is
rec.radio.swap rec.radio.amateur.equipment is not for buying and selling,
though you wouldn't know that from looking at the messages, it's intended
for discussing the equipment. And rec.radio.amateur.boatanchors was
not set up to sell equipment, but to discuss equipment, and when it
was created someone foolishly said something about selling being allowed.
Unfortunately, it has primarily become a buy and sell newsgroup, though
that old equipment is worthy of plenty of discussion.

rec.radio.amateur.homebrew is in great shape, though methinks it sadly reflects the state of building in the hobby. Yet over there, we do get our share of intruders, in the form of cross-posts and forsale ads. The other specialized newsgroups from the occasional check I make, are likewise in similarly much greater shape than rec.radio.amateur.misc

The real problem we have is that if someone is interested in the hobby, either to become a ham or just out of curiosity, I think the newsgroup they will check is .misc Not because the name indicates it's the place to look, but the names of the other newsgroups rule them out.

And then they look in here, and they see the garbage posts. Ideally, they should be seeing very few posts, because the other newsgroups well cover the territory. They would see very few posts if the junk posts weren't here.

I don't look in here very often, and considering the clutter, lots of posts aren't a problem but they are if they have no place in the newsgroup, I imagine even when people do post questions about entering the hobby, the messages get lost in the noise.

The first part of the solution is to ignore the garbage posts, and don't respond to them. But by their very nature, we seem to have two groups slugging it out in the newsgroup, for reasons that aren't clear. So the junk posts continue because they aren't "good posters versus bad posters" but "bad posters versus bad posters". The second part of the solution is to figure out things that don't fit into the other newsgroups, and start posting about them. This newsgroup has deteriorated over the years, because as the junk gets worse, the useful posts drop off (just as ads have overrun .boatanchors and .equipment). But if there is nothing to balance the garbage posts, then the garbage posts will be what people see if they are thinking of becoming a ham.

Of course, we could consider going to the trouble of trying to get a new newsgroup created, rec.radio.amateur.newcomer (or something like that)to discuss matters of new hams, and people who are curious about the hobby, and even the matter of getting newcomers intot he hobby.

1. The pupose of the news group (Obviously unmoderated) is to provide a place for topics such as
Radio Practices, Contests, Events, etc. that do not fit into the other ham news groups which are:

rec.radio.amateur.antenna - Antenna theory and construction.
rec.radio.amateur.boatanchors - Old Time Ham Gear News Group
rec.radio.amateur.digital.misc - Digital Radio, Packet, AMTOR, G-TOR and Other TORS
rec.radio.amateur.dx - Amateur Radio DX News Group
rec.radio.amateur.equipment - Amateur Radio Hardware.
rec.radio.amateur.homebrew - Construction and Experimentation.
rec.radio.amateur.policy - Radio use & regulation policy.
rec.radio.amateur.space - Space and Satellites
For a guide to Amateur Radio News groups see Jeffrey Hermans Guide KH6O at URL:
http://ac6v.com/newsgroups.htm
It is an FTP download

2. Not moderated as far as I know

3. In an open forum all kinds of stuff apperars, but looking at the titles one can separate the wheat from the chaff and there is a lot of good information on the rec.radio.amamteur news groups and a lot of nonsense as well. Just sort them out and you will see many worthwhile posts.

4. In a free forum, guess you can't. If you check all other free forum news groups, they suffer from the stuff.

If you want a no nonsense version of various ham news, subscribe to a moderated mail list -- see URL:
http://ac6v.com/mail.htm
Hundreds of Ham Topics are available.

Poor little Woger. Your theme is, "Be all you can't be." Your useless drivel is again showing your single digit IQ.
Remember, Woger...aime low, attain less.

"Roger--sitting in a sewer and adding to it.

How special! I guess that His Holiness, Raoul Xemblinosky has inspired your creative muse. Now if you would post in on your web page, just as the songs about you are posted on Raoul's, the circle would be complete.

Rog...how does your song go? Could you hum a couple of bars of it? Rumor in West Virginia is that you are an accomplished "hummer".
Come on, Woger. Give me a hummer. Pretty please?

3788. KC8JBO's Theme Song???

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-04 20:37:24 UTC
From: Repugnant <Woger@gism.com>
Message-ID: <97u8ufcle0@dosa.alt.net>
Source record: 92766

Is this the song that Raoul wrote for Roger? By the way, JR. If this news group so apalls you, why do you linger here? Do you like to whine?

Roger Wiseman's Greyhound Men's Room Band
(R. Xemblinosky/P. McCartney)
It was twenty years ago today,
Roger Wiseman forced the boys to be gay
He's been going in and outa their rears
And he's made them into ravin' queers.
So watch out or I'll force on you
The act we've hated all these years,
Roger Wiseman's Greyhound Men's Room Band.

We're Roger Wiseman's Greyhound Men's Room Band,
Disciples of the Bucktoothed Choad,
Roger Wiseman's Greyhound Men's Room Band,
Sit back and watch us shoot a load.
Roger Wiseman's Greyhound, Roger Wiseman's Greyhound,
Roger Wiseman's Greyhound Men's Room Band.
It's wonderful to be here,
But Wiseman's full of crap,
The dirty goddamn pederast:
That fucker gave us syphilis,
That fucker gave us clap.

I don't really want to stop the show,
But I thought you had all better know,
That Wiseman's going to play a song,
On a stickpin that he stuck through his schlong.
So let me introduce to you
The one and only Bucktoothed Choad
And Roger Wiseman's Greyhound Men's Room Band.

3789. Re: Imitation, even when inept, is the sincerest form of flattery.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, KT1J, NC1L, N2NB, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, N4AA & QRZ DX, N4GN, WB4PVT, WD4NGB, N5FG, N6RT, K8YSE, NE8Z, W9VA, CT1BNW, CT1END, CT1ERK, DJ7ZG, DL1EK & DX News Letter, DL2FAG, G3SXW, G4ZVJ, HA5LV, HA0HW, HK3JJH, I0MWI, IK7JWX, IN3ZNR, IZ8AJQ, JA3MZB, JM1LRQ, PA5ET, PY2KQ, RZ3EC, UA6CW, VE3EXY, YB5QZ, ZR1DQ and the ARRL Letter for the following DX information.

MESSAGE FROM EDITOR: My wife and I would like to thank the many who sent congratulation messages on OPDX's 500th issue. We hope to continue to provide you with the up-to-date DX information each week best as we can. As long as the DX Community provides the info, we will continue to send it out..... 73 and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25/Feb, through Sunday, 4/Mar there were 243 countries active. Countries available: 1S, 3A, 3B8, 3B9, 3D2, 3D2/r, 3V, 3W, 3Y/b, 4J, 4L, 4S, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH3, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, S9, SM, SP, SU, SV, SV5, SV9, T31, T32, T33, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZF, ZK1/s, ZK2, ZK3, ZL, ZP and ZS.
There were 37 CQ Zones available during the past week.

CQ Zones that were not active are: 2,3,4
There were 51 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,7,8,9,15,21,22,23,24,25,26,31,
34,35,43,58,59,68,69,70,71,72,74,90
PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As
always, you never know - "Work First Worry Later" (WFWL).

OPDX InterNet Subscribers will receive an additional bulletin (due to its
size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3C5, EQUATORIAL GUINEA. Alan, 3C5A, who is active on 6 meters, expects
to leave here in April.

3D2CI, CONWAY REEF. This operation is now QRT. The team had a bumpy trip
back to Fiji due to Tropical Cyclone PAULA. However, the team made it back
safely in spite of the terrible sea-sickness they had. The team net 30,000
QSOs on the operation. Look for the logs to be available after March 9th
on the Web page: http://www.kragujevac.co.yu/3d2/
Last week OPDX had a error and reported that YU1FW was a member of Conway
team. This is incorrect and YU1DX/Srecko should have been listed instead.

3G, EASTER ISLANDS. Just a reminder (Please refer to OPDX.495) to look
for a team of Chilean and German operators to be active from here as 3G0Y
now through March 19th. Operators mentioned are: Alfredo/CE3WDD, Sergio/
CE3WDH, Fred/DK1BT, Falk/DK7YY, Tom/DL2OAP, Mar/DL3DXX, Jan/DL7UFN,
Norbert/DL9NEI and Danilo/XQ3ZW. The team plans to be active mainly on
CW and RTTY. Operations will be on all HF bands, but with an emphasis
on the lower bands and the WARC bands. QSL via DK7YY. For more information,
check their Web site at: http://www.qsl.net/3g0y

3Y, BOUVET. By the time you read this, Chuck, 3Y0C, should have departed
from Bouvet as of March 4th. He was picked up by the ship "RV Lance"and
headed to Cape Town, and is expected to arrive around March 10th.

59(9) EDITOR RETIRES. OPDX received the following message from Bob, WB2YQH,
Editor of "The 599 DX Report": "After several weeks of considering all the
circumstances here at '59(9)', we have decided to retire from the DX bulletin
business. This was not an easy decision. We started this publication from
the ground up 7 years ago. It has grown to be the largest of the U.S. paid
subscription newsletters. Each issue was created with care and dedication to
deliver a full and complete issue. We have sold the subscription list for
all versions to Bernie McClenny, W3UR, Publisher of The Daily DX. Bernie's
journalistic style closely matches ours and we are certain he will provide
you with the same high quality newsletter each week. He has a solid DX
background to satisfy all your DX needs. This publication will be called
The Weekly DX and will be available in paper and PDF versions. He will
provide you with all the details next week. All your subscriber information
has been forwarded to him. Any renewals received here will be forwarded to
him as well. We are retaining the company name and the Flying Horse Callbook
business as The 59(9) DX Report - Callbook Distributor. We will continue to
offer the WARC Award and the current QSL Pipeline Directory. We have
enjoyed all your positive comments along the way. Thank you all for your

support. A special Thank You to my wife, the creator of the layout and all the graphics, for being there every week to proofread the issue. Thanks for staying with us, it's been a great ride."

5U, NIGER. An Italian group consisting of Silvano/I2YSB, Paolo/I2UIY and Marcello/IK2DIA are now active until March 12th. The team was active during last weekend's ARRL Contest as 5U5A. However, look for them to be active this week as 5U2T on CW and 5U2K on SSB. There has been a lot of activity on 40-10 meters, especially the WARC bands. QSL via I2YSB direct or via the ARI Bureau. Also, check out the following Web page for details and an online log search: http://digilander.iol.it/i2ysb

9M0, SPRATLY ("The UnDXpedition", refer to OPDX.498). Members of the Central Arizona DX Association (Darryl/AF7O, Dennis/AF7Y, Sally/KM5EP, Mike/N7MB, Dan/NA7DB, Jerry/WB9Z and Luis/XE1L) are now active as 9M0M. Some members were active in the ARRL DX SSB Contest during the past weekend. Activity will be 80-10 meters CW/SSB. QSL via K7XN. For more information, check their Web site at: http://www.xcvr.com/9M0M

9M6, EAST MALAYSIA. Andy, G4ZVJ, plans to operate CW only from 9M6AAC, East Malaysia from March 8-12th. His activity will include an entry in the RSGB Commonwealth Contest (BERU).

AP, PAKISTAN. Hasnat, AP2HA, has been active on RTTY around 21081 kHz between 1330-1430z.

CQ1, PORTUGAL. An operation sponsored by the Costa Verde Radio Club will sign with a special callsign CQ1CV on the air from Portugal during the CQ WPX 2001 SSB weekend. The site of operation will be on the northern border close to Spain on Serra Amarela at roughly 1200m altitude. The entry will be Multi-Single with 6 operators joining the team: CT1ENQ/Miguel, CT1ERK/Antonio, CT1ETE/Paulo, CT1GFK/Antonio, CT1GPQ/Goncalo and CT2GTP/Paulo. All these operators have good contest experience. The team will be active on all 6 bands and is aiming at the World Top Ten spot and will do their best to get there.

CQ3/CQ4, PORTUGAL. Cupido, CT1BNW, informs OPDX that he will be active during the next two CQ WPX Contests with special callsigns to celebrate the event "Porto 2001", the Capital European of Culture (CEC). Look for him on SSB, March 24-25th, to sign CQ3CEC. Look for him on CW, May 26-27th, to sign CQ4CEC. QSL via CT1BNW.

D68C QRT. This operation is now QRT. Reports indicate that they excessed over 160,000 QSOs, with RTTY QSOs exceeding 4000, PSK exceeding 1,000 and FM 3,200. It will be a while before someone breaks this record.

DXCC NEWS.....
Bill Moore, NC1L, DXCC Manager, reports, "We just approved ST0P for DXCC credit. It was on the bad list for lack of documentation since the middle of last year. The documentation has been reviewed and it is OK. People can now receive DXCC credit. Anyone who has submitted it and had it rejected can contact us and we'll be able to update their record without having to submit the card again. If not, it can

be sent in the next submission."

EA8, CANARY ISLANDS. Well known DXer Martti Laine, OH2BH, had a temporary escape from the rather cold OH-land and was active this past week from his Canary Islands QTH as EA8BH for the ARRL DX SSB Contest. It was reported that Martti has offered a drink on his account at HamCom in Texas, June 9-10th, for those who were lucky to work him on all six bands. See the following Web page for details: http://www.hamcom.org

FK, NEW CALEDONIA (Great News! TX0). Jacky, F2CW, is currently active from here as TX5CW (but earlier in the week as FK/F2CW). He has been active mainly on CW on 30/20/17/15/10 meters at various times. However, here is the great news. "The Daily DX" is reporting that Jacky will be heading a group of four operators to activate Chesterfield Islands (DXCC's newest entity) between April 24th and May 8th. Reportedly, arrangements have been made for a chartered sailboat to take the team there. Dany, F5CW, and at least two other operators will join the group. They expect to have 3 stations active. There will be a special effort on the lower bands and 15 meters. More details are forthcoming.

HA, HUNGARY. Viktor, HA5LV, informs OPDX that operators in HA-land are still waiting to be permitted to use 6 meters. Any reports of activity are SLIMS.

HC8, GALAPAGOS ISLANDS. Pedro, HC1OT, is now active from San Cristobal Island, Galapagos, as HC8Z until March 8th. QSL via NE8Z: Rick Dorsch, Box 616, Hamburg, MI 48139 USA.

HI, DOMINICAN REPUBLIC. Babs/DL7AFS and Lot/DJ7ZG will be on tour again and will be active from here as DL7AFS/HI9 and DJ7ZG/HI9, respectively. They should be active now through March 23rd. Activity will be on 80-6 meters on SSB, RTTY and PSK. QSL via DL7AFS.

HK0, MALPELO ISLAND (Update). Pedro, HK3JJH, informs OPDX that he will leave for Malpelo April 4th and his operation will start April 7th (if all goes well).

IOTA NEWS.....
AS-NEW. Bill-Chen, BV9BC, from the "Eastern Branch of Chinese Taipei Amateur Radio League" reports to look for BV9O from Orchid Island (Lan-Yu) from March 15-19th. Operations from this new IOTA will take place from Lang-Tao Elementary school. QSL via BV8BC: Bill-Chen, Box 222, Taitung-city 950, Taiwan.

AS-056. Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island) now through March 8th during his spare time. Suggested schedule is as follows: March 5th 1000-1500z, March 6th 1000-1500z, March 7th (no times) and March 8th 1000-1100z. Activity will be on 40 meters, 14260 and 21260 kHz +/-10 kHz. Operations will be on SSB/CW/SSTV. This is not a DXpedition. QSL only via the Bureau.

OC-066. HA9RE is active as FO0ARE from Tuamotu Island. His length of stay is unknown. QSL Manager is HA8IB.

OC-144. Irfan, YC4FIJ, a resident on Belitung Island, can be found a few days during the week on or around 21260 kHz between 1200-1600z. QSL via YC9BU.

OC-201. Bob, G3PJT, will be active from Waiheke Island as ZL4CC from March 8-13th. His activity will be mainly on CW, however, he does plan to participate in the RSGB Commonwealth CW Contest. QSL via G3PJT (direct or bureau).

IQ, ITALY. The "Campania Contest Team" will participate in all major contests throughout the year of 2001 with special callsign IQ8S. The team operators are: IZ8AJQ, IZ8DBJ IZ8CEV, I8TLI, IZ8CSD and IK8YBE. QSL via IZ8DBJ direct (or via bureau) to: Mario Pesce, P.O. Box 15, ZIP 80070 Bacoli (NA), ITALY.

JD, OGASAWARA. A station signing JD1BIA was active over the weekend during the ARRL Contest running 10 watts on 21353 kHz. Length of stay is unknown.

KH0, MARIANA ISLANDS. Nob, JM1LRQ, will be active as KH0/JM1LRQ from Saipan Island (OC-086), March 22-26th. Activity will be on 160-6 meters CW/SSB. He plans to participate in the CQ WPX SSB Contest as Multi-Band entry. Nob states that he will concentrate on CW outside of the contest. QSL via the bureau or direct to: Nobuyuki Arai, 5-6-1-1002 Kitayamata, Tsuzuki, Yokohama, 224-0021, Japan.

LLDXT UPDATE (QTH Needed). Rob Snieder, PA5ET, reports that "The Low Land DXpedition Team (LLDXT) is currently planning the 'Caribbean Tour 2001' to Grenada (J3) and St.Vincent (J8) which will be held in August/ September 2001. We are looking for excellent operating spots on both islands preferable on the north side, or on a hill with free sight to the north. The locations should at least have 2 bedrooms, big living and plenty of space in the garden to setup yagi's, verticals and wire antennas. We found several nice villa's on the Internet but all of them are very expensive. Who can give us some valuable information/tips which can contribute to a big success of this years tour." If you can help, send an E-mail to Rob at: pa5et@muurkrant.com
Also, visit the LLDXT Web page at: http://www.qsl.net/lldxt/

PW0S PRESS RELEASE/SUMMARY. This operation is over, making around 7800 QSOs. OPDX InterNet Subscribers will receive the complete press release/summary as an additional bulletin.

QSL INFO AND NEWS.....
The ARRL Letter reports that the British Virgin Islands has a new QSL Bureau address effective immediately. It's BVI QSL Bureau, PO Box 4, West End, British Virgin Islands.

QSL cards have finally arrived from the printers for the July 2000 operations of FP/KT1J, FP/N1JEZ and KT1J/CY9 (all via K1WY DXA), and WV2B/CY9 and WA4RX/CY9 (both via N2AU). Direct and bureau cards will

be mailed very shortly.

Alfred, IK7JWX, inform OPDX tha EQSLs are available for: IK7JWX, IK7JWX/7, IK7JWX/P, IK7JWX/ILH, IK7JWX/ZA, IK7JWX/IJ7, IK7JWX/IL7, IJ7/IK7JWX, IL7/IK7JWX, ZA/IK7JWX and IQ7J. Check the Web site at: http://eqsl.cc/qslcard/
Regular QSLs are also available via the bureau.

IQ7J was activated during the ARRL SSB Contest by the "Salento Dx Team" from Lecce, Italy. QSL to IK7JWX via the bureau of Italy or direct to: Alfredo De Nisi, P.O. Box 218, 73100 LECCE, Italy.

NOT THE MANAGER. Karl, DL2FAG, informs OPDX that he is not the QSL Manager of Z21AV. He is receiving at the moment quit a lot of QSL request for Z21AV (direct and bureau). Please check your databases.

Several have asked what the QSL route is for TR8CX. QSL TR8CX to: Xavier Cholat, BP 4776, Libreville, GABON.

The recent operation of W4D from Dauphin Island (NA-143) now has the log search and pictures available on the MDXA Web Page: http://mdxa.org/dauphin-2001.html
The photo on the main page of the island at sunset is a possible photo for the QSL card.

Doug, N6RT, informs OPDX that the latest logs for XX9TDX and VQ9GB are now available at the Web site: http://dx.qsl.net/logs

Fabrizio, IN3ZNR, inform OPDX that his processing of QSL cards for his Laos 2000 DXpedition, where he signed XW3ZNR and Mauro/IN3QBR signed XW3QBR between December 27th (2000) through January 11th (2001), will begin after March 15th, once he has the picture QSL card back from the printer. He is also glad to inform everyone that both operations were approved by ARRL DXCC Desk.

RARE OBLAST. Leonid, UA6CW, informs OPDX that his good friend Kirill, UA6CT, a reporter for Russian television, is now active from Chechnya as UA6CT/6. He will be on all bands with 100 watts with dipole antennas during his spare time. It's a good chance to confirm this rare oblast. Leonid may also take part in the Russian DX contest. QSL via RK6AXS, either direct or bureau.

RRC ANNOUNCEMENT. The Russian Robinson Club is proud to announce the results of "World Robinson Cup Marathon 2000" and the rules for the upcoming "World Robinson Cup 2001" (WRC-2001). The WRC-2001 participation period is from April 1st through September 30th. The new rules for the WRC-2001 can be found on the Web site: http://rrc.sc.ru
Any comments or questions are welcome via E-mail at: wrc_rrc@mail.ru
PLEASE Note: The lists of islands for National Islands Programs are available on the RRC site and on the official site of the program.

SOUTHERN PACIFIC DXPEDITION (3D2, A35 and 5W). Hirotada, JA0SC, will be active this month from Fiji, Tonga and Western Samoa. Look for him to

sign A35SC for 5 days from Tonga starting March 10th. He will head to Apia, Samoa, on March 15th and be active there for 5 days as 5W1** (callsign will be assigned upon his arrival). He will arrive in Nadi, Fiji, on March 20th and operate for 2 days as 3D2HY. His suggested operating frequencies are: SSTV - 21343, 28683 and 14233 kHz; RTTY - 21080, 28080 and 14080 kHz. His equipment is a FT-100 with a HL-200 amp (200 watts) into a CY153 (15m), 10 meter 3 element monobander Yagi and a PW-1 Portable HF Vertical antenna for 7-30Mhz. He will use a Vaio Laptop PC with MMSSTV software for SSTV and MMTTY for RTTY. QSL via the Bureau or Direct to JA0SC: Hirotada Yoshiike, 722-1 Shiba matsushiro-cyo, Nagano-city 381-1214 JAPAN.

SPECIAL EVENT. Look for special event station IR0MA to be active next month (April) commemorating the 2754th birthday of Roma. This operation will be valid for 5 points on the "Natale di Roma Award". On April 21st, look for IR0MA to be active from the "Capitolium of Roma". QSL only direct to I0MWI CBA. ADDED NOTE: OPDX InterNet Subscribers will receive an additional bulletin containing the details of the "Natale di Roma Award".

VK9L, LORD HOWE ISLAND. Reorts indicate that Ed, K8VIR (aka-ZL4IR) is planning to operate as VK9EHH from here beginning this week, March 5th. Watch the IOTA frequncies. QSL via W8WC.

VP2MDY OPERATION SUMMARY (Sable Island, CY0, Next). Art, N2NB, aka-VP2MDY, has made it safely home and is happy to report that the logs have safely made it to his QSL Manager NW8F's QTH. Art would like to thank everyone for making his one man 6 day operation worth while and fun. His totals are:
160 Meters --- 176 QSOs 15 Meters --- 1286 QSOs
80 Meters --- 499 QSOs 12 Meters --- 499 QSOs
40 Meters --- 208 QSOs 10 Meters --- 1126 QSOs
30 Meters --- 635 QSOs SSB --- 3163 QSOs
20 Meters --- 1760 QSOs CW --- 3894 QSOs
17 Meters --- 868 QSOs TOTAL --- 7057 QSOs
Art mentions that he would like to hear some feedback (both positive and negative) from you. He also mentions that there are 17 of you who are on his elite list for working him at least 8 times. His E-mail address is: A1RTRAFFIC@aol.com Art is currently making plans to go to Sable Island (CY0) next.

ZD8, ASCENSION ISLAND. Jim, N6TJ, will once again be active as ZD8Z from May 7-17th. QSL via VE3HO (U.S. stamps are OK).

ZW0T, TRINDADE ISLAND. Ben, PY2KQ, informs OPDX that a DXpedition to Trindade Island is scheduled for October, 2001. The current list of operators are: PU2RYW/Fran, PY2NW/Claudio and PY2QI/Erwin. There will will be two stations active for two to three days, ZW0TB on SSB and ZW0TW on CW. This DXpedition has been planned since January and they currently have three sponsors at this moment:
ICOM Incorporated Japan - is providing them with 2 HF transceivers.
SOUNDY Equipamentos para Radioamador - will help them with partial QSL expenses and some equipments.
RADIOHAUS Radiocomunications - will help them with partial QSL expenses

and some accessories.
They also have the support of the Brazilian Navy, which has a base
there and also ANATEL, the Brazilian Telecomunication Agency which allowed
them the licences for ZW0TB and ZW0TW. Ben, PY2KQ, will be the QSL-Manager
and will support the group. You can check detailed information about this
DXpedition by visiting the official web site (still under construction)
at: http://www.radiohaus.com.br/trindade.htm

Mheh. He posted the same piece of shit as "SONG: RAOUL'S SWALLOWING THE CHOAD AGAIN" in the 'Nose. The lazy hillbilly fuck couldn't even come up with a separate "song" for each of us.

3792. 14.313 --- Contesters And Blowhards

I don't know which was worse today, the stupid idiotic knee-jerk contesters ("CQ contest CQ contest CQ contest CQ contest CQ contest CQ contest CQ contest CQ contest CQ contest CQ contest") or the 2 self-centered pompous blowhards N4FZ and W4ASX ("I know everything and am the best" "No, I know more and am very rich".).

It's enough to make one puke. I'd rather hear the Cowboy.

What kind of anti American rock did you crawl out from
under ? This weapon is a NON lethal tactical weapon. I
suggest you put your sorry ass in a "peace keeping", or
"law enforcement" role that US military forces deployed
on in the past - and then when a hostile crowd (a crowd
including both military and civilians), is intent on
decaptitating your head and carrying it around on a pole,
you come back here and report how you shot and killed all
the women and children brandishing knives... or would you
rather hold your fire and give up your life - because you
have such moral ideals.

If my men are under fire by civilians, and if I have a non lethal force option to employ, i will use it, but, given the absence of one, escalating to lethal force is the last alternative.

Any professional soldier will tell you they do not wish to harm civilians, this is the impetus for this new technology. It is an effective deterrent, publicity not withstanding.

And before you shoot your socialist mouth off, I suggest you remember the incident in the streets of Mogadishu, Somalia back in 1993. Where the body of a US Army Ranger was being dragged naked thru the streets, an angry mob, including women and children - cheering at the sight. I suggest you read the book "Black Hawk Down".

People like you would prefer my comrades and I in arms, simply ask the enemy really nicely "oh would you please not hurt us?". While they cut our throats and spit on, and burn the American flag for the anti western crowds that have not so friendly intentions for the U.S.

This technology is another tool, another option for our commanders in the field to accomplish their missions. The ultimate tactical applications, and ROE's regarding the technology would no doubt have to be worked out, but having it is better than not having it.

Perhaps my math skills are deteriorating due to my advanced old age (46), but that chart appears to indicate not a drop, but a continual INCREASE in the number of licensed hams in the US.. both as raw numbers AND as a percentage of population (per capita)... Am I wrong? Anybody?

3795. Reminder about ex-AA8DP

New shortwave pirate, ex-AA8DP, is being linked to 3950. It's 3860 that he was affiliated with. Yes, years ago he was on 3950, but was outed by several hams as being a government operative, trying to provoke illegal activity. He participated in some Liberty Nets, but was told to knock of his sh*t when he wished everyone a *Happy Nig-ger Day* on MLK's birthday. He and his buddies left for 3860 and never came back.

Do I need to think like you to be up on the times? I don't think so, bucko. I also don't think this hobby needs the likes of you. Why not try another life? Also it may be wise to keep your daughter out of the gutter and the men's locker room. She may thank you when she's 40ish. Afraid of you? MWAHAHAHA! As you would say!

Look closely and see the decline starting at the last stat. I was merely presenting alternative numbers that I felt showed a little more than raw numbers of hams in the states. Presenting raw stats like the previous poster did is like comparing 1917 dollars to 2001 dollars without taking into account inflation.

I could really care less about which way the numbers go, just enjoyed finding out.

How depressing. Just as I thought that he had expended some effort to
please me, you have dashed my hopes.

And a second thought: If he reworked that song, he must have been
saving it for three or four years, and if he saved it, why that would
make him <gasp> anal!

Oh nooooooo!

> have such moral ideals.

A good Commander in Chief, and proper rules of engagement, will correct this problem. If the enemy is presenting an immeadiate threat to the lives of our soldiers, they should be taken out. Period. Man, women, child, black, brown, etc. makes no difference once they take up arms and try to attack our soldiers, they become the enemy.

>
> If my men are under fire by civilians, and if I have a
> non lethal force option to employ, i will use it, but,
> given the absence of one, escalating to lethal force is
> the last alternative.

If it were the first option, there would be a lot less incidents to start with.

>
> Any professional soldier will tell you they do not wish
> to harm civilians, this is the impetus for this new
> technology. It is an effective deterrent, publicity not
> withstanding.

When they take up arms against you, they are no longer civilians, they are the enemy.

>
> And before you shoot your socialist mouth off, I suggest

> suggest you read the book "Black Hawk Down".

Again, this would never have happened given a proper Commander and correct rules of engagement.

>

Personally, I would say to run up a few Blackhawks and test out the mini-guns. Funny thing about a riot, when you shoot a few at the front, the rest go home.

> This technology is another tool, another option for our
> commanders in the field to accomplish their missions.

>

The only problem is that this tool is targeted for domestic use, and the military has not disclosed the whole truth about this weapons' real capabilities. Couple this device with the testing of HAARP's mass mind altering potential, and you start to wonder what these devices are really being developed for...

Why not go to 17m or 12m -- no contests allowed there. 28.600 is probably out of range of the contesters as well.. And there is CW, RTTY, PSK31, et al.

As for blowhards -- in any workplace, in any bar, in any newsgroup, in any church, in just about any place, there are blowhards -- so why pick on Ham radio, just QSY!

Gyoza Xao wrote:

3818. Has anyone dealt with Bill Turner on Staten Island, NY?

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-05 01:44:30 UTC
From: foxblaine@aol.com
Message-ID: <20010304204430.18806.00001050@ng-mi1.aol.com>
Source record: 92693

Please advise if you have. I responded to an ad he had on QTH.COM (Listing #93878) in which he had SEVERAL rigs up for sale or trade. I made an offer on an FT-847 which he accepted. He asked me to go ahead and ship it, and gave an address of:

Bill Turner
599 Midland Ave.
Staten Island, NY 10306

I became a bit weary due to his vague and infrequent answers to my e-mails, so did a bit of investigating. Did a reverse address search on him and spoke with someone at that address on Staten Island who has NO IDEA who Bill Turner is. Searched the QRZ database and could only come up with one call that matched, and that was in New York City. No luck tracking down a phone # there either. Thank GOD I haven't sent my rig out yet. I'd like to hear from ANYONE who has dealt with this guy.

His email is Bturner1957@aol.com -- What REALLY worries me is that I made a vague reference of my employment in the law enforcement field and that he could call me on my cell phone in the squad. AOL allows you to check the status of e-mails you send to other AOL users, and I see he read it, but no response at all from him.

Thanx in advance...and Bill, if you're legit, let me know so we can get on with the deal, and apologies in advance if it turns out you are legit.

73~~~

That's right, anytime we are victims of our own failed foreign policy,
we will just turn up the microwave for a few minutes and everything
will be all right. Just kind of look at it a Napalm that doesn't
destroy property. Neat stuff huh?

I would suggest that you look at the history of modern warfare before
you shoot your mouth off about the desires of the "professional
soldier). Try looking at how many civilians were killed at the
bombings in Germany. Try looking at the collateral damage from our
effective use of nuclear weapons in modern warfare. Were any
civilians killed in the bombing of Iraq? How about Bosnia? We never
killed civilians in Vietnam.

What happened to the soldiers in the Blackhawk was the result of
failed foreign policy and piss poor tactical planning. Cooking every
person within 700 yards would have made the outcome much different.

The option of cooking your enemies is another option available to the field commander. Plus, who says that is the only way that the technology can be deployed? Could a bigger one be put aboard a plane? Cook the people and keep the property.

Much better than a neutron bomb. Of course, the military never thought about that because they stay up all night worrying about hurting civilians....yeah right. Plus, do you really think that the only ones to use this technology will be the US military?

Are you that naive?

It gives some of these idoits a place to rant and rave. The way I figure it its good for Amateur Radio. Some of these clowns are so slow that it takes them all day to think of a message then write it down and send it. So they are off the air. Thats good for Amateur Radio.

>
> > 4. How do we clean this newsgroup up?

Why would you want to do that? These fools are here. That means that they are off the air. I admit there are some ture losers. Where ever these losers are there isn't much hope in cleaning up the mess. Yet the positive partof this is then again they are OFF THE AIR WHEN THEY ARE HERE.

I picked uip a Ramsey FX-146 10/91 Rev 1.3 at a local junk shop, and need help with setting up the frequency-setting diode matrix and the mic pin-outs. I thought I would find a web site on this thing, but darned if I could find one.
Can anybody point me to some reference information so I can check this thing out?

I think there is another way of looking at this.
With the popularity of the Internet and the number of hours that
people spend on the Internet its a very good testomony to Ham Radio
that the numbers have not decline even more.

Instead of crying about the lower number of hams why not do something
about it? How many people a year so you tell about Amateur Radio?
Without all the crying about the licenses changes and boo hoo because
you had to know the code and a new guy does not.

I think that a lot of people that might take the time to learn enough
to get a ticket decide that they are not wanted because they listen on
the air (just like we all did, I listened while I was studying for my
licenses) or in these newsgroups. In stead of hearing a lot of
friendly people getting along with each other and possabley finding a
Elmer to help them on there way they hear all the negitivity about
some licensing changes that they dad nothing to do with.

One important thought, if we do not get new hams into the hobby
someday the goverment will take our frequencys away and find a way for
those frequencys to generate revenue.

Find some way to promote our hobby, post class skedules, talk with
techie people, help them put up am antenna, Do Something.

Now dismounting soapbox,

Uhhh, dimmy, Suzy, Godzilla, or whatever you call yourself now. Lemme get
this clear and correct me if I am wrong. You can libel people, slander them
on the air, send terroristic threats to people, send them fraudulent magazine
subscriptions, send libelous letters full of lies to their employers, neighbors,
friends, and customers, call people from pay phones in the middle of the
night, stalk people, terrorize little old ladies in nursing homes, tell obscene filthy
stories about children engaged in sex acts on the air, insult people's
spouses, and god knows what else comes out of your sick mind, BUT when someone dares to say
booo to you, you scream that you and your family of two birds are protected by a court
order? Now is that all correct? or did I miss something?
Come now dimmy, be a man for once, step up to the plate without your mommy and
tell all of us here if everything just said here is correct or incorrect????
come on dimmy, we are all waiting ???????????

Del... quite right.. it's we ourselves that have the power to save the service. We are supposed to be ambassadors, representatives of our countries.. but more, of our service and our hobby. Infighting never did do anything for any organization, other than to destroy it. As far as licensing changes go, was it not we ourselves, through our representative organization, the ARRL, that brought these changes about? Certainly they did not fight for these changes on their own volition, after all, they already HAD their licenses.

One point of disagreement however, that people seem to be laboring under a misconception about. The FCC MAY consider denying American hams use of the amateur bands, but they cannot, but treaty, offer these bands up to other services for profit. The amateur frequencies have been internationally allocated by the IRC and WARC conventions and the US is a signatory.

Please folks.. let's enjoy the bands, and the people.. and show our best sides to the world... :)

Well, thats nice rhetoric, Mr. Professional Soldier, but that nonsense is not fooling me. I'm fully aware of the military training scenarios featuring American citizens as the target (so-called terrorist groups - often conservative right-wing groups defined as "terrorist" groups). As any truthful professional soldier will tell you, this type of training has become commonplace within the military over the last few years.

And this mission (control of "terrorist" groups in the US) is certainly one of the primary factors driving the development of "crowd control" weapons in the military.

As for the "non-lethal" nonsense, let me remind you that just about everytime the military has been used for "law enforcement," the situation has become lethal.

Now you want to hand soldiers (and eventually police departments) a weapon touted as "non-lethal" if used correctly, when those very soldiers have shown that they cannot be trusted to use a gun correctly in those situations (remember, thats why the military does not give bullets to soldiers on guard duty).

Somehow, your claim that this is "non-lethal" technology does not really comfort me that much.

> If my men are under fire by civilians,
> and if I have a non lethal force option

> It is an effective deterrent, publicity
> not withstanding.

Ah, judging from the first paragraph directly above, I see you're also aware of the military training scenarios featuring so-called "terrorist" groups as the target (or at least aware of the mentality behind that training).

Anyway, the two paragraphs above don't add up when taken together. If "your men" are under fire, are you going to sit around waiting for this V-MADS weapon to be deployed? Of course not. You're going to shoot first and let God sort out the dead afterwards. So obviously, protection of civilians is not the real impetus for this new technology like you claimed in the second paragraph. Instead, this technology is obviously designed to control non-violent crowds (crowds that pose no lethal threat to your soldiers).

> And before you shoot your socialist
> mouth off, I suggest you remember

> the sight. I suggest you read the
> book "Black Hawk Down".

V-MADS technology would not have made any difference in Somalia, my friend. Thanks to the overly aggressive tactics used, our soldiers succeeded in turning the entire population of that country against us in just a matter of days (even groups that initially supported our involvement). V-MADS technology would not have changed that at all.

Even that specific incident (the crowd dragging the soldier) would not have changed with V-MADS technology. Since that incident was totally unexpected, V-MADS technology would not have been immediately available to use. By the time it would have reached the location, the incident would have been over.

> People like you would prefer my
> comrades and I in arms, simply ask
> the enemy really nicely "oh would
> you please not hurt us?". While
> they cut our throats and spit on,

> and burn the American flag for
> the anti western crowds that have
> not so friendly intentions for
> the U.S.

Don't give me that "comrades in arms" fighting the enemy nonsense, because it just doesn't fly. This technology, as advertised, is not about fighting the enemy . This weapon is being advertised as a crowd control tool. And, as far as I know, the military has not yet defined non-violent crowds as the enemy (yes, since you've already said you would use conventional weapons against violent crowds that threatened your soldiers, we are talking about non-violent crowds).

And, if you're fighting an enemy, you're not going to use weapons like this in a non-lethal manner. If this type of weapon is used at all, it will be used to kill the enemy. As such, it becomes nothing more than another weapon to kill with (so drop the high moral facade, my friend).

And, finally, I strongly object to your attempts to paint me as anti-American or anti-military. Throughout this entire discussion, my comments have been solely directed at the use of this technology as a crowd control tool. Not once have I commented on the use of this technology against a real enemy in a warfare situation.

Furthermore, I don't see how one can be painted as anti-American because of opposition to a weapon anyway. The United States has huge chemical weapons stockpiles. Is it anti-American to be opposed to chemical weapons? What about biological weapons (we have a stockpile of those also)? What other weapon must I not object to if I want to avoid being called anti-American?

Agreed. In fact, they let the cat out of the bag with the press release (its based on RF). Since we're talking about radio here, it should not be that difficult to figure out - almost anybody familiar with radio could come up with the frequency used with little experimenting and the equipment should certainly not be that difficult to build. Somehow, I suspect we're seeing the beginnings of a whole new arms race.

Is Ham Radio Dying? I do not think it will die. As long as people that post their garbage here instead of on Ham Bands. If they ever got back on the air and tried this stuff no one would come back to them. One's language is usually an indication of their capability of functioning in life. It is obvious that these poor folks cannot function in a normal life style so they take out their frustrations behind a key board. If you look up their license in the FCC data base that might be an indication of how much they know about ham radio. But then again it may not. Memorization skills have even shown that monkeys can learn. Maybe a more comprehensive test, such as actually building a transmitter and putting a station together at a test site might weed out the malcontents.

What we are seeing in the Ham community that is so negative is not rare. It is a phenomena that is in every aspect of life. Look at the major sports clubs. The ones that are getting the most attention are the guys, who have an arrest record larger than the FCC ham test!

We hams need NOT respond to the foul and feeble minded posters with like talk. Rather try to encourage these creatures to look deep within themselves and face their own failures rather than being an "A-Bomb" garbage mouth. Or better yet ignore them and they will become tired of posting to themselves.

The interesting thing is that pretty much anyone can build this thing --
and, if the government is claiming that it's NOT a dangerous weapon,
then if the intended victims "do unto others before they are done unto,"
there isn't a lot of room for the Feds to complain, is there?

Wouldn't you love to be in THAT courtroom?

ATTY: "Officer, you testified that the defendant was using a Scrooch
Gun on you. Yet we have heard testimony that the defendant had an
Amateur Radio license, and was transmitting at legal power and frequency
. . ."

Ha! You've even managed to outrage someone outside the hobby with your thesis preview. Looks like your ISP (YOUR ISP) is as filthy as you are! I'll look forward to meeting with you one day and hopefully you'll be wearing a name tag. You'll easily recognize me, I'll be the fellow attached to the fist. Until then, you're the first to make the kill file!

They would simply ban the frequencies use for the general public and make it
a federal penalty to even possess it.
Who Knows or the fake who knows, I'm not sure

Actually Oris is right on this one. This is exactly the same thing we did on 14.300/14.313. It confined the malcontents, the jammers, the foul mouths to basically 1 or two frequencies. We were their target, and it worked.

Ham radio owes ex WB2OTK a big thank you. It could have been a LOT WORSE.

Unfortunatly, as with many a good plan, it had its flaws. The result was the "good guys" were pulled into the fray. And only with the intervention of Riley the Inforcer did that end with the mass exodus of a group of operators to another frequency.

Human beings are a inventive bunch. Anything one group does, another can counter. This theory was/is called the Dominoe theory. Remember that one?

What you have here is a small group of overgrown "problem children" who refuse to grow up. They used to insult, slander, defame, and harass each other via amateur radio. This has been going on for years. A few years ago, amateur radio enforcement got a breath of fresh air in the form of the FCC's Riley Hollingsworth. For once, someone was serious about cleaning the human debris off of the amateur bands.

This newsgroup is a testimony to his success. Instead of using amateur radio as their weapon-of-choice, they now harass each other via the Internet. Same people, same problem, different mode of communication.

Is it a conduction cooled PA? I have a Motorola PA that uses a 8560AS conduction cooled tube I do not have the schematic but I did draw one out I use it on 144 Mc. SSB
Excellent P.A. for 2M a little change should be made in the output coupling but not really nesisarry..,

Sure. You can couple the scope to the audio output of the rig to the speaker. Or you can come out of a 'phone-patch' or 'fixed audio' output.

Or if the scope is a good-un you can couple it to the low frequency IF.

A coupling/blocking capacitor will probably be needed. Try a .01 for a start.

: I am trying to locate a manual for the Motorola VHF Linear number TLD6622A. I
: believe it was part of a system and might be included in its manual. The tube
: is missing and its heat sink assembly and I am trying to identify the missing
: parts. Will pay for copying and shipping or reasonable cost of original.
: Please respond via email. Thanks Don KB6GQA

Since you said VHF and heat sink, I'll throw out that the tube was
probably an 8560 and the unit a vintage early Micor or late Motrac Base
Station Repeater type. The often white block inside the pa cab is
beOxide, just be carefull not to sand or breath dust from any broken parts
of it.

Hit the flea markets and have a look around for the Motrac Series of high
powered base / repeater units. God knows I worked on enough of them in my
day...

I've converted the Heathkit SB-230 conduction cooled amplifier to run on
the 8560 tetrode.... similar mounting and lots of gain when set up
properly.

cheers

>The stats can lie if you make them lie.

And your table below proves that! You've formed a ratio of two
independent variables (no where did you show there is any direct
dependent relationship between the two). Your percentages ONLY
show that the rate of population growth is greater than the rate
of amateur licensee growth; yet both are growing at independent rates,
though. For example, internet and cellphones do not affect general
population growth, yet one suspects both those modes of communication
might possibly have an affect on amateur growth (yet amateur growth
still occurs at a positive rate).

I suspect you've read the book, "How To Lie With Statistics."

Why not make up a table comparing the annual amateur population to the
annual particle count of the ozone layer and draw a conclusion from
the sequence of calculated ratios? (Yikes! An increase in licensees is
causing a decrease in the ozone layer! Run for your lives! :)

I must ask. What on earth got you started on this course of discourse? Who or what ever caused you to be so caustic? You are not only disgrace to the amateur radio community but to your self. What goes around comes around so be just be prepared to get some of what you dish out. It just amazes me how cowardly people like you act. Your name, address, and phone number are a matter of public record in the FCC and the QRZ call sign search site files. It will be just a matter of time before someone just as nuts as you are shows up at your door and decides to greet you in the manner you so justly deserve. I probably will not hear you on the 75 meter band because no self-respecting ham would answer your CQ call. Have fun Roger L. Wiseman of Glendale, West Virginia enjoy it while you can......people like you usually end up no where.

I would beg to disagree with you. The dependant relationship is that US Hams must be a member of the larger US Population group. Without associating the smaller group with the larger you have meaningless data.

At the risk of offending your knowledge of statistics I state that associating numbers in this way is called Per capita.

Take this example:

"March 20, 1998 - According to the Internet Industry Almanac the U.S. has an overwhelming lead in Internet users with over 54% of the total 100M Internet users at year-end 1997. However, the U.S. is only ranked 4th in Internet users per capita. Finland is the leader with nearly 25% of the population being regular Internet users."'

Rank Country Internet Users per 1,000 People
1 Finland 244.5
2 Norway 231.1
3 Iceland 227.3
4 U.S. 203.4

Same with my Hams example. I was merely pointing out that although the raw number of hams is increasing, the per capita number is actually decreasing. And, as someone astutely pointed out, there has been a rise in per capita Ham Population until very recently.

The unstated question of my original post is why?

3879. Re: IS Ham Radio Dying? (Was Newark Store)

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-06 03:04:02 UTC
From: none@none.com
Message-ID: <981k4nclp2@slb2.atl.mindspring.net>
Source record: 92605

Ok. Here is one in which we do not user Per Capita, thus no dependancies:

Year Ham Population Increase Per Year (Averaged)
1917 6,000
1928 17,000 1000.00
1936 46,000 3625.00
1950 90,000 3142.86
1956 140,000 8333.33
1958 160,000 10000.00
1963 250,000 18000.00
1977 327,000 5500.00
1989 500,000 14416.67
1997 678,473 22309.13
2001 682,240 941.75

Since the original poster did not post year-by-year data (can't blame him for
that :-]) the best I could do was to extrapolate the data to gain a yearly
increase. Not the best method I agree, but look at the last number. Would
you not agree that it is a dramatic change?

Contrary to some postings, I am *not* here to start a war, nor am I trolling
or making any conclusions.

Hello
I am looking for some older Icom and Kenwood info. I was wondering what older models of these radio have any or all or these features: digital voice recorder, auto antenna tuner, VOX, and is over 100 watts output? PLus is good for DX and limited contesting. Please email me direct at NZ8C@aol.com with any info. Thanks!
73,
Renee NZ8C

Greetings...

Still Looking for a good trade, after having many offers fall thru...

I have for trade a beautiful Kenwood TS-940SAT. Radio is cosmetically a 9.8 and a solid 10 in operation. I just like to trade radios! I am looking to trade for an Icom IC-756, Icom IC-746 (possibly), or perhaps a Yaesu FT-920 or FT-847. Any trade offers listened to. I VERY much want this to be an in-person trade, and will drive a reasonable distance to meet someone halfway. I am in Beloit, WI, which is 10 miles north of Rockford, IL. Anyone in Chicago, Milwaukee, Madison or anywhere fairly close willing to trade? Please e-mail with offers. Rig includes box in excellent condition and manual.

73, es gud dx de N9LXX~~~

its funny because many media outlets took some very good shots of this unit on video. one could simply measure the waveguide and resonance chamber and easily figure out the frequency. of course, the right amount of power is another issue, but 20 rats and an assortment of different gain dishes would fix that problem. the $50 million? inflated salaries for the last ten years..any good geek could do it under $10k easy.

And of course, nothing was mentioned about the effects if the potential
"victim" were wearing a suit made with metallic fibers. Metal reflects
or shields RF, so a prepared adversary would most likely be immune to

the effects.

3900. TrustedQSL Progress report. Need C/C++ programmers

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-06 16:34:32 UTC
From: darryl_NOSPAM@shecora.com
Message-ID: <905C77B2FdarrylNOSPAMshecorac@207.126.101.100>
Source record: 92628
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.shortwave

Greetings,

It has been less than 2 weeks since I posted my announcement
about the TrustedQSL project. When I start I only knew
what I wanted to do and kind of how to do it. Things
are a little more clear now. The goals of the project
are fairly simple:

1. Create a digital signature SDK/system that can used
by anyone with a 32 bit computer.

2. Open Source which means that anyone can have access to
the source code and use it in their programs. Without
cost or other restrictions, except maybe given credit
where credit is due.

3. Easy for software developers to program.

4. Easy for end users and CAs (Certifying Authority)to use

5. Easy for awards sponsors to validate E-QSLs offline

6. Create a project space on www.sourceforge.net for
easy access to source. This has been done.

7. Create a web site.

I now have the following programs working on Linux and
Cygnus Win32 G++:

qgenkey - create a key pair for amateurs.
gencert - for CAs to sign a public key of amateurs
chkcert - validate a amateur/CA certificate.

What is left to do is to write the docs, clean up
the code, port it to wintel32, create Trusted
QSL formats and test it well. The current size of
a cert which includes the public key is 358 bytes.
The size of a signedQSL is around 1k. This means
that more than a 1000 signed trusted QSL could be
stored on a single floppy. I think using a different
encode scheme we can get the size down to less than
300 bytes (current uses ascii hex encoding). I haven't
found the source to one yet, and haven't had time to
write it.

The process of using creating a TrustedQSL is:

1. qgenkey call-sign

2. Have a CA sign your public key
which is the certificate. This will prove that it was
you that signed the QSL

3. Then either a logging program or a free standing TrustedQSL
program will create a signed QSL which with the cert. can
be validated anywhere anytime.

Special servers can be set up as key servers which will
store certs and revoked cert list. Natural place for this
would be web sites like www.vqsl.com, www.qrz.com, www.eqsl.cc,
www.qsl.net, etc.

I have set up an area on www.sourceforge.net for trustedQSL.
This area will handle source code control, bug tracking, forums,
release management and many other things related to this project.
To find information on this project go to www.sourceforge.net
and do a search on trustedQSL and it will take you to the project
page.

I don't program in Microsoft C/C++ so I really need MS C++ programers
to help with this project.

I'm looking for an article published in QST in what I thought was the summer of 1998 to use a specific Radio Shack TV antenna for 2 meters. I built the antenna and it works just great, but have been asked to do a presentation at the local club, and can't find the original article. I've searched the QST technical data base for a title but haven't located the article. Anybody happen to remember the article and could let me know the month and year? Certainly would be helpful.

I kind of like the Full Body Shield Suit. It has STYLE! And it makes a bold fashion statement that is sure to attract the ladies. And to round it all off, I simply must have one of the EMF proof wallets (imagine flipping one of those babies open to impress the ladies when it comes time to pay for the dinner). Ah, the future is looking better all the time.

I am curious to know if the man-child KC8JBO retook the General Class Ham test. I wonder if he even wrote back to FCC about his lack of ability to read, write, or even think Amateur Radio theory and that he, / she?, may need to take the test using the Handicapped rules allowing him / she?, to have an interpreter for Amateur Radio terminology; also allowing him to have someone write the big words for him, and another person to send and receive the Morse code because his feeble brain cannot interpret anything other than foul language. (my apologies to the disabled community.) Keep us informed of the Ham radio status of this foul mouthed refugee from kindergarten.

The fact that KC8JBO posts through other servers shows that
KC8JBO would still post there even if COTSE's service didn't exist.

> By way of contrast, Stagger Lee made 39 total posts via all news servers
> and to all news groups during that same time interval.

Yeah, but you forgot to include a weight factor.
Multiply your posts by 2 because you don't know how to use a
kill filter and continue to feed the troll. Then multiply by 2
again because you yourself have taken posts originally posted only
to alt.2600 and cross-posted them to rec.radio.amateur.misc; which goes
to show that you're out trolling for attention. Multiply again by 2
because you're arguing in alt.2600 which is more likely to start
trolling your group now rather than sympathize with you getting
burned in a flamewar. Factoring these things in, you've managed
to be about 2.5 times as annoying as KC8JBO. Congratulations.

BWHAHAHAHAHAHAHAHAHAHAHAHAAHAHAHAHAHAHAHA!!! Nothing like RECENT news..
Let's see, a warning letter, my only one, "may" indicate an impermissible
activity ocurred, but by its nature is neither proof of the activity, nor
guarantee of the validity of the evidence, if any. You are an IDIOT.
Why didn't Riley ever get back to me about this "warning?" We'll se if your
illegally modified equipment stands the test of the FCC.

3928. Child molester Dick Elliot was busted last year for shoplifting Ham Radio Outlet

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-07 21:44:07 UTC
From: KC8JBO <kc8jbo@MailAndNews.com>
Message-ID: <3AA91A67@MailAndNews.com>
Source record: 92656

Career criminal "Dickhead Elliott" <elliotta@netusa1.net> babbled:

<Dickhead Elliot's too fucking stupid to know the truth, or even figure out what was going on>

I am curious to know if the W9FPJ took the Ham test. I wonder if he even passed it or just paid for it since his lack of ability to read, write, or even think and that Elliot's a he/she, may need to take the test since he bribed that VE to pass the test in the first place; also allowing him to have someone write the big words for him, since Dickhead paid for the High school diploma he currently has, he even had another person to send and receive the Morse code because his feeble brain cannot interpret anything other than 4th grade language. Elliot also stole that shitty equipment he operates, and runs way over legal limit. Keep me informed
of the Ham radio status of this fuckheaded refugee from the reform school and
state prison,W9FPJ.

In article <9861u8$aq0$0@dosa.alt.net>, SLee@houston-hunks.com says...
> posts for 19 day period of 17 Feb 2001 -> 7 Mar 2001, 1500 GMT
>
> Posts to r.r.a.m. which were made through COTSE: 89 (4.7 per day)
>
>
Yes, his posting rate has increased since your last complaint, at least you are not exaggerating this time.

However, there is no limit as to how much someone can participate in a group. The limit is on EMP and spam. If he posts the same post 20 times in a 45 day sliding window he will be terminated. He will not be terminated just for being a highly active participant in a news group. Unless he is running a garbage bot to flood the group, which he isn't.

As far as your complaints about his annoyance factor, there is an easy solution, it is called a kill file. I find both you and him childish and annoying, but it doesn't bother me. Why? I know how to use a kill file. Granted I have control over my actions, so my kill file is mental, but those who cannot control their actions and have to read the post can use a physical kill file.

You'll find that his annoyance factor for you will go way down if you add these two addresses to your kill file:

kc8jbo@cotse.com
kc8jbo-no-spam@cotse.com

It is that simple and your life will no longer be interrupted by his posts. Although because you focus so much time and energy on him, I have to believe you have to read his posts and you wait for him to post so you can respond. To me that says you want him posting to you.

Anyway, we'll kill his account rapidly if he violates any of our policies. read our policies, learn them, and notify us if you think you found a violation. If it is one, we'll terminate. Until then, I am going back to ignoring both of you two children. It really is easy, you should try it too.

Amen!!

>The foul language and
>disgusting
>> messages are a disgrace to the hobby.

I've never known hams to be this way. It is embarassing.

To my understanding:

the purpose of the group is to share info, knowledge and education and to
further the advancement of amateru radio as a hobby.

If this group has a moderator they seem to be on vacation.

I think people investigating amateur radio will be extremely turned off by this
newsgroup. I subscribe to 2 other ham newsgroups and they are just as bad. I
have even seen a couple of these (non ham) messages in the cooking group I am
in.

I think the only way to clean it up is for people to stop responding to them.
Its just like when someone operates inappropriately on the bands. Unless
someone wants to become a moderator, and force participants to behave
themselves, I think it will take a long time to change. I doubt anyone would
want to moderate these groups because of the sheer volume of messages.

Just my opinion.

Just one more comment on this. I know you believe we should terminate
his account just for being annoying and using bad language. If all
other isp's did that, so would we. But understand that if it worked
like this, even though we would term his account for it, you would also
lose your account for the same thing with your ISP.

At least he Chose the Roman form.
Surely a mature mind is one that is flexible enough to maximise the apparent
options and not permit a lifetimes dogma to stand in the way of a prudent
move.
No Doubt St. Peter has a sincerity sorter to hand.
Unlike a lie detector it does not work upon the lack of human response to
tenuous topics.
Remember that although the way into Heaven is by the narrow gate,
the key to entry is faith.

The reason that people use newsgroups to show their stupidity is because it is so easy to hide behind the keyboard. These poor foolish people have a low self-esteem of them selves, and very little formal education, if any at all.

I took others advice and used a "kill-file" and "killed" the childish posters off the newsgroup. If you do not know how to block those childish idiots heres how: Highlight the sender you want to block first. Then go to your tools, or help, button and look for a line that says block senders. For each sender you highlight press the block sender and you will not see them. Also be sure to block them from sending you their gibberish to your email. Now when I go to this news group it pleasureable to read things that help me in the ham hobby. W9FPJ

> provider, SuperNews, which specifically forbids the type of activity
> that cotse has allowed.

I guess that means I use a more restrictive usenet service than we run.
So? That means you can netcop me for saying "fuck" here, fire away.
What if I say "shit"? Is that obscene? If so, I guess you'll be
successful in netcopping me.

Have you looked around in some of the other groups regarding supernews?
There are calls to netcop lots of supernews people because of situations
like you have. Altopia is constantly on the list of people complaining
about it being to lax. Deja was complained about. Talkway was
complained about. Yahoo get's complained about. Roadrunner gets
complained about. All of these because they won't term accounts in a
flamewar, either. Stop in news.admin.net-abuse.usenet sometime. Check
out the real trolls, look at their headers. Then tell me their services
are more restrictive than we are.

Our ToS are stricter than any of the above mentioned places. In ours
you can't crosspost to more than 4 groups. With other services you can.
With ours you can't change the from line address, can't preload paths,
can't forge moderator approval, can't issue control messages, etc., you
can with many of the others. Our service is stricter than the one you
support when you pay them. You support a service that is far less
restrictive with their users than we are ours. Check around the net
about Altopia.

Our service is also one of the easiest to kill file on Usenet. If the
thread replies bother you try nfilter (www.nfilter.org), it will work
with nearly any windows news app and give you the ability to killfile
threads. If you run Unix you already have that ability.

Every single service that allows group communication between people will
be the source of intense fights, name-calling, arguments, etc. A person
cannot even get along with everyone in a gathering of 20 people, how do
you expect them to get along with 13 million? Ignore what you do not
want to see. There is no one forcing you to read every one of his
posts.

If he is libeling you, our service is not anon, subpoenas get our logs
in cases of libel, etc. You have the means to do something about libel.

> In fact, if I have been annoying, GOOD!

Have you ever looked at 2600? This is how I read it, I read about 15 posts that interest me, respond to a couple, Ctrl-a (select all in Gravity), Ctrl-k (mark them all read and purge them from my screen). You are not annoying in that sense of the word. What I meant was you are equal to him. It takes two or more to argue. Take yourself out of the equation if you really want it to end. One all by himself becomes the babbling idiot of the group which no one pays any attention.

For PSK-31, you need: audio from the rig, audio to the rig, and PTT. The REMOTE connector (7-pin DIN) on the back of the rig will give you access to the PTT and the audio out. The microphone connector on the front of the rig can give you access to the PTT and audio in. The headphone jack can give you access to audio out.

The TS-440 and TS-450 will let you access everything through the back of the rig, but for the TS-430 you have to use the microphone port. I think there was an article in QST last year about constructing a PSK-31 I/F that plugged in between the microphone and the microphone jack to let you select digital modes or the microphone.

The mic jack is certainly easier to wire than the 13-pin DIN used on the TS-440 and TS-450.

Good luck. PSK-31 is fun!

Ignoring this particular case, I think its a good idea that ISP's send a copy of abuse reports to the user concerned. It would stop a lot of malicious abuse reports and you'd also get to see who you had upset! :)

Roger, KC8JBO, and his daddy, Jesse Jackson, are under investigation by the IRS to determine whether or not Rev. Jackson has been illegally using tax-exempt monies to support his "love children". Roger, penniless, denies this.
Rumor is that the Rev. Jackson is supporting a "love child" of two years old and it is said that this same child is Roger Wiseman's step-sister. Same daddy, different mothers. Roger, when queried by the press, answered, "You $&&*)#$$^%@, @%$($$, choad, sucking #$()@%#@ uckers #^$$@Q^&% can #$*%)(my member.
Roger is now undergoing blood tests to be sure that he is not carrying Hepatitas A or the HIV virus.

Roger will, in all his vileness, vehemently refute this accusation. Watch for Roger to resort again to his typical descriptors such as "choad swallowers", "butt swallowers" and other vile and less than creative responses.
Living at home with Mommy makes him feel as though he is invulnerable.
What? Oh, that. OK, Roger. Mommy calls. Time to toddle off to bed now. You know how upset Mommy gets when you pick the lock on your sister's bedroom door!
Go to bed now, Rog. Mommy wants you to get up early so you can clean out the chicken coop tomorrow. Billy Bob is coming by for some fresh-laid eggs in the morning and since your daddy is in prison for the next 38 months you gotta help Mommy.
Remember what your Daddy said just before the Bulls took him away..."Take care of Mommy like I would."
Roger...he did NOT mean for you to have conjugal visits with her!

Highly unlikely since Roger is infertile due to inbreeding. Perhaps his
Collie did it?

Roger the Hot Dog Molester and purveyor of little boys has decided to
open a web page. The URL is soon to be available. Roger and Dimmy Dimwit are
co-creating this page, so more will be forthcoming in the near future.
Roger still claims that he had nothing to do with the abduction of that
sixteen year old cheerleader last week. That is his story.
The parents of the sixteen year old are looking for Roger...it remains
to be seen just why they want to "get" him.

3965. Who May This Be?

Newsgroup: rec.radio.amateur.misc

Garsh! Is this the very same Ham who puts on such a good face with his local Ham club? The same Ham who threatens little old ladies in their nursing home apartments? The same Ham whose car window had a brick tossed through cause he didn't pay a debt to a local CB'er?
The same Ham who'd rather buy a case of beer instead of getting a wheel bearing in his junker repaired?
Is this the same Ham who has never had a credit card? Same Ham who has no saving account? The same Ham who is a "war hero"? The same Ham who is an "Electrical Engineer?" A "Biomedical Specialist?" A Waste Removal Engineer would be more in keeping here.
Is this the same Ham who has two "Honorable Discharges?" (Good HP printers)
Is this the same Ham who said, "I killed before, and I might kill again?"
Is this the same Ham who bragged that he was tried for murder in 1991 and was released because of a hung jury?
We can't be talking about the same guy, can we? How stupid to make statements such as this.
Surely no two guys could be as stupid as what this one guy is supposed to have said and done.
Who would be so stupid? Who would be so ignorant? How about Dimmy Da Dimwit?
Stoopid is a stoopid does.

From: Liberator <Donnapigf@belchsouth.com>
Message-ID: <98a19u$1pq$0@pita.alt.net>
Source record: 92545

Story in the outback is that Dimmy Dimwit decided to not take a vacation this year. We are told that Dimmy and his stinky spouse cannot affort to travel, so they will instead stay home and let their minds wander.
Dimmy and Donna never gained a reputation for being overly intelligent, and the income the both of them garner are an indication of this.
See you dimwits later. Hope you can find a couple used tires to get you to the corner booze store.

Arselicks looked at his dog eating wife and retarded mongrel heinz 57 brat and whined the following :

> Crap from unemployed failure snipped.

I wish desparately for you and your third world family to try and obtain some knd of life. We know you are a failure. But why must you reinforce your failure and low self esteem with hundreds of juvenille whiny anon posts? Myself and the newsgroup would really appreciate it if you would grow testicles, come out from your pathetic world and do something. Come confront me in person, you sniveling little coward. Must you be a pathetic gutless wimp all of your life? Why is it when I knock on your door you run and hide? Both of us know. Because you are a failure, and a little coward with no self esteem. When your little Heinz 57 looks at you, he sees a coward. Both myself and the rest of this group are sick of your childish pathetic whining. Either take action or crawl back into your scared little life, you gutless anon failure nobody.

I love this NG!
It's a microcosim of the original .313 and 75 meters
Where else but in a ham radio newsgroup can
you fing a bunch of toothless tightwad old WASPs
posting with woids like "shi-hol-licker, reta-d, sewer
scum, c-m drink-ng, assh-le, crankshaft suc-ing, toilet
bowl polisher, penile enlargment (..that's a Freuidan
Slip!) and a number of other such fun uses of the
Anglo-Saxon/Indo-European language. Please DO keep
up the good work boys! I'm sure that c-cksuc-er ex-ham
on St Croix is jackin-off big time...

In closing here's a transcript from:

http://www.epic.org/free_speech/pacifica.txt

FEDERAL COMMUNICATIONS COMMISSION v. PACIFICA FOUNDATION ET AL.

No. 77-528 SUPREME COURT OF THE UNITED STATES

438 U.S. 726; 98 S. Ct. 3026; 1978 U.S. LEXIS 135; 57 L.
Ed. 2d 1073; 43 Rad. Reg. 2d (P & F) 493; 3 Media L. Rep. 2553
April 18, 19, 1978, Argued July 3, 1978, Decided

(ENJOY it you radio geek chimps !!!)

The following is a verbatim transcript of "Filthy Words"
prepared by the Federal Communications Commission.

Aruba-du, ruba-tu, ruba-tu. I was thinking about the curse
words and the swear words, the cuss words and the words that you
can't say, that you're not supposed to say all the time, ['cause]
words or people into words want to hear your words. Some guys
like to record your words and sell them back to you if they can,
(laughter) listen in on the telephone, write down what words you
say. A guy who used to be in Washington knew that his phone was
tapped, used to answer, Fuck Hoover, yes, go ahead. (laughter)
Okay, I was thinking one night about the words you couldn't say on
the public, ah, airwaves, um, the ones you definitely wouldn't
say, ever, [']cause I heard a lady say bitch one night on
television, and it was cool like she was talking about, you know,
ah, well, the bitch is the first one to notice that in the litter
Johnie right (murmur) Right. And, uh, bastard you can say, and
hell and damn so I have to figure out which ones you couldn't and
ever and it came down to seven but the list is open to amendment,
and in fact, has been changed, uh, by now, ha, a lot of people

pointed things out to me, and I noticed some myself. The original seven words were, shit, piss, fuck, cunt, cocksucker, motherfucker, and tits. Those are the ones that will curve your spine, grow hair on your hands and (laughter) maybe, even bring us, God help us, peace without honor (laughter) um, and a bourbon. (laughter) And now the first thing that we noticed was that word fuck was really repeated in there because the word motherfucker is a compound word and it's another form of the word fuck. (laughter) You want to be a purist it doesn't really -- it can't be on the list of basic words. Also, cocksucker is a compound word and neither half of that is really dirty. The word -- the half sucker that's merely suggestive (laughter) and the word cock is a half-way dirty word, 50% dirty -- dirty half the time, depending on what you mean by it. (laughter) Uh, remember when you first heard it, like in 6th grade, you used to giggle. And the cock crowed three times, heh (laughter) the cock -- three times. It's in the Bible, cock in the Bible. (laughter) And the first time you heard about a cock-fight, remember -- What? Huh? naw. It ain't that, are you stupid? man. (laughter, clapping) It's chickens, you know, (laughter) Then you have the four letter words from the old Anglo-Saxon fame. Uh, shit and fuck. The word shit, uh, is an interesting kind of word in that the middle class has never really accepted it and approved it. They use it like, crazy but it's not really okay. It's still a rude, dirty, old kind of gushy word. (laughter) They don't like that, but they say it, like, they say it like, a lady now in a middle-class home, you'll hear most of the time she says it as an expletive, you know, it's out of her mouth before she knows. She says, Oh shit oh shit, (laughter) oh shit. If she drops something, Oh, the shit hurt the broccoli. Shit. Thank you. (footsteps fading away) (papers ruffling)

Read it! (from audience)

Shit! (laughter) I won the Grammy, man, for the comedy album. Isn't that groovy? (clapping, whistling) (murmur) That's true. Thank you. Thank you man. Yeah. (murmur) (continuous clapping) Thank you man. Thank you. Thank you very much, man. Thank, no, (end of continuous clapping) for that and for the Grammy, man, [']cause (laughter) that's based on people liking it man, yeh, that's ah, that's okay man. (laughter) Let's let that go, man. I got my Grammy. I can let my hair hang down now, shit. (laughter) Ha! So! Now the word shit is okay for the man. At work you can say it like crazy. Mostly figuratively, Get that shit out of here, will ya? I don't want to see that shit anymore. I can't cut that shit, buddy. I've had that shit up to here. I think you're full of shit myself. (laughter) He don't know shit from Shinola. (laughter) you know that? (laughter) Always wondered how theShinola people feel about that (laughter) Hi, I'm the new man from Shinola. (laughter) Hi, how are ya? Nice to see ya. (laughter) How are ya? (laughter) Boy, I don't know whether to

shit or wind my watch. (laughter) Guess, I'll shit on my watch. (laughter) Oh, the shit is going to hit de fan. (laughter) Built like a brick shit-house. (laughter) Up, he's up shit's creek. (laughter) He's had it. (laughter) He hit me, I'm sorry. (laughter) Hot shit, holy shit, tough shit, eat shit, (laughter) shit-eating grin. Uh, whoever thought of that was ill. (murmur laughter) He had a shit-eating grin! He had a what? (laughter) Shit on a stick. (laughter) Shit in a handbag. I always like that. He ain't worth shit in a handbag. (laughter) Shitty. He acted real shitty. (laughter) You know what I mean? (laughter) I got the money back, but a real shitty attitude. Heh, he had a shit-fit. (laughter) Wow! Shit-fit. Whew! Glad I wasn't there. (murmur, laughter) All the animals -- Bull shit, horse shit, cow shit, rat shit, bat shit. (laughter) First time I heard bat shit, I really came apart. A guy in Oklahoma, Boggs, said it, man. Aw! Bat shit. (laughter) Vera reminded me of that last night, ah (murmur). Snake shit, slicker than owl shit. (laughter) Get your shit together. Shit or get off the pot. (laughter) I got a shit-load full of them. (laughter) I got a shit-pot full, all right. Shit-head, shit-heel, shit in your heart, shit for brains, (laughter) shit-face, heh (laughter) I always try to think how that could have originated; the first guy that said that. Somebody got drunk and fell in some shit, you know. (laughter) Hey, I'm shit-face. (laughter) Shitface, today. (laughter) Anyway, enough of that shit. (laughter) The big one, the word fuck that's the one that hangs them up the most. [']Cause in a lot of cases that's the very act that hangs them up the most. So, it's natural that the word would, uh, have the same effect. It's a great word, fuck, nice word, easy word, cute word, kind of. Easy word to say. One syllable, short u. (laughter) Fuck. (Murmur) You know, it's easy. Starts with a nice soft sound fuh ends with a kuh. Right? (laughter) A little something for everyone. Fuck (laughter) Good word. Kind of a proud word, too. Who are you? I am FUCK. (laughter) FUCK OF THE MOUNTAIN. (laughter) Tune in again next week to FUCK OF THE MOUNTAIN. (laughter) It's an interesting word too, [']cause it's got a double kind of a life -- personality -- dual, you know, whatever the right phrase is. It leads a double life, the word fuck. First of all, it means, sometimes, most of the time, fuck. What does it mean? It means to make love. Right? We're going to make love, yeh, we're going to fuck, yeh, we're going to fuck, yeh, we're going to make love. (laughter) we're really going to fuck, yeah, we're going to make love. Right? And it also means the beginning of life, it's the act that begins life, so there's the word hanging around with words like love, and life, and yet on the other hand, it's also a word that we really use to hurt each other with, man. It's a heavy. It's one that you have toward the end of the argument. (laughter) Right? (laughter) You finally can't make out. Oh, fuck you man. I said, fuck you. (laughter, murmur) Stupid fuck. (laughter) Fuck you and everybody that looks like

you. (laughter) man. It would be nice to change the movies that we already have and substitute the word fuck for the word kill, wherever we could, and some of those movie cliches would change a little bit. Madfuckers still on the loose. Stop me before I fuck again. Fuck the ump, fuck the ump, fuck the ump, fuck the ump, fuck the ump. Easy on the clutch Bill, you'll fuck that engine again. (laughter) The other shit one was, I don't give a shit. Like it's worth something, you know? (laughter) I don't give a shit. Hey, well, I don't take no shit, (laughter) you know what I mean? You know why I don't take no shit? (laughter)) [']Cause I don't give a shit. (laughter) If I give a shit, I would have to pack shit. (laughter) But I don't pack no shit cause I don't give a shit. (laughter) You wouldn't shit me, would you? (laughter) That's a joke when you're a kid with a worm looking out the bird's ass. You wouldn't shit me, would you? (laughter) It's an eight-year-old joke but a good one. (laughter) The additions to the list. I found three more words that had to be put on the list of words you could never say on television, and they were fart, turd and twat, those three. (laughter) Fart, we talked about, it's harmless It's like tits, it's a cutie word, no problem. Turd, you can't say but who wants to, you know? (laughter) The subject never comes up on the panel so I'm not worried about that one. Now the word twat is an interesting word. Twat! Yeh, right in the twat. (laughter) Twat is an interesting word because it's the only one I know of, the only slang word applying to the, a part of the sexual anatomy that doesn't have another meaning to it. Like, ah, snatch, box and pussy all have other meanings, man. Even in a Walt Disney movie, you can say, We're going to snatch that pussy and put him in a box and bring him on the airplane. (murmur, laughter) Everybody loves it. The twat stands alone, man, as it should. And two-way words. Ah, ass is okay providing you're riding into town on a religious feast day. (laughter) You can't say, up your ass. (laughter) You can say, stuff it! (murmur) There are certain things you can say its weird but you can just come so close. Before I cut, I, uh, want to, ah, thank you for listening to my words, man, fellow, uh space travelers. Thank you man for tonight and thank you also. (clapping whistling)

(from George Carlin's "The Seven Words" Carlin is a GENIUS fer sure dude)

Message-ID: <3AA8F860.4906B280@ix.netcom.com>
Source record: 92558

Anyone have further info on this possible origin of Elmer ??
ORIGIN OF ELMER
Not many reports on this but had a report that early Army rifle
instructors were called "Elmers".

From Ken And Mary
I believe that the term "Elmer" is a fairly new one. It has only been
widely used for perhaps the last twenty years. I recall reading of it's
origin in QST or other ham magazine sometime no earlier than the late
'70s. It refers to a specific ham whose first name was Elmer, who was a
mentor of novices in a ham club somewhere in the USA.

More origins such as:
Origin of Ham Origin of CQ Origin Of 73 Origin Of Q, R, X and
Z Codes
Origin Of BoatAnchor Origin Of Roger Wilco Origin Of 33
Origin Of MAYDAY Origin Of SOS Origin of PAN PAN
Origin Of DE Origin Of Fist Origin Of DX Origin Of ProSigns

I wonder why no-one from America comments on this extremely
childish individual?
Is it because such behaviour is typical of the American Ham and
so does not raise any eyebrows?

Judging by the example set by CBers in this NG,
is "KC8JBO" an example of an American CB licence?
(The childish and abusive manner would suggest so)

Do you even know the meaning of, "73"? I doubt it.

I wonder why nobody from the States comments upon the
poor public relations for Ham Radio that the infantile mind
of KC8JBO emanates? Can it be that they've tired of his
attention seeking RVMJ and ignore him?

Or can it be that this is typical of the unacceptable face of
Ham Radio in the States such that it raises no complaints?

Can it be that we have accidentally revealed to him a
different source of "Parents" to respond to his "Child".
(As written by Thomas A Harris in "Transactional Analysis"
long before he penned "The Silence Of The Lambs")

There was a recent case of an American Ham having his
licence revoked because his anti-social behaviour rendered
him an unsuitable candidate. If appeals to cotse.com fail, perhaps
we could appeal to the FCC, citing the international public
face of Ham Radio in the States that KC8JBO presents?

No it is definitely an amateur licensee (or, as the other G8ASO might
suggest, an amateur callsign).

> There was a recent case of an American Ham having his

Only one problem there OM.

The FCC could come back and quote the example of a British amateur, one
who says the Head of State of the UK "squits bits of shits"...

I wonder what sort of impression that gives to foreign amateurs.

No problem with that at all - but try to get your citation correct....

"In Short, Politics!"

Monarchy is heinous
'Cos the queen has an anus.
She sits and squits
Brown bits of shits.

So, astuteness that monarchy is a big con, a dream world
of no value to the future of humanity, much like masturbating,
and that the monarch is equal in every human function to any other
person is undesirable? Get real!

Let's spend our lives furthering our own well-being and not
by being enslaved to The Great Parasite Of Windsor!

I bet you enjoyed Olly Read in "The Devils", selling all those indulgences.
I think the conversation at the mass grave side of the plague victims was a classic.

A great pity that men have so wrecked what should have been a blue print for a useful and moral life.

Some years ago we (the people of Newbury) re-enacted the burning of three men for failing to go to Church during Mary's reign.
As part of the general atmosphere a medieval fair was held,
At that fair was a monk / travelling brother that was raising money to support the staging of the play by selling indulgences. He had done his homework and was very convincing. I really got the sort of feeling that those poor peasants must have experienced in the presence of such a strong personality.

I think that it would cost some of us quite a few bob to get our sins absolved.
As a side line he was doing a nice line in relics, Christ's Finger nails, etc.

The second part of the play was held in the church where the original trial had taken place. The words were taken directly from the records held in Winchester and the British Museum.
At the beginning of the week, the editor of the local rag had slated the production, but he was seen sat in the front pews of the church wiping his eyes.
By the end of the week the tickets were only available on the black market and celebrities from London were glad to get tickets.

The ethos of the old church that relied upon the ignorance and superstition of the people was well demonstrated.

It bore absolutely no resemblance to the modern democratic church that now practices in that same historic building.
Certainly made me think though, and whose to say that Malcolm was wrong?
So far nobody has come back with any evidence to support either contention.

Perhaps that's the next step for Ham Radio: Psychic Communication;
but that'd only lead to "my crystal ball is better than yours" type
arguments.

The Anus, appropriately enough, wrote (in part)

>squits Brown bits of shits.

This is an unremarkable statement of the obvious.

Prisoners-of-war in Korea, in the prison camps along the Yalu, were subjected to harsh conditions of climate, political indoctrination, and poor diet (fourteen peanuts a day and a dollop of sorghum), and many felt like giving up, which meant dying. It was reckoned that, once a prisoner got "give-up-itis", he would be dead in three days. The Americans, by and large, had a policy of "each man for himself", and died in their thousands. The other nationalities had a "buddy program", whereby when a potential case of give-up-itis arose, the prisoner concerned would be assigned two "buddies" to look after him, however little they had to offer. Survival rates were impressive. The soldier suffering from incipient give-up-itis would be encouraged to eat with the admonition "If you don't eat, you don't shit. If you don't shit, you die. So eat!"

After the prisoners came home, the Americans had to have an enquiry into the poor performance of their prisoners, and many books were written.

HTH The Anus to come to terms with the importance but ordinariousness of shitting. But I doubt if it wll.

Or perhaps it's someone's idea of a very bad joke - cf. Elmer Fudd (or vice-versa). Aren't most amateur operators male and over 55? (Oh! You mean they're not.....)

Technically, "ham" is a derrogatory term - why not "elmer?"

There is also a surname of Elmer. I don't know the derrivation of the English Elmers, but the Swiss Elmers are from a town called Elm - and so is the elm tree.

GLENDALE, WV: The FCC requested July 11, 2000, that Roger L. Wiseman, KC8JBO, retake the General examination elements under the supervision of an ARRL-VEC volunteer examiner team. Wiseman must appear for retesting by September 11, 2000, or his license will be canceled. Applicants appearing for re-examination are granted an Amateur Radio license consistent with the elements passed. The FCC had written Wiseman on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" between Wiseman and another licensee that included allegations of interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two licensees to contact him to discuss the matter. Additionally, the FCC had sent Wiseman a Warning Notice last November in response to allegations of deliberate and malicious interference on 20 meters.

Dearest Al. You are no cop. Maybe a wanna be. As for a threat; What threat. Sure I would like to visit you. I am retired and the weather is getting better for traveling and exploring. We can trade barbs, have a cup of coffee, a coke, or tea. I never threatened you. Boy are you paranoid! Hey if you are a cop, pray tell, lets have a badge number, city, town, or crossing guard station. Please let me know. As for the NCIC you or anybody else will not find any thing except my name if even that. Signal 80! If you know what that means. You might be better at being an ass than I am. But thank you for equating me with a mule. Mules are incredibly intelligent, very loyal, and know when to kick ass. You just prove my first post in this string. Most people like you are cowards. I bet you are not even an amateur radio operator unless F. A. is not your real first and middle initials? A recent check of the FCC Amateur Radio Data Base turned up no F. A. Stafford. Who knows about wacko keyboard cowards anyway. For all we know you may be a frustrated pregnant English teacher that hates men. Hey you might be the one listed in NCIC (National Criminal Information Center), INHDB, SHOWCAP, or how about America's most wanted. You poor excuse for a fruit cake. What don't you just signal 9.

Ole Roger Wiseassman was trying to jam himself and the neighbors dog saw him
and went into a jealous fit. When the neighbors dog owner came out to see
what the fuss was all about he saw the "jamming" going on next door and
reported it to the FCC.

4000. Oris Jammed on 3901

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-10 02:41:00 UTC
From: "Public <Anonymous_Account>" <remailer@anon.xg.nu>
Message-ID: <123681f15a71cc3d1435055e9da70920@anon.xg.nu>
Source record: 92579

A call to the Laurel, Maryland, High Frequency Direction Finding
facility last night by a quick thinking SWL resulted in a batch of
electronic data being instantaneously collected on a station jamming
Oris and another station he was in qso with last night on 3901 khz.
The noose tightens ever more around Hiram, Georgia.

This message did not originate from the Sender address above.
It was posted with the use of anonymizing software at

I have a great background in the law and learned quite a bit about it just a few years ago. I went to a state run technical school that just not everybody can get into since it takes the recommendation of a Judge to even get you through the doors! Of course, Mike Deaver helped and deserves some of the credit but most of the credit goes to me.
The cool web site for this school is http://www.dcor.state.ga.us/OffenderQuery/asp/OffenderQueryForm.asp and when you get there, enter my student ID number (inmate) 315598 in the form to get all the information on how well I did.

It's not clear what your question refers to. The term "Elmer" certainly does not date from the late seventies. The term was around in the early seventies when I started reading about ham radio, and it was definitely old at that point. If anything, it's a term that seems to have gone out of favor as time goes by.

Roger will be attending the Glendale United Methodist Church services this Sunday to confess his sins and pray for forgiveness. Rog admits to renting XXX videos from the Village Video store in such great quantities that he has actually worn out a couple of them. Roger asks for your understanding and hopes you will pray for his full recovery.
If you wish to offer a few words of encouragement to Roger, please call him at 1-304-845-0109. He will enjoy your input and would love to hear from you.

4006. For The Record

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-10 09:00:14 UTC
From: N9PGE <Nobody@nowhere.orl>
Message-ID: <98cqbk$k68$0@pita.alt.net>
Source record: 92485

For the record, I , N9PGE will make a short statement.
I have had many, many problems with malicious jamming aimed at me on the HF bands. I have had to put up with 'spam' coming in on email more times than can be counted.
I have had late night telephone calls that resulted in the other party hanging up. These calls went on for months. I finally had to tell the phone company to put a call block in place.
I have had 'anonymous' magazine subscriptions sent to me on a regular basis.

Why is this relevant? Actually it is not.

I just want to warn others who fall into disfavor with W4AMP that these same problems could happen to you. Do I accuse AMP of being vindictive? Yeah..he is vindictive. He is very much off balance. Would he call you in the middle of the night from a pay phone booth? Only if he has thirty five cents!
Is this man a good Ham as he seems to portray? NO!
In the future I will post any and all email spam I get from this source. I will include Dimmy's veiled threats and post them word for word, complete with headers.
Dimmy...now we can dance.

4008. FS: Rubber "doughnut" for Drake (behind tuning knob skirt)

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-10 11:55:38 UTC
From: Neil <DontDoIt@ImNotHere.com>
Message-ID: <dd5kat87p9m5b8kv9sg2hnov9fev1frm6u@4ax.com>
Source record: 92487
Cross-posted to:
rec.radio.amateur.boatanchors,rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap

Has the little rubber "doughnut" behind the tuning knob/skirt on your TR-7 (or R7/RV-7/RV-75) gotten all dried up and stiff? If your radio is like most of them, unless this doughnut has been replaced recently it now looks like it's been "baked" and doesn't function very well (it needs to be supple and rubbery for the zero-adjustment to work/feel right).

I have the perfect replacement part, brand new. It's made of the same material as the factory unit, same dimensions, and works great. I even wrote up clear, step-by-step illustrated instructions showing how to do the job, with pointers on what to avoid.

To get your doughnut and instructions, send $2 to:

Neil Rosenberg, K1VY
60 Plain Road
Hollis, NH 03049

If you want 2 or more they're $1.50 each, shipped.

Satisfaction guaranteed, of course. By the way, they also work great on 4-line gear!

Email to K1VY@arrl.net or call (603) 465-2788

Thanks!

This guy used the U.S. Mail to harass me a while back. While the U.S. Postal Inspection Service was not all the eager to go after him, they were very helpful in explaning to me how to preserve the evidence and develop more information as to who actually sent the mail. They explaned how to preserve and develop the evidence in such a way that it would be acceptable in a court of law. I also paid for a test they recommended on the paper, envelopes, and stamps he used. This info will stand up in court. BTW, who is the former FCC agent that this guy is known to have been harassing, threatening, and stalking the guy's family for a number of years?

I heard the DF pinned it along the NC / Va border.
One good thing, in general all of these 75 Meter jammers are at home
behind a microphone at night instead of out on the
roadway drunk behind the wheel at 11:00 PM. Look at it that way.
Thank goodness for small blessings

I own two RLC3s...yes they do come out with updates...based on owner's request and cleaning some problem...but Steve and Allan have a great product line....Be aware the RLC 4 does NOT do multi-tone generation..(like dialtone, etc) it only does a single tone at a time...in case you wanted a CT that sounded like dialtone

There are also 2 list servers for the Linkcomm products and one for the SCOM..(the 2nd Linkcomm server is not run by Linkcomm and is not moderated)

If you are looking for multiple links, look at the RLC 2 or wait for the new board for the RLC Club that will make it a 4 or 5 port controller...less than $1000 total. You could buy a Club now and add their new expansion board later (the Deluxe board currently available only adds one more port)

4028. Mike's Package Store Says "No More."

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-11 05:55:03 UTC
From: Plubius <Truth@DemsCheat.votes>
Message-ID: <98f3ro$7gm$0@pita.alt.net>
Source record: 92506

Mike's Package Store in Hiram, Georgia went on record this afternoon and stated that they will no longer be showing the adult-rated movie that has proven so popular these last three weeks.
Mike's spokespersons claimed that attendance has dropped off drastically and that they could no longer handle the class of people who were showing up. This reporter was told that many of the attendees had to call tow trucks or other service people because their old, tattered vehicles would not start when they left the movie to return home. It was also learned that many of the customers became ill after watching the "Georgia Peach" perform and had to use more than one of the allocated "barf bags". Mike also hinted that he suspected the attendees were there mostly for the free popcorn instead of the movie.
Neighbors also became concerned when customers, many having no teeth, were seen urinating in the bushes behind the business.
Future showings of this classic movie may be scheduled to be shown at an address on Hiram-Sudie Road, and details are still being worked out.
Stay tuned for further developments.

4029. Kenwood TS 2000 info needed

I left CB radio 19 years ago when I got my novice ticket. It felt good communicating with people that knew what they were doing and were proud of their accomplishments in getting licensed. Over the past year things have gotten shitty on the bands and operators are stupid. It sounds just like the CB I left 20 years ago except that the rig's readout is showing a ham frequency. To bad there isn't a better radio service I can go to now that the bands are full of idiots. Thanks FCC, Thanks ARRL, I'm back to 11 meters in the middle of a ham band.

4031. Dimmy Da Dimwit Will Return

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-11 08:04:41 UTC
From: POTUS <Truth@DemsCheat.votes>
Message-ID: <98fbeo$pd0$0@pita.alt.net>
Source record: 92510

Dimmy Da Dimwit, close relative of Suzy Da Pig and butt buddy of Roger Wiseman, plans to return to this news group immediately after he sobers up. Dimmy is not available for comment this morning as he spent the night consuming a case of Old Milwaukee beer and quaffing a quart of cheap wine. Dimmy will awaken some time around noon tomorrow, eat a couple aspirin and try to clear his foggy, alcohol sopped head. He will then get busy sending spam to his "enemies" and researching other means of nefarious retaliation. Sending magazine subscriptions are out since so many folks are wise to this high school scam and Dimmy knows that postal authorities are zeroing in on him.

Late night phone calls are out, too. Dimmy knows that he is being closely watched and he is aware that he could be caught. Authorities are also aware that many of the late night calls originated from a pay phone very near his trashy abode.

Dimmy's schedule for the coming week is as follows:

Sunday: Get up at noon. Eat a Tylenol for the headache. Drink booze at 4:00 p.m.

Monday: Get up at noon. Eat another Tylenol. Send wife out for booze.

Tuesday: Get up at noon. Get on the CB. Drink Old Milwaukee. Send the wife out for booze.

Wednesday: Get up at noon. Dodge the landlord. Send wife out for booze.

Thursday: Get up at noon. Hear sirens coming..go hide. Drink Old Milwaukee.

Friday: Get up at noon. Get the wife's pay check. Go to liquor store.

Saturday: Repeat all of the above.

And there ya have it folks! A week in the life of this hapless, hopeless Ham!

Sure you did. The fact that you posted this message to nine newsgroups, used a fake identification, and made numerious false statements about ham radio, clearly shows this as an attempt to stir up trouble instead of voicing an honest complaint. If you want to stir up trouble, try not being so transparent next time. Until then, you rate less than a one on the old troll-o-meter.

Hey Fellow Amateurs...
Do you have a Senior family member or disabled person that wants to
LIVE AT HOME and NOT an expensive resthome???

Do you have a friend, spouse or loved one who live's at home alone
and wants both SECURITY and MEDICAL monitoring FREE OF CHARGE?

Peterson & Associates has aquired about 100 of the long sought after,
NO MONTHLY fee, WIRELESS Pendant, emergency Console systems!
These sell RIGHT NOW through Retirement Groups nationally for 199.95

See our web ad.... www.ratestuff.net/medical.html -they sell there
for 69.95

Read on to get yours through our Ham Radio sales outlet-dealer in
Salt Lake City, Utah for 59.95, plus shipping and any taxes
applicable.

These are Complete Security and Emergency Medical HELP Dialer -
Console
systems that consist of a 100' Wireless Pendant that a Senior or
disabled
person can carry around the House. These are GREAT for Parents, the
Elderly or anyone that wants to stay at home, giving family members
a peace of mind. These are provided to monitor an alert Friends and
Families
through an emergency dialing system, witout ANY MONTHLY MONITORING
FEES, EVER!!

These are like the "HELP I"VE FALLEN and can't get up BUTTONS"
advertised
with 30.00 per month monitoring fees, these units can be programmed
easily with up to THREE Family members telephone numbers, or even 911
or Police where accepted.

Once the panic button is pressed, the console dials out and delivers a
pre-recorded emergency message to your loved ones.

These UNITS are for sale to Ham Radio Families and their friends for
a special NET price of $59.95, plus tax & shipping.
VISA, Mastercard and ATM cards now accepted!!

Just ask Bob for the special price on the PANIC DIALER's

COMMUNICATIONS PRODUCTS

4046. Re: how many mobile antennas?

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-11 18:53:18 UTC
From: Jerry Oxendine <joxendi@bellsouth.net>
Message-ID: <3AABC99E.1F6C@bellsouth.net>
Source record: 92525
Cross-posted to: alt.radio.scanner,rec.radio.scanner,rec.radio.amateur.misc

I have 3 (counting the AM/FM). There are only 2 comm. antennas: one is a homebrew 3" screwdriver, the other is a dual-band 2M/440. Incidentally, I, too, used to have an "antenna farm" and a car full of various ham and military-type rigs. But as the technology advanced, I was able to reduce the number of antennas--much to my satifaction. Finally, with the advent of the IC 706 series, I eliminated a scanner, a 6M rig, a CB, and another separate 440 radio. So now I have ONE radio and 2 antennas. I don't talk on CB (I just listen for traffics snarls), and I discovered by accident that the screwdriver would work 6M (harmonically).

About 25-28 years ago, there was a surplus dealer in Charlotte, NC that stockpiled hundreds of military VHF antennas. They had a small black coil at the bottom and were, supposedly 5/8 wavelength. The whip was OD green and slid up and down within a locking ring. The top of the whip (stinger) was flexible. There were markings on the bottom portion that indicated the frequencies between about 130-170 MHZ. Perhaps some of the readers have seen these. I substituted a steel whip for the original mast/stinger, and it makes for a low profile VHF/UHF antenna. I never had any instructions for these antennas, so I assumed it was strictly for VHF, and I used it this way for many years. (I bought a bunch of them in the late 70s and sold them at hamfests. Original price was $5.00 from the surplus dealer). Recently, I changed the radio out of an old vehicle and into a '93 Lumina. While setting up the antenna, figuring to remove the Larsen dual band from the old car, I discovered that that military antenna worked VERY well on UHF! How nice!

I never was "too" crazy about having bunches of antennas on my cars, but I always operate under the premise that if I *HAVE* to have an antenna to do a certain job, then so be it. I have friends that seem to get a kick out of having many antennas on their cars. One guy I know, really nice guy even tho the general public regards most people with lotsa antennas as "weird", has 7 various and sundry antennas strung across the back of his Olds. The odd thing is, *some* of them are duplicates. For example, he has 3, yes 3, scanners that cover the same bands/ranges and 3 antennas to go with them. He has 2 CB radios and 2 antennas (??????). There are 2 2M rigs and 2 antennas for those---and so on. I'm not criticizing him, but I cannot fathom his reasoning for it, either. Is it *really* needed, or is he just "showing" off? Diff'rent strokes.....

Then you need to get a new meter. His meter detected a troll, period. Don't you think that something as dumb as a meter would register a 10 on, as you say, something as transparent as "ARRL's" post? Also, try using your spell check. When a person flames another but in the process misspells a simple word as "generous", they tend to lose all credibility.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, N2OO, WN3VAW, W3UR & The Daily DX, N4AA & QRZ DX, K5TT, W5PF, K8YSE, K9LSB, NE8Z, CT1ETE, CX3AL, DL1EK & DX News Letter, DL3APO, F5NQL, F6AJA & Les Novelles DX, G3SXW, GW0ANA, HK3JJH, JA3MZB, LU8ADX, LX2AJ, ON4ALW, PA3BIZ, PA9KT, PY1NEZ, YB5QZ and ZL1AMO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4/Mar, through Sunday, 11/Mar there were 234 countries active. Countries available: 1S, 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4U1U, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BV9P, BY, C3, C5, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, SU, SV, SV5, SV9, T32, T7, T8, T9, TA, TF, TG, TI, TI9, TK, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, VE, VK, VK9L, VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZK2, ZK3, ZL, ZL7, ZP, and ZS

PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3C5, EQUATORIAL GUINEA (Correction). Alan's, 3C5I (not 3C5A as reported in OPDX.501), 6 meter beacon is still up and active on 50096 kHz. Alan

was heard this past weekend on 50110 kHz around 2130z calling CQ. He will leave here in April.

3G, EASTER ISLAND. The 3G0Y group continues to be very active on all bands and modes. Look for them to go QTH on March 19th. QSL via DK7YY.

3W, VIETNAM. YL operator Aya, 3W2QAQ, was heard active on 21040 kHz at 0015z and on 7013 kHz at 1420z. Also heard was 3W2NY on 21245 between 0430 and 0530z. QSL via JH1MZG. Hans, 3W2LWS, continues to be very active on 15/20/40 meters CW between 1900 and 0130z. QSL via WA1LWS.

5U, NIGER. The activity by the Italian group signing 5U2K and 5U3T should be QRT (March 12th) by the time you read this.

9M0, SPRATLY. The 9M0M group may have gone QRT. There were no QSNs reported over the past weekend. Last spot was on March 9th. QSL via K7XN.

A4, OMAN. Chris, A45XR, has been playing on RTTY a lot on 40/20/15/10 meters during various times throughout the day. Check around 80 kHz from the band edge. QSL via P.O.B 2038, CPO 111 Oman.

BQ9, PRATAS ISLAND. The BQ9P group continues to be very active until March 15th. QSL via KU9C.

H40, TEMOTU PROVINCE (Just One More). Well known DXer Ron Wright, ZL1AMO, who usually travels/activates many locations in Pacific, informs OPDX that he will be activating the Temotu Province (OC-065). He expects to begin operations about March 21st for 3 weeks. His callsign most likely will be H40RW. H40 is ranked near 48 on the most wanted list. He will be on CW/SSB/RTTY with various antennas, but no amp. Ron states that his linear is too heavy to carry. His liasion during the operation is via Dick, N6FF, E-mail address: n6ff@tco.net
The QSL will be a special color card as this will probably be "his last DXpedition". Ron would like to encourage everyone to QSL direct to ZL1AMO CallBook address.

HK0, MALPELO ISLAND (Update). Pedro, HK3JJH, informed OPDX this week that some friends in Japan sent him a new transceiver, an Icom IC-706. He reported that he will make a two day trip to Bahia Malaga to ship the equipment to Malpelo on March 6th. He states now that his next start (heading for Malpelo) will be April 6th where he will be active for a month. Pedro will be active only on SSB on all the bands from 80-6 meters in the DX windows +/- or the IOTA frequencies. It was reported this past week that Carl, N4AA, editor of "QRZ DX", will be Pedro's QSL Manager. Also, Carl is collecting donations for Pedro's operation. Please make checks/money orders payable to "CARL SMITH", and put a notation on the check that it is for HK0M. Send it to: Carl Smith, POB 249, Leicester, NC 28748-0279 USA

IOTA NEWS.....
AS-NEW. Look for BV9O to be active from Lan-Yu Island from March 15-19th. An IOTA number has not been assigned yet and is usually assigned during the operation. QSL via BV8BC.

AS-056. (Change in plans) Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island), April 10-20th (March 21-30th was cancelled). This is not a DXpedition, and he will only be active in his spare time. Activity will be on 40 meters, and 14260 or 21260 +/- 10kHz. QSL only via the Bureau.

EU-064. Jean Marc, F5SGI, will be active from Yep Island (lles de la France Metropolitaine Award AT-021) as F5SGI/p from April 14-21st (instead of the 26th). Activity will be mainly on CW on all HF bands. QSL via F5SGI, direct or via REF French National Bureau.

EU-038. Once again the UBA section "NOK" will travel to Texel Island to take part in the 2001 IOTA Contest. During the last 2 years they were active using the callsign PA6TEX, but this year they are trying to apply for a shorter callsign and special prefix (PF,PC,PG), which they hope will satisfy prefix and IOTA hunters. As soon as they can, they will inform us of the callsign. Activity will be before and during the contest on all bands/modes. QSL via ON4ALW: Ronald "Ron" Van Aken, Kapelstraat 5, 2330 Merksplas, Belgium (or via UBA Bureau). Please do not send QSLs via the DUTCH QSL Bureau!!!

EU-091. The "Salento DX Team" from Lecce was expected to be active from the Island of Treviso (I.I.A. BR-006 - WW.LOC. JN80XP) over the past week. Stations expected to be active were: IK7JWX/7, IK7FPX/7, IK7LMX/7, IK7QMJ/7 and IZ7CTE/7. QSL via their home callsigns.

OC-NEW. Operators YC6LAY, YB6LYS, YC6JKV and YC6PLG will all sign homecall/P and activate Mursala Island (in the Sumatra's Coastal Island North Group) during March 15-17th. Activity will be on 21260 kHz and 14260 +/- 10 kHz and operations will be on SSB only. QSL via YC6LAY.

SA-077. A group of Brazilians will activate Franceses Island in the Santana Archipelago, which is located at the opposite side of the city of Macae in the east coast of the State of Rio de Janeiro from March 29th through April 1st, 2001. Operation will be around the clock on CW/SSB on 80-10 meters including the WARC bands, depending on propagation. Look for callsigns/ operators: PU1NEZ/p (Carl), PY1LVF/p (Zeca), PY1NEW/p (Pete) and PY1NEZ/p (Lima). Suggested frequencies (+/- 10 kHz):
CW - 3530, 7030, 10115, 14040, 18098, 21040, 24920 and 28040
SSB - 3755, 7055, 14260, 18128, 21260, 24950 and 28460 kHz
QSL via their homecall or through the Bureau. Please feel free to contact them either through their E-mails or mailing addresses:
PU1NEZ - Carlos Guilherme Correa, 9/306 Presidente Backer, 24220-045 Niteroi, RJ - Brazil
E-mail: pu1nez@bol.com.br
PY1LVF - Jose Luiz Vieira Fernandes, P. O. Box 18009, 20722-970 Rio de Janeiro, RJ - Brazil

E-mail: < py1lvf@cxpostal.com >
PY1NEW - Emanuel Tavares Filho, P. O. Box 100659,
24001-970 Niteroi, RJ - Brazil,
E-mail: < py1new@interclub.com.br >
PY1NEZ - Rogaciano Lima C. Filho, 91/1101 Belizario Augusto,
24230-200 Niteroi, RJ - Brazil
E-mail: < py1nez@interclub.com.br >

J3, GRENADA (Update). Paul, W5PF, wants to remind everyone that he and Dee, W2HEO, will be active here March 30th through April 11th. Operations will be on 40-10 meters, CW/SSB. Special attention will be given to the WARC bands and the General Class portions of the phone band. Suggested frequncies are:
CW - 7030, 14030, 18080, 21030, 24910 and 28030 kHz
SSB - 7085*, 14185/14240, 18140, 21320, 24940 and 28440 kHz
* Listening frequency to be announced!
Their J3 callsigns will be assigned upon arrival, but they are expected to be J3/W1HEO and J3/W5PF. QSL with SASE direct to their respective callbook addresses or via the bureau.

LX, LUXEMBOURG. Philippe, LX2AJ, will be signing with the special callsign LX7I during the CQ WPX SSB Contest as a Single/Op/Single Band 20 meters entry. QSL via LX2AJ: Philippe Lutty, 6A, Sentier de Bricherhof, L-1262 Luxembourg. The log will be on the InterNet after the contest on the Web page: http:dx.qsl.net/logs

QSL INFO AND NEWS.....
NOT THE MANAGER. John, K4BAI, continues to receive requests for 8P5A QSLs, however, he is NOT the QSL Manger for 8P5A. The correct route is Tom, W2SC. There are several on-line databases that STILL show K4BAI as the 8P5A QSL Manager, please correct your databases. However, John, K4BAI, is the QSL Manager for 8P9HR, 8P9HT and 8P9Z.

NOT THE MANAGER. Remember, the QSL Manager for D68C is G3SWH, not G3SXW.

PLEASE NOTE: Bob, N2OO, reports that "ALL QSLS FOR 9M6AAC MUST GO VIA N2OO." There have been reports that G4ZVJ was operating from 9M6AAC and to QSL to his home call. This is WRONG. Please make the note. All QSLs for 9M6AAC will be via N2OO only.

The QSL Manager for CQ1CV is CT1ETE via the bureau or direct to:
P.O.BOX 1026 - 4811-908 GUIMARAES - PORTUGAL

Leo, CX3AL, wants to remind the DX community that 1 USD does not cover the postal rate in Uruguay. The Uruguayan Post Office has raised their rates as of December 2000, and the minimun cost of mailing a letter is 2 USDs. On the other side IRCs are accepted by the Uruguayan mail. So, to cover the postage you have to include at least 2 USDs or 1 IRC.

Babs/DL7AFS and Lot/DJ7ZG now active from the Dominican Republic as HI9/DL7AFS and HI9/DJ7ZG through March 23rd, will have on-line logs available at: http:\\www.qsl.net/dl7afs

The logs from FO/DL5XU (Rangiroa OC-066) and FO/DL1AWI (Marquesas OC-027) operations are now available at the following two Web site: http://dx.qsl.net (N6RT) -or- http://www.radioklub.de/cgcg

Diego Salom, LU8ADX, was active in last week's ARRL Contest as AY8A. He states to QSL via LU8ADX via the Bureau or direct to: Box 373, (1412) Buenos Aires, Argentina. Do NOT use the callbook address.

SPECIAL EVENT (50 YEARS FOR VRZA). Wim Visch, PA3BIZ, Vice President of the VRZA, informs OPDX that "this year the V.R.Z.A. (Dutch Amateur Radio Society) celebrates its 50th aniversary. For this occasion a special award will be issued. To qualify for this award, one needs to contact at least four of the following special stations who will be on the air throughout the year 2001: PI50VRZ/A, PI50CQP/A, PI50V, PI50R, PI50Z and PI50A. Each week the callsigns PI50V, PI50R, PI50Z and PI50A will be assigned to 4 of the 18 clubstations participating in this event and shifting the next week to four other clubstations until the circle is closed going the whole year round. QSL needs to be sent via the regular clubstations callsign i.e. PI4(clubcall) so please ask, if you work a PI50(?), for the clubstations callsign. The stations will be on all bands all modes, also during contests etc.... A log file of the four stations you have heard/worked, signed by two other amateurs, and accompanied by 5 USD or equivalent will be sufficient to apply for the award. Send to the manager: Ben Horsthuis, PA0HOR, Fr. Halsstraat 95, 3781 EV VOORTHUIZEN, The Netherlands."

TX0, CHESTERFIELD ISLANDS (Update). Jacky F2CW/ZK3CW, Dany F5CW/FK8VHY and two others operators will leave Noumea on April 24th and hope to arrive at Chesterfield on April 27th. They leave Chesterfield on May 2nd to head back to Noumea on May 6th. They hope to have 3 stations active for operating on 160-6 meters. They have requsted the callsigns TX0C or TX5C.

TX5, NEW CALEDONIA. Look for FK8GM and FK8HC to sign with the callsign TX5G during the CQ WPX Contest.

VP5, TURKS & CAICOS ISLANDS. Dave/W5AO, along with husband/wife team Connie/K5CM and Pam/N5KW, will operate from the VP5B station on North Cacios Island from March 21st through April 5th. Each operator will sign out the contest VP5/homecall. They will operate 160-6 meters SSB/CW and will be active during the CQ WPX SSB Contest as VP5V. QSL cards for VP5/K5CM and VP5/N5KW go to their home address and for VP5/W5AO and VP5V, QSL to Box 88, Morris, OK 74445-088.

VP6, PITCAIRN (Possible New One?). The "Les Novelles DX" is reporting that Jacky, F2CW/ZL3CW, who was recently active as FK/F2CW and TX5CW from Noumea, will be traveling with Kan, JA1BK, and has left for Tahiti and Pitcairn. Over the past weekend, QSNs show that VP6BK and VP6CW were active on CW on 40 meters and the WARC bands. ADDED NOTE: Word has it that Kan and Jacky may be on another island close too but far enough away from Pitcairn Island to qualify for a new DXCC entity. Kan suggests/hints this on his Web page at: http://www.iijnet.or.jp/JA1BK (but in Japanese) Many are guessing that the two are on Ducie Island (OC-182) which is 540 KM east of Pitcairn (lat/lon 24.40s/124.40w). The two will be coming back to Noumea at the end of March.

XU, CAMBODIA. XU7ABN has been active on RTTY on 14085 kHz between 1900 and 0000z.

YV, VENEZUELA (IOTA Activity). Dr. Rick, NE8Z, will be in Venezuela from March 26th through April 4th signing YV5/NE8Z from the Caracas area. He will then leave roughly around March 30th through April 2nd, for "Islas Los Roques" (IOTA SA-035) signing YV5/NE8Z. He will only be on 28460 kHz on SSB with his TS-50 and dipole antenna. QSL via NE8Z, Rick Dorsch, Box 616, Hamburg, MI 48139 USA.

ZD7/ZD9, ST. HELENA AND ASCENSION ISLAND. Glyn, GW0ANA, QSL Manager and Team Member for the ZD7/ZD8 DXPedition advises OPDX that all their gear has arrived safely on Ascension Island and is waiting their arrival on the 19th of March. They have be allocated ZD8K for Ascension Island and ZD7K for St. Helena. The team hopes to be active from ZD8 in the CQ WPX Contest. Their Web site has been fully updated and looks very interesting. DXers may want to log on to the neat URL: http://www.dxpedition.co.uk

Thanks for reading this message. I need a good or new power transformer for my
FT-902DM transceiver or a new home for a parts rig. A nice radio with all the filters, DC to DC converter. This is my backup radio. My FT-1000MP has been at
factory since the first of February. Guess I'll get my 807 out of closet!

Dennis, w8nw

Interesting site Stagger Lee.

If other life is "out-there", in our solar system, our world would be poison to them as we have air and not one planet has enough "air" to support life as we know it. Maybe, just maybe, those Martians are underground and have their own air making machines. But that kind of equipment would be detectable here on earth. My own theory is we, that is the human race, were once on Mars and messed it up so badly we sent two Martians, Adam and Eve, to Earth to start the human race over again. Judging by the history of man on Earth we are doing the same thing the "alleged" Martians have done to Mars.....killing it.

Is there life beyond our solar system? Probably. More than likely. My proof? Well I have none. But I am not arrogant enough to believe that we are alone given the unlimited size of outer space.

So why has there been no contact with others? Could be many reasons. They may not know how to contact others or even care too. They may be so far ahead of us that any contact with other worlds would "ruin the education and discovery process of other worlds". (Star Trek rules: No interference of other worlds) Remember discovery is fun and leads to more discovery. That is not to say that these "inelegant" beings have not given their secrets to selected humans in the past and in the present. Just look at the explosion of knowledge and inventions in the last one hundred years one would have to ask: "What caused this incredible explosion of knowledge and inventions?" Or the beings have read some of the news groups on the world wide net and read the idiotic posts from people that are so foul mouthed and stupid the beings believe we could not offer them anything positive that would benefit them.

What do other beings look like? Who knows. But lets look at what science says about us. In recent articles released by NASA scientists on their web site we find that the human race has in their bodies every element found in outer space. Given that information I would tend to believe that other living, thinking, and air or water breathing (water is full of oxygen) beings would look like we do, including the animals and fish of the sea do not the weird far out looking creatures on various space related shows.

Life for us on earth will be exciting if we do not blow it up, pollute it up, or starve it to death. W9FPJ

This is exactly what I'm getting at with the "Mark of the Beast" concept.

We need to persuade Christians that such technology is very similar to the evil that is predicted in Revelations. In fact, it would be ideal for a world dictator such as the Antichrist. Libertarians and Christians (plus a lot of other people) would be against anyone like that.

Altantic Monthy had an article about privacy that
covered this little chip. It makes it possible to track
people anywhere.

03/11/2001 - Sunday - Page B 4
So Much Counting, So Little Time

by Charles Seife. Charles Seife is author of "Zero: The Biography of a Dangerous Idea" and a
staff writer for Science magazine.

U.S. PATENT NUMBER 5,211,129 might be the answer to all the Census Bureau's problems. Thanks to that handy little invention (the "syringe-implantable identification transponder"), a tiny stick with a needle could implant a microchip under your skin-one that chirps "Here I am!" when it receives an electronic signal. That certainly would make counting the population a whole lot easier, if a wee bit creepy.

But Big Brother hasn't grabbed the reins of power just yet, so the bureau can't count us using homing signals from our bodies. Because of this, the bureau is caught in the latest battle over the meaning of numbers. For years, politicians and statisticians have been arguing about whether to adjust the Census results to account for millions of people missed by the count; last week, the bureau formally recommended against it-at least for now.

This is no small matter because democracy is, at its foundation, a system based upon counting votes and counting citizens. If numbers lose their meaning-if nobody can agree how many people live in the United States or how many votes were cast for Al Goreor George W. Bush -then our society is in deep trouble. Luckily scientists are experts in dealing with problems with measurement and counting, and they have methods for dealing with ambiguity. Yet their methods have a price: the possibility of failure.

Silly as it sounds, the latest hubbub is about counting, something that should be as simple as one, two, three. In reality, it's not. Try it yourself: Count the amount of money in a big jar of pennies. Count it again. Do your numbers match? Probably not. Any act of measurement is error-prone. You can accidentally count a penny twice, or leave it out of your count, or lose track of how many you've counted. Any number of things can go wrong, throwing your count off the true value a little bit.

The Census Bureau has the same problem on a massive scale, though it has some powerful tools to help out. The first is brute force. The bureau sends

out questionnaires, but many don't get returned. Then agents knock on doors, finding people who didn't answer the survey. Most people get counted by this method, but surveys and agents can't find everybody. Millions of people escape detection.

In an attempt to correct this inaccuracy, the Census Bureau has been testing out a new tool called "sampling." Instead of relying upon brute force to count every person (and inevitably missing a large number), the sampling method makes a careful study of who returns questionnaires and who doesn't; after the returns come back, that study is used to adjust the raw census figures. In the 2000 Census, the sampling method indicates that the bureau missed about 3 million people with the old unadjusted approach.

Statisticians agree that the sampling method is better (and potentially cheaper) than brute force. The bureau itself believes that its new tool is "more accurate overall," even as it has recommended sticking with the old method for the time being. So why hasn't the bureau embraced sampling yet? Because a third method of counting heads-demographic analysis-has made a mess of things. Demographic analysis is simply an accounting of the number of people who are born in and emigrate to the United States, as well as those who leave or die. If you know all these numbers, you can figure out a population's growth and its size. Though this is likely the least accurate method, demographic analysis indicates that the old approach overcounted the population by 2 million rather than undercounting by 3 million.

The bureau used three different tools to measure the population and got three very different answers. Which one is correct? Scientists encounter this dilemma all the time. Astronomers, for instance, have long been trying to figure out the age of the universe, and different measurement methods-some more accurate than others-give slightly different answers. Over the course of decades, they have been ironing out the kinks in their methods, making better observations and taking careful account of the errors inherent in their measurements. They have come to a broad consensus about the universe's age, and their numbers are agreeing more and more with each refinement.

Unfortunately, the Census Bureau has no time left: Congressional districts must be redrawn. And since a disproportionate number of the undercounts are minorities (and tend to vote Democratic), Republicans oppose the use of sampling while Democrats support it; partisan fights are making the pressure on the Census Bureau much worse. The science of measurement requires time and patience-two resources in scant supply in the world of politics.

This was sadly obvious in November. Counting ballots is easier than counting people, but the election turned on a few hundred votes out of 6 million cast in Florida. The tools we used to count those ballots weren't good enough to give us an unambiguous winner-and in an election that close, it may be that no possible method is good enough.

Scientists occasionally encounter this problem, too; they realize that it's impossible to make the measurement they want. A scientist might well conclude that the Florida election was effectively a tie; our methods of

counting votes failed to tell us who the true winner was. The scientist would then carefully study the sources of error and try to correct for the inaccuracies. Instead, our society was forced to pick among indistinguishable alternatives-to make an arbitrary choice of which numbers to accept and which ones to reject.

Such capriciousness, as any scientist can tell you, is a great way to wreck an experiment. To make sure that the numbers underneath our democracy retain their meaning, we must carefully choose the methods we use to enumerate our population and count their votes and make sure that the tools we use are the most accurate available to us-regardless of how the political winds are blowing.

But at the same time, we must also be able to admit that our measurements are fallible. Preparing an automatic procedure, in advance, for dealing with an ambiguous vote or choosing a census method is the way to prevent ourselves from sacrificing objectivity for the sake of expedience.

After all, objectivity is necessary for any experiment to succeed-even the Great Experiment of democracy.

Post-edit, you fucking IDIOT. If you're going to use terms, at LEAST get the
use of them right, even if you don't know what the fuck they mean. But
anyways, it elicited a shrill, defensive response, which is the goal.

> completely

Admitting to your fuck-up, then??? How nice. But you couldn't read Dr. Seuss
completely, now could you?

>(but then, I seldom read your posts entirely).

Well, you DO have that reading impediment.
It has to do with your oblong, melon-shaped head entrenched up your faggoty
ass on a permanent basis. Did you ever take Steve from COTSE up on his offer
about e-mail attachments?? I didn't think so.

>Still, there's a problem:

Yeah, you're a fucking ill-educated Christian.

> North of Alabama is TN, KY, and IN. Ohio is
>north of a more easterly Southern state.

Ohio is North of Alabama, you fucking idiot. Or is your one-dimensional,
backward and 19th century "thinking" disallowing you any abstract thought?
Typical Christian illiterate. Beleive any dogma the wacko prachers throw
your
way.

> Can you name it? (Hint: Mike's Liquor Store is located there.)

The state where you are known as a deadbeat? Poor Arselicks, married to that
old hag of a hunchback. Maybe you two can hold jobs for once in your lives

as
sideshow freaks.

CIA patching ECHELON shortcomings
By: Thomas C Greene in Washington
Posted: 06/03/2001 at 07:47 GMT

A core objection to paranoid rants regarding the US National Security Agency (NSA) electronic eavesdropping apparatus called ECHELON is the simple observation that spooks trying to use it are literally buried in an avalanche of white noise from which it's quite difficult to extract anything pertinent.

But now the US Central Intelligence Agency (CIA), no doubt with some assistance and guidance from NSA, is making strides towards cracking that little inconvenience.

The CIA's Office of Advanced Information Technology is developing a number of data-mining enhancements to make life easy for those who would eavesdrop on electronic communications, Reuters reports.

First up is a computer program called Oasis, which automatically converts audio signals into conveniently readable, and searchable, text.

And it distinguishes voices, cleverly enough, so that the transcript of an intercepted 'broadcast' (a conference call via mobile phones?) will show each speaker automatically identified as Male 1, Female 1; Male 2, Female 2; and so on.

If the transcript seems implausible at any point, or disappointingly mundane, the operator can easily listen to relevant parts of the broadcast to check the machine's accuracy, and determine that "recognize speech" actually was "wreck a nice beach," and send in the appropriate goon squads to prevent it.

Oasis also references search terms and keywords automatically. Thus text containing the phrase "truck bomb" would pop up in a query for "terror*".

The CIA is planning to develop Oasis for spy-useful foreign languages such as Arabic and Chinese, the wire service says.

Next comes a software tool called FLUENT, which enables an operator to search stored documents in a language s/he doesn't understand by using his or her own language for queries.

So, imagine an uneducated, highly-trained Anglophone with a PhD in some anti-intellectual pseudo-'discipline' like medicine, education, women's studies, engineering, creative writing, economics or computer science, naturally poorly acquainted with languages, but charged with grave national security responsibilities.

Say this person needs to know what the Chinese have been publishing about nuclear warheads.

Salvation: FLUENT allows them to search on "nuclear warhead" in English, and still dredge up Chinese (or whatever) documents for people with actual language skills to translate and evaluate for them. Is that cool or what?

Presently, FLUENT can translate Chinese, Korean, Portuguese, Russian, Serbo-Croatian and Ukrainian, Reuters says.

The omissions are almost as telling as the languages included. What, no Japanese, no Arabic, no Spanish, no Hebrew, no French? Laotian and Navajo we can understand, but what have we here? Laziness, discrimination, or misplaced trust?

You make the call. &#65533;

>===== Original Message From Ghost <jupiter1-no-spam@cotse.com> =====
>See <BITCHSLAP!!!!!!>

You already fucked up, by saying kb8jbo in a previous post. Now, you try a little damage control, hoping nobody will notice.

Brother Falstaff wrote:

This was just faxed from the Birminham Field office:

The Great Pumpkin
Birmingham Post-Herald
October 14, 2000

Police arrested Lloyd A. Davies, a 27 year old white male, resident of Athens, Alabama in the Anderson Pumpkin patch at 11:38pm Friday. Davies will be charged with lewd and lascivious behavior, public indecency, and public intoxication at the Athens Municipal Courthouse Monday. The suspect allegedly stated that as he was passing a pumpkin patch, he decided to stop. "You know, a pumpkin is soft and squishy inside, and there was no one around here for miles. At least I thought there wasn't." he stated in a phone interview from the Athens Municipal Courthouse Jail.
Davies went on to state that he pulled over to the side of the road, picked out a pumpkin that he felt was appropriate to his purposes, cut a hole in it, and proceeded to satisfy his alleged "need". "I guess I was just really into it, you know?" he commented with evident embarrassment. In the process, Torrance apparently failed to notice the Athens Municipal police car approaching and was unaware of his audience until officer Brenda Taylor approached him. "It was an unusual situation, sure." said officer Taylor. "I walked up to (Davies) and he's... just working away at this pumpkin."
Taylor went on to describe what happened when she approached Davies. "I just went up and said, 'Excuse me sir, but do you realize that you are screwing a pumpkin?' He got real surprised as you'd expect, and then looked me straight in the face and said,
'A pumpkin? Damn... is it midnight already?"

Whoa! JBO an officer of the law? I know one or two police officers who would be totally offended by that idea. Certainly you jest.

As to being saved, I have personal knowledge that His Holiness, Raoul Xemblinosky attempted to lay hands on JBO and lead him to Jesus. The attempt quickly became an obvious failure, because JBO attempted to hump Raoul's leg, taken as he was by the spirit of Satan and by his own lust. Raoul was saddened by the fact that he had to use force to rid himself of JBO, and reluctantly used his stun gun on JBO's tender parts to effect a disengagement.

Well, we all know how that kind of thing turns out from our own experience: Resentment simmers just under the surface, and you never can establish a real relationship after that. Once somebody has applied 20,000 volts to your balls, you just never feel the same way about them. It takes something out of you.

That's also why Roger hates the Eveready Battery Company.

I was listening to the Liberty Net (AKA W1WCR) Friday night about 10:30
11:00 and there was this distinctive carrier on frequency. It sounded
like the same carrier we get on 3.901. Was Dimmy jamming the Liberty
Net? Is the word getting out and NOT EVEN THE LIBERTY NET will have him.
Poor Dimmy I'll be glad when the feds NAIL HIM!

It was a joke, Jeff. There isn't a meter, and my message wasn't a flame.
And I certainly wasn't seeking "credibility" with nonsense such as this.

As for the fake meter, it isn't an on/off meter (on for troll, off for no
troll). It is a meter that rates a troll on a scale from one to ten. Since
this troll was so obvious, it simply doesn't rate very high as a troll in my

opinion.

However, since you control your own fake meter, you're free to rate the troll how you want. And I assure you that I will not hold your troll rating against you. [insert big grin here]

Mark of the Beast? I doubt it.

Christian mythology aside, I see the potential for bad happenings with personal tracking devices.

I wonder if these chips can survive a period of time near a magnetic field? It seems to me that for every advance in the field of governmental snooping there must be a defensive technique available.

Strider

To make schemes of this type totally useless it is only necessary to
render enough of the data suspect to make all of the data suspect.
This could be less than half, perhaps about 25%. Once you know that at
least 25% of the data is worthless or possibly worthless then you
might as well toss out the whole data set. You'll never know which 25%
is the worthless part.

When filling in forms transpose numbers, misspell, and make various
other errors. When they try to link various databases together they'll
end up with lots of extra people that don't exist and/or liberal
errors for those that do.

When they come out with these tracking devices we can just make lots
of extra transmitters that put out the same or similar signals,
introducing copious errors into the mix and rendering any significant
information suspect at best.

It's only a matter of time until they track you using DNA and then
we'll have a black market in tissue samples from other people.

I wonder if there is a law in Georgia that stops people from showing GROSS stuff in public theaters

I don't think so. They have to be for the First Amendment (it protects their freedom of religion). They aren't into invading other people's privacy, although a few annoying ones think anyone who doesn't believe exactly as they do is going to hell. Well, it's a free country...

> As for the "One World Government" (NOT the UN, btw ... more
> like commercial interests),

The UN, which is trying to do things like ban private ownership of firearms worldwide.
The villains in the "Left Behind" Christian movies are part of ONE (One Nation Earth). I can think of a ONE Flag: it's blue and it has a picture of a globe with olive branches on either side...

We have to convince everyone that Big Brother is evil. If we can persuade the Fundamentalists that Big Brother and the Antichrist are likely to be the same person, and do similar things...

The Fundamentalists already vote mostly Republican, but we have to drive the Million Mom March OUT of their churches (gun control), which unfortunately are giving aid and comfort (meeting facilities) to these scum.

I doubt that a Zapper would do them any good. But I would most likely
want to use it first on anyone who had ideas about giving me one of
those little goodies.

Watch them start out by convincing people their children will be safer
if they are tagged and can be tracked anywhere in case they ever get
lost or abducted.

The human body tends to reject living tissue that it recognizes as
foreign. Things like hip replacements, insulin pumps and pacemakers
don't get rejected. The average human body will hardly even notice this
thing.

Cellphones drowning out police radios
Mobile communications explosion interferes
with signals -- and the results can be deadly
By Paul Davidson
USA TODAY

Cell towers cause 'dead spots' in police-fire radio coverageWASHINGTON --
''One Adam 12.''

''Car 54, where are you?''

The police radios that popularized those refrains on TV cop shows worked as reliably as quartz watches. In the real world, such dependability can be a matter of life and death.

''That's your lifeline; that's just a given,'' says Kansas City, Mo., detective Robert Blehm, who took that popular image to heart.

But as Blehm and his partner, Derek McCollum, ran after a drug dealer at 4 in the morning on Sept. 18, 1996, they got dead air when they tried to call for backup on their new handheld radios.

As they cornered the suspect, he shot them both. Blehm -- lying in the street, blood gushing from his shattered right leg -- tried calling again. Again nothing.

Finally, McCollum, shot in the chest but still able to move, stumbled up the street until he found a clear signal and summoned help.

The shooting victims were also victims of progress. The once-dependable police radio is literally being drowned out by a torrent of information-age services, such as wireless phones and instant messaging, that have made mobile communications available to millions of Americans. Even as police, fire and emergency medical services upgrade to pricey new radio systems, dozens of agencies -- including those in Seattle; Portland, Ore.; Denver; and Miami -- face increasing interference from more powerful commercial wireless services.

''This is a very big problem, and it's going to get worse'' as cellular's customer base grows, says Ron Haraseth of the Association of Public-Safety Communications Officials.

In Tigard, Ore., recently, police twice were unable to radio for backup while facing armed suspects because of cellphone interference. Part of the problem is the fact that Kansas City's police force and others, beset by

tight budgets and poor planning, have been unable or unwilling to build sufficient infrastructure to support their new, but more terrain-sensitive systems. And many agencies simply find their new, feature-rich radios tougher to use and more prone to breakdown.

In the 1960s and 1970s, ''there weren't as many users, and systems were simpler,'' says Chuck Jackson of Motorola, the top maker of emergency-service radios. ''There was a microphone and a speaker, and you talked over it.''

Some officials blame the Federal Communications Commission, which supervises the airwaves, for not doing more to head off the current traffic jam. And experts say the FCC's plan to divvy up a new band of radio spectrum -- ostensibly to fix the problems -- may just replicate current congestion.

FCC critics, moreover, say that the agency, under pressure to wring as many billions of dollars as possible from auctioning airwaves to commercial carriers, gives second-class consideration to public-safety agencies that get the spectrum for free. The FCC says it balances both interests.

However the blame is shared, the bottom line at street level is that the ongoing glitches have caused an untold number of close calls, at least a few injuries and may have contributed to the death of a police officer.

''It could mean life or death to police officers, firefighters and even citizens who are not able to get prompt emergency service,'' says Harlin McEwen, a retired police chief who handles telecommunications issues for the International Association of Chiefs of Police.

Public-safety radios traditionally worked in the relatively uncrowded 400-megahertz frequency band and lower. Interference was rare and came from taxis and other services on nearby channels, whose conversations were brief.

But as metro populations swelled, police, fire and medical agencies lacked enough channels to handle growth in their own ranks. The sprawl also complicated another concern: Departments typically cannot communicate by radio with neighboring agencies whose equipment works on different frequency bands. This still is a nationwide problem during major fires and other disasters involving multiple jurisdictions.

To fix both problems, a growing number of agencies across the USA the past decade have been upgrading to new equipment that works in the 800-megahertz band, which has more capacity and allows more features. And neighboring communities often move there in tandem, so they can communicate with each other.

Fix breeds new problems

But that slice of spectrum is the same space occupied by the exploding wireless industry. And it brings its own headaches:

* Wireless interference. Much of the commercial interference with public-safety radios comes from cellphones. And, for historical reasons, the cellphone company causing the most problems is Nextel Communications.

Until recent years, Nextel operated a mobile radio service for taxis, truckers and others. In the 1970s, the FCC interlaced Nextel's channels with those of other mobile radio services, including public safety. It did so because it thought each organization's channels were more vulnerable to interference from its other channels than from someone else's channels.

It's not clear whether this belief was correct -- the FCC had few resources for testing back then. But the legacy is that in each market, dozens of police and fire channels abut Nextel channels. For years, the layout caused few problems because both Nextel and public-safety agencies used a radio system design: a handful of towers on hilltops beaming wide-area signals.

Cellphones create coverage gaps

But in the mid-1990s, Nextel morphed into a national cellular phone company, which required it to dot cities with dozens more towers. The result is that its transmissions now can overwhelm relatively weak public-safety systems on nearby channels and create coverage gaps that can reach a mile, especially near cell towers.

Other wireless phone providers, such as AT&T and Cingular Wireless, also cause interference. But because their channels were granted in separate blocks, they wreak havoc only where they meet public safety's block. ''In almost every region of the country we're hearing complaints,'' says Mike Hunter, president of engineering firm RCC Consultants.

In Anne Arundel County, Md., police officers are plagued by eight ''dead spots'' where Nextel and Cingular have towers. The problem came to a head last year when an officer stopped a speeding car and could not reach dispatch. As he wrote out a ticket, another officer stopped to warn him that the driver was a shooting suspect.

''It was getting to where officers, who are pretty courageous, were starting to get very uncomfortable,'' says Anne Arundel Police Chief P. Thomas Shanahan. The county recently agreed to buy a new $15 million radio system.

In Phoenix, Nextel transmitters hamper the police radio data system, which does background checks during traffic stops. ''Certainly people guilty of crimes have been let go because the officer couldn't get through,'' says radio manager Melvin Weimeister.

In Portland, Ore., Nextel's system -- which has 80 towers in the area vs. the county's 14 -- ''is like the biker gang that moved next door, banging and raising hell,'' says Joel Harrington, who handles city communications there. Officials are considering a more robust $50 million radio network, he says.

Most of the time, the interference means hassles rather than disaster: Officers must travel farther to get a signal, carry cellphones and bring backup when entering static-prone areas. And Nextel, officials say, has been a good neighbor, agreeing to switch channels, reduce transmitter power and sometimes even move towers.

''We take reports of interference with public safety very seriously,'' says Larry Kervor, Nextel's vice president of government affairs. But the company, he says, is ''fully in compliance with the FCC.''

The FCC, in turn, says that years ago it simply did not anticipate Nextel's cellular service.

Remedial measures are of limited value, says Tom Eckels, an engineer with consultancy Hatfield & Dawson. A long-term solution would be to move Nextel and public-safety channels into separate blocks. But it would take huge sums to reprogram equipment. Many towns couldn't afford it.

Portland and other cities are considering moving to the 700-megahertz band to be vacated by UHF television stations as they switch to digital broadcasting. But radio equipment for that band won't be ready until mid-2002.

And some experts contend that the FCC's new plan for that band will make it just as crowded. The agency first designed the 700 band with public safety in its own block and more space between that block and other wireless carriers. But the FCC revised the plan last year, and critics say it now allows carriers to operate powerful transmission towers in channels that are too close to public safety.

''It's a significant concern,'' says Steve Sharkey of Motorola, which asked the FCC to reconsider. The FCC turned it down, saying interference should not be a problem.

McEwen of the police chiefs group charges, ''The FCC changed the rules to get more money from auctions, but they're putting public safety at risk.''

Tom Sugrue, chief of the FCC's wireless bureau, replies, ''That's just wrong.'' He notes that ''radio spectrum is a limited resource that everyone wants'' and that the FCC must balance competing needs.

* Need for more towers. Although radio signals in the 800-megahertz band are clearer, they typically don't dance around hills, trees and buildings as deftly as their predecessors. They also have more trouble penetrating big new, reflective-glass buildings.

The solution is to build a bigger network. But budget-conscious cities often don't realize or want to accept that upgrading to 800 megahertz requires adding many more towers than their older systems needed, RCC's Hunter says.

In Kansas City, officials decided: ''This is how much we want to spend, and this'll do,'' says Bob Lawrey, communications manager for city police.

The city recently had to enhance its new 800-megahertz, $18 million system with $10 million worth of additional antennas.

''I was pretty upset that they expected us to do this job, and they gave us substandard equipment,'' says Blehm, 29, the wounded officer who has settled a lawsuit against his assailant, the city, the city's radio consultant (SFA) and the maker of the radios (Ericcson).

Assistant City Manager Rich Noll said officials thought the original network would be sufficient.

Orange County, Calif., installed an $80 million radio system last year. But the system design did not adequately account for the area's maze of malls, apartments and offices.

Recently, as a SWAT team searched for a suspect in an Irvine office building, Orange County officers could not radio colleagues outside to let them know the team was coming through the door. The county is now debating more antennas.

In Delaware, firefighters often resort to blaring sirens to let colleagues know that a blaze is spreading or a floor is caving in. That's because Delaware's new $52 million, statewide radio system doesn't work in five communities, including tourist hotbed Rehoboth Beach, or in large buildings. Motorola has agreed to add signal boosters at no cost, and the state will spend $10 million to improve performance inside buildings.

Police officer shot to death

Problems turned tragic in Atlanta. In 1997, as two officers responded to a domestic dispute, the man became aggressive. Officer Patricia Cocciolone says she tried to call for help, but her radio didn't work. The man emerged with a rifle and critically injured Cocciolone. He killed her partner, John Sowa.

Chip Warren, vice president of the police union, says the city has balked at spending to add antennas to its $39 million, 6-year-old system. ''This is putting troops' lives in danger.''

Atlanta Police Maj. Bill Gordon says the problem is not widespread and says Cocciolone's radio worked, contrary to her testimony and media reports.

Experts also note that every radio system has dead spots: buildings, low spots and other nooks where signals will not reach. Says Eckels of Hatfield & Dawson: ''Nobody ever can afford to build the perfect radio system.''

* More complicated equipment. New 800-megahertz radios sport fancy features, such as emergency buttons to alert dispatchers to trouble and automatic scanning for an open channel.

But some officers have had trouble using them. Before, they searched for open channels themselves, listening to colleagues' conversations as they scanned. Now, if the airwaves are busy, they hear a beep and must wait for a channel. ''We've had officers frustrated during a shooting because they get a tone,'' says Portland Assistant Police Chief Bruce Prunk.

A Kansas City dispatcher, bewildered by a new 60-channel radio, responded on the wrong channel to firefighters calling for hoses, forcing them to jump out a first-floor window to escape a blaze.

Though time and training should ease many of these concerns, the feature-packed new radio systems are also more glitch-prone.

''The systems are full of controllers and microprocessors and software,''
Hunter says. ''There's a lot more to go wrong.''

Bad things can happen if agencies can't talk
By Paul Davidson
USA TODAY

WASHINGTON -- Many public-safety agencies around the country cannot communicate on their radios with agencies in neighboring jurisdictions because they use incompatible equipment -- a gap that could lead to tragedy.

Sometimes even police and fire agencies in the same town can't communicate.

The problem is underscored during major fires, car chases and other incidents that draw response from several communities. ''No one should lose his or her life because we cannot communicate,'' says Derek Siegle, an FBI manager and member of the Public Safety Wireless network, an ad hoc group working on the problem.

Examples of miscommunication:

* During rescue efforts after the 1995 Oklahoma City bombing, local police, suspecting there might be a second bomb in the tattered building, ordered everyone to evacuate. State, federal and local fire officials did not get the message for several minutes -- until they were told in person. Fortunately, there was no bomb.

* After an Air Florida jet plunged into the Potomac River in 1982, Arlington, Va., fire and rescue workers sped to the scene, then tried in vain to call for help from Washington, D.C., counterparts.

* During a 1999 fire that destroyed a row of shops in Ellicott City, Md., local fire officials could not talk to counterparts from neighboring counties. Runners had to relay messages from firefighters at the front of the building to those in back. ''It makes it really hard to do business,'' says former Howard County fire chief Jim Heller.

The heart of the problem: Analog radio systems built for specific frequency bands, such as 400 megahertz, can't connect with radios on other bands. And digital systems from different manufacturers generally cannot talk to others at all because they are based on different digital standards.

Help may be coming. Some neighboring agencies have bought new 800-megahertz radios together to be compatible.

And the Federal Communications Commission recently set aside channels in the planned 700-megahertz band for communication between agencies. The FCC is requiring makers of digital equipment for that band to use a common standard

and also to make radios able to communicate with late-model analog equipment.

Meanwhile, emergency officials make do by sharing radios, carrying cellular phones, patching calls through dispatchers using phone lines and setting up makeshift command centers at the scene. ''You do whatever you have to do at that moment in time,'' Heller says.

Soon, everone will have stylish "face pieces" that attach with
adhesive or are attached to eyeglass-type frames. You could probably
just paint your face solid black or white and the camera wouldn't
register it as a face. How about a fake nose with a spinning propeller
on it - just for fun...

Secure police communication protested
Digital radio systems shut out helpful public

By Karen Balsley
The Journal Gazette
Don Stilwell once helped police catch a criminal.

While driving on DeWald Street and listening to his portable police scanner a few years ago, he heard officers receive a call of a burglary at a nearby house.

Stilwell drove by the house, heard an engine start up, and jotted down the license plate number of what turned out to be the crook's car.

Stilwell, a Fort Wayne resident, would never have known the crime was taking place had it not been for his scanner.

His crime-fighting days, however, might soon be over.

With a new digital 800 megahertz system developed by Motorola slated to be in place locally by late fall, the public will no longer be able to listen to police, fire, and other agencies' transmissions in Fort Wayne and Allen County.

The Society of Professional Journalists, a national organization that works to protect First Amendment guarantees of freedom of speech and press, believes this kind of radio communication system "impedes the public's right to know and the media's role as a watchdog of the government."

There is no state statute, however, that says the public has the right to listen to radio traffic of government agencies.

No store-bought scanner invented to date is capable of picking up digital communication traffic. Only the radios designed for a specific agency's system can be used to listen in on police, fire and other emergency traffic using digital technology.

Local officials have pledged to cooperate with local media and allow them to purchase police radios - which cost several thousand dollars each.

Having lived in a household with a scanner since he was a teen-ager, Stilwell views the act of keeping tuned into police and fire radio traffic less as a hobby than as a call of duty.

"The police department can't do everything by itself," he said. "Without the public's help, a lot of things aren't going to be solved."

Digital vs. analog

Fort Wayne and Allen County's communications centers now use what are called analog systems. That means voices are transmitted over the airwaves, where they can be picked up by any radio or scanner in the area programmed to pick up the right frequencies.

The new system planned for the area uses digital technology. It will also use airwaves to transmit information, but instead of sending out actual voices, a computer inside a radio or the dispatch center first turns voices into streams of data. The encrypted data are reconstructed in the form of the speaker's voice when they are received by the computer in the listener's radio.

When that data is picked up by scanners or radios that are not part of an agency's communications system, a high-pitched squeal will be heard rather than voices, said Chief Deputy Mike Bedwell, director of Fort Wayne communications.

Fort Wayne and Allen County operate off two dispatch centers and have been working for years to develop a joint communication system. While the two will remain separate, county and city workers will have the ability under the new system to communicate directly to one another via hand held radios. Currently, a county officer who wants to get a message to a city officer must contact county dispatchers, who then telephone the city dispatchers, who in turn relay the message to the city officer over the radio.

The digital system can also be expected to improve sound quality and eliminate a lot of background noise and static, Bedwell said.

The state is working on developing a similar system that would allow such communication between agencies at local, county, and state levels. Meanwhile, Allen County and Fort Wayne will be keeping some of its analog equipment for use of non-emergency agencies, such as the street department, and use it to communicate with other counties, Bedwell said.

Digital communication technology is the way of the future, according to Bedwell. Across the country, including in some counties in Ohio, government agencies are replacing analog systems with digital systems.

A number of local officials say they are not necessarily in favor of preventing the public from listening in on police and fire radio transmissions, though they admit that doing so has its benefits.

"For the most part, the people who listen to scanners are supportive of police; they're our best friends," Allen County Sheriff Jim Herman said. "I have no problem with people having scanners, and I'd be happy to have them listen."

Shutting out the public

There is an ongoing debate as to whether private radio transmissions among government agencies is beneficial or detrimental.

A closed system, some officials argue, would prevent crime suspects from hearing law enforcement tactics first-hand. Others say closed systems prevent curious onlookers from cluttering up a crime or accident scene and impeding police, fire or other emergency personnel in doing their job.

Digital systems are encrypted by nature, but law enforcement officials nationwide have expressed concern over communications systems that criminals can easily hear, said Keith Kemmerline, assistant architect with Motorola. The company kept those concerns in mind when designing its newest system, he said.

An example of that safety concern was shown by seven men who broke out of the John B. Connally prison south of San Antonio on Dec. 13. Two days after their escape, two of them robbed a Radio Shack near Houston, taking, among other items, a number of police scanners.

On Christmas Eve, all seven allegedly robbed a sporting-goods store near Dallas, killing one officer. They then eluded officials for several more weeks.

Proponents of an open communication system, however, say the media and the tax-paying public have the right to monitor government agencies and argue that law enforcement agencies already have the ability to transmit confidential information.

The Society of Professional Journalists' Cincinnati's Pro chapter issued a letter to government officials of Clermont County, Ohio, protesting implementation of a $12 million, 800 megahertz radio system.

"Scanner traffic can alert the media to situations as routine as a traffic accident to as serious as a manhunt for a killer," wrote Tim Bonfield, president of the Cincinnati Pro chapter.

"We believe most police organizations already have the ability to quietly communicate sensitive or tactical information. We challenge law enforcement agencies in Clermont County and others that may be considering similar policies to demonstrate how public scanners have impeded law enforcement and to justify why these concerns would outweigh the long-established public interest in maintaining openness in government activities."

Fort Wayne police have had digital capabilities since 1998 in the form of laptop computers in their squad cars, Bedwell said. Dispatchers can also make voice channels private in emergency situations, he said.

Steve Key, a counsel for governmental affairs with the Indiana State Press Association, pointed out that there is no law stating that government agencies must allow the public access to its radio frequencies.

"SPJ's point is the public's ability to monitor the normal radio traffic allows them to keep up on the efficiency of law, fire, and emergency services," Key said. "By cutting off that ability to monitor, it makes it more difficult for the public and media to make intelligent determinations on how the police (and other agencies) are doing."

`A market for it'

While Allen and Clermont counties have vowed to provide media with access to encrypted communications that the public will not have, the Society of Professional Journalists argues that many media organizations, student journalists, photographers and free-lancers will not be able to afford the new equipment.

Radios like those used by the Fort Wayne Police Department, which Bedwell has been working to secure for the purchase of local media, cost about $3,000 each.

Herman agrees with Stilwell and other scanner enthusiasts that the public can serve as a watchful eye for the authorities.

Herman said there have been cases in which a vehicle being sought by officers has gone by the home of someone listening to a scanner and that listener has been able to help officers pinpoint where the vehicle had gone.

Many times, however, citizens with good intentions can lead officers to the wrong car or in the wrong direction, thinking they've spotted a suspect, Herman said.

Dave Diehl, a reserve officer for the Angola Police Department and a former Angola firefighter, supports the idea of a closed communication system and would like to see Steuben County make the move to digital technology.

"The digital system provides more of a secure method of transmission, and you don't get the onlookers at an accident scene when it's close to their home," Diehl said. "It takes four minutes to clutter up a fire scene on a quiet country road with spectators who heard it all on their scanner, making it dangerous for fire personnel to cross a road and get water to the scene.

"On the same token, (with a closed system) officer safety is not compromised when serving warrants because the `bad guy' has no idea that you just surrounded his house."

However, Diehl, who also works for a Radio Shack in Angola, added that the public would lose out on hearing what roads might be closed and about what havoc the weather may wreak. He said the store sells about four or five scanners a week, and sales tend to go up around tornado season or whenever bad weather hits.

While digital scanners will not be available when the digital system comes to Allen County, many believe they will be someday.

"I'm sure with the technology, someone will find a way to get around it," Stilwell said.

Kemmerline, Motorola's assistant systems architect, agrees, guessing such scanners could be available in less than 10 years. If and when that technology develops, he said, Motorola will look into providing software that would keep criminals from being able to listen.

He did not forecast much resistance on Motorola's part in continuing to keep the general public from hearing digital radio traffic.

"Someday, they will invent digital scanners," he said. "I don't see why not. There would be a market for it."

Recently my fuel gauge on the car has been sticking.
I think that there is some moisture in the pivot or spring that is freezing
and producing this effect.
Do you know of a way of freeing it without removing the dashboard?

Hi! I'm new to this hobby, currently studying for my Technician exam. Enjoying it so far, so am thinking ahead to the next step. Was wondering what people think is the best way to learn morse code. Is there a preferred tape/CD, software program, or what? Is 3-4 weeks a reasonable timeframe to be ready for the 5wpm test, or am I being too ambitious?

Thanks!

-Ken

First download Morse Academy from http://ah0a.org. It is a well-respected piece of software in use for eons.

The one and only code test is given with characters sent at 13-16 wpm but spaced down for five.
If you use the Farnsworth approach and add two characters a day to your repertoire your time estimate is right on the money.

Pay some attention to background details. Buy a set of cheap headphones from Walmart to keep all around you from berating you about the head and shoulders with large cudgels. Assume a comfortable position: Morse should not be associated with neck pains and tension headaches. Handwrite on unlined paper; VEs do not give neatness awards.

Even tho the exam is plain text requiring eight content questions or 25 consecutive out of the 125 characters, you are better off copying random groups. This is because you learn each letter equally where text, as every Wheelie knows, uses Ts and Es etc more than others. A lot of exams are weighted toward low-frequency characters.

Code is not a respecter of age or intelligence, merely time and attitude. To this extent it may be unlike anything you have done. Progress comes in fits and starts. Some day the fog lifts and off you go.

Feel free to rattle my e mail if you wish

Dick N&#65533;BK

The digital scanner may come but it would be useless if the transmissions
are encrypted. IF you do not have the key then you do NOT hear the
communication, digital scanner or not.

For that reason, I doubt it would be wroth making a digital scanner, who
would buy it?

Encryption is here an unbreakable, live with it, no choice anyhow.

BY UNBREAKABLE I MEAN THAT BY THE TIME YOU FIND THE KEY IT IS USELESS SINCE
THE INFORMATION IS TOO OLD OR THE KEY HAS CHANGED.

Good looking girls aren't important?

I've never been happy about unsecured radios. If I want everybody in town
to know where I'm going, I'll use the PA.

There is the possibility of "underground" clinics that remove the tracking
device for a price.

Ken,
No matter how you learn, tape, on-air, CD, or what ever, the
key to learning CW is practice. No 'magic' tricks, just plain
old 'practice'. Any one can learn 5WPM Morse code in 3-4 weeks.
'Doc

More likely it's the "sending unit" located in the tank.
Overfilling-"topping off"- the tank excessively can cause this.
Sometimes it has to be replaced to correct the problem.

Dick

Government agencies are OUR agencies and they represent us.
We have a right to monitor their activities as a part of their representing us and our wishes.
They work for us, not the other way around. Well in an ideal world that is.
In reality they consider the whole nation works for them, the elite goverment employees.

The only time everyone in town would know where you are going is if you get pulled over by the police
and was caught for a crime.
I think we all have a right to the personnal issues reguarding criminals. They apparently have no problem
committing crimes against us which can be very personnal, like breaking into people's houses, rape or murder.
Even if you get a speeding ticket and you have warrants for crimes, we should have the right to know exactly
what kind of joker you are for not only being dangerous with your own life but possibly jeopardizing ours or our
security.

First ,you find out what CPU the radio's are using, then reverse engineer the code.
That would give the exact encryption/decryption format which would make it much easier
to resolve the encryption key based on pattern analysis.
Then you build a cheap digital scanner and publish the keys in a monthly database format.

> Government agencies are OUR agencies and they represent us.

Yes sir, you are right there.

> We have a right to monitor their activities as a part of their
representing us and our wishes.

Why do you assume this is a right? Where is this right you speak of? Where
does it say you have the right to eavesdrop on an ongoing investigation?

> They work for us, not the other way around. Well in an ideal world that
is.

Actually they represent you not work for you. You can't hire and fire them
you can only elect them. BIG difference.

> In reality they consider the whole nation works for them, the elite
goverment employees.

No in reality the electorate gives them their power and can take it away
through voting. BTW who is "they"? Do you feel it is so somple that "they"
are all the same due to being a government employee?

After decades of experiencing "dead zones", garbled
transmissions and static, it would have been wonderful to have had
digital communications when I was on active duty.
I don't see what all the fuss is. Radios capable of
decyphering the transmissions will be available from the police
department, according to the article.

> Regards,

You didn't miss much. Here in LA, digital hasn't really lived up to it's promise. That's evident by the number of dual signal phones that are now on the market. They work with both digital and analog, so at least sometimes you can actually use the damn thing. PCS was just pathetic.

It seems that digital works great when you get a solid signal, just like analog. But when your surrounded by large buildings, hills, or a lot of electronics, you can lose just a tiny portion of the signal. With analog, you hear hissing and static. With digital, you don't hear squat, or the sound breaks in and out, so you lose half the conversation.

Chronic alcoholic like his illegal alien daddy "His Hermmaphroditess, Raoul Xemblinosky" <drunkard@bungmunch.net> gibbered:
>
>KPACHOE TEPPOP

From the State where drunk driving is considered a
sport, comes a true story from MA.
Recently a routine police patrol parked outside a
local Neighborhood tavern. Late in the evening the
officer noticed a man leaving the bar so intoxicated
that he could barely walk.

Raoul stumbled around the parking lot for a few
minutes,with the officer quietly observing. After what
seemed an eternity and trying his keys on five vehicles,
the mangled dwarf managed to find his car which he fell into.
He was there for a few minutes as a number of other
